AGENCY: Environmental Protection Agency.

ACTION: Notice of reproposal and proposal.

SUMMARY: On February 4, 1986, the Environmental Protection Agency proposed rules at 51 FR 4458 that would have required States to develop sludge management programs to assure that the use and disposal of sludge complies with the Federal sludge use and disposal standards. The February 4, 1986 proposed rule provided requirements for approvable State sludge management programs, for their submission, and for their review and approval by EPA. The regulatory program was designed to ensure the environmentally sound use and disposal of sewage sludge and assure that the Federal standards for sludge use and disposal promulgated under section 405(d) would be met.

On February 4, 1987, Congress passed the Water Quality Act of 1987 amending the Clean Water Act, which included significant changes to the sludge management provisions of section 405. In today's action the Agency is reproposing State sludge program requirements to include the additional requirements and directions established in the amendments. Today's notice also contains proposed revisions to the National Pollutant Discharge Elimination System (NPDES) permit requirements and procedures (Parts 122, 123, and 124) to incorporate sludge permitting and State program requirements.

DATE: Comments must be received on or before May 9, 1988.

ADDRESSES: Comments should be addressed to Debora Clovis, Permits Division (EN-336), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. The supporting information and all comments on this proposal will be available for inspection and copying at the EPA Public Information Reference Unit, Room 2402. The EPA public information regulation (40 CFR Part 2) provides that a reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Martha Kirkpatrick, Permits Division (EN-336), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 475-9529.

I. Background

Implementation of the Clean Water Act (CWA) has resulted in increased treatment of wastewater before discharge to surface waters and the generation of large quantities of residual sewage sludge as a by-product of wastewater treatment. Thus, the proper management of sewage sludge is becoming increasingly important as efforts to remove pollutants from wastewater have become more effective. In the United States, the quantity of municipal sewage sludge has almost doubled since the enactment of the Clean Water Act in 1972. Municipalities currently generate over 7.6 million dry metric tons of wastewater sludge per year, or approximately 32 kilograms per person per year. In addition, greater focus on surface water toxics control, as well as Resource Conservation and Recovery Act (RCRA) provisions such as the ban on land disposal of certain hazardous wastes (section 3004(d)) and the exclusion of discharges into municipal sewers from RCRA requirements (section 1004(27)), may result in increased volumes of toxic and hazardous pollutants that reach publicly owned treatment works (POTWs) and may adversely affect sludge quality.

Improper sludge management could lead to significant environmental degradation of land and air, and failure to dispose of sludge properly could have serious impacts on groundwater and wetlands, as well as human health impacts. Sludge management and the many different sludge disposal practices are linked to air, solid waste, ocean dumping, wetlands protection and pretreatment programs. Poor landfill and land application practices, as well as failure to ensure appropriate sludge quality, could result in sludge contaminants reaching groundwater and vulnerable wetlands areas. Concern for air quality and oceans necessitates proper controls over sludge incineration and ocean disposal practices. The interrelationship among these media requires a tightly constructed, comprehensive approach that closes environmental loopholes and assures that solving problems in one media will not create problems for another. In addition, the beneficial use of sludge as a soil conditioner and fertilizer cannot continue to increase if sludge quality is poor.

Prior to the enactment of the Water Quality Act of 1987, the federal authorities and regulations related to the use and disposal of sewage sludge were fragmented and did not provide States and municipalities with comprehensive guidelines on which to base sludge management decisions. Section 405 of the Clean Water Act required the development of sludge standards by December 1978, but did not specify how the standards were to be implemented. Standards developed pursuant to section 405 have been promulgated for cadmium, PCBs, and pathogens only (40 CFR Part 257). In addition, sludge is regulated under a number of other programs, such as new source performance standards and national emissions standards for hazardous air pollutants under the Clean Air Act, requirements for solid waste landfills under Subtitle D of the Resource Conservation and Recovery Act, (and Subtitle C if the sludge is hazardous) ocean dumping requirements under the Marine Protection, Research and Sanctuaries Act (MPRSA), and PCB controls under the Toxic Substances Control Act. These regulations often use different methodologies and approaches to sludge management.

Concerns about the potential environmental problems created by improper sewage sludge use and disposal and the lack of a comprehensive legislative framework governing sludge management led to the establishment of an intra-Agency Sludge Task Force (STF) by EPA in early 1982 to study and make recommendations for

Agency actions in the sludge management area. The STF, with representatives from EPA's Offices of Water, Air and Solid Waste, approached sludge management from a multi-media perspective. The STF developed the Agency "Policy on Municipal Sludge Management" (49 FR 24358, June 12, 1984). The purpose of the policy was to establish a consistent role in sludge management across all environmental media and all management practices and to establish the federal regulatory role in sludge management in the context of the role expected of both State and local governments.

The STF Policy established several important principles which continue to guide the Agency's approach to sludge management. It states, in part:

> The U.S. Environmental Protection Agency (EPA) will actively promote those municipal sludge management practices that provide for the beneficial use of sludge while maintaining or improving environmental quality and protecting public health. To implement this policy, EPA will continue to issue regulations that protect public health and other environmental values. The Agency will use all available authorities to ensure that States establish and maintain programs to ensure that local governments utilize sludge management techniques that are consistent with Federal and State regulations and guidelines. Local communities will remain responsible for choosing among alternative programs, for planning, constructing and operating facilities to meet their needs, and for ensuring the continuing availability of adequate and acceptable disposal or use capacity.

49 FR 24056.

II. February 4, 1986 Proposed Rule

On February 4, 1986, EPA proposed State Sewage Sludge Management Program Regulations (51 FR 4458). These proposed rules would have required States to develop sludge management programs to assure that the use and disposal of sewage sludge complies with the federal sludge use and disposal standards (the Part 503 technical standards) promulgated under section 405 of the Clean Water Act. These regulations were proposed pursuant to recommendations of the Agency's Sludge Task Force, which concluded that the best approach for sludge management would be to require each State to prepare a program to implement the sludge standards, which would then be reviewed for sufficiency by EPA. The regulations were proposed under the legal authorities of the Clean Water Act, the Resource Conservation and Recovery Act, the Clean Air Act, the Toxic Substances Control Act, and the Marine Protection, Research and Sanctuaries Act.

The principal requirements of the proposed regulations were that the States would submit to EPA for review and approval a description of their existing sludge management programs with plans and schedules for improving them as necessary to meet the added requirements of the proposal. The proposal set forth minimum requirements for approvable sludge management programs and provided the procedural requirements for submitting, approving, revising and withdrawing approval of such programs.

These regulations were proposed prior to the February 1987 amendments to the CWA. Prior to those amendments, the CWA required that sludge standards be promulgated but did not specify a mechanism, such as a permit program, for implementing the standards. As such, the proposed regulations did not require that the sludge standards be implemented through permits. As discussed in further detail below, the Water Quality Act of 1987, which amended section 405, specifies that the Part 503 technical standards are to be implemented either through an NPDES permit, or through a permit issued under one of the federal permit programs listed under amended section 405(f)(1), or through permits issued pursuant to an approved State sludge program. Thus today we are reproposing regulations for approval of State sludge programs in accordance with the direction established by the 1987 amendments.

III. Water Quality Act of 1987

A. Implementation of Sludge Standards Through Permits

Section 406 of the Water Quality Act (WQA) of 1987, which amends section 405 of the Clean Water Act, sets forth for the first time a comprehensive program for reducing the environmental risks and maximizing the beneficial use of sludge. The basis of the program to protect public health and the environment from any adverse effects from sewage sludge is the development of technical requirements for sludge use and disposal, and the implementation of these requirements through permits. The WQA requires promulgation of sludge standards establishing acceptable levels of toxic pollutants in sewage sludge and management practices in two stages.

Before the technical standards have been promulgated, the amendments provide that the "Administrator shall impose conditions in permits issued to publicly owned treatment works under section 402 of this Act or take such other measures as the Administrator deems appropriate to protect public health and the environment from any adverse effects which may occur from toxic pollutants in sewage sludge" section 405(d)(4). (This and subsequent citations to the CWA are to the amended version which codifies the 1987 amendments.) In response to this directive to take immediate action, EPA and the States have begun to include sludge requirements in permits for POTWs as they are reissued.

After the technical standards have been promulgated, the amendments direct that any permit under section 402 of the Act (NPDES permits) issued to a POTW or any other treatment works treating domestic sewage shall include the sludge technical standards, unless such requirements have been included in a permit issued under Subtitle C of RCRA, Part C of the Safe Drinking Water Act, MPRSA, or the Clean Air Act, or

> under State permit programs approved by the Administrator, where the Administrator determines that such programs assure compliance with any applicable requirements of this section [405].

Section 405(f)(1). The amendments further provide that the Administrator may issue separate permits that implement the sludge requirements to treatment works which are not subject to section 402 of the Act (NPDES) or to any of the other listed permit programs or approved State programs. Section 405(f)(2). Such permits are referred to as "sludge-only" permits.

The 1987 amendments give new direction for the regulation of sludge management activities on several fronts. First, section 405 now clearly mandates that NPDES permits, whether issued by EPA or by an approved NPDES State, must contain conditions implementing the sludge technical standards to be promulgated by the Agency, unless those standards have been included in a permit issued under one of the listed federal programs or under a State program approved for administering a section 405(f) sludge permitting program. Therefore, a State which seeks EPA approval to administer a sludge permitting program can choose to do so through its NPDES program or through another sludge permitting program (e.g., solid waste programs), so long as the permit implements the sludge technical standards promulgated under section 405. Second, the amendments establish that the sludge standards will apply to any treatment works that treats domestic sewage, not just publicly owned treatment works or treatment works that treat primarily domestic

BEST COPY AVAILABLE

waste. These treatment works may be subject to sludge standards even if they are not otherwise required to obtain NPDES permits.

The 1987 amendments also strengthen the provisions for enforcing against violations of section 405 or permits implementing regulations promulgated under section 405. Section 405(e) provides that:

> it shall be unlawful for any person to dispose of sludge from a publicly owned treatment works or any other treatment works treating domestic sewage for any use for which regulations have been established pursuant to subsection (d) of this section, except in accordance with such regulations.

Congress also amended section 309(c) of the CWA to provide, for the first time, criminal penalties for negligent or knowing violations of section 405 or permits implementing the requirements of section 405. The Administrator's new authority to assess administrative penalties for violations of the CWA also covers violations of section 405 and implementing regulations and permits. Section 309(g).

In addition, section 308 of the CWA, which establishes the Administrator's authority to require monitoring, reporting and recordkeeping and to inspect and sample to determine compliance with the CWA has been amended to specifically reference section 405. *See* section 308(a)(4), as amended by section 406(d) of the WQA. Other provisions amended by section 406(d) of the WQA include section 505(f) (citizen suits for violations of regulations under section 405(d)) and section 509(b)(1)(E) (judicial review of regulations promulgated under section 405).

B. Sludge Technical Standards (40 CFR Part 503)

The major purpose of today's rulemaking is to develop a program to protect public health and the environment from improper sludge use and disposal and to implement the sludge technical standards established pursuant to section 405(d) of the CWA. The sludge technical standards for the use and disposal of non-hazardous sewage sludge will be proposed in a separate rulemaking and will be codified at 40 CFR Part 503. The Part 503 standards will address the land application, distribution and marketing; landfilling, incineration, and ocean disposal of sewage sludge. Generally, the standards will specify limits on pollutants of concern in sewage sludge that may interfere with its safe disposal and identify management practices that mitigate the migration of pollutants from a particular end use into and through the environment. In sum, today's proposed rule establishes the programmatic and procedural framework for implementing the sludge technical standards. Today's proposed rule does not change the status of existing federal technical requirements applicable to sludge use and disposal, such as 40 CFR Part 257. Those requirements will remain in effect until revised through separate rulemakings.

IV. Discussion of Today's Proposed Rule

A. General

The purpose of today's proposed rule is to establish a national program for sludge use and disposal by establishing State program requirements, conditions and procedures for sludge permitting. Today's proposed rule contains four principal sections. First, 40 CFR Part 122 is proposed to be revised to add permitting requirements to accommodate the regulation of sewage sludge use and disposal through NPDES permits. Second, 40 CFR Part 123 is proposed to be revised to include requirements for State sludge management programs for States that wish to implement the sludge requirements through their NPDES program. Third, today's proposal would add Part 501, which contains the requirements and submission procedures for State sludge management programs that are not part of a State NPDES program. Fourth, 40 CFR Part 124 is proposed to be revised to add procedural requirements for sludge permitting.

1. Minimum State Program Requirements

Today's proposal sets forth minimum requirements for approvable State sludge management programs, whether the State uses NPDES or another authority. Section 405(f) of the CWA gives EPA broad discretion to promulgate regulations which establish requirements for approvable State programs that assure compliance with any applicable requirements of section 405.

As proposed today, State section 405 sludge programs are not mandatory. All NPDES permits must contain the sludge standards mandated by CWA section 405(d) unless they are addressed under another federal permit or a permit issued pursuant to an approved State sludge program. However, a State is not required to submit a section 405 sludge program for approval. If the State does not have an approved program, EPA would issue the sludge permit. This is a significant departure from the February 4, 1986 proposal in which States would have been required to develop and submit sludge programs for approval. In the 1987 amendments to the Clean Water Act Congress authorized, but did not expressly mandate, that States develop section 405 sludge programs. (By contrast, when Congress amended the Clean Water Act in 1977 and added requirements to develop pretreatment programs, Congress expressly mandated that States with existing NPDES programs modify those programs to add pretreatment authority.) EPA interprets this failure to expressly mandate the development of State sludge programs to mean that Congress intended that they be optional. However, as stated in EPA's 1984 "Policy on Municipal Sludge Management," it is EPA's policy that sludge management is a local concern and thus should be handled at the State and local level, within the context of broadly-established national objectives. Therefore, EPA will encourage the States to develop approvable sludge programs, through such mechanisms as the continuing planning process and section 106 work program development. The Agency invites comment on whether State sludge programs implementing Section 405 should be required.

The most important requirement for an approvable State sludge program under section 405 is the authority to issue permits implementing the Part 503 technical standards, because the CWA requires State sludge programs to implement sludge standards through permits issued to POTWs and other treatment works treating domestic sewage.

A State program would include provisions for compliance monitoring, including the authority to: Conduct inspections of sludge management facilities; require the operator to maintain records; have access by the State agency to records and monitoring equipment; and require periodic monitoring and reports from the permittee to the State agency. In addition, the State would need the authority to take enforcement actions and impose civil and criminal penalties against violators of the Part 503 technical standards and permits implementing sludge requirements.

Today's proposal also sets forth requirements for citizen participation. A State would have to provide public access to operator information unless such information is protected as confidential (*see* 40 CFR Part 2). Public notice of and opportunity to comment on proposed permits must be provided. Today's proposal would also require that the State provide for public participation in enforcement.

2. Program Submission

Today's proposal sets forth the basic components of a program submission. The first of these is the program description of the scope, structure, coverage, and processes of the State program. This would include: An identification of the lead agency responsible for implementing the sludge program, including staffing and organization; a description of the resources and costs of the program; a description of applicable State procedures; copies of permit, application and report forms; a description of the State's compliance tracking and enforcement program, and an inventory of all facilities required to obtain a sludge permit (POTWs and other treatment works treating domestic sewage).

The State also would submit a statement from the State Attorney General setting forth the State's legal authority to carry out the required program. This would include citations to specific statutes, regulations, and where applicable, judicial decisions.

Finally, the program submission would contain a Memorandum of Agreement (MOA) between the State Director and the EPA Regional Administrator. This document would set forth the State's plans to administer the sludge program and EPA's program oversight, and would include provisions for the transfer of information, proposed permits, reports, etc., between the Regional Administrator and the State. State sludge programs would be submitted to the appropriate EPA Regional office for review and approval, subject to concurrence by EPA Headquarters.

B. Part 501: State Sludge Management Program Regulations: Non-NPDES

1. General

As discussed earlier in this preamble, EPA proposed Part 501 regulations on February 4, 1986, that would have required States to develop programs regulating sludge use and disposal. Today's notice reproposes State sludge management program requirements based on the authority and program direction provided in the Clean Water Act amendments of 1987. Thus, while much of the substance of the earlier proposal is retained, there are a number of significant changes due to both the changes mandated by the Act and in response to comments on the February 4, 1986 proposed rule. This portion of the preamble is a section-by-section analysis of proposed Part 501. Part 501 applies only to those States that will not be regulating sludge through their NPDES programs (i.e., States without NPDES programs and States with approved NPDES programs which choose to implement a sludge program separate from their NPDES program). NPDES States that wish to incorporate sludge permitting into their NPDES program would submit such program for approval as a program modification under 40 CFR 123.62. Similarly, States seeking initial approval of an NPDES program which includes sludge would be subject to Part 123, rather than Part 501.

In developing proposed Part 501, the NPDES program was used as a basis, while attempting to make program requirements as flexible as possible so that States with existing, effective permit programs with different procedures would be approvable. Some States may be using a program that has been approved by EPA under another authority as a mechanism to regulate sludge, such as a State Solid Waste Management Plan under Subtitle D of RCRA. Such programs would be reviewed under Part 501 for their ability to implement section 405 of the CWA. There may be minor procedural differences between Part 501 and the approved program; the Memorandum of Agreement between the Regional Administrator and the State Director may be one means of resolving these differences.

2. Purpose, Scope and General Program Requirements

Subpart A of part 501 sets forth the intent and general requirements for EPA to approve State sludge programs as adequate to implement section 405. In accord with Congressional intent in enacting the section 405 amendments, States that seek to administer a State sludge program in lieu of the federal program generally must have authority as broad as EPA's to regulate sludge use and disposal. This would include the legal authority and programmatic capability to implement a permit program for the use and disposal of sewage sludge, to implement and enforce the Part 503 technical standards and any other Federal sludge standards (e.g., 40 CFR Part 257), and generally to take action to protect the public health and environment from adverse effects of toxic pollutants in sewage sludge.

Today's rule proposes that the State must issue sludge permits to all POTWs and other treatment works that treat domestic sewage. The requirement potentially includes numerous small facilities (for example, non-discharging, privately-owned domestic sewage treatment works) not previously regulated under any existing State or federal program and thus raises concerns about the additional resources that would be needed to fulfill the permitting requirement. EPA solicits comments on alternative ways of regulating these types of facilities other than through individual permits. Some possibilities include rules of general applicability and general permits. EPA also encourages States to submit any data they have on the number of such facilities in their States and the amount and kind of sludge they produce.

It is important to note that, in addition to requiring permits for POTWs and other treatment works treating domestic sewage, the amendments to section 405 make it illegal for *any person* to use or dispose of sewage sludge except in accordance with the technical regulations. Thus a State program must, at a minimum, require permits that cover all applicable requirements of the technical standards, including any that pertain to the activities which occur at disposal sites for POTWs and other treatment works treating domestic sewage. In addition, because the technical standards will apply to all users and disposers, the State program must include some provisions for enforcing the technical standards against these users and disposers as well. Thus, today's proposal includes a general requirement that States have provisions for regulating all users and disposers of sewage sludge, whether or not such users or disposers are required to obtain a permit. In today's proposal such other users and disposers are not required to have permits, although some of them may be required to have permits in the final rule. For example, the final rule may require some type of permit mechanism for regulating contractors who purchase sludge from a POTW for distribution and marketing to the public and for sludge incinerators that don't generate sludge themselves. (This possibility is also discussed below in the discussion about expanding the scope of the Part 122 permitting program to include sludge regulation.)

A number of States currently provide some type of regulation of "other users," ranging from permits to directly enforceable rules of general applicability. Other possibilities for regulating users include general permits, certifications of compliance, written releases acknowledging liability for compliance with the technical standards, and requiring the POTWs to regulate the users and disposers of its sludge through approved local programs similar to local pretreatment programs for regulating industrial users of POTWs. The agency is soliciting comments on effective means of regulating other users and disposers of sewage sludge that are not "POTWs and other treatment works treating domestic sewage."

A State sludge program may be administered as part of an existing State program (e.g., the State solid waste management plan) or it may be a separate section 405 sludge program, so long as it meets the requirements of the Part 501 regulations. States are, of course, free to adopt more stringent or more extensive requirements under section 510 of the CWA. State programs will be reviewed for their ability to meet the requirements of the Act and to ensure that there are no State provisions which may undercut or hinder implementation of the program, such as unauthorized variances from technical standards.

Assignment of Program Responsibilities (§ 501.1(d))

In some States, local agencies such as local health departments and soil conservation or agricultural extension offices play a significant role in carrying out various sludge management activities. In most cases, today's proposed rule would allow decentralized administration of State sludge programs to continue undisturbed. Where the local agencies are part of a State agency, they would be considered "field offices" of the State agency and questions about the propriety of assigning program responsibilities to them normally would not arise. The State would, however, be expected to identify the roles of field offices in describing how it will carry out program responsibilities, and, if more than one State agency is involved, designate a lead agency.

Today's proposal (§ 501.1(d)) would also generally allow States seeking approval of their sludge programs to maintain existing decentralized administration of sludge programs even where the local agencies are not part of a State agency. This is in keeping with the Agency's general policy of minimizing disruption to existing State programs. Also, because proper sludge disposal may often depend on local conditions and disposal site characteristics, the knowledge and proximity of local agencies to regulated activities can enhance efficient and effective administration of program responsibilities. Accordingly, today's proposal would generally allow the State sludge management agency to assign program responsibilities to local agencies.

However, today's proposal would not allow separate approval of local programs (by the State or EPA) nor relieve the State agency of overall responsibility for program administration. It also would not allow a State to assign program responsibilities to a local agency under control of a political subdivision that also owns or operates a POTW or other facility that treats or disposes of sewage sludge. This restriction is intended to avoid a conflict of interest situation with the local agency playing dual roles of regulator and regulated party. Beyond these broad parameters, the proposed rule does not specify the extent to which a State agency may use local agencies to carry out program responsibilities. EPA solicits comments on whether limitations should be established to guard against potential problems such as inconsistent application of program requirements within the State.

EPA is particularly concerned about potential conflict of interest situations where local agencies executing sludge responsibilities are part of the same political subdivision or other governmental entity with authority over POTWs or other sludge treatment or disposal facilities. Therefore, EPA also solicits comments regarding the roles of local agencies in existing State sludge programs, including the various functions they perform (e.g., permitting, compliance monitoring, enforcement), the extent to which they are the final decision-makers, and their relationships to State agencies, POTWs, and other sludge treatment and disposal facilities.

Under today's proposal, any assignment to local agencies must be well documented and supported in the State's submission for program approval. States would also be expected, through provisions in the MOA, to assume oversight responsibilities to ensure that the assignment is carried out properly. In addition, to assure that EPA could effectively carry out its oversight responsibilities in local delegation situations, the lead State agency would remain responsible for all program reporting and other activities related to EPA oversight of the State's approved program (e.g., submission of proposed permits for EPA review). Finally, State agencies would be required to retain all necessary authority to carry out program responsibilities so that they could step in where local agencies are not adequately performing assigned functions.

Partial Programs

Prior to the passage of the Water Quality Act in February 1987, partial NPDES program approvals were prohibited. A State wishing to obtain NPDES approval was required to seek approval of the entire program: NPDES, pretreatment, and regulation of federal facilities. Section 403 of the WQA (codified at section 402(n) of the Clean Water Act) authorizes two types of partial program approvals. The first type, the "major category partial permit program" is a partial program in which all discharges under the jurisdiction of a department or agency of the State are covered by the program. In the case of section 405 sludge programs, this would allow a State to seek a partial program approval if one agency has responsibility for regulating a particular sludge use or disposal method, and the State only sought to administer this program. For example, where all the sludge incinerators in the State are regulated by the State agency responsible for air programs, partial program approval could be sought for the State's sludge incinerator program. That program would be evaluated and approved based on its adequacy to meet all of the requirements of CWA section 405 (i.e., the State program requirements in Part 501) and to implement the Part 503 technical standards for those facilities under the Agency's jurisdiction. The approved State would then issue permits that implement the standards to all sludge incinerators, and EPA would be responsible for permitting all other sludge facilities in the State.

It is important to note that there may be circumstances where approval of a partial program would *not* be consistent with Congressional intent. For example, if a State has reorganized its administrative agencies simply to avoid a controversial or resource-intensive activity, EPA may decline to approve the State's program.

With the "major category" type of partial program, the State would not be required to obtain approval of a complete section 405 sludge program to maintain approval of its partial program. It would also be possible for a State to have two partial programs. EPA solicits comments on whether it should allow "major category" partial programs under Part 501 or whether it should instead require States with jurisdiction over sludge disposal split among various agencies to designate a lead agency and operate an entire program under an intra-State agreement.

The second type of partial approval authorized is the "major component partial permit program." This type of partial program provides for phased assumption by the State of major NPDES program components. Under this approach, the statute requires the State to submit a plan for assumption of full

program administration within five years of the date that the first phase is approved. CWA section 402(n)(4). Thus, the State could seek and obtain approval for its NPDES program first, and phase in approval of the pretreatment and federal facilities program components over five years.

Like pretreatment and federal facilities programs, a sludge program is a "major component," and cannot be broken down into smaller "major components." However, as proposed today, sludge programs, unlike federal facilities and pretreatment programs, are optional with the State. Therefore, a State that wants to phase in its NPDES program over five years must assume federal facilities and pretreatment, and may (but is not required to) include a complete sludge program as a component.

Today's notice does not contain any proposed regulatory language addressing partial programs. EPA will be proposing regulations governing the general requirements for partial program approvals as part of its general NPDES revision package. While comments are invited on today's preamble discussion of partial sludge programs, there will be another opportunity to comment when the general revisions to the NPDES program regulations are proposed.

Section 501.2 Definitions. Section 501.2 provides definitions for terms as they are used in Part 501. The terms "distributor," "septage," "sewage sludge," "use" or "utilization practice," and "users" are intended to be consistent with definitions used in the forthcoming technical regulations (40 CFR Part 503). The definition of "treatment works" is taken from section 212 of the CWA.

Part 501 defines a "Class 1 Sludge Management Facility" to be any sludge facility classified as such by the Regional Administrator in conjunction with the State Director. Class 1 Sludge Management Facilities are analogous to NPDES "major facilities" (see 40 CFR 122.2). They are a permitting priority and generally are subject to more stringent reporting and monitoring requirements. As with NPDES majors, under today's proposal the actual classification of facilities as Class 1 would not be done through rulemaking, but rather would be determined through a negotiated process between the Region and the State administering an approved program. This would allow flexibility for targeting efforts on areas of specific concern to the State (e.g., disposal on or near ecologically sensitive areas such as estuaries) and on particular facilities with known or suspected problems with their sludge. Where information available to EPA suggests that particular classes of facilities or practices are of concern on a national basis, EPA may issue national guidance on Class I determinations. For example, it may be appropriate to focus attention on sludge incinerators (because available information suggests that these facilities may have greater potential to threaten the environment) and on major POTWs required to have pretreatment programs under 40 CFR 403.8 (because facilities are so classified on the basis of their size and industrial contribution). These and/or other classes of facilities may become part of initial or subsequent Class I identification.

EPA invites comment on the process for identifying Class I facilities contained in the definition of "Class I management facility" proposed today.

Section 501.3 Coordination with other programs. A facility's sludge operation is closely linked to its wastewater treatment processes and other treatment activities. This section would allow States to coordinate their sludge programs and jointly issue permits with other State or Federal environmental programs where appropriate to promote efficiency in the process and consistency among the various requirements regulating the facility's waste treatment operations. For example, POTW permit issuance could be coordinated where a State has separate NPDES and sludge management programs.

3. Development and Submission of State Programs

Section 501.11 Elements of a sludge management program submission. This section summarizes the basic components of a program submission, each of which are described in greater detail in subsequent sections. The essential components of a program submission are: a letter from the Governor requesting program approval, a description of the State's sludge management program, a statement of the State's legal authority to implement the program from the Attorney General, and a Memorandum of Agreement (MOA) between the Regional Administrator and the State Director. This section provides that EPA will determine whether the State program submission is complete within 30 days of receipt of the program submission. EPA then has 90 days from the date of the completeness determination to review and decide whether to grant or deny the State's request for program approval. EPA will approve programs which meet the requirements of this Part and section 405 of the CWA.

Section 501.12 Program description. This section provides a detailed discussion of the nature and contents of the program description. The program description is the primary mechanism by which the State explains how it intends to administer its sludge program. While the legal authorities define the State's intended implementation, the program description describes the State's processes and policies, such as how the State plans to structure its enforcement program. The program description should explain how the program is adequate to meet the essential requirements of CWA section 405: to implement the technical standards through permits and to protect public health and the environment from adverse effects from pollutants in sewage sludge.

The description must include an explanation of the organization and structure of the agency or agencies that will be administering the program, including the number and general responsibilities of the employees. The description must also contain a discussion of the estimated costs and available resources for administering the program. These resource requirements are more extensive than what was proposed on February 4, 1986, because a resource discussion is essential in order to evaluate the State's capacity to implement the program as envisioned by Congress. EPA is soliciting comments on whether cost and resource factors are an appropriate measure of the State's capacity to implement the program.

The program description includes a description of applicable State permitting, administrative, and judicial review procedures. This includes a description of any administrative review or appeal procedures and criteria, as well as procedures and criteria for any variances available under State law. The program description must also contain copies of application and reporting forms.

Another important requirement is the facility inventory. Today's proposal would require that the State include in the program description a complete list of all POTWs or other treatment works treating domestic sewage, i.e., all facilities that are required to obtain sludge permits. (Note: As discussed elsewhere in this preamble, the categories of facilities required to obtain permits may be expanded to include other regulated parties. In this case, the inventory requirement would be correspondingly expanded to include all facilities or parties required to obtain a permit.) This is considerably pared down from the February 4 proposal which would have required an inventory of all sewage sludge generators and sewage sludge disposal facilities in the State, including firms which pump and service septic tanks and portable toilets.

The States will be expected to complete an inventory of all generators and disposal facilities and sites. The program description should explain how and when the State's inventory will be completed and the State's plan for maintaining the inventory. However, under today's notice only those facilities required to obtain permits must be identified on the inventory as a *precondition* to program approval.

The States also are asked to identify whether they have a separate program to regulate septage disposal. The February 4 proposal would have required a more extensive description of the State's septage disposal program. Several commenters on this earlier proposal remarked that septage is different from sludge and that it was not necessary to include requirements for septage in a sewage sludge management program.

In today's proposal, how a State regulates septage is only significant for the purposes of its section 405(f) sludge program, in that its program must ensure that where septage is disposed of in the same manner as sludge (e.g., applied to land), it is subject to the same requirements as sewage sludge. Thus, today's rule will be consistent with the forthcoming proposed Part 503 regulations including "septage" within the definition of "sewage sludge," so that where septage is used or disposed of as sewage sludge it would be subject to the same standards as sewage sludge. Beyond this coverage, how the State does or does not regulate septage would not have to be addressed in its sludge program under today's proposal. For example, septage that is transported to a POTW for treatment need not be covered under the State's sludge management program, since the POTW's sludge would be regulated.

Section 501.13 Attorney General's Statement. The Attorney General's Statement is where the State demonstrates its legal authority to carry out the program implementation requirements set forth in this part. The Attorney General (AG) certifies that in his or her opinion, the laws of the State provide adequate authority to carry out the program. The Attorney General's Statement would include a discussion of the State's legal basis for conducting each aspect of the program and address any significant difference between State and federal law. It would cite to the specific statutory and regulatory provisions that give the legal authority for each program element, and explain how each citation provides the requisite authority. All referenced State statutes and regulations would have to be in full force and effect by the time the program is approved.

The Attorney General's Statement must be signed by the Attorney General or a representative of the AG who is authorized to sign and can bind the State by so doing. Alternatively, the Statement may be signed by an independent legal counsel. To qualify as an independent legal counsel, the signatory must have full authority to represent the State agency in court on all matters, including defending actions against the State and bringing actions to enforce against program violations. The February 4 proposal stated that the Statement would be signed by the AG "or appropriate legal counsel," which EPA now regards as not specific enough in requiring that the legal counsel must have full authority to represent the State agency.

Section 501.14 Memorandum of Agreement (MOA). The program description and the MOA, taken together, should explain program operation and clearly define the respective roles of EPA and the State, (and local agencies, if appropriate), so that by examining these two documents EPA or the public can fully understand how the program will be run. Some overlap between the content of the two documents is expected since both address areas such as compliance monitoring, enforcement, permit issuance, and transfer of information. However, the two documents have different long-term roles. The program description provides a narrative explanation of program administration. The MOA is designed to be a long-term outline of these programmatic duties in the form of a binding agreement between EPA and the State. It establishes the parameters for ongoing program administration.

The MOA establishes the basis for cooperation and coordination between the State and EPA and for ensuring that the program is administered in an effective manner consistent with the objectives of the Clean Water Act. The MOA defines the State/EPA relationship and denotes the responsibilities of each party. It charts the procedures EPA and the State will follow in carrying out these various responsibilities and generally defines the manner in which the sludge management program will be administered.

The MOA should begin with a statement of the basis and implications of the Agreement, and must affirm that the State program will be managed in accordance with State and Federal statutes. The main body of the MOA consists of a listing of the responsibilities and procedures which will be used to ensure coordination between the State and EPA.

In addition, the MOA is to include provisions for transferring from EPA to the State, permit applications and other program information. In the MOA, EPA and the State will specify the classes or categories of permits that will be sent to EPA for review and comment, and the classes of permits for which such review will be waived. EPA may waive review of any class of sludge permits except for Class 1 Sludge Management Facilities. This is significantly pared down from NPDES, which lists several classes of dischargers for which review cannot be waived. *See* 40 CFR 123.24(d). On the basis of EPA's experience with NPDES, the Agency today is proposing that the waiver of review be prohibited only for a narrow class of permits, those for Class 1 Sludge Management Facilities. The MOA must also provide for termination of the waiver, for individual permits or classes of permits, at the written direction of the Regional Administrator.

Today's rule proposes that the procedures and requirements in § 123.44 governing EPA review of State-issued NPDES permits, including EPA's authority to object to, and, where necessary, veto permits that are outside the guidelines and requirements of the CWA, generally apply as well to permits issued under State programs approved under Part 501. Although the CWA does not specifically address EPA veto of State-issued permits with inadequate sludge provisions, it does grant EPA broad authority to establish State program requirements as necessary to assure compliance with section 405 requirements. CWA, section 405(f)(1). Based on past experience in other programs, EPA believes that the ability to veto State-issued permits which do not adequately implement federal standards is an important tool for effectively assuring that State programs implement minimum federal requirements. This approach is also consistent with that in the NPDES program where EPA has authority to veto State-issued NPDES permits that are outside the guidelines and requirements of the Act (including those implementing sludge standards). EPA sees no reason why the availability of a veto authority should depend on whether a State sludge program is

approved under the NPDES program in Part 123 or separately under Part 501.

The MOA shall also set forth the frequency and content of reports the State will submit to EPA (§ 501.14(b)(5)). This provision is similar in breadth and scope to NPDES (40 CFR 123.24(b)(3)). It is not a separate requirement, but rather is to be read in conjunction with the specific requirements regarding information transmittal from the State to EPA. For example, the MOA would identify that the State will transmit to EPA a copy of permit applications for which review has not been waived within, for example, five days of receipt.

The MOA also will contain an agreement that the State will allow EPA to routinely review relevant State records, reports and files. Provisions on the State's compliance monitoring and enforcement program, such as coordination with EPA on inspections and on enforcement activities, must also be addressed in the MOA.

Section 501.15 Requirements for Permitting. This section sets forth the specific requirements for ensuring effective permitting programs. It is divided into four principal subsections. Subsection (a) specifies general requirements the State must be able to implement and standards for program implementation. Subsection (b) outlines boilerplate provisions which all permits must contain. Subsection (c) contains provisions for permit actions such as transfers, modification, revocation and reissuance, and termination. Subsection (d) contains the procedures for permit issuance, primarily public input into the issuance process.

Section 501.15(a)(1) deals with confidentiality of information, a very important provision balancing the public interest in access to information and the permittee's interest in confidentiality. The State may protect information claimed confidential, except that it must deny such claims for: (1) The name and address of the permittee, and (2) permits, permit applications and effluent data. This proposal is consistent with the confidentiality rules in the NPDES program (§ 122.7), which are mandated by sections 308 and 402(j) of the Clean Water Act.

Section 501.15(a)(2) proposes information the permit applicant would provide in applying for a sludge permit. General information requirements would include name, address, and location, and an identification of the activities which bring the facility under the jurisdiction of section 405. The applicant must also identify whether it is subject to any of the listed environmental permit programs. This is important in order to provide notice of the sludge permit to other affected programs and to determine whether some Part 503 requirements are already included in other permits.

More specific information requirements would include a topographic map of the treatment works property which depicts the location of any sludge management facilities, including on-site disposal sites. Applicants would also have to describe their sludge use and disposal practices as this will be the basis on which limits are established under Part 503. The description of sludge use and disposal practices would include a specific identification of the sites where the applicant proposes to transfer sludge for treatment and/or disposal as well as the names of applicators, distributors, or other contractors that will handle the disposal of the applicant's sludge. In the case of sludge or sludge products (e.g., compost) which are distributed and marketed to the general public, the permit applicant would identify the distributor, if different from the applicant. This information will be important for purposes of tracking the sludge to ensure that it is properly managed as provided for in applicable federal standards. Applicants must also state their annual sludge production volume.

The proposed rule also contains general requirements for applicants to submit available data on sludge quality and ground water monitoring. Additional information may also be necessary in order for the permit writer to ascertain compliance with the Part 503 standards. Accordingly, the proposed rule requires the applicant to submit any information required to determine the appropriate standards to be used for permitting under Part 503. States would also need the authority to require the applicant to submit any other information the Director may reasonably require to assess the sludge use and disposal practices, for example where permits are developed on a case-by-case basis.

The State must have the authority to require the applicant to keep records of relevant data and information submitted with the permit application for three years. This record retention time is consistent with that required in other Federal environmental programs, including NPDES. (Note: It also coincides with the Paperwork Reduction Act and implementing regulations (44 U.S.C. 3507; 5 CFR 1320.6(f)), which generally recommend a record retention time of three years.) The Agency solicits comments on whether record retention time should be increased, for example to five years to correlate with the typical permit term.

Paragraph (a)(4) proposes that permit applications be signed in accordance with the requirements set forth in 40 CFR 122.22. This is necessary to ensure that the person signing the forms has the authority to speak for and legally bind the permittee.

Paragraph (a)(5) proposes that sludge permits be for a term of up to five years. Because many of the requirements will be new, the Agency feels that a longer permit term would be inappropriate. The State may, of course, write permits for a shorter term.

Paragraph (a)(6) provides that schedules of compliance may be used (but are by no means mandatory) except that a State may not issue a permit with a compliance schedule which goes beyond the statutory deadline. CWA section 405 mandates that compliance with the Part 503 technical standards be achieved by one year from the date of their promulgation, except where the standards would require major construction, in which case the permittee has up to two years to achieve compliance. Because the statutory compliance deadlines are relatively tight, permit compliance schedules after promulgation of the Part 503 standards will most likely be used only for facilities requiring major construction (i.e., those which have a two-year statutory compliance deadline). Where a compliance schedule goes beyond one year, this section would require interim requirements and reporting, to ensure that the permittee is on schedule.

Paragraph (a)(7) discusses conflict of interest. It is taken directly from § 123.25(c) of the NPDES regulations and would require that no member of a board or body which approves a permit receives or has for the past two years received income from permit holders or applicants. Under the NPDES conflict-of-interest regulations (and the proposed rule in Part 501), State agencies or departments are not considered "permit holders or applicants for a permit." § 123.25(c)(iii). Without this exemption, many States could not administer an approved NPDES program because State agencies often hold NPDES permits. A similar exemption for Federal agencies or departments is being considered and may be addressed in the forthcoming proposed revisions to the NPDES regulations. Municipalities, on the other hand, are considered "permit holders or applicants for a permit." Therefore, employees of a municipality that owns or operates a facility required to obtain a permit could not sit on the board or body that approves all or portions of sludge permits issued in an approved State.

Although the NPDES standard for conflict-of-interest is dictated by the CWA and is considered relatively stringent, EPA believes that requirements to guard against conflicts-of-interest are also important for State sludge programs. The Agency solicits comments on whether another standard would be more appropriate. One approach the Agency is considering is allowing a State that will use a program approved under another Federal statute as the basis for its sludge program under Part 501 to comply with the conflict-of-interest provision applicable under the other Federal statute (e.g., section 128 of the Clean Air Act, 42 U.S.C 7248).

Section 501.15(b) is the second principal subsection, and sets forth the permit conditions all State permits would need to contain in order for the program to be approvable. These provisions are important because they put the permittee on notice as to the applicability of Clean Water Act provisions, and identify the effect of the permit with regard to compliance and noncompliance with the Clean Water Act for enforcement purposes.

The first paragraph of § 501.15(b) requires that the permit include requirements necessary to comply with the Part 503 sludge standards and generally the requirement in CWA section 405 to protect public health and the environment. This includes requirements as to sludge quality, monitoring frequency, management practices, etc. Requirements for sludge use and disposal may include management practices or other limitations that apply at the disposal site. When the POTW or other treatment works subject to a permitting requirement disposes of its sludge offsite, the permit must include conditions to meet all applicable requirements, including those that apply at the offsite disposal site, unless those requirements are included in a permit issued under one of the programs listed in section 405(f) of the Act.

The permit by specific language in the permit document would have to require that the permittee comply with all conditions, and that noncompliance with any of the permit conditions constitutes a violation of the Clean Water Act. The permit must require compliance with the Part 503 technical standards, even if the permit has not been modified to incorporate them. This implements the language of CWA section 405 which makes these regulations directly enforceable one year from their promulgation, or two years from promulgation when construction is required. The permit must inform the permittee of the civil and criminal penalties in the Clean Water Act for permit violations and noncompliance with section 405 (which includes penalties for noncompliance with the promulgated technical standards even if the standards have not been incorporated in the permit).

This section also contains several boilerplate permit conditions. The permittee must take all reasonable steps to prevent sludge use or disposal in violation of the permit which has a reasonable likelihood of adversely affecting health or the environment, and must at all times properly operate and maintain facilities and systems. It is not a defense in cases of noncompliance to claim that it would have been necessary to halt or reduce the permitted activity in order to comply.

Paragraph (7) states that the permit may be modified, revoked and reissued, or terminated for cause.

Paragraph (8) is the duty to provide information. This puts the permittee on notice that the Director may request information on compliance, or to determine whether cause exists to modify or terminate the permit, and that the permittee has an obligation to furnish such information within a reasonable time.

Paragraph (9) discusses inspection and entry. It is very important that this be set forth in the permit. It sets the parameters for the Director or an authorized representative to enter onto the premises, inspect the facility, have access to records and conduct sampling.

Paragraph (10) outlines the requirements for monitoring, recordkeeping and record submission. Paragraph (10)(i) would require that the permittee report monitoring data no less frequently than once a year. The permit will require that monitoring be conducted at the frequency specified by the Part 503 standards; however, the permit writer may require additional or more frequent monitoring as needed. Today's proposed rule would not specify a minimum frequency for sludge monitoring (except compliance with Part 503 technical standards), but would leave that determination to the permit writer using best professional judgment and guidance. This approach avoids establishing a minimum monitoring frequency in regulations that may not be appropriate for the broad variety of situations and facilities that would be involved. Frequent monitoring, however, enhances the effectiveness of compliance monitoring and enforcement, particularly for early detection, assessment, and correction of violations. For this purpose, quarterly or even monthly monitoring has been suggested as a minimum requirement for all facilities. On the other hand, the potential threat to public health and the environment from some facilities (e.g. small lagoons that treat only domestic sewage and dispose of sludge infrequently) may be so remote that monitoring less frequently or on an "as needed" basis (e.g., change in influent or disposal practices) is sufficient. Of course, in establishing requirements the Agency will balance the value of such requirements against the burden they would impose on the public. EPA is sensitive to this and will take both factors into account in determining the need for specifying a minimum monitoring frequency and the appropriate level of monitoring. EPA solicits comments on whether the regulations should establish a minimum monitoring frequency and, if so, what that frequency should be (e.g. annual, quarterly, monthly).

Paragraph (10) also requires that monitoring be representative of the monitored activity, and that parameters for monitored information be set forth in the permit. Monitoring must be conducted in accordance with procedures established under 40 CFR Part 503 unless others have been specified in the permit. The permit must inform the permittee that anyone who falsifies, tampers with or knowingly renders inaccurate any monitoring device or method or makes a false statement or representation is subject to Clean Water Act criminal penalties.

Paragraph (11) contains signatory requirements. It incorporates by reference 40 CFR 122.22. This ensures that applications and reports are signed by an authorized individual.

Paragraph (12) would require the permittee to give advance notice to the Director of any planned changes in the sludge disposal practices or facilities that may justify the application of different permit conditions, or which may result in noncompliance with the permit. The permit must also require that the permittee report all instances of noncompliance.

Under Paragraph (12)(ii) the permit would have to provide that it was not transferable except after notice to the Director. Section 501.15(c) discusses procedures for permit transfer.

Today's proposal would require that the permit contain a reopener clause, so that the permit would have to be modified or revoked and reissued where more stringent technical standards than are currently in the permit are promulgated. (See Paragraph 13.) Under the CWA, compliance with the technical

standards is required regardless of existing permit conditions. Thus, permit modification would facilitate compliance by the statutory deadline of one year from promulgation (or two years where construction is required) found in CWA Section 405. This reopener provision would also apply if limits are promulgated for a pollutant not regulated in the permit.

Subsection (c) discusses procedures for permit actions. This covers permit transfers, permit modification, permit termination, and permit issuance.

Paragraph (1) addresses permit transfers, and sets out procedures for automatic transfer, so that permit modification or revocation and reissuance can be avoided in some instances.

Paragraph (2) discusses permit modification and revocation and reissuance. When permits are modified only the provisions subject to the modification are reopened. Permits may be modified only for cause as defined in (2)(ii). For example, the promulgation of new technical sludge standards by EPA would be cause for modifying the permit.

Permit revocation and reissuance is more severe; the entire permit is reopened and subject to revision and the permit reissued for a new term. Revocation and reissuance can only be done in three circumstances: (1) Cause exists for termination but the Director decides to revoke and reissue; (2) cause exists for modification only but the permittee agrees to revocation and reissuance; or (3) the Director has received notice of a proposed permit transfer under § 501.15(b)(15). (A permit may also be modified to reflect a transfer.)

The most severe permit action, termination of the permit, is described in paragraph (3). Permits can be terminated (or permit renewal applications denied) for four reasons: (1) Noncompliance; (2) permittee's failure to disclose all relevant facts; (3) the permitted activity endangers health or the environment and can be adequately regulated only by modifying or terminating the permit; and (4) a change in condition that requires either reduction or elimination of the permitted activity.

Subsection 501.15(d) describes the permit issuance procedures that the State would need the authority to administer. The most important element of this subsection involves the requirement to ensure public participation in the permit issuance process. This section sets forth minimum provisions to ensure adequate public participation. The State may, of course, provide for more extensive public involvement, e.g., by providing lengthier public comment periods, requiring more public hearings, having more extensive public notice, etc.

The State Agency must not commence processing a permit until the applicant has fully satisfied the application requirements discussed in § 501.15(a)(2).

Paragraph 501.15(d)(3) sets forth procedures for permit modification, revocation and reissuance, and termination. Interested persons may petition the Director to take such action by written request, or he may do so on his own initiative, providing that one of the reasons specified in § 501.15(c) exists.

Paragraph (4) discusses draft permits. A draft permit would be prepared where the Director tentatively decides to issue the permit, and whenever the permit is modified, revoked and reissued, or terminated. A draft permit must include all of the conditions required to be in the permit under the provisions of Part 501 (which includes conditions required for compliance with Part 503).

Paragraph (5) discusses fact sheets. Under today's proposal, State programs would have to require that a fact sheet be prepared for permits issued to "Class 1 Sludge Management Facilities." The purpose of the fact sheet is to explain the basis for any permit condition and thus allow meaningful public comments on the draft permit. Accordingly, the fact sheet would set out the significant factual, legal, methodological, and policy questions considered in preparing the draft permit, including a brief description of the facility and the use and disposal practices, and an explanation of how the limits and conditions for sludge use and disposal were derived.

Public notice and comment procedures are the subject of paragraph (6). Under today's proposal, the State program must require that the Director give public notice of the draft permit and if a public hearing has been scheduled. The public notice must identify the name and address of the processing office, the name and address of the applicant, a brief description of the activity described in the permit application (e.g., sludge incineration), and a description of the procedures for submitting comments. The notice must provide for no less than a 30-day comment period during which any interested person may submit written comments and request a public hearing. Where the notice is for a public hearing, the notice must designate the date, time and place of the hearing and specify its nature and purpose.

The State regulations must specify that public comments will be considered before making a final decision; that significant comments will be responded to in writing and made available to the public; and that any provisions in the final permit which differ from the proposed permit will be noted and explained in the written response to comments.

Subsection (e) sets forth optional program provisions. These provisions, which the State is not required to adopt, are currently in the NPDES program and generally make the program less stringent or easier to administer. If the State decides to adopt general permits, permit continuation, or minor modification of permits for sludge, its provisions must be no less stringent than the corresponding Federal provisions identified in subsection (e). Under today's proposal, State-issued general permits would not be subject to review by EPA's Office of Water Enforcement and Permits, as § 123.44(a)(2) provides for NPDES general permits, but would be reviewed by the EPA Region to the same extent as other State-issued sludge permits (i.e., minimally, all permits for Class 1 facilities must be reviewed by the Region). States considering the use of general permits for sludge should so indicate in their program description and Attorney General's Statement, and make sure that State law would allow issuance of general permits.

Section 501.16 Requirements for compliance evaluation programs. This section would require that States have requirements and procedures for compliance monitoring and evaluation; 40 CFR 123.26 is used as the basis for these requirements. Section 405 of the Clean Water Act makes it unlawful for *any person* to use or dispose of sewage sludge except in accordance with the Part 503 standards. Thus it is important that the State's compliance monitoring program cover non-permittees (e.g., disposal sites) as well as permittees.

Section 501.17 Requirements for enforcement authority. Enforcement remedies must be specified in State statutes (and, as noted earlier, enforcement remedies should also be referenced in each permit.) State law must provide for adequate enforcement authority, including the ability to enjoin violations and bring *both* civil and criminal actions for any violations of permits, the permit program, or the sludge use and disposal standards set forth in 40 CFR Part 503. Other sanctions, such as the ability to bring actions for damages, are allowed, but under today's proposal they would be additions to, and not substitutes for, these enforcement remedies.

Under today's proposal, the State would have to be able to seek injunctive relief in two instances. First, the State must be able to immediately restrain any unauthorized activity endangering the public health or the environment. Second, it must have authority to sue to enjoin any threatened or continuing violations without first revoking the permit. State penalty authority must allow the State to seek civil penalties in the amount of at least $5,000 per day of violation, seek criminal fines (for willful or negligent violations) in the amount of at least $10,000 per day of violation, and seek criminal fines for knowingly making false representations or certifications, or knowingly rendering monitoring devices inaccurate, in at least the amount of $5,000 for each instance of violation.

The minimum penalty ceilings in today's proposal are consistent with the current parallel requirements in Part 123 for approved NPDES programs. The Water Quality Act of 1987 significantly increased both civil and criminal penalties required for violations of the CWA. In keeping with past policy that, to be effective substitutes for the federal program, State programs must have penalties generally proportionate to those available under Federal law, EPA is considering raising the minimum penalty ceilings required for State program approval. Therefore, the final promulgation of today's proposal may require higher minimum penalty ceilings for approved State sludge programs under Part 501. EPA would seek parity between Part 501 and Part 123 in this regard.

States cannot provide additional defenses or rights to dischargers where not authorized by Federal law. Thus, a State could not allow a permittee to challenge its permit limits in an enforcement proceeding, and State law that provided such an option would be inconsistent with the Federal requirements. Similarly, a State could not restrict its enforcement by limiting the use of information in an enforcement action.

State programs must allow for public participation in the enforcement process. Section 501.16(d) would allow States to choose between two options. The first option is for State law to provide for intervention as of right in any enforcement action. States choosing this option may not place restrictions on this right. Alternatively, where State laws allow permissive intervention in State civil or administrative actions, the State could agree not to oppose such intervention in any enforcement proceeding. Under this option, the State would also have to agree to investigate and respond to citizen complaints and publish all settlement agreements for a public comment period of at least 30 days.

Section 501.19 Sharing of information. Section 501.19 incorporates 40 CFR 123.41, which requires that the State make available to EPA upon request, any information obtained or used in the administration of a State program.

Section 501.20 Receipt and use of Federal information. Section 501.20 incorporates § 123.42, which addresses the transfer of relevant information collected by EPA to the State agency upon program approval. Under that section, the MOA between the State and the Regional Administrator must provide for: (1) Transfer of all copies of pending permit applications and other relevant information to the State, and (2) procedures to ensure that the State Director will not issue a permit on the basis of any application received from the Regional Administrator which the Regional Administrator has identified as incomplete until the Director receives information sufficient to correct the deficiency.

Section 501.21 Program reporting to EPA. This section contains the requirements for quarterly and annual reports to be submitted to EPA. These reports are important for tracking the State program and evaluating compliance and enforcement.

Section 501.21(a) describes the annual report, which would include an update of the inventory of sludge facilities, and information of substantial non-compliance of Class 1 management facilities. The information on substantial noncompliance would include instances of significant failure to comply with Part 503 standards and permit conditions, failure to complete construction of essential elements of a sludge facility (as provided in a compliance schedule or as otherwise necessary to meet permit and/or Part 503 standards), and failure to provide adequate monitoring or other reports. This paragraph identifies what information shall be provided with regard to such instances of noncompliance, for Class 1 and non-Class 1 sludge facilities.

Section 501.21(b) contains the requirements for quarterly reports. In that report the State would provide a summary of the incidents of substantial non-compliance occurring in the previous quarter by Class 1 facilities.

4. Program Approval, Revision, and Withdrawal

Section 501.31 Review and approval procedures. This section outlines the procedure for State submission and EPA review and approval of a State program. As with NPDES, today's proposal would require that EPA make a determination as to the completeness of the application within 30 days. Today's proposal would require that EPA notify the State of any deficiencies in its submittal.

Once the program is determined to be complete, EPA would publish notice of the submission in the **Federal Register** and in enough of the largest newspapers in the State to attract State-wide attention. In addition, the notice must be mailed to all interested persons and government agencies, as well as to all permit holders and applicants subject to sludge use and disposal requirements. The notice must provide at least a 45-day comment period and provide that a public hearing within the State will be held no less than 30 days after the notice is published. The notice would indicate where and when the State's submission would be accessible to the public and indicate the cost of obtaining a copy. The notice would also delineate the fundamental aspects of the State's proposed program. Finally, the notice would indicate whom an interested person may contact for additional information.

EPA specifically solicits comments on two requirements of this Section: (1) Whether (as proposed) the rule should require that individual notice of the State's application for program approval should be sent to all permit holders and applicants subject to sludge use and disposal requirements, or whether other forms of notice (**Federal Register**, State newspapers, and mailing lists) would be sufficient; and (2) whether (as proposed) a public hearing on EPA's approval of the State program should be mandatory or whether it should be required only when public interest is demonstrated.

The Administrator has 90 days from the date of receipt of the complete program to approve or disapprove of the program. This period may be extended by mutual agreement between the State and EPA. The Regional office will prepare a responsiveness summary identifying the public participation activities conducted, summarizing significant comments and responding to these comments. Notice of approval will be published in the **Federal Register**. If the program is disapproved, the Administrator will notify the State of the reasons for disapproval and what revisions would be necessary to make the program approvable.

Section 501.22 Procedures for revision of State programs. Revision of State programs may be necessary any time the State or federal laws or

programs change. The procedures for program modification are very similar to the original program approval process.

Paragraph (b) would require that where State program revision is necessitated by changes or additions to the regulations governing sewage sludge use and disposal, including changes to this Part, the State would revise its program within one year from promulgation of the applicable regulations, or within two years if an amendment to a State statute is required.

Section 501.23 Criteria for withdrawal of State programs and Section 501.24 Procedures for withdrawal of State programs. These sections incorporate 40 CFR 123.63 and 123.64, the NPDES provisions for program withdrawal. Under these sections, withdrawal can occur voluntarily (where the State decides to transfer all program responsibilities back to EPA) or involuntarily (EPA decides to withdraw approval where the State program no longer complies with the Clean Water Act or regulations). Program withdrawal is considered an extreme remedy but will be invoked where the State is unable or fails to take corrective action to solve State program deficiencies. Grounds for initiating State program withdrawal proceedings include: (1) The State's legal authorities no longer meet CWA requirements; (2) the operation of the State program fails to comply with EPA regulations; (3) the State's enforcement program fails to comply with EPA regulations; or (4) the State program fails to comply with the terms of the Memorandum of Agreement.

5. Indian Tribes

The February 4, 1986 proposed rule provided that EPA and a tribal government could develop, on a case-by-case basis, an appropriate role for the tribal government in carrying out a sludge management program on Indian lands where a State is unable to demonstrate adequate legal authority to administer and enforce its program on the Indian lands. See proposed § 501.19, 51 FR 4463. Subsequently, Congress created a more prominent róle for Indian tribes in the management of environmental programs on Indian lands in section 506 of the WQA (codified as section 518 of the CWA). That section provides in part that:

> The Administrator is authorized to treat an Indian tribe as a State for purposes of title II and Sections 104, 106, 303, 305, 308, 309, 314, 319, 401 402, and 404 of this Act to the degree necessary to carry out the objectives of this section, but only if—
>
> (1) the Indian tribe has a governing body carrying out substantial governmental duties and powers;
>
> (2) the functions to be exercised by the Indian tribe pertain to the management and protection of water resources which are held by an Indian tribe, held by the United States in trust for Indians, held by a member of an Indian tribe if such property interest is subject to a trust restriction on alienation, or otherwise within the borders of an Indian reservation; and
>
> (3) the Indian tribe is reasonably expected to be capable, in the Administrator's judgment, of carrying out the functions to be exercised in a manner consistent with the terms and purposes of this Act and of all applicable regulations.

CWA section 518(e). This section further directs the Administrator to promulgate regulations which specify how Indian tribes will be treated as States for purposes of the Act. Today, EPA proposes, consistent with the intent of section 518, to provide that Indian tribes may be treated as States for purposes of approved State sludge management programs.

Section 518 does not list section 405, EPA's primary authority for establishing approved State sludge management programs. The legislative history is also silent on this point. However, EPA believes that treating Indian tribes as States is nonetheless appropriate here. Indian tribes may be treated as States under Title II (construction grants) and section 303 (water quality standards and implementation plans). Both sections recognize that sludge management is an integral part of wastewater treatment. Section 303(e) in fact, requires States to have a continuing planning process which includes, inter alia, plans for "controls over the disposition of all residual waste from any water treatment processing." Section 303(e)(3)(H). Since Congress intended that Indian tribes be treated as States for purposes of sludge management activities under other provisions of the Act, it is reasonable to conclude that Congress similarly intended that Indian tribes be treated as States for purposes of approved sludge management programs authorized by Section 405.

Providing for the treatment of Indian tribes as States under section 402 of the Act further supports similar treatment under section 405. Section 402 authorizes approval of State NPDES programs. As discussed elsewhere, EPA proposes to allow NPDES States to use their NPDES programs to implement a section 405(f) sludge management program, consistent with Congressional designation of NPDES permits as a primary implementation mechanism for section 405(d) technical requirements. Thus, an Indian tribe that wishes to obtain separate approval of its NPDES program could also seek approval of its sludge management program as part of that NPDES program. It would be illogical and inconsistent not to allow Indian tribes to seek treatment as a State for purposes of an approved sludge management program that is separate from an NPDES program. EPA does not believe that Congress intended such a result. The Agency therefore proposes to provide for treatment of Indian tribes as States for purposes of sludge management programs approved under Part 501.

EPA intends that an Indian tribe which qualifies for treatment as a State would be subject to many of the same program requirements and approval procedures as are States under existing regulations. Accordingly, the definition of "State" in § 501.2 in today's proposed rule includes Indian tribes which are eligible for treatment as a State.

Today's proposal does not include provisions for determining an Indian tribe's eligibility for treatment as a State. EPA does not expect the requirements or procedures for this determination to vary significantly among the various programs under the Clean Water Act. Accordingly, EPA plans to propose a separate rule addressing Indian tribes' eligibility for treatment as States which would apply to various programs under the CWA, including sections 402, 404 and 405.

C. Part 123: State Sludge Management Program Regulations: NPDES

Part 123 establishes the program requirements and approval procedures for States which seek EPA approval to administer an NPDES permit program pursuant to Section 402 of the Act in lieu of the Federal NPDES permit program. All 39 States which currently have EPA-approved NPDES programs govern, at a minimum, the discharge of pollutants to waters of the United States, including the discharge of sewage sludge to waters of the United States (see sections 405 (a) and (c) of the CWA). None of these State programs, however, have been approved by EPA to administer a program which meets the requirements of sections 405 (d) and (f) of the CWA for the safe use and disposal of sewage sludge.

In the 1987 amendments to the Act, Congress authorized the Administrator of EPA to promulgate procedures for the approval of State programs that assure compliance with section 405(d) of the Act and also recognized permits issued pursuant to section 402 as appropriate vehicles for implementing section 405(d) requirements. Section 405(f). To accommodate both goals. EPA today is proposing to amend Part 123 to allow States to incorporate a sludge management program as part of their approved NPDES programs.

Today's proposed revisions to Part 123 would apply only to those States which choose NPDES as the vehicle for administering an EPA-approved sludge management program in lieu of the federal program. States which choose to implement an approved sludge program through existing solid waste or other programs would follow the procedures in Part 501 (described above), rather than those in Part 123. A proposed revision to § 123.1(c) reflects this intent. For the same reason, EPA is also proposing to revise the introductory paragraph in § 123.25(a), which lists permitting requirements in Parts 122 and 124 applicable to the federal NPDES program which a State must also be able to implement as part of an approved NPDES program. Today's proposed revision clarifies that a State which chooses not to seek approval of a sludge management program as part of its NPDES program does not have to be able to implement the sludge-related revisions to those provisions of Parts 122 and 124 listed in § 123.25(a) which are promulgated after enactment of the 1987 amendments to the CWA. However, States that use their NPDES programs to implement a sludge program would have to be able to implement these revisions.

Although a State may choose to seek approval of its sludge management program under Part 123 or Part 501, the basic requirements under either Part will be the same. Maintaining consistency among State program requirements will help ensure that minimum standards apply nationwide, regardless of which program a State chooses for its sludge management program. The purpose of the program requirements under both parts is to produce programs which adequately ensure compliance with section 405(d) requirements and meet the Congressional goal of approving State programs which are no less stringent than the federal program. See Cong. Rec. H10576 (October 15, 1986). Today's proposed revisions to Part 123 are designed to "fill in the gaps" of existing NPDES requirements by adding requirements which are unique to sludge management programs.

Program Description

To obtain NPDES approval, States must submit a comprehensive description of the program they propose to administer in lieu of the federal program. § 123.22. For States which seek approval of their sludge management program as part of an NPDES program, EPA is proposing to revise § 123.22 to include three additional requirements. First, States would be required to submit an inventory of all POTWs and other treatment works treating domestic sewage, together with a plan for completing and maintaining an inventory of all sewage sludge generators and disposal facilities. Second, a State would be required to identify any program for regulating the disposal of septage and portable toilet pumpings that is handled under a program that is separate from that for sewage sludge. Finally, the program description would be required to describe any bans or prohibitions imposed by State or local authorities on specific sludge management practices. The above discussion of Part 501 explains these provisions in more detail.

The program description also must describe the State's compliance evaluation program. § 123.22(e). Section 123.26 establishes the minimum requirements for State compliance monitoring programs. EPA proposes two revisions to § 123.26(e) for sludge management programs. First, paragraph (e)(1) is proposed to be revised to specify that the inventory of all sources covered by NPDES must include permits which implement section 405(f) of the CWA. In most cases, sludge treatment works which must obtain permits that implement § 405(d) requirements will already be required to obtain NPDES permits because they discharge wastewater to surface waters of the State. However, some sludge treatment works which are subject to the permitting requirement under section 405 may apply their effluent on land or otherwise dispose of their effluent. The proposed revision to paragraph (e)(1) clarifies that these nondischarging treatment works must also be included in the required inventory. The second proposed revision would require annual inspections of all Class 1 sludge management facilities in addition to inspection of all major dischargers. Again, these two categories may overlap in many cases, but not necessarily in all cases.

Memorandum of Agreement

The Memorandum of Agreement (MOA) between the State Director and the Regional Administrator (RA) must describe which classes and categories of permits the RA will review before issuance by the State and those for which the RA will waive review. Section 123.24(d) lists the classes and categories of permits for which review cannot be waived. Today, EPA proposes to add to this list the category of Class I sludge management facilities. As explained above, Class I sludge management facilities are those which require priority attention as determined by the RA and the State Director. Under this proposal, permits issued to these facilities must be submitted to EPA for review and comment, and, where appropriate, objection.

The MOA also must contain provisions specifying reports and information the State is expected to submit to EPA. Section 123.24(b)(3). Program reporting requirements are listed, in part, in § 123.45, which specifies requirements for noncompliance reporting. Today, EPA is proposing to amend § 123.45 by adding a new paragraph (e), which would require a State to submit reports on noncompliance with sludge requirements as specified in § 501.21, i.e., quarterly reports summarizing instances of significant non-compliance and annual reports. Today's proposal also specifies that the sludge noncompliance reports may be combined with the reports currently required under § 123.45.

Incorporating Sludge Management Into Existing NPDES Programs

States which are approved for NPDES already have in place many of the program requirements that will be required of States which seek approval under Part 501. Consequently, NPDES States need only seek modification of their existing programs under § 123.62 if they wish to implement the sludge program through their existing NPDES programs rather than submit entirely new programs. Typically, EPA expects that a program modification to incorporate sludge would require a State to submit an updated program description (including the information about sludge management activities discussed above), addenda to the Attorney General's Statement and, where necessary, revisions to the Memorandum of Agreement. NPDES States would need to demonstrate that legal authority exists to issue NPDES permits for sludge use and disposal where there is no discharge of the sludge to surface waters, and that they have the additional authority to implement the Part 503 technical regulations. Existing State regulatory and statutory provisions regarding inspection, monitoring, reporting and enforcement must be broad enough to include section 405 implementation. In addition, States would be expected to make any revisions to their legal authority necessary to implement "sludge revisions" to Parts 122 and 124 proposed today which are applicable to State programs (as specified in those parts).

D. Revisions to Part 122

1. General

Part 122 establishes the essential requirements for NPDES permits issued pursuant to section 402 of the Act by EPA or an approved State. It establishes the scope of the NPDES permit program, general requirements governing the administration of the program, application requirements, required permit conditions, and permissible causes for modifying or terminating NPDES permits. These regulations specifically address sludge requirements for NPDES permittees only to the extent of providing that sludge may not be discharged to waters of the United States. While the regulations more generally require that NPDES permits contain any conditions required by section 405 of the Act regarding the disposal of sewage sludge from POTWs (§ 122.44(o)), they neither accurately reflect the broadened scope of sludge requirements nor have explicit requirements designed to address the sewage sludge use and disposal practices that are proposed to be regulated in Part 503, e.g., application requirements.

The WQA of 1987 requires that the Part 503 regulations be implemented through permits and designates NPDES permits as the primary implementation mechanism, where the Part 503 regulations are not already implemented through permits issued under other federal programs (Subtitle C of RCRA, Part C of the Safe Drinking Water Act, MPRSA, or the Clean Air Act) or State programs approved pursuant to section 405(f). *See* section 405(f)(1). Accordingly, EPA is proposing to amend Part 122 to establish requirements for including in NPDES permits any terms and conditions necessary to implement the sludge standards in Part 503 as well as any others which may be necessary to fulfill the general mandate in section 405 to protect human health and the environment. These proposed regulations would apply to all NPDES permits for treatment works treating domestic sewage which are issued by EPA and by States which choose to administer an approved sludge management program as part of their NPDES programs. (Note: The permit requirements that must be followed by States which choose to administer an approved sludge program independently from an NPDES program are listed separately in Part 501. These requirements are described above in the discussion about Part 501.)

The 1987 amendments also authorize the Administrator to establish procedures and issue permits for sludge use and disposal to any treatment works that treats domestic sewage where the treatment works is not otherwise subject to NPDES and is not subject to sludge requirements that implement section 405 contained in other federal permits or permits issued under an approved State program ("sludge-only" facilities). CWA, section 405(f)(2). A treatment works that land applies its effluent rather than discharging it to surface waters is an example of a treatment works that might fall into the category of "sludge-only" facilities. Here, although the treatment works would not need an NPDES permit for surface water discharges, it may generate sewage sludge subject to regulation under section 405 and thus would require an NPDES permit under today's proposal.

Today, EPA proposes to amend Part 122 to establish it as the mechanism through which EPA will issue "sludge-only" permits. The proposed revisions include expanding the scope of Part 122 to cover sludge-only permits (§ 122.1) and to indicate where the requirements for "sludge-only" permits differ from the requirements applicable to other NPDES permittees (e.g., proposed § 122.21(c)(3), specifying when a sludge-only facility would have to apply; proposed § 122.21(d)(3)(ii), specifying the information a "sludge-only" facility must submit with its application; proposed § 122.44(j), requirement for pretreatment programs when necessary to assure compliance with section 405 requirements). The general requirements applicable to NPDES permittees would also apply to "sludge-only" permittees except where the requirements, by their own terms, apply only to discharges to surface waters.

Permit conditions that implement technical requirements for the use and disposal of sewage sludge may include management practices and other limitations that apply at the disposal site. The technical sludge standards promulgated at 40 CFR Part 503 will contain both sludge pollutant concentration limits, and management practices and factors that apply at the disposal site. Under today's rule, these conditions must be included in the permit issued to the POTW or other treatment works treating domestic sewage (i.e., the generators), unless applicable requirements have been included in a permit issued under one of the federal programs listed in section 405(f) or in a permit or other approved control mechanism under an approved State program.

As noted above, parties who use and dispose of sewage sludge are also liable under the CWA for violations of any technical regulations promulgated pursuant to section 405(d) of the CWA even though they may not be required to obtain a permit because they have not been classified as a POTW or other treatment works treating domestic sewage. Examples of such parties might include regional sewage treatment facilities not connected to a POTW (e.g., regional incinerators and composting facilities), landfill operators, contractors who purchase sludge from the POTW and distribute it to the public, or farmers who land apply sewage sludge.

In some cases, the most effective way to assure compliance with the technical standards may be to issue separate permits to the users or disposers of sludge. Accordingly, EPA is considering adding a provision to the Part 122 permit regulations to specifically provide for issuing permits to users or disposers of sewage sludge to implement technical standards where the permitting authority (EPA or an approved State) determines (either on a case-by-case basis or for a particular class or category of users or disposers) that a permit is necessary to assure compliance with applicable standards. Such permits might be particularly appropriate for parties which contract with the POTW to dispose of the sludge (e.g., regional sludge incinerators, landfills, commercial applicators and composting facilities). In such cases, where the POTW is not the ultimate user/disposer, and where the requirements applying to the disposal site are implemented directly through a permit or other control mechanism issued to the user/disposer, the POTW permit would contain only the requirements applicable to sludge quality, e.g., pollutant concentration limits. EPA solicits comments on the appropriateness of such permitting authority for other users and disposers, and of limiting the POTW permit in such cases to requirements as to sludge quality.

2. Specific Revisions to Part 122

a. *Purpose and Scope.* EPA proposes several revisions to § 122.1 to reflect the expanded scope of the NPDES program to include requirements for sludge use and disposal pursuant to section 405 of the CWA. The new scope of the NPDES program is discussed above. An additional revision worth noting involves section 405(d)(4) of the CWA. That section provides that:

> Prior to promulgation of regulations required by [§ 405(a)(2)], the Administrator shall impose conditions in permits issued to publicly owned treatment works under section 402 of this Act, or take such other measures as the Administrator deems appropriate to protect public health and the environment from any adverse effects which may occur from toxic pollutants in sewage sludge.

EPA reads this provision of the Act to authorize the development, on a case-by-case basis, of permit conditions to regulate sludge use and disposal practices whenever necessary to fulfill the purpose of the Act to protect public health and the environment from the adverse effects of sewage sludge. This authority is in addition to the authority to impose conditions in NPDES permits that implement the requirements of Part 503 (the technical standards) and applies whenever a technical standard in Part 503 does not address a particular pollutant or practice which EPA determines is of concern.

Similarly, EPA reads section 405(d)(4) to authorize imposition of sludge requirements in permits issued to non-POTWs (e.g., privately-owned treatment works treating domestic sewage, sludge incinerators unconnected to a facility treating domestic sewage) if necessary to protect public health and the environment prior to the promulgation of applicable Part 503 requirements. In sum, section 405(d)(4) grants EPA broad authority to include sludge requirements in NPDES permits whenever necessary to protect human health and the environment, whether before or after the promulgation of the technical standards in Part 503.

It has been suggested that EPA use the authority granted by section 405(d)(4) to write permit limits on a case-by-case, best professional judgment basis when an applicable Part 503 standard is outdated and therefore is no longer adequate to protect public health and the environment. This would allow EPA to use new information to write limits that implement the statutory standard without waiting until the completion of a new technical rulemaking, which can take several years to develop and finalize. The Agency solicits comments on whether writing case-by-case permit limits in this situation would be appropriate.

b. *Permit as a Shield.* Section 122.5 currently states that, except for standards or prohibitions under section 307(a) of the Act, "compliance with a permit during its term constitutes compliance * * * with sections 301, 302, 306, 307, 318, 403, and 405 of the CWA." This "permit as a shield" provision mirrors section 402(k) of the Act except that CWA section 402(k) does not include section 405 among those sections covered by the permit shield. Section 405 was included in the regulatory permit-as-shield provision because that section (section 405) merely clarified EPA's authority to require NPDES permits and establish effluent limitations for discharges of sewage sludge to surface waters to the same extent as for other pollutant discharges regulated through NPDES permits. See CWA section 405(a)–(b).

When Congress required permits for the implementation of section 405(d) requirements in the 1987 amendments, it did not make corresponding changes to section 402(k) to extend the permit shield to section 405(d) (i.e., the forthcoming Part 503 technical sludge standards). Moreover, Congress amended section 405(e) to provide, "It shall be unlawful for any person to dispose of sludge from a publicly owned treatment works or any other treatment works treating domestic sewage for any use for which regulations have been established pursuant to subsection (d) of this section, *except in accordance with such regulations*" (emphasis added). This language strongly suggests that the section 405(d) regulations are independently enforceable and supports the conclusion that Congress did not intend that compliance with sludge permit conditions would operate as a shield against liability for violations of the regulations.

EPA is proposing to revise § 122.5 to clearly indicate that compliance with a permit does not constitute compliance with section 405(d). Similar revisions are being proposed to § 122.41(a) and § 122.44. This means that persons subject to Part 503 requirements (both permittees and nonpermittees) may be liable for violations of those requirements even if the permit does not address the requirements.

EPA does not read the CWA to prohibit limited protection for permittees in all situations. In particular, EPA believes that it would be unfair to subject a permittee to an enforcement action for a violation of section 405 when the permittee was in compliance with permit terms specifically designed to implement the Part 503 standard allegedly violated. Providing protection to the permittee in this case reinforces the integrity of the permitting system and acknowledges the permittee's good faith efforts to comply with the section 405(d) regulations by complying with its permit. Accordingly, EPA is considering ways to protect permittees in this situation against possible enforcement actions for violating section 405(d) regulations.

One approach would be to adopt a limited affirmative defense which a permittee could assert in an enforcement action if it were in compliance with a permit condition developed to implement the Part 503 standard allegedly violated. Consistent with legislative intent, the defense would not be available if the permit did not address the requirement allegedly violated. Similarly, compliance with interim limits developed on a case-by-case basis pursuant to section 405(d)(4) would not qualify for the defense if the parameter or practice in question were subject to a subsequently promulgated requirement in Part 503 that addressed that parameter or practice.

Another approach would be to promulgate a regulation that deems permit conditions which implement particular Part 503 standards to be Part 503 standards. Therefore, compliance with those permit conditions would be compliance with Part 503 and hence, compliance with section 405(d) requirements.

EPA solicits comments on whether it should provide a protection to permittees against enforcement actions for violating section 405(d) where the permittee complies with permit conditions designed to implement applicable Part 503 requirements, and what the most appropriate way to do this would be.

c. *Application requirements.* Section 122.21 establishes application requirements for NPDES permittees. EPA is proposing revisions to this section both for "traditional" NPDES permittees and "sludge-only" permittees.

Currently, § 122.21(a) states that "any person who discharges or proposes to discharge pollutants" has a duty to apply for an NPDES permit. Today's proposal would revise this section to clearly state that "sludge-only permittees" also have a duty to apply for a permit. Today's proposal would also specify when sludge-only permittees would be required to apply: existing facilities within 120 days after promulgation of 40 CFR Part 503 (or earlier if necessary to protect public health and the environment); new facilities that commence operation after promulgation of 40 CFR Part 503, at least 180 days prior to the date proposed for commencing operation.

Today's proposal would also specify the application requirements for both sludge-only permittees and NPDES permittees that are POTWs or other treatment works treating domestic sewage by revising § 122.21(d)(3). This revision would require that these permit applicants submit the information required under 40 CFR 501.15(a)(2) (also proposed today). These information requirements are described above in the discussion about Part 501. EPA also plans to evaluate whether additional application requirements would be appropriate (for example, to collect data to assess the need for additional Part 503 standards).

d. *General permits.* Under the existing rule (§ 122.28), general permits may be issued to cover a category of discharges within a specified geographic area when all sources: (1) Involve the same or substantially similar type of operations; (2) discharge the same types of wastes; (3) require the same effluent limitation or operating conditions; (4) require the same or similar monitoring; and (5) in the opinion of the Director, are more appropriately controlled under a general permit than under individual permits. Clearly, under the circumstances described in § 122.28, general permits have the potential to significantly reduce the administrative burden of issuing individual permits without sacrificing environmental quality.

EPA today is proposing to amend § 122.28 so that general permits may be written to cover sludge use or disposal practices under the same type of circumstances as permits for effluent discharges. Under the proposal, for example, a general permit might be written to cover all facilities that use the same disposal method and are subject to the same sludge quality requirements and management practices. It would not be necessary that all facilities covered by the sludge general permit also qualify for a general permit covering their effluent discharges. Thus, it would be possible for a facility to be covered by an individual NPDES permit which regulates its discharges and by a general permit which regulates its sludge practices.

e. *Permit conditions.* Section 122.41 establishes "boilerplate" conditions which must be included in all NPDES permits while § 122.44 establishes requirements for developing individual limits for each permit. Today's proposal includes revisions to both of these sections to accommodate the need to include sludge-related conditions in permits.

Three of the revisions relate to the "permit as a shield" issue discussed above. First, § 122.41(a)(1) would be revised to state that the permittee has a duty to comply with standards promulgated pursuant to section 405(d) (i.e., Part 503) whether or not the permit has been modified to incorporate the standard. As explained earlier, this provision follows the clear intent of Congress. Requiring inclusion of this provision in all permits clearly notifies permittees of their potential liabilities under the Act for violations of section 405. In addition, a proposed revision to § 122.44(b) would require the permitting authority to modify the permit when Part 503 standards are promulgated after permit issuance if the standards are more stringent than existing permit limits. Similarly, a proposed revision to § 122.44(c) would require the permitting authority to include in permits a "reopener" clause, stating that the permit will be reopened to incorporate new section 405 standards under the circumstances described in § 122.44(b). All these revisions parallel existing requirements that apply to section 307(a) toxic effluent standards or prohibitions.

Another group of revisions to § 122.41 and § 122.44 relate to permittee monitoring requirements. Current regulations generally require that all monitoring be conducted in accordance with Part 136. Part 136 methods do not comprehensively address sludge monitoring and analysis. To supplement Part 136, Part 503 may specify required monitoring methodologies where Part 136 methods are inappropriate. Accordingly, EPA proposes to revise § 122.41(j)(4) and (l)(4)(ii) and § 122.44(i)(1)(iii) to state that sludge monitoring methodologies shall be as specified in Part 503, as well as Part 136.

In addition, current regulations require that permits contain requirements for permittee reports on monitoring results at a "frequency dependent on the nature and effect of the discharge, but in no case less than once a year." § 122.44 (i)(2). EPA proposes to revise this section to include reporting for sludge monitoring. Thus, the frequency for reporting of sludge monitoring results which must be specified in the permit would be based on the nature and effect of the permittee's sludge use or disposal activity. How frequently reporting is appropriate would be determined by the permit writer's best professional judgment, but must be required no less than once a year. (Note: Part 503 may also specify recommended or required monitoring frequencies for various parameters and practices. The Agency expects that Part 503 be followed whenever applicable).

As explained in the discussion about proposed Part 501 permit requirements, the Agency is soliciting comments on whether the regulations should establish a minimum monitoring frequency (where there is no applicable Part 503 technical requirement) and what that frequency should be (e.g., annual, quarterly, monthly).

Today's proposed revisions also address how monitoring must be reported. Section 122.41(1)(4) states that monitoring results must be reported on a "DMR." A DMR ("Discharge Monitoring Report") is the EPA uniform national form for the reporting of self-monitoring results by permittees, which must be used by approved NPDES States as well as EPA. At this time, EPA has not yet developed a uniform reporting form for the results of permittee monitoring of sludge activities regulated by permit. Accordingly, EPA proposes to revise § 122.41(l)(4)(i) and (ii) to state that monitoring of sludge use and disposal practices should be reported on forms specified by the Director (rather than on the DMR). EPA intends that the Director (EPA or an approved State) will develop forms to elicit the relevant data from the permittee based on the monitoring and other conditions in the permit. Alternatively, the Director could specify other appropriate forms for reporting monitoring information, such as the forms used by the laboratory to report results of its analyses.

Minor wording revisions are also being proposed today to establish that the activity or requirement addressed by Part 122 regulations includes sludge use and disposal activities as well as effluent discharge activities (e.g., § 122.41(d), "duty to mitigate"; § 122.64(a)(4), termination of permit when permittee ceases regulated activity; see also proposed revisions to § 123.44, EPA review of and objection to State permits). EPA also intends that other general provisions governing permit conditions which are not affected by today's proposed revisions apply to a permittee's sludge activities as well as to discharge activities covered by the permit where the existing language is broad enough to cover both discharge and sludge disposal activities (e.g., "need to halt or reduce activity not a defense" under § 122.41(c); "duty to provide information" under § 122.41(h); "inspection and entry" under § 122.41(i)).

Conversely, existing provisions which, by their own terms, are limited to effluent discharges and are not proposed to be revised today will continue to apply exclusively to the permittee's discharge activities (e.g., bypass and upset defenses (§ 122.41(m), (n)); new sources and new discharges (§ 122.29)). Minor revisions have also been made to some provisions that are clearly intended to apply only to discharge activities, but which, by their language, could be interpreted more broadly (e.g., § 122.44(e)(1), reissued permits; § 122.45(b)(1), production-based limits) to clarify that these provisions apply to discharge activities only.

f. *Permit modifications.* Under NPDES, permits may be modified or revoked and reissued only for cause. Section 122.62 lists the causes for which permit modification or revocation and reissuance is deemed permissible. Today, EPA proposes two revisions to this section related to sludge. First, § 122.62 (a)(1) is proposed to be revised to clarify that a permit may be modified (or revoked and reissued if the permittee agrees) when there is change in the permittee's sludge use or disposal practice after permit issuance which would justify the application of different or additional limits. This proposed revision directly relates to a corresponding proposal to require a permittee to notify the Director of any significant change in sludge use or disposal practices under § 122.41(1)(1)(iii). Both proposed revisions are intended to cover situations where the permittee decides to switch to a different sludge use or disposal practice than the one(s) described in the permit application and covered by the permit. It would not cover situations where the permittee alternates sludge practices (e.g., depending on the season) and the permit addresses each alternative.

The second revision would allow permit modification whenever required by a reopener clause to incorporate limits based on new standards for sludge use and disposal promulgated in 40 CFR Part 503. (In related revisions proposed today, permits must be modified when the new standards are more stringent than existing permit limits (§ 122.44(b) and the permit must contain a "reopener" clause to this effect (§ 122.44(c)(4)). As noted in earlier discussions, a permittee would be expected to comply with any applicable Part 503 standard by the statutory deadline even if its permit had not been revised to incorporate the standard. However, the proposed revision would give the permittee a basis for requesting modification of the permit to eliminate uncertainty about how the standard applies to the permittee's particular situation, when this is not readily apparent on the face of the regulation. Obtaining specific limits implementing a Part 503 requirement would have added importance if EPA decides to adopt a provision protecting a permittee from enforcement actions for complying with such limits.

E. Revisions to Part 124

Part 124 establishes the procedural requirements for issuing, modifying, and terminating permits under several federal programs, including NPDES. In today's action, EPA proposes to have the procedural requirements in Part 124 that apply to NPDES permits apply as well to "sludge-only" permits which would be issued by EPA under the proposed revisions to Part 122. Thus, § 124.1 is proposed to be revised to state that Part 124 governs "sludge only" permits issued by EPA. Similarly, § 124.71 (applicability of Subpart E governing evidentiary hearings) and § 124.111 (applicability of Subpart F governing non-adversary panel proceedings) are proposed to be revised to indicate that those subparts govern permits issued pursuant to section 405(f)(2) ("sludge only" permits). EPA intends these proposed revisions, together with the proposed revisions to Part 122 described above, to fulfill its statutory responsibility to establish procedures for EPA issuance of permits with sludge use and disposal requirements to treatment works which are not regulated under one of the permit programs listed in section 405(f) of the CWA.

In addition, EPA is proposing to make minor revisions to Part 124 which reflect the expanded content of NPDES permits to include requirements for sludge use and disposal. These proposed changes include: (1) Revisions to the definitions of "applicable standards and limitations", "facility or activity" and "general permit", and a new definition for "Class I sludge management facility;" (2) revision to § 124.6(d)(4) to require that draft permits include conditions necessary to meet the requirements of standards for sludge use and disposal; (3) revisions to §§ 124.8 and 124.56 to require that fact sheets be prepared for "Class I sludge management facilities" (§ 124.8) and contain an explanation of how sludge limits were derived and where the regulated activities or facilities are located (§ 124.56); (4) revisions to the public notice requirements in § 124.10 to require the permit authority to mail the public notice of a permit action to any agency known to have or be required to issue a sludge management permit or ocean dumping permit (§ 124.10(c)(1)(ii)) and to describe in the public notice the location of each sludge management facility (including disposal sites) and disposal or use practice (§ 124.10(d)(1)(vii) and (5) a revision to § 124.5(d) which would allow EPA to terminate a permit in the course of transferring permit responsibility to an approved State under § 501.14(b)(1) without having to issue a notice of intent to terminate (and following the procedures applicable to draft permits).

V. Request for Comments

The proposed rule is intended to provide a comprehensive programmatic framework for implementing the national sludge program mandated by the 1987 amendments to the CWA. In addition to the issues specifically raised in the preamble discussion, EPA requests comments on all aspects of today's proposed rule.

In the State program portion of today's rule, EPA has attempted to develop requirements that could be applied nationwide to assure minimum consistency among State programs and effective implementation of sludge standards through permits as envisioned by Congress in the 1987 CWA amendments. EPA is aware that States have already developed a variety of ways to implement sludge management programs. Therefore, EPA is particularly interested in hearing from States about their experiences in administering sludge management programs and in what specific areas additional flexibility is needed in the final State program rule.

Over 60 persons submitted comments in response to the February 4, 1986, proposed rules for state sludge management programs. Where still relevant (e.g., not rendered moot by the 1987 amendments to section 405 of the CWA), EPA will consider and respond to these comments, together with those received in response to today's proposal, in promulgating the final rules. Therefore, persons who commented on the earlier proposal need not resubmit their comments unless, of course, they wish to change them.

VI. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is major and, therefore, subject to the requirement of a Regulatory Impact Analysis. A major rule is defined as a regulation which is likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in the costs or prices for consumer, individual industries, Federal, State, and local government agencies, or geographic regions; or (3) significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Today's proposed rule establishes the mechanism (permits) for implementing standards for sludge use and disposal which are being promulgated under a separate rulemaking (to be codified at 40 CFR Part 503). The potential impacts of

these Part 503 standards on regulated parties and the need for a Regulatory Impact Statement will be considered in conjunction with that rulemaking.

The proposed rule also establishes requirements for the submission and approval of State sludge management programs. States are not required to seek program approval under these rules. In any event, the proposed rules would not impose large costs upon State regulatory agencies. Therefore, the proposed rule does not satisfy any of the criteria for a major rule as specified in section 1(b) of the Executive Order and as such does not constitute a major rulemaking. This regulation was submitted to the Office of Management and Budget (OMB) for review.

VII. Paperwork Reduction Act

The information collection requirements (ICRs) in this proposed rule have been submitted for approval to the Office of Management and Budget under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* An Information Collection Request document (ICR #1237) has been prepared by EPA and a copy may be obtained from Eric Strassler, Information Management Branch, EPA, 401 M Street SW. (PM-223), Washington, DC 20460, or by calling (202) 382–2709. Submit comments on the information collection requirements to EPA and to Timothy Hunt, Office of Information and Regulatory Affairs, OMB, 726 Jackson Place NW., Washington, DC 20503. The ICR document discusses reporting requirements imposed by the proposed rule and estimates the annual burden to respondents (POTWs, other treatment works treating domestic sewage, and States seeking EPA approval of their sludge management programs) for complying with these requirements. The final rule will respond to any OMB or public comments on the information collection requirements.

VIII. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, EPA is required to prepare a Regulatory Flexibility Analysis to assess the impact of its rules on small entities. No regulatory flexibility analysis is required, however, where the head of the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Today's proposed rule most directly affects State agencies. It also affects treatment works that generate and dispose of sewage sludge, by specifying that any applicable requirements promulgated under separate regulations be implemented through requirements in permits issued to the treatment works. In nearly all cases, these treatment works already are required to obtain the permits under existing federal or State programs. Accordingly, I hereby certify pursuant to 5 U.S.C. 605(b) that this amendment will not have a significant impact on a substantial number of small entities.

Lists of Subjects

40 CFR Part 122

Administrative practice and procedure, Confidential business information, Reporting and recordkeeping requirements, Sewage disposal, Waste treatment and disposal, Water pollution control.

40 CFR Part 123

Confidential business information, Hazardous materials, Reporting and recordkeeping requirements, Sewage disposal, Waste treatment and disposal, Water pollution control, Penalties.

40 CFR Part 124

Administrative practice and procedure, Air pollution control, Hazardous materials, Sewage disposal, Waste treatment and disposal, Water pollution control, Water supply, Indians—lands.

40 CFR Part 501

Confidential business information, Environmental protection, Reporting and recordkeeping requirements, Publicly owned treatment works, Sewage disposal, Waste treatment and disposal.

Date: February 25, 1988.

Lee M. Thomas,

Administrator.

For the reasons set forth in the preamble, 40 CFR Parts 122, 123, 124, and Chapter I of Title 40 of the Code of Federal Regulations are proposed to be amended as follows.

PART 122—EPA ADMINISTERED PERMIT PROGRAMS: THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

1. The authority citation for Part 122 continues to read as follows:

Authority: The Clean Water Act, 33 U.S.C. 1251 *et seq.*

2. Section 122.1 is proposed to be amended by revising paragraphs (a)(1), (d)(2), by adding new paragraphs (b)(3), (g)(5) and (g)(6) and redesignating existing paragraph (g)(5) as (g)(7) and revising it, and by redesignating the remaining paragraphs accordingly, to read as follows:

§ 122.1 Purpose and scope.

(a) * * *

(1) These regulations contain provisions for the *National Pollutant Discharge Elimination System* (NPDES) Program under section 318, 402, and 405 under The *Clean Water Act* (CWA) (Pub. L. 92–500, as amended by Pub. L. 95–217, Pub. L. 95–576, Pub. L. 96–483, Pub. L. 97–117, and Pub. L. 100–4; 33 U.S.C. 1251 *et seq.*)

* * * * *

(b) * * *

* * * * *

(3) The permit program established under this part also applies to the use and disposal of sewage sludge by owners or operators of any treatment works that treats domestic sewage, whether or not the treatment works is otherwise required to obtain an NPDES permit in accordance with paragraph (a)(1) of this section, unless all requirements implementing section 405(d) of CWA applicable to the treatment works are included in a permit issued under the appropriate provisions of Subtitle C of the Solid Waste Disposal Act, Part C of the Safe Drinking Water Act, the Marine Protection, Research, and Sanctuaries Act of 1972, or the Clean Air Act, or under State permit programs approved by the Administrator as adequate to assure compliance with section 405 of the CWA.

* * * * *

(d) * * *

* * * * *

(2) *Technical regulations.* The NPDES permit program has separate additional regulations. These separate regulations are used by permit-issuing authorities to determine what requirements must be placed in permits if they are issued. These separate regulations are located at 40 CFR Parts 125, 129, 133, 136, 40 CFR Subchapter N (Parts 400–460), and 40 CFR Part 503.

* * * * *

(g) * * *

* * * * *

(5) Section 405(d)(4) of the CWA requires the Administrator, prior to promulgation of standards for sewage sludge use and disposal, to "impose conditions in permits issued to publicly owned treatment works under section 402 of this Act, or take such other measures as the Administrator deems appropriate to protect public health and the environment from any adverse effects which may occur from toxic pollutants in sewage sludge."

(6) Section 405(f) provides that NPDES permits must include requirements implementing the standards for sludge use and disposal (40 CFR Part 503) "unless such requirements have been

included in a permit issued under the appropriate provisions of Subtitle C of the Solid Waste Disposal Act, Part C of the Safe Drinking Water Act, the Marine Protection, Research, and Sanctuaries Act of 1972, or the Clean Air Act, or under State permit programs approved by the Administrator * * *." Section 405(f) also authorizes the Administrator to issue permits with requirements for sludge use or disposal that assure compliance with 40 CFR Part 503 to any treatment works not subject to NPDES (i.e., have no point source discharge) and not covered by the other listed permit programs.

(7) Sections 402 (b) and (c), and 405 (c) and (f) of CWA authorize EPA approval of State permit programs for discharge from point sources, discharges to aquaculture projects, and disposal and use of sewage sludge.

* * * * *

3. Section 122.2 is proposed to be amended by revising the definitions of "applicable standards and limitations", "sewage sludge," "toxic pollutant," by adding a sentence to the definition of "facility or activity" and by adding definitions for "class I sludge management facilities," "standards for sewage sludge use and disposal," "distributor," "generator," "sludge use or disposal practice," "treatment works," and "user," as follows:

§ 122.2 Definitions.

* * * * *

Applicable standards and limitations means all State, interstate, and Federal standards and limitations to which a "discharge," a "sewage sludge use or disposal practice," or a related activity is subject under the CWA, including "effluent limitations," water quality standards, standards of performance, toxic effluent standards or prohibitions, "best management practices," pretreatment standards, and "standards for sewage sludge use or disposal" under sections 301, 302, 303, 304, 306, 307, 308, 403 and 405 of CWA.

* * * * *

Class 1 sludge management facilities means any sludge facility classified as such by the Regional Administrator, or, in the case of approved State programs, the Regional Administrator in conjunction with the State Director.

* * * * *

Distributor means the person responsible for distributing and marketing sewage sludge and sludge-derived products.

* * * * *

Facility or activity * * *. "Facility" also means all land and structures, other appurtenances and improvements on the land used for the treatment, storage, processing, utilization, or disposal of sewage sludge.

* * * * *

Generator means the owner or operator of a treatment works that treats domestic sewage (but not including individual household septic tanks or portable toilets) or any person whose act or process produces sewage sludge.

* * * * *

Sewage Sludge means any solids, semi-solid, or liquid residue which contains materials removed from municipal or domestic wastewater during treatment, including primary and secondary solids, septage, and portable toilet pumpings. "Septage" means the liquid and solid material pumped from a septic tank, cesspool, or similar domestic waste treatment system when the system is cleaned.

* * * * *

Sludge use or disposal practice means the collection, storage, treatment, transportation, processing, monitoring, use, or disposal of sewage sludge.

* * * * *

Sludge-only facility means any treatment works that treats domestic sewage and engages in "sludge use or disposal practices" subject to regulations promulgated pursuant to section 405(d) of the CWA, and is required to obtain a permit under § 122.1(b)(3) of this part.

Standards for sewage sludge use and disposal means the regulations promulgated at 40 CFR Part 503 pursuant to section 405(d) of the CWA which govern minimum requirements for sludge quality, management practices, and monitoring and reporting applicable to sewage use and disposal practices by treatment works treating domestic sewage and also by the users of sewage sludge.

* * * * *

Toxic Pollutant means any pollutant listed as toxic under section 307(a)(1) or, in the case of "sludge use or disposal practices," any pollutant listed as toxic in regulations implementing section 405(d) of the CWA.

Treatment works means any devices and systems used in the collection, storage, treatment, recycling, and reclamation of domestic sewage waste of a liquid nature, including land dedicated for the storage, treatment and disposal of sewage and resulting sludge.

User means the person responsible for proper end use of sewage sludge or sludge products.

* * * * *

4. Section 122.5 is proposed to be amended by revising paragraph (a) to read as follows:

§ 122.5 Effect of a permit.

(a) *Applicable to State programs § 123.25.* Except for any toxic effluent standards and prohibitions imposed under section 307 of the CWA and standards for sludge use and disposal under 405(d) of the CWA, compliance with a permit during its term constitutes compliance, for purposes of enforcement, with sections 301, 302, 306, 307, 318, 403, and 405(a)–(b) of CWA. However, a permit may be modified, revoked and reissued, or terminated during its term for cause as set forth in §§ 122.62 and 122.64.

* * * * *

5. Section 122.21 is proposed to be amended by revising paragraph (a), by redesignating (c) as (c)(1) and adding a new paragraph (c)(2), by redesignating paragraph (d)(3) as (d)(3)(*i*), and revising it and adding a new paragraph (d)(3)(ii) to read as follows:

§ 122.21 Application for a permit (applicable to State programs, see § 123.25).

(a) *Duty to apply.* Any person who discharges or proposes to discharge pollutants or who owns or operates a "sludge-only facility" and who does not have an effective permit, except persons covered by general permits under § 122.28, excluded under § 122.3, or a user of a privately owned treatment works unless the Director requires otherwise under § 122.44(m), shall submit a complete application (which shall include a BMP program if necessary under 40 CFR 125.102) to the Director in accordance with this section and Part 124.

* * * * *

(c) * * *

(2) Any existing "sludge-only facility" shall submit an application to the Director within 120 days after promulgation of 40 CFR Part 503 or upon request of the Director prior to the promulgation of 40 CFR Part 503 if the Director determines that a permit is necessary to protect public health and the environment from any adverse effects that may occur from toxic pollutants in sewage sludge. Any "sludge-only facility" that commences operations after promulgation of 40 CFR Part 503 shall submit an application to the Director at least 180 days prior to the date proposed for commencing operations.

* * * * *

(d) * * *

(3)(i) All applicants for EPA-issued permits, other than POTWs, new sources, and "sludge-only facilities," must complete Forms 1 and either 2b or 2c of the consolidated permit application forms to apply under § 122.21 and paragraphs (f), (g), and (h) of this section.

(ii) In addition to any other applicable requirements in this part, all POTWs and other treatment works treating domestic sewage, including "sludge-only facilities," must submit with their applications the information listed at 40 CFR 501.15(a)(2).

* * * * *

6. Section 122.28 is proposed to be amended by revising the introductory text of paragraphs (a)(1) and (a)(2)(ii) and by revising paragraphs (a)(2)(ii) (B), and (C) and paragraphs (b)(2)(i) (B), (C), and (F) to read as follows:

§ 122.28 General permits (applicable to State NPDES programs, see § 123.25).

(a) * * *

(1) *Area.* The general permit shall be written to cover a category of discharges or sludge use or disposal practices or facilities described in the permit under paragraph (a)(2)(ii) of this section, except those covered by individual permits, within a geographic area. * * *

* * * * *

(2) *Sources.* * * *

(ii) A category of point sources other than storm water point sources, or a category of sludge facilities, if the sources or facilities all:

(A) * * *

(B) Discharge the same types of wastes or engage in the same types of sludge use or disposal practices:

(C) Require the same effluent limitations, operating conditions, or standards for sludge use and disposal;

* * * * *

(b) * * *

(2) * * *

(i) * * *

(A) * * *

(B) The discharge or sludge facility is not in compliance with the conditions of the general NPDES permit;

(C) A change has occurred in the availability of demonstrated technology or practices for the control or abatement of pollutants applicable to the point source or sludge facility;

* * * * *

(F) Standards for sludge use and disposal have been promulgated for the sludge use and disposal practice covered by the general NPDES permit; or

* * * * *

7. Section 122.41 is proposed to be amended by revising paragraphs (a)(1), (d), (j)(4), by adding a new paragraph (l)(1)(iii), and by revising paragraphs (l)(4)(i) and (l)(4)(ii), to read as follows:

§ 122.41 Conditions applicable to all permits (applicable to State programs, see § 123.25).

* * * * *

(a) * * *

(1) The permittee shall comply with effluent standards or prohibitions established under section 307(a) of the Clean Water Act for toxic pollutants and with standards for sludge use and disposal established under section 405(d) of the CWA within the time provided in the regulations that establish these standards or prohibitions or standards for sludge use or disposal, even if the permit has not yet been modified to incorporate the requirement.

* * * * *

(d) *Duty to mitigate.* The permittee shall take all reasonable steps to minimize or prevent any discharge or sludge use or disposal in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

* * * * *

(j) * * *

(4) Monitoring results must be conducted according to test procedures approved under 40 CFR Part 136 or, in the case of sludge use or disposal, approved under 40 CFR Part 136 unless otherwise specified in 40 CFR Part 503, unless other test procedures have been specified in the permit.

* * * * *

(l) * * *

(1) * * *

(iii) The alteration or addition results in a significant change in the permittee's sludge use or disposal practices, and such alteration, addition, or change may justify the application of permit conditions that are different from or absent in the existing permit;

* * * * *

(4) * * *

(i) Monitoring results must be reported on a Discharge Monitoring Report (DMR) or forms provided or specified by the Director for reporting results of monitoring of sludge use or disposal practices.

(ii) If the permittee monitors any pollutant more frequently than required by the permit using test procedures approved under 40 CFR Part 136 or, in the case of sludge use or disposal, approved under 40 CFR Part 136 unless otherwise specified in 40 CFR Part 503, or as specified in the permit, the results of this monitoring shall be included in the calculation and reporting of the data submitted in the DMR or sludge reporting form specified by the Director.

* * * * *

8. Section 122.44 is proposed to be amended by redesignating paragraph (b) as paragraph (b)(1) and adding a new paragraph (b)(2), by adding a new paragraph (c)(4), by revising paragraphs (i)(1)(iii) and (i)(2), by adding a new paragraph (j)(3), and by revising paragraph (l)(1) to read as follows:

§ 122.44 Establishing limitations, standards, and other permit conditions (applicable to State NPDES programs, see § 123.25).

* * * * *

(b) * * *

(2) *Standards for sewage sludge use and disposal* under section 405(d) of the CWA unless those standards have been included in a permit issued under the appropriate provisions of Subtitle C of the Solid Waste Disposal Act, Part C of Safe Drinking Water Act, the Marine Protection, Research, and Sanctuaries Act of 1972, or the Clean Air Act, or under State permit programs approved by the Administrator. When there are no applicable standards for sewage sludge use or disposal, the permit shall include requirements developed on a case-by-case basis to protect public health and the environment from any adverse effects which may occur from toxic pollutants in sewage sludge. If any applicable standard for sewage sludge use and disposal is promulgated under section 405(d) of the CWA and that standard is more stringent than any limitation on the pollutant or practice in the permit, the Director shall initiate proceedings under these regulations to modify or revoke and reissue the permit to conform to the standard for sewage sludge use and disposal.

(c) * * *

(4) For any permit issued to a treatment works which treats domestic sewage (including "sludge-only facilities"), the Director shall include a reopener clause to incorporate any applicable standard for sludge use or disposal promulgated under section 405(d) of the CWA. The Director shall promptly modify or revoke and reissue any permit containing the reopener clause required by this paragraph if the standard for sludge use or disposal is more stringent than any requirements for sludge use or disposal in the permit, or controls a pollutant or practice not limited in the permit.

* * * * *

(i) * * *

(1) * * *

(iii) Other measurements as appropriate including pollutants in internal waste streams under § 122.45(i); pollutants in intake water for net limitations under § 122.45(f); frequency, rate of discharge, etc., for noncontinuous discharges under § 122.45(e); pollutants subject to notification requirements under § 122.42(a); and pollutants in sewage sludge or other monitoring (e.g., air emissions, groundwater monitoring) as specified in 40 CFR Part 503;

* * * * *

(2) Requirements to report monitoring results with a frequency dependent on the nature and effect of the discharge or the sludge use or disposal practice, but in no case less than once a year.

* * * * *

(j) * * *

(3) For POTWs which are "sludge-only facilities," a requirement to develop a pretreatment program under 40 CFR Part 403 when the Director determines that a pretreatment program is necessary to assure compliance with section 405(d) of the CWA.

* * * * *

(l) *Reissued permits.* (1) Except as provided in paragraph (l)(2) of this section when a permit is renewed or reissued, interim effluent limitations, standards or conditions must be at least as stringent as the final effluent limitations, standards, or conditions in the provisions in the previous permit (unless the circumstances on which the previous permit were based have materially and substantially changed since the time the permit was issued and would constitute cause for permit modification or revocation and reissuance under § 122.62.)

* * * * *

9. Section 122.45 is proposed to be amended by revising paragraph (b)(1) to read as follows:

§ 122.45 Calculating NPDES permit conditions (applicable to State NPDES programs, see § 123.25).

* * * * *

(b) *Production-based limitations.* (1) In the case of POTWs, permit effluent limitations, standards, or prohibitions shall be calculated based on design flow.

* * * * *

10. Section 122.47 is proposed to be amended by revising paragraph (a)(3)(i) to read as follows:

§ 122.47 Schedules of compliance.

(a) * * *

(3) * * *

(i) The time between interim dates shall not exceed 1 year, except that in the case of a schedule for compliance with standards for sewage sludge use and disposal, the time between interim dates shall not exceed six months.

* * * * *

11. Section 122.62 is proposed to be amended by revising paragraphs (a)(1) and (a)(7) to read as follows:

§ 122.62 Modification or revocation and reissuance of permits (applicable to State programs, see § 123.25).

* * * * *

(a) * * *

(1) *Alterations.* There are material and substantial alterations or additions to the permitted facility or activity (including a change or changes in the permittee's sludge use or disposal practice) which occurred after permit issuance which justify the application of permit conditions that are different or absent in the existing permit.

* * * * *

(7) *Reopener.* When required by the "reopener" conditions in a permit, which are established in the permit under § 122.44(b) (for CWA toxic effluent limitations and standards for sludge use and disposal, see also § 122.44 (c)) or 40 CFR 403.10 (e) (pretreatment program).

* * * * *

12. Section 122.64 is proposed to be amended by revising paragraph (a)(4) to read as follows:

§ 122.64 Termination of permits (applicable to State programs, see § 123.25).

(a) * * *

(4) A change in any condition that requires either a temporary or permanent reduction or elimination of any discharge or sludge use or disposal practice controlled by the permit (for example, plant closure or termination of discharge by connection to a POTW).

* * * * *

PART 123—STATE PROGRAM REQUIREMENTS

13. The authority citation for Part 123 continues to read as follows:

Authority: Clean Water Act, 33 U.S.C. 1251 *et seq.*

14. Section 123.1 is proposed to be amended by revising paragraphs (b) and (c) as follows:

§ 123.1 Purpose and scope.

* * * * *

(b) These regulations are promulgated under the authority of sections 101(e), 304(i), and 405(f) of CWA, and implement the requirements of those sections.

(c) The Administrator shall approve State programs which conform to the applicable requirements of this part. A State NPDES program will not be approved by the Administrator under section 402 of CWA unless it has authority to control the discharges specified in sections 318 and 405(a) of CWA. Permit programs under sections 318 and 405(a) will not be approved independent of a section 402 program. (Permit programs under section 405(f) of CWA (sludge management programs) may be approved independently of a section 402 permit program under 40 CFR Part 501.)

* * * * *

15. Section 123.2 of proposed to be revised to read as follows:

§ 123.2 Definitions.

The definitions in Part 122 and Part 501 apply to all subparts of this part.

16. Section 123.22 is proposed to be amended by adding a new paragraph (f) to read as follows:

§ 123.22 Program description.

* * * * *

(f) A State seeking approval of a sludge management program under section 405(f) of the CWA as part of its NPDES program in addition to the above requirements of this section, shall include the following:

(1) An inventory of all POTWs and other treatment works treating domestic sewage and a plan for developing and maintaining in inventory of all sewage sludge generators and disposal facilities in the State;

(2) An identification of any State program for regulating the disposal of septage and portable toilet pumpings if separate from the State's program for sewage sludge; and

(3) If applicable, a description of any bans or prohibitions imposed by State or local authorities on specific sewage sludge management practices.

17. Section 123.24 is proposed to be amended by revising the last sentence in the introductory text of paragraph (d), and by adding paragraph (d)(8) to read as follows:

§ 123.24 Memorandum of Agreement with the Regional Administrator.

* * * * *

(d) * * * While the Regional Administrator and the State may agree to waive EPA review of certain "classes or categories" of permits, no waiver of review may be granted for the following classes or categories:

* * * * *

(8) Facilities which are "Class I Sludge Management Facilities" as defined in 40 CFR 501.2.

* * * * *

18. Section 123.25 is proposed to be amended by revising the introductory text of paragraph (a) and by revising paragraph (a)(37) to read as follows:

§ 123.25 Requirements for permitting.

(a) All State Programs under this part must have legal authority to implement each of the following provisions and must be administered in conformance with each, except that a State which chooses not to administer a sludge management program pursuant to section 405(f) of the CWA as part of its NPDES program is not required to have legal authority to implement the portions of the following provisions which were promulgated after the enactment of the Water Quality Act of 1987 (Pub. L. 100-4) and which govern sewage sludge use and disposal. In all cases, States are not precluded from omitting or modifying any provisions to impose more stringent requirements:

* * * * *

(37) 40 CFR Parts 129, 133, Subchapter N and 40 CFR Part 503.

* * * * *

19. Section 123.26 is proposed to be amended by revising paragraphs (e) (1) and (5) to read as follows:

§ 123.26 Requirements for compliance evaluation programs.

* * * * *

(e) * * *

(1) Maintaining a comprehensive inventory of all sources covered by NPDES permits (including permits which implement section 405 of CWA where applicable) and a schedule of reports required to be submitted by permittees to the State agency.

* * * * *

(5) Inspecting the facilities of all major dischargers and all Class I sludge management facilities where applicable at least annually.

20. Section 123.44 is proposed to be amended by revising paragraphs (c)(5) and (c)(6) to read as follows:

§ 123.44 EPA review of and objections to State permits.

* * * * *

(c) * * *

(5) Any provisions of the proposed permit relating to the maintenance of records, reporting, monitoring, sampling, or the provision of any other information by the permittee are inadequate, in the judgment of the Regional Administrator, to assure compliance with permit conditions, including effluent standards and limitations or standards for sewage sludge use and disposal required by CWA, by the guidelines and regulations issued under CWA, or by the proposed permit;

(6) In the case of any proposed permit with respect to which applicable effluent standards and limitations or standards for sewage sludge use and disposal under sections 301, 302, 306, 307, 318, 403, and 405 of CWA have not yet been promulgated by the Agency, the proposed permit, in the judgment of the Regional Administrator, fails to carry out the provisions of CWA or of any regulations issued under CWA; the provisions of this paragraph apply to determinations made pursuant to § 125.3(c)(2) in the absence of applicable guidelines, to best management practices under section 304(e) of CWA, which must be incorporated into permits as requirements under sections 301, 306, 307, 318, 403 or 405, and to sewage sludge use and disposal requirements developed on a case-by-case basis pursuasnt to section 405(d) of CWA, as the case may be;

* * * * *

21. Section 123.45 is proposed to be amended by adding a new paragraph (e) to read as follows:

§ 123.45 Noncompliance and program reporting by the Director.

* * * * *

(e) *Sludge noncompliance program reports.* The Director shall prepare and submit quarterly noncompliance and annual program reports as required under 40 CFR 501.21. The Director may include this information in reports submitted in accordance with paragraphs (a)–(d) of this section.

PART 124—PROCEDURES FOR DECISIONMAKING

22. The authority citation for Part 124 continues to read as follows:

Authority: Resource Conservation and Recovery Act, 42 U.S.C. 6901 *et seq.*; Safe Drinking Water Act, 42 U.S.C. 300(f) *et seq.*; Clean Water Act, 33 U.S. 1251 *et seq.*; and Clean Air Act, 42 U.S.C. 1857 *et seq.*

23. Section 124.1 is proposed to be amended by revising the first sentence of paragraph (a) to read as follows:

§ 124.1 Purpose and scope.

(a) This part contains EPA procedures for issuing, modifying, revoking and reissuing, or terminating all RCRA, UIC, PSD and NPDES "permits" (including "sludge-only" permits issued pursuant to § 122.1(b)(3)), other than RCRA and UIC "emergency permits" (see §§ 270.61 and 144.34) and RCRA "permits by rule" (§ 270.60).* * *

* * * * *

24. Section 124.2 is proposed to be amended by revising paragraph (a), and by revising the definitions of "applicable standards and limitations," "Facility or activity," and the first sentence of "General permit" to read as follows:

§ 124.2 Definitions.

(a) In addition to the definitions given in §§ 122.2 and 123.2 (NPDES), 501.2 (sludge management), 144.3 and 145.2 (UIC), 233.3 (404), and 270.2 and 271.2 (RCRA), the definitions below apply to this part, except for PSD permits which are governed by the definitions in § 124.41.* * *

* * * * *

Applicable standards and limitations means all State, interstate, and Federal standards and limitations to which a "discharge", a "sludge use or disposal practice" or a related activity is subject under the CWA, including "standards for sewage sludge use and disposal", effluent limitations," water quality standards, standards of performance, toxic effluent standards or prohibitions, "best management practices," and pretreatment standards under sections 301, 302, 303, 304, 306, 307, 308, 403, and 405 of CWA.

* * * * *

Facility or activity means any "HWM facility," UIC "injection well," NPDES "point source" or "treatment works" as defined in § 501.2, or State 404 dredge or fill activity, or any other facility or activity (including land or appurtenances thereto) that is subject to regulation under the RCRA, UIC, NPDES, or 404 programs.

General permit (NPDES and 404) means an NPDES or 404 "permit" authorizing a category of discharges or activities under the CWA within a geographic area.* * *

25. Section 124.3 is proposed to be amended by revising the third and sixth sentences in paragraph (c) to read as follows:

§ 124.3 Application for a permit.

* * * * *

(c) * * * Each application for an EPA-issued permit submitted by an existing HWM facility (both Parts A and B of the application), existing injection well or existing NPDES source or sludge-only permittee should be reviewed for completeness within 60 days of receipt.* * * When the application is for an existing HWM facility, an existing UIC injection well or an existing NPDES source or sludge-only permittee the Regional Administrator shall specify in the notice of deficiency a date for submitting the necessary information.* * *

* * * * *

26. Section 124.6 is proposed to be amended by revising paragraph (d)(4)(v) to read as follows:

BEST COPY AVAILABLE

§ 124.6 Draft permits.

(d) * * *

(4) * * *

(v) NPDES permits, effluent limitations, standards, prohibitions, standards for sludge use and disposal, and conditions under §§ 122.41, 122.42, and 122.44, including when applicable any conditions certified by a State agency under § 124.55, and all variances that are to be included under § 124.63.

* * * * *

27. Section 124.8 is proposed to be amended by revising the first sentence in paragraph (a) to read as follows:

§ 124.8 Factsheet.

* * * * *

(a) A factsheet shall be prepared for every draft permit for a major HWM, UIC, 404, or NPDES facility or activity, for every Class I sludge management facility, for every 404 and NPDES general permit (§§ 237.37 and 122.28), for every NPDES draft permit that incorporates a variance or requires an explanation under § 124.56(b), and for every draft permit which the Director finds is the subject of widespread public interest or raises major issues. * * *

* * * * *

28. Section 124.10 is proposed to be amended by revising paragraphs (c)(1)(ii) and the first sentence in (d)(1)(vii) to read as follows:

§ 124.10 Public notice of permit actions and public comment period.

(c) * * *

(1) * * *

(ii) Any other agency which the Director knows has issued or is required to issue a RCRA, UIC, PSD (or other permit under the Clean Air Act), NPDES, 404, sludge management permit, or ocean dumping permit under the Marine Research Protection and Sanctuaries Act for the same facility or activity (including EPA when the draft permit is prepared by the State);

* * * * *

(d) * * *

(1) * * *

(vii) For NPDES permits only (including "sludge-only permits"), a general description of the location of each existing or proposed discharge point and the name of the receiving water and the location of each sludge management facility and disposal or use practice. For draft general permits, this requirement will be satisfied by a map or description of the permit area. * * *

* * * * *

29. Section 124.56 is proposed to be amended by revising paragraphs (a) and (c) to read as follows:

§ 124.56 Factsheets.

* * * * *

(a) Any calculations or other necessary explanation of the derivation of specific effluent limitation and conditions or standards for sludge use and disposal, including a citation to the applicable effluent limitation guideline, performance standard, or standard for sludge use and disposal as required by § 122.44 and reasons why they are applicable or an explanation of how the alternate effluent limitations were developed.

* * * * *

(c) When appropriate, a sketch or detailed description of the location of the discharge or regulated activity described in the application; and

* * * * *

30. Section 124.71 is proposed to be amended by revising the first sentence in paragraph (a) to read as follows:

§ 124.71 Applicability.

(a) The regulations in this subpart govern all formal hearings conducted by EPA under CWA sections 402 and 405 (f), except those conducted under Subpart F. * * *

* * * * *

31. Section 124.111 is proposed to be amended by revising the first sentence of paragraph (a)(1)(i) to read as follows:

§ 124.111 Applicability.

(a) * * *

(1) * * *

(i) In any proceedings for the issuance of any NPDES permit under CWA sections 402 and 405(f) which constitute "initial licensing" under the Administrative Procedure Act, when the Regional Administrator elects to apply this subpart and explicitly so states in the public notice of the draft permit under § 124.10 or in a supplemental notice under § 124.14. * * *

* * * * *

31. Chapter I Of Title 40 of the Code of Federal Regulations is proposed to be amended by adding a new Subchapter O consisting of Part 501 to read as follows:

SUBCHAPTER O—SEWAGE SLUDGE

PART 501—STATE SLUDGE MANAGEMENT PROGRAM REGULATIONS

Subpart A—Purpose, Scope, and General Program Requirements

Sec.
501.1 Purpose and scope.
501.2 Definitions.
501.3 Coordination with other programs.

Subpart B—Development and Submission of State Programs

501.11 Elements of a sludge management program submission.
501.12 Program description.
501.13 Attorney General's statement.
501.14 Memorandum of Agreement with the Regional Administrator.
501.15 Requirements for permitting.
501.16 Requirements for compliance evaluation programs.
501.17 Requirements for enforcement authority.
501.18 Prohibition.
501.19 Sharing of information.
501.20 Receipt and use of Federal information.
501.21 Program reporting to EPA.

Subpart C—Program Approval, Revision and Withdrawal

501.31 Review and approval procedures.
501.32 Procedures for revisions of State programs.
501.33 Criteria for withdrawal of State programs.
501.34 Procedures for withdrawal of State programs.

Authority: The Clean Water Act, 33 U.S.C. 1251 et seq.

Subpart A—Purpose, Scope and General Program Requirements

§ 501.1 Purpose and scope.

(a) These regulations are promulgated under the authority sections 101(e), 303(e), 304(i), 405(f) and 501(a) of the CWA, and implement the requirements of those Sections.

(b) This part specifies the procedures EPA will follow in approving, revising, and withdrawing State sludge management programs under 405(f) that are not part of a State's NPDES program, and the requirements State programs must meet to be approved by the Administrator under section 405 of CWA. Sludge Management Program submissions may be developed and implemented under any existing or new State authority or authorities as long as they meet the requirements of this part. (States seeking approval of their sludge program as part of their NPDES program are to follow the requirements and procedures for program modification set forth in Part 123.)

(c) Any complete State Sludge Management Program submitted for approval under this Part shall have the following as a minimum:

(1) The authority to require compliance with sludge use and disposal requirements issued under section 405(d) of the CWA, including compliance by federal facilities;

(2) A requirement to prohibit sludge use and disposal except in compliance with a permit issued to a POTW or other treatment works treating domestic sewage that applies and ensures compliance with applicable requirements of 40 CFR Part 503 and section 405 of the Clean Water Act, and procedures for issuance of such permits;

(3) Provisions for regulating the use or disposal of sewage sludge by non-permittees;

(4) The authority to take actions to protect public health and the environment from any adverse effects that may occur from toxic pollutants in sewage sludge; and

(5) The authority to abate violations of the State sludge program, including civil and criminal penalties and other ways and means of enforcement.

(d) In addition, any complete State Sludge Management Program submitted for approval under this part shall have authority to address:

(1) All sewage sludge management practices used in the State, including associated transport and storage, that are practiced or planned to be practiced in the State. Sludge management activities and practices shall include as applicable:

(A) Sludge treatment, processing, and short-term storage practices, including:

(i) Digestion, composting, heat treatment, and drying,

(ii) Lagoons, stockpiles, and other surface impoundments,

(iii) Sludge treatment, processing and transport activities, as may be covered by Federal regulations.

(B) Sludge use and ultimate disposal practices, including:

(i) Land application,

(ii) Landfill,

(iii) Distribution & marketing,

(iv) Incineration,

(v) Ocean disposal, and

(vi) Any other sludge use and disposal practices as may be covered by Federal regulations.

(e) A State may assign portions of its program responsibilities to local agencies, provided that

(1) No assignment is made to a local agency under the jurisdiction of a political subdivision which owns or operates a POTW or other facility that treats or disposes of sewage sludge;

(2) The program description required by § 501.12 of this part identifies any assignment of program responsibilities to the local agency(ies) and includes copies of any documents which affect the assignment and contain agreements between the State agency and the local agency(ies) defining their respective program responsibilities;

(3) The Attorney General's Statement required by § 501.13 of this part states that any assignment of program responsibilities to the local agency(ies) described in the program description is valid under State law and that State and local law do not otherwise prohibit the local agency(ies) from executing the program responsibilities assigned by the State agency;

(4) The Memorandum of Agreement (MOA) required by § 501.14 of this part includes adequate provisions for the State agency's oversight of the program responsibilities assigned to the local agency(ies);

(5) The State agency retains all responsibility for the program reporting required by § 501.21 of this part and for all other activities required by this part or by the MOA related to EPA oversight of the State's approved program; and

(6) The State agency retains full authority and ultimate responsibility for administering all aspects of the State's approved program in accordance with the requirements of this part and the MOA.

(f) The Administrator will approve State programs which conform to the applicable requirements of this part.

(g) Upon approval of a State program, the Administrator will suspend the issuance of Federal permits for those activities subject to the approved State program. After program approval EPA will retain jurisdiction over any permits (including general permits) which it has issued unless arrangements have been made with the State in the Memorandum of Agreement for the State to assume responsibility for these permits. Retention of jurisdiction will include the processing of any permit appeals, modification requests, or variance requests; the conduct of inspections, and the receipt and review of self-monitoring reports. If any permit appeal, modification request, or variance request is not finally resolved when the Federally issued permit expires, EPA may, with the consent of the State, retain jurisdiction until the matter is resolved.

(h) Notwithstanding approval of a State sludge program, EPA has the authority to take enforcement actions for any violations of this part or section 405 of the CWA.

(i) Any State program approved by the Administrator shall at all times be conducted in accordance with the requirements of this part.

(j) Nothing in this part precludes a State or political subdivision thereof, or interstate agency, from adopting or enforcing requirements established by State or local law that are more stringent or more extensive than those required in this part or in any other Federal statute or regulation.

(k) Nothing in this part precludes a State from operating a program with a greater scope of coverage than that required under this part. If an approved State program has greater scope of coverage than required by Federal law the additional coverage is not part of the Federally approved program.

(l) Sections 106 (a) and (d) of the Marine Protection, Research, and Sanctuaries Act (MPRSA), 33 U.S.C. 1416, generally preclude States from regulating or issuing permits for ocean dumping. Nothing in this regulation is intended to confer on the States the authority to engage in the regulation or permitting of ocean dumping in contravention of the provisions of sections 106 (a) and (d) of the MPRSA.

§ 501.2 Definitions.

"Approved program" means a State program which has received EPA approval under this part.

"Class I sludge management facility" means any sludge facility classified as such by the Regional Administrator in conjunction with the State Program Director.

"Disposal practice" means the emitting, discharging, depositing, injection, dumping, spilling, leaking, or placing of any solid waste or hazardous waste into or on any land, air, or water so that such solid waste or hazardous waste or any constituent thereof may enter the environment or be emitted into the air or discharged into any waters, including groundwaters.

"Distributor" means the person responsible for distributing and marketing sewage sludge and sludge-derived products.

"Facility" means all land and structures, other appurtenances, and improvements on the land used for the treatment, storage, processing, utilization, or disposal of sewage sludge.

"Generator" means the owner or operator of a treatment works (but not including individual household septic tanks or portable toilets) or any person whose act or process produces sewage sludge.

"Municipality," as defined in section 502(4) of the Clean Water Act, means a city, town, borough, county, parish, district, association, or other public body (including an intermunicipal agency of two or more of the foregoing entities) created under State law, (or an Indian tribe or an authorized Indian tribal organization,) having jurisdiction over sewage sludge management, or a designated and approved management agency under section 208 of the Clean Water Act. This definition includes a special district created under State law such as a water district, sewer district, sanitary district, utility district, drainage district, or similar entity, or an integrated waste management facility.

"Permit" means an authorization, license, or equivalent control document issued by EPA or an "approved State" to implement the requirements of this part.

"Publicly Owned Treatment Works" or "POTW" means a "treatment works" which is owned by a State or municipality.

"Septage" means the liquid and solid material pumped from a septic tank, cesspool, or similar domestic waste treatment system when the system is cleaned.

"Sewage sludge" means any solid, semi-solid, or liquid residue which contains materials removed from municipal or domestic wastewater during treatment, including primary and secondary solids, septage, and portable toilet wastes.

"Sludge management practice" means the collection, storage, treatment, transportation, processing, monitoring, use or disposal of sewage sludge.

"State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariane Islands. "State" also means an Indian tribe which is eligible for treatment as a State under regulations promulgated under section 518 of the CWA.

"State Program Director" or "Director" means the chief executive officer of the State sewage sludge management agency.

"State sewage sludge management agency" means the agency designated by the Governor as having the lead responsibility for managing or coordinating the approved State program under this part.

"Treatment works" means any devices and systems used in the collection, storage, treatment, recycling, and reclamation of municipal sewage waste of a liquid nature, including land dedicated for the storage, treatment and disposal of sewage and resulting sludge.

"Use" or "utilization practice" means the treatment or final disposition of a waste material involving resource recovery, recycling, or beneficial use of all or part of the material for such purposes as energy recovery, and soil fertilization or conditioning.

"User(s)" means the person(s) responsible for proper end use of sewage sludge or sludge products.

§ 501.3 Coordination with other programs.

Issuance of State permits under this part may be coordinated with issuance of RCRA, UIC, NPDES, 404 and other permits whether they are controlled by the State, EPA, or the Corps of Engineers. (See for example 40 CFR 124.4 for procedures for coordinating permit issuance.)

Subpart B—Development and Submission of State Programs

§ 501.11 Elements of a sludge management program submission.

(a) Any State that seeks to administer a program under this part shall submit to the Administrator at least three copies of a program submission. The submission shall contain the following:

(1) A letter from the Governor of the State requesting program approval;

(2) A complete program description, as required by § 501.12 describing how the State intends to carry out its responsibilities under this part;

(3) An Attorney General's statement as required by § 501.13;

(4) A Memorandum of Agreement with the Regional Administrator as required by § 501.14; and

(5) Copies of all applicable State statutes and regulations, including those governing State administrative procedures.

(b) Within 30 days of receipt by EPA of a State program submission, EPA will notify the State whether its submission is complete. If EPA finds that a State's submission is complete, the 90-day review period will be deemed to have begun on the date of the completeness determination. If EPA finds that a State's submission is incomplete, the review period will not begin until all the necessary information is received by EPA.

(c) If the State's submission is materially changed during the review period, the review period will begin again upon receipt of the revised submission.

(d) The State and EPA may extend the review period by agreement.

§ 501.12 Program description.

Any State that seeks to administer a program under this part shall submit a description of the program it proposes to administer in lieu of the Federal program under State law or under any interstate compact. The program description shall include:

(a) A description in narrative form of the scope, structure, coverage and processes of the State program.

(b) A description (including organization charts) of the organization and structure of the State agency or agencies which will have responsibility for administering the program, including the information listed below. If more than one agency is responsible for administration of a program, each agency must have statewide jurisdiction over a class of activities. The reponsibilities of each agency must be delineated, their procedures for coordination set forth, and an agency must be designated as a "lead agency" to facilitate communications between EPA and the State agencies having program responsibility. If the State proposes to administer a program of greater scope of coverage than is required by Federal law, the information provided under this paragraph shall indicate the resources dedicated to administering the federally required portion of the program. This description shall include:

(1) A description of the State agency staff who will carry out the State program, including the number, occupations, and general duties of the employees. The State need not submit complete job descriptions for every employee carrying out the State program;

(2) An itemization of the estimated costs of establishing and administering the program including cost of the personnel listed in paragraph (b)(1) of this section, cost of administrative support, and cost of technical support; and

(3) An estimate of the available resources for implementing the program.

(c) A description of applicable State procedures, including permitting procedures, and any State administrative or judicial review procedures.

(d) Copies of the permit form(s), application form(s), and reporting form(s) the State intends to employ in its program.

(e) A complete description of the State's compliance tracking and enforcement program (see 40 CFR 501.16 and 501.17).

(f) An inventory of all POTWs and other treatment works treating domestic sewage who generate, use or dispose of sewage sludge and procedures for developing an inventory of all sewage sludge generators and disposal facilities in the State;

(g) An identification of the State's program for regulating the disposal of septage and portable toilet pumpings if separate from the State's program for sewage sludge; and

(h) If applicable, a desciption of any bans or prohibitions imposed by State or local authorities on specific sewage sludge management practices.

§ 501.13 Attorney General's statement.

(a) Any State that seeks to administer a program under this part shall submit a statement from the State Attorney General (or the attorney for those State or interstate agencies which have independent legal counsel) that the laws of the State, or an interstate compact, provide adequate authority to carry out the program described under § 501.12 and to meet the requirements of this part. This statement shall include citations to the specific statutes, administrative regulations, and, where appropriate, judicial decisions which demonstrate adequate authority. State statutes and regulations cited by the State Attorney General or independent legal counsel shall be in the form of lawfully adopted State statutes and regulations at the time the statement is signed and shall be fully effective by the time the program is approved. To qualify as "independent legal counsel" the attorney signing the statement required by this section must have full authority to independently represent the State agency in court on all matters pertaining to the State program. If a State seeks to carry out the program on Indian lands, the statement shall include an appropriate opinion and analysis of the State's authority.

§ 501.14 Memorandum of Agreement with the Regional Administrator.

(a) Any State that seeks to administer a program under this part shall submit a Memorandum of Agreement. The Memorandum of Agreement shall be executed by the State Program Director and the Regional Administrator and shall become effective when approved by the Administrator. In addition to meeting the requirements of paragraph (b) of this section, the Memorandum of Agreement may include other terms, conditions, or agreements consistent with this part and relevant to the administration and enforcement of the State's regulatory program. The Administrator shall not approve any Memorandum of Agreement which contains provisions which restrict EPA's oversight responsibility.

(b) The Memorandum of Agreement shall include the following:

(1) Provisions for the prompt transfer from EPA to the State of pending permit applications and any other information relevant to program operation not already in the possession of the State Director (e.g., support files for permit issuance, compliance reports, etc.). If existing permits are transferred from EPA to the State for administration, the Memorandum of Agreement shall contain provisions specifying a procedure for transferring the administration of these permits. If a State lacks the authority to directly administer permits issued by the Federal government, a procedure may be established to transfer responsibility for these permits.

(2) Provisions specifying classes and categories of permit applications, draft permits, and proposed permits that the State will send to the Regional Administrator for review, comment and, where applicable, objection. EPA shall follow the permit review procedures set forth in 40 CFR 123.44, except that where a State issues a general permit for sludge, the review by the Office of Water Enforcement and Permits provided in § 123.44(a)(2) for NPDES general permits will not apply.

(3) The Memorandum of Agreement shall also specify the extent to which EPA will waive its right to review, object to, or comment upon State-issued permits under section 402(d)(3), (e) or (f) of CWA. While the Regional Administrator and the State may agree to waive EPA review of certain "classes or categories" of permits, no waiver of review may be granted for facilities which are "Class I Sludge Management Facilities" as defined in § 501.2.

(4) Whenever a waiver is granted under paragraph (3) of this section, the Memorandum of Agreement shall contain a statement that the Regional Administrator retains the right to terminate the waiver as to future permit actions, in whole or in part, at any time by sending the State Director written notice of termination.

(5) Provisions specifying the frequency and content of reports, documents and other information which the State is required to submit to EPA. The State shall allow EPA to routinely review State records, reports, and files relevant to the administration and enforcement of the approved program. State reports may be combined with grant reports where appropriate. The procedures shall implement the requirements of § 501.21.

(c) The Memorandum of Agreement shall also provide for the following:

(1) Prompt transmission to the Regional Administrator of notice of every action taken by the State agency related to the consideration of any permit application or general permit, including a copy of each proposed or draft permit and any conditions, requirements, or documents which are related to the proposed or draft permit or which affect the authorization of the proposed permit, except those for which permit review has been waived under paragraph (b)(3) of this section. The State shall supply EPA with copies of notices for which permit review has been waived whenever requested by EPA; and

(2) Transmission to the Regional Administrator of a copy of every permit issued to a Class I Sludge Management Facility. Copies of final permits issued to other sludge management facilities shall be transmitted to the Regional Administrator upon request.

(3) Provisions on the State's compliance monitoring and enforcement program, including:

(i) Provisions for coordination of compliance monitoring activities by the State and by EPA. These may specify the basis on which the Regional Administrator will select facilities or activities within the State for EPA inspection. The Regional Administrator will normally notify the State at least 7 days before any such inspection; and

(ii) Procedures to assure coordination of enforcement activities.

(4) When appropriate, provisions for joint processing of permits by the State and EPA for facilities or activities which require permits from both EPA and the State under different programs (See for example 40 CFR 124.4).

(5) Provisions for modification of the Memorandum of Agreement in accordance with this part.

(d) The Memorandum of Agreement, the annual program grant and the State/EPA Agreement should be consistent. If the State/EPA Agreement indicates that a change is needed in the Memorandum of Agreement, the Memorandum of Agreement may be amended through the procedures set forth in this part. The State/EPA Agreement may not override the Memorandum of Agreement.

§ 501.15 Requirements for permitting.

(a) *General requirements.* All State programs under this Part shall have legal authority to implement each of the following provisions and must be administered in conformance with each, except that States are not precluded from omitting or modifying any provisions to impose more stringent requirements:

(1) *Confidentiality of information.* State programs shall deny claims of confidentiality for the following information:

(i) The name and address of any permit applicant or permittee;

(ii) Permit applications, permits, and effluent data. This includes information submitted on the forms themselves and any attachments used to supply information required by the forms.

(2) *Information requirements.* All applicants for permits shall provide the following information to the Director:

(i) The activities conducted by the applicant which require it to obtain a permit.

(ii) Name, mailing address, and location of the facility for which the application is submitted.

(iii) The operator's name, address, telephone number, ownership status, and status as Federal, State, private, public, or other entity.

(iv) Whether the facility is located on Indian lands.

(v) A listing of all permits or construction approvals received or applied for under any of the following programs:

(A) Hazardous Waste Management program under RCRA.

(B) UIC program under SDWA.

(C) NPDES program under CWA.

(D) Prevention of Significant Deterioration (PSD) program under the Clean Air Act.

(E) Nonattainment program under the Clean Air Act.

(F) National Emission Standards for Hazardous Pollutants (NESHAPS) preconstruction approval under the Clean Air Act.

(G) Ocean dumping permits under the Marine Protection, Research, and Sanctuaries Act.

(H) Dredge or fill permits under section 404 of CWA.

(I) Other relevant environmental permits, including State permits.

(vi) A topographic map (or other map if a topographic map is unavailable) extending one mile beyond the property boundaries of the source, depicting the location of the sludge management facilities (including disposal sites).

(vii) Any sludge monitoring data the applicant may have which is representative of normal operating conditions at the facility, including available ground water monitoring data, with a description of the well locations, for landfills or land application sites (see Appendix 1 to 40 CFR Part 257).

(viii) A description of the applicant's sludge use and disposal practices (including, where applicable, the location of any sites where the applicant transfers sludge for treatment and/or disposal, as well as the name of the applicator or other contractor who land applies sludge if different from the applicant, and the name of any distributors when the sludge will be disposed of through distribution and marketing, if different from the applicant).

(ix) Annual sludge production volume.

(x) Any information required to determine the appropriate standards for permitting under 40 CFR Part 503 and

(xi) Any other information the Program Director may request and reasonably require to assess the sludge use and disposal practices, to determine whether to issue a permit, or to ascertain appropriate permit requirements.

(3) *Recordkeeping.* Applicants shall keep records of all data used to complete permit applications and any supplemental information submitted under this section for a period of at least three years from the date the application is signed.

(4) *Signatories to permit applications and reports* as provided in 40 CFR 122.22.

(5) *Duration of permits.* (i) 405(f) permits shall be effective for a fixed term not to exceed 5 years.

(ii) The term of a permit shall not be extended by modification beyond the maximum duration specified in this section.

(iii) The Director may issue any permit for a duration that is less than the full allowable term under this section.

(6) *Schedules of compliance*—(i) *General.* The permit may, when appropriate, specify a schedule of compliance leading to compliance with CWA and regulations. Any schedules of compliance under this section shall require compliance as soon as possible, but not later than the applicable statutory deadline under the CWA.

(ii) *Interim dates.* If a permit establishes a schedule of compliance which exceeds 1 year from the date of permit issuance, the schedule shall set forth interim requirements and the date for their achievement. The time between interim dates shall not exceed six months.

(iii) *Reporting.* The permit shall be written to require that no later than 14 days following each interim date and the final date of compliance, the permittee shall notify the Director in writing of its compliance or noncompliance with the interim or final requirements, or submit progress reports if paragraph (a)(6)(ii) of this section is applicable.

(7) *Conflict of interest.* State sludge management programs shall ensure that any board or body which approves all or portions of permits shall not include as a member any person who receives, or has during the previous two years received, a significant portion of income directly or indirectly from permit holders or applicants for a permit.

(i) For the purposes of this paragraph:

(A) "Board or body" includes any individual, including the Director, who has or shares authority to approve all or portions of permits either in the first instance, as modified or reissued, or on appeal.

(B) "Significant portion of income" means 10 percent or more of gross personal income for a calendar year, except that it means 50 percent or more of gross personal income for a calendar year if the recipient is over 60 years of age and is receiving that portion under retirement, pension, or similar arrangement.

(C) "Permit holders or applicants for a permit" does not include any department or agency of a State government, such as a Department of Parks or a Department of Fish and Wildlife.

(D) "Income" includes retirement benefits, consultant fees, and stock dividends.

(E) Income is not received "directly or indirectly from permit holders or applicants for a permit" when it is derived from mutual fund payments, or from other diversified investments for which the recipient does not know the identity of the primary sources of income.

(b) *Permit conditions applicable to all permits.* In addition to permit conditions which must be developed on a case-by-case basis in order to meet all requirements of 40 CFR Part 503, section 405 of the CWA, and paragraph (a) (1)–(6) of this section, all permits shall contain the following:

(1) *Duty to comply.* The permittee must comply with all conditions of this permit. Any permit noncompliance constitutes a violation of the Clean Water Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or denial of a permit renewal application.

(2) *Compliance with sludge standards.* The permittee shall comply with standards for sludge and disposal established under section 405(d) of the CWA within the time provided in the regulations that establish such standards, even if the permit has not yet been modified to incorporate the standards.

(3) *CWA penalties.* Section 309 of the Clean Water Act (CWA) sets out penalties applicable to persons who violate the Act's requirements. For example, section 309(d) provides that any person who violates a permit condition implementing section 301, 302, 306, 307, 308, 318, or 405 of the Clean Water Act is subject to a civil penalty not to exceed $25,000 per day for each violation. Such violations also may be subject to administrative penalties assessed by the Administrator pursuant to section 309(g) of the CWA. Any person who negligently violates permit conditions implementing section 301, 302, 306, 307, 308, or 405 of the Clean Water Act is subject to a fine not less than $2,500 nor more than $25,000 per day of violation or by imprisonment for not more than 1 year, or both. Any person who knowingly violates a permit condition implementing section 301, 302, 304, 307, 308, or 405 shall be punished by a fine not less than $5,000 nor more than $50,000 per day of violation, or by imprisonment for not more than 3 years or both.

(4) *Need to halt or reduce activity not a defense.* It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

(5) *Duty to mitigate.* The permittee shall take all reasonable steps to minimize or prevent sludge use or disposal in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

(6) *Proper operation and maintenance.* The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance also includes adequate laboratory controls and appropriate quality assurance procedures.

(7) *Permit actions.* This permit may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition.

(8) *Duty to provide information.* The permittee shall furnish to the Director, within a reasonable time, any information which the Director may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit or to determine compliance with this permit. The permittee shall also furnish to the Director, upon request, copies of records required to be kept by this permit.

(9) *Inspection and entry.* The permittee shall allow the Director, or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to:

(i) Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit;

(ii) Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;

(iii) Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and

(iv) Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act, any substances, parameters or practices at any location.

(10) *Monitoring and records.* (i) The permittee shall report monitoring results with a frequency dependent on the nature and effect of its sludge use or disposal practices, but in no case less than once a year.

(ii) Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity. The permittee shall retain records of all monitoring information, copies of all reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least 3 years from the date of the sample, measurement, report or application. This period may be extended by request of the Director at any time.

(iii) Records of monitoring information shall include:

(A) The date, exact place, and time of sampling or measurements;

(B) The individual(s) who performed the sampling or measurements;

(C) The date(s) analyses were performed;

(D) The individual(s) who performed the analyses;

(E) The analytical techniques or methods used; and

(F) The results of such analyses.

(iv) Monitoring must be conducted according to test procedures specified in 40 CFR Part 136 or 503 unless other test procedures have been specified in this permit.

(v) The Clean Water Act provides that any person who knowingly falsifies, tampers with, or renders inaccurate any monitoring device or method required to be maintained under this permit shall, upon conviction, be punished for the first conviction by a fine of not more than $10,000 or by imprisonment for not more than 2 years per violation, or by both. Subsequent convictions for the same offense are punishable by a fine of not more than $20,000 per day of violation, or imprisonment of not more than 4 years, or both.

(11) *Signatory requirements.* (i) All applications, reports, or information submitted to the Director shall be signed and certified according to the provisions of 40 CFR 122.22.

(ii) The CWA provides that any person who knowingly makes any false statement, representation, or certification in any record or other document submitted or required to be maintained under this permit shall, upon conviction, be punished for the first conviction by a fine of not more than $10,000 per violation, or by imprisonment for not more than 2 years per violation, or by both. Subsequent convictions shall be punishable by a fine of not more than $20,000 per day of violation or by imprisonment of not more than 4 years, or by both.

(12) *Notice requirements*— (i) *Planned changes.* The permittee shall give notice to the Director as soon as possible of any planned physical alterations or additions to the permitted facility, or changes planned in the permittee's sludge disposal practice, where such alterations, additions, or changes may justify the application of permit conditions that are different from or absent in the existing permit, including notification of additional disposal sites not reported during the permit application process.

(ii) *Anticipated noncompliance.* The permittee shall give advance notice to the Director of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements.

(iii) *Transfers.* This permit is not transferable to any person except after notice to the Director. The Director may require modification or revocation and reissuance of the permit to change the name of the permittee and incorporate such other requirements as may be necessary under the CWA.

(iv) *Other noncompliance reporting.* The permittee shall report all instances of noncompliance.

(v) *Other information.* Where the permittee becomes aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to the Director, it shall promptly submit such facts or information.

(13) *Reopener.* If an applicable "acceptable management practice" or numerical standard for pollutants in sewage sludge promulgated under section 405(d)(2) of the Clean Water Act as amended by the Water Quality Act of 1987 is more stringent than the sludge pollutant limit or acceptable management practice in this permit, or controls a pollutant not limited in this permit, this permit shall be promptly modified or revoked and reissued to

conform to the requirements promulgated under section 405 (d)(2). The permittee shall comply with the limitations by no later than the compliance deadline specified in the applicable regulations as required by section 405(d)(2)(D) of the Clean Water Act.

(c) *Permit actions.* All State programs under this Part shall have the legal authority to implement the following provisions as a minimum.

(1) *Transfer of permits*—(i) *Transfers by modification.* Except as provided in paragraph (ii) of this section, a permit may be transferred by the permittee to a new owner or operator only if the permit has been modified or revoked and reissued to identify the new permittee and incorporate such other requirements as may be necessary under CWA.

(ii) *Automatic transfers.* As an alternative to transfers under paragraph (c)(1)(i) of this section, any sludge permit may be automatically transferred to a new permittee if:

(A) The current permittee notifies the Director at least 30 days in advance of the proposed transfer date in paragraph (ii)(B) of this section.

(B) The notice includes a written agreement between the existing and new permittees containing a specific date for transfer of permit responsibility, coverage, and liability between them; and

(C) The Director does not notify the existing permittee and the proposed new permittee of his or her intent to modify or revoke and reissue the permit. If this notice is not received, the transfer is effective on the date specified in the agreement mentioned in paragraph (c)(1)(ii)(B) of this section.

(2) *Modification or revocation and reissuance of permits.* (i) When the Director receives any information (for example, where the Director inspects the facility, receives information submitted by the permittee as required in the permit, receives a request for modification or revocation and reissuance under § 501.15(e)(3)(i), or conducts a review of the permit file), he or she may determine whether or not one or more of the causes listed in paragraphs (c)(2) (ii) and (iii) of this section for modification or revocation and reissuance or both exist. If cause exists, the Director may modify or revoke and reissue the permit and may request an updated application if necessary. When a permit is modified, only the conditions subject to a modification are reopened. If a permit is revoked and reissued, the entire permit is reopened and subject to revision and the permit is reissued for a new term. A draft permit must be prepared and other procedures in § 501.15(d) followed. If cause does not exist under this section, the Director shall not modify or revoke and reissue the permit.

(ii) *Causes for modification.* The following are causes of modification but not revocation and reissuance of permits except when the permittee requests or agrees.

(A) *Alterations.* There are material and substantial alterations or additions to the permitted facility or activity which occurred after permit issuance which justify the application of permit conditions that are different or absent in the existing permit.

(B) *Information.* The Director has received new information. Permits may be modified during their terms for this cause only if the information was not available at the time of permit issuance (other than revised regulations, guidance, or test methods) and would have justified the application of different permit conditions at the time of issuance.

(C) *New regulations.* New regulations have been promulgated, or the standards or regulations on which the permit was based have been changed by promulgation of amended standards or regulations or by judicial decision after the permit was issued.

(D) *Compliance schedules.* The Director determines good cause exists for modification of a compliance schedule, such as an Act of God, strike, flood, or materials shortage or other events over which the permittee has little or no control and for which there is no reasonable available remedy. However, in no case may a compliance schedule be modified to extend beyond an applicable CWA statutory deadline.

(iii) The following are causes to modify or alternatively, revoke and reissue a permit.

(A) Cause exists for termination under § 501.15(c)(3) and the Director determines that modification or revocation and reissuance is appropriate.

(B) The Director has received notification (as required in the permit, see § 501.15(b)(12)(iii)) of a proposed transfer of the permit.

(3) *Termination of permits.* The following are causes for terminating a permit during its term, or for denying a permit renewal application:

(i) Noncompliance by the permittee with any condition of the permit;

(ii) The permittee's failure in the application or during the permit issuance process to disclose fully all relevant facts, or the permittee's misrepresentation of any relevant facts at any time;

(iii) A determination that the permitted activity endangers human health or the environment and can only be regulated to acceptable levels by permit modification or termination; or

(iv) A change in any condition that requires either a temporary or a permanent reduction or elimination of any activity controlled by the permit.

(d) *Permit procedures.* All State programs approved under this part shall have the legal authority to implement each of the following provisions and must be administered in accordance with each, except that States are not precluded from omitting or modifying any provisions to impose more stringent requirements.

(1) *Application for a permit.* (i) Any person who is required to obtain a permit for the use or disposal of sewage sludge under section 405 of the CWA shall complete, sign and submit to the Director an application for a permit.

(ii) The Director shall not begin the processing of a permit until the applicant has fully complied with the application requirements for that permit.

(2) *Modification, revocation and reissuance, or termination of permits.* (i) Permits may be modified, revoked and reissued, or terminated either at the request of any interested person (including the permittee) or upon the Director's initiative. However, permits may only be modified, revoked and reissued, or terminated for the reasons specified in § 501.15(c). All requests shall be in writing and shall contain factors or reasons supporting the request.

(ii) If the Director tentatively decided to modify or revoke and reissue a permit he or she shall prepare a draft permit incorporating the proposed changes. The Director may request additional information and, in the case of a modified permit, may require the submission of an updated application. In the case of revoked and reissued permits, the Director shall require the submission of a new application. If the Director tentatively decides to terminate a permit he or she shall prepare a Notice of Intent to Terminate and follow the public notice and comment procedures outlined in § 501.15(d)(6).

(3) *Draft permits.* Once an application is complete, the Director shall tentatively decide whether to prepare a draft permit or to deny the application. If the Director decides to prepare a draft permit, he or she shall prepare a draft permit that contains the necessary conditions to implement this part, 40 CFR Part 503, and section 405 of the CWA.

(4) *Fact sheets.* A fact sheet shall be prepared for every draft permit for a Class I Sludge Management Facility, and for every draft permit which the Director finds is the subject of widespread public interest or raises major issues. The fact sheet shall briefly set forth the principal facts and the significant factual, legal, methodological and policy questions considered in preparing the draft permit. The Director shall send this fact sheet to the applicant and, on request, to any other person.

(i) The fact sheet shall include, when applicable:

(A) A brief description of the type of facility or activity which is the subject of the draft permit;

(B) Any calculations or other necessary explanation of the derivation of limitations and conditions for sludge use and disposal, including a citation to the applicable standards under 40 CFR Part 503 and reasons why they are applicable.

(5) *Public notice of permit actions and public comment period.* (i) The Director shall give public notice that the following actions have occurred:

(A) A draft permit has been prepared. The public notice shall allow at least 30 days for public comment.

(B) A hearing has been scheduled. Public notice shall be given at least 30 days before the hearing.

(ii) *Methods.* Public notice of activities described in paragraph (d)(5)(i) of this section shall be given by the following methods:

(A) By mailing a copy of a notice to the following persons (any person otherwise entitled to receive notice under this paragraph may waive his or her rights to receive notice for any classes and categories of permits):

(*1*) The applicant;

(*2*) Any other Agency which the Director knows has issued or is required to issue a RCRA, UIC, PSD, NPDES, MPRSA, or 404 permit for the same facility or activity (including EPA);

(*3*) Any State agency responsible for plan development under CWA section 208(b)(2), 208(b)(4) or 303(e);

(*4*) To any unit of local government having jurisdiction over the area where the facility is proposed to be located; and to each State agency having any authority under State law with respect to the construction or operation of such facility; and

(*5*) Any person who requests a copy.

(B) For Class I Sludge Management Facilities permits, publication of a notice in a daily or weekly newspaper within the area affected by the facility or activity;

(C) In a manner constituting legal notice to the public under State law; and

(D) Any other method reasonably calculated to give actual notice of the action in question to the persons potentially affected by it, including press releases or any other forum or medium to elicit public participation.

(iii) *Contents*—(A) *All public notices.* All public notices issued under this part shall contain the following minimum information:

(*1*) Name and address of the office processing the permit action for which notice is being given;

(*2*) Name and address of the permittee or permit applicant and, if different, of the facility or activity regulated by the permit.

(*3*) A brief description of the activity described in the permit application.

(*4*) Name, address and telephone number of a person from whom interested persons may obtain further information, including copies of the draft permit, fact sheet, and the application; and

(*5*) A brief description of the comment procedures required by § 501.15(e)(8) and the time and place of any hearing that will be held, including a statement of procedures to request a hearing (unless a hearing has already been scheduled) and other procedures by which the public may participate in the final permit decision.

(*6*) Any additional information considered necessary or proper.

(B) *Public notices for hearings.* In addition to the general public notice described in paragraph (d)(6)(iii)(A) of this section, the public notice of a hearing shall contain the following information:

(1) Reference to the date of previous public notices relating to the permit;

(2) Date, time and place of the hearing; and

(3) A brief description of the nature and purpose of the hearing, including the applicable rules and procedures.

(6) *Public comments and requests for public hearings.* During the public comment period, any interested person may submit written comments on the draft permit and may request a public hearing, if no hearing has already been scheduled. A request for a public hearing shall be in writing and shall state the nature of the issues proposed to be raised in the hearing. All comments shall be considered in making the final decision and shall be answered as provided in paragraph (d)(10) of this section.

(7) *Public hearings.* The Director shall hold a public hearing whenever he or she finds, on the basis of requests, a significant degree of public interest in a draft permit. The Director may also hold a public hearing at his or her discretion, (e.g. where such a hearing might clarify one or more issues involved in the permit decision).

(8) *Response to comments.* At the time a final permit is issued, the Director shall issue a response to comments. The response to comments shall be available to the public, and shall:

(i) Specify which provisions, if any, of the draft permit have been changed in the final permit decision, and the reasons for the change; and

(ii) Briefly describe and respond to all significant comments on the draft permit raised during the public comment period or during any hearing.

(e) *Optional program provisions.* The following provisions may be included in a State program at the State's option. If the State decides to adopt any of these provisions, they must be no less stringent than the corresponding Federal provisions:

(1) Continuation of expiring permits (40 CFR 122.6).

(2) General permits (40 CFR 122.28); and

(3) Minor modifications of permits (40 CFR 122.63).

§ 501.16 Requirements for compliance evaluation programs.

State Sludge management program shall have requirements and procedures for compliance monitoring and evaluation as set forth in § 123.26.

§ 501.17 Requirements for enforcement authority.

(a) Any State agency administering a program shall have available the following remedies for violations of State program requirements:

(1) To restrain immediately and effectively any person by order or by suit in State court from engaging in any unauthorized activity which is endangering or causing damage to public health or the environment.

Note: This paragraph ((a)(1)) requires that States have a mechanism (e.g., an administrative cease and desist order or the ability to seek a temporary restraining order) to stop any unauthorized activity endangering public health or the environment.

(2) To sue in courts of competent jurisdiction to enjoin any threatened or continuing violation of any program requirement, including permit conditions, without the necessity of a prior revocation of the permit; and

(3) To assess or sue to recover in court civil penalties and to seek criminal remedies, including fines, as follows:

(i) Civil penalties shall be recoverable for the violation of any permit condition; any filing requirement; any duty to allow or carry out inspection, entry or monitoring activities; or any regulation or orders issued by the State Program Director. These penalties shall be assessable in at least the amount of $5,000 a day for each violation.

(ii) Criminal fines shall be recoverable against any person who willfully or negligently violates any applicable standards or limitations; any permit condition; or any filing requirement. These fines shall be assessable in at least the amount of $10,000 a day for each violation.

(iii) Criminal fines shall be recoverable against any person who knowingly makes any false statement, representation or certification in any program form, or in any notice or report required by a permit, or who knowingly renders inaccurate any monitoring device or method required to be maintained by the State Program Director. These fines shall be recoverable in at least the amount of $5,000 for each instance of violation.

Note: States which provide the criminal remedies based on "criminal negligence," gross negligence" or strict liability satisfy the requirement of paragraph (a)(3)(ii) of this section.

(b)(1) The maximum civil penalty or criminal fine (as provided in paragraph (a)(3) of this section) shall be assessable for each instance of violation and, if the violation is continuous, shall be assessable up to the maximum amount for each day of violation.

(2) The burden of proof and degree of knowledge or intent required under State law for establishing violations under paragraph (a)(3) of this section shall be no greater than the burden of proof or degree of knowledge or intent EPA must provide when it brings an action under the appropriate Act;

Note: For example, this requirement is not met if State law includes mental state as an element of proof for civil violations.

(c) A civil penalty assessed, sought, or agreed upon by the State Program Director under paragraph (a)(3) of this section shall be appropriate to the violation.

(d) Any State administering a program shall provide for public participation in the State enforcement process by providing either:

(1) Authority which allows intervention as of right in any civil or administrative action to obtain remedies specified in paragraphs (a) (1), (2) or (3) of this section by any citizen having an interest which is or may be adversely affected; or

(2) Assurance that the State agency or enforcement authority will:

(i) Investigate and provide written responses to all citizen complaints submitted pursuant to the procedures specified in § 123.26(b)(4);

(ii) Not oppose intervention by any citizen in any civil or administrative proceeding when permissive intervention may be authorized by statute, rule, or regulation; and

(iii) Publish notice of and provide at least 30 days for public comment on any proposed settlement of a State enforcement action.

§ 501.18 Prohibition.

State permit programs shall provide that no permit shall be issued when the Regional Administrator has objected in writing under § 123.44.

§ 501.19 Sharing of information.

State sludge management programs shall comply with the requirements of § 123.41.

§ 501.20 Receipt and use of Federal information.

State sludge management programs shall comply with § 123.42.

§ 501.21 Program reporting to EPA.

The State Program Director shall prepare quarterly and annual reports as detailed below and shall submit any reports required under this section to the Regional Administrator. These reports shall serve as the main vehicle for the State to report on the status of its sludge management program, update its inventory of sewage sludge generators and sludge disposal facilities, and provide information on substantial incidents of noncompliance. The State Program Director shall submit these reports to the Regional Administrator according to a mutually agreed-upon schedule. The Quarterly Sludge Violation Reports and Annual Reports specified below may be combined with other reports to EPA (e.g., existing NPDES or RCRA reporting systems) where appropriate.

(a) *Quarterly reports.* Quarterly Sludge Violation Reports (QSVRs) shall provide a tabular summary of the incidents of "substantial" noncompliance which occurred in the previous quarter by Class I facilities. The State Program Director and Regional Administrator may choose to include reporting of incidents of substantial noncompliance by additional non-Class I facilities at their discretion.

(1) At a minimum, the following occurrences shall be considered incidents of substantial noncompliance which must be reported under this section:

(i) Significant failure to comply with minimum Federal requirements for sludge use or disposal practices;

(ii) Significant failure to comply with permit conditions;

(iii) Failure to complete construction of essential elements of a sludge management facility or meet other key milestone dates specified in a permit;

(iv) Failure to provide required compliance monitoring reports or submission of reports that are so deficient as to cause misunderstanding and thus impede the review of the status of compliance;

(v) Significant noncompliance with other program requirements.

(2) The tabular summary will identify:

(i) The non-complying facilities by name and reference number,

(ii) The type of noncompliance, a brief description and date(s) of the event. (See list in paragraph (a)(1) of this section.) If records for a facility show noncompliance of more than one type under the sludge management program, the information should be combined into a single entry for each such facility.

(iii) The date(s) and a brief description of the action(s) taken to ensure timely and appropriate action to achieve compliance.

(iv) Status of the incident(s) of noncompliance with the date of resolution, and

(v) Any details which tend to explain or mitigate the incident(s) of noncompliance.

(b) *Annual report.* In addition to the information required by paragraph (a) of this section, the annual report shall include the following:

(1) Information to update the inventory of all sewage sludge generators and sewage sludge disposal facilities submitted with the program plan or in previous annual reports, including:

(i) Name and location,

(ii) NPDES, RCRA, Clean Air Act, and State permit number, if any,

(iii) Sludge management practice used,

(iv) Identification of non-complying facilities, and

(v) Sludge production volume.

(2) A summary of the number and type of violations by sludge use and disposal practice over the past year for Class I sludge management facilities.

(3) A list of Class I sludge management facilities brought into compliance since the last annual report;

(4) A summary of the results of periodic State compliance monitoring efforts to verify self-monitoring reports.

(5) Information on substantial noncompliance of Non-Class I Facilities which shall include:

(i) A tabular listing which identifies:

(A) The non-complying facility by name and reference number,

(B) The type of noncompliance (see list in paragraph (a)(1) of this section),

(C) How long the facility has been in noncompliance, and

(D) What steps are being taken to bring these facilities into compliance;

(ii) A summary of the number and type of violations by sludge use and disposal practice over the past year by non-Class I sludge management facilities;

(iii) A list of non-Class I facilities that have been brought into compliance since the last annual report; and

(iv) A separate list of all facilities (along with any applicable permit numbers) that are six or more months behind in their schedules for achieving compliance.

Subpart C—Program Approval, Revision and Withdrawal

§ 501.31 Review and approval procedures.

(a) Within 30 days of receipt by EPA of a State program submission, EPA will notify the State whether its submission is complete. If it is incomplete, EPA will identify the needed information.

(b) After determining that a State program submission is complete, EPA will publish notice of the State's application in the **Federal Register** and in enough of the largest newspapers in the State to attract statewide attention. EPA will mail notice to persons known to be interested in such matters, including all persons on appropriate State and EPA mailing lists and all permit holders and applicants within the State subject to sludge use and disposal requirements. The notice will:

(1) Provide a comment period of not less than 45 days during which interested members of the public may express their views on the State program;

(2) Provide for a public hearing within the State to be held no less than 30 days after notice is published in the **Federal Register** and indicate when and where the hearing is to be held;

(3) Indicate the cost of obtaining a copy of the State's submission;

(4) Indicate where and when the State's submission may be reviewed by the public;

(5) Indicate whom an interested member of the public should contact with any questions; and

(6) Briefly outline the fundamental aspects of the State's proposed program, and the process for EPA review and decision.

(c) Within 90 days after determining that the State has submitted a complete program under § 501.11, the Administrator shall approve or disapprove the program based on the requirements of this part and of CWA and taking into consideration all comments received. A responsiveness summary shall be prepared by the Regional Office which identifies the public participation activities conducted, describes the matters presented to the public, summarizes significant comments received and explains the Agency's response to these comments.

(d) The State and EPA may extend the 90-day review period by mutual agreement.

(e) If the State's submission is materially changed during the 90-day review, either as a result of EPA's review or the State action, the official review period shall begin again upon receipt of the revised submission.

(f) Notice of program approval shall be published by EPA in the **Federal Register**.

(g) If the Administrator disapproves the State program he or she shall notify the State of the reasons for disapproval and of any revisions or modifications to the State program which are necessary to obtain approval.

§ 501.32 Procedures for revisions of State programs.

(a) Any approved State program which requires revision to comply with amendments to federal regulations governing sewage sludge use or disposal (including revisions to this part) shall revise its program within one year after promulgation of applicable regulations, unless the State must amend or enact a statute in order to make the required revision, in which case such revision shall take place within 2 years.

(b) State sludge management programs shall follow the procedures for program revision set forth in 40 CFR 123.62.

§ 501.33 Criteria for withdrawal of State programs.

The criteria for withdrawal of sludge management programs shall be those set forth in § 123.63.

§ 501.34 Procedures for withdrawal of State programs.

The procedures for withdrawal of sludge management programs shall be those set forth in § 123.64.

Environmental Protection Agency

40 CFR Part 86

Control of Air Pollution From New Motor Vehicles and New Motor Vehicle Engines; Certification Procedures; Notice of Proposed Rulemaking

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 86

[AMS–FRL–3304–1]

Control of Air Pollution From New Motor Vehicles and New Motor Vehicle Engines; Certification Procedures

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA is proposing revisions to the motor vehicle and motor vehicle engine emission certification procedures for 1990 and later model year light-duty vehicles, light-duty trucks, heavy-duty vehicles, and heavy-duty engines. The revisions under consideration are primarily intended to address emission control durability demonstration requirements pertaining to vehicle and engine manufacturers covered under the small-volume manufacturer and small-volume engine family regulations. Several minor changes are proposed which will affect all manufacturers.

EPA proposes that only firms having total U.S. sales not exceeding 300 units per year remain exempt from any durability testing requirement. This proposal would continue a small-volume certification program for firms selling fewer than 10,000 units annually. Firms in this category using what this proposal defines as "proven" technology would not experience a significant change from the way the current program works. Such firms would continue to be allowed the use of assigned deterioration factors (d.f.'s), although the methodology for determining those d.f.'s would be changed somewhat. Firms using "unproven" technology would be required to run a limited number of durability test vehicles (e.g., 50,000 miles for light-duty vehicles, etc.) to verify emission durability. Firms selling over 10,000 units will continue to be able to certify up to 10,000 units each year under the "small-volume engine family" provisions, as amended by this proposal. Because of the potential for reduced durability demonstration burden, those manufacturers eligible for the 300 or less sales exemption are clearly distinguished. For these reasons, EPA is also proposing to clarify its sales aggregation rules for determining eligibility for treatment as a small-volume manufacturer.

In addition, this proposal includes several minor changes that apply to all manufacturers completing the certification process. These changes essentially reflect actions currently being accomplished voluntarily by nearly all manufacturers completing the certification process. They include changes to the vehicle emission control label, establishment of a minimum mileage for emission-data vehicle service accumulation, and potential measures to give greater assurance that small-volume firms take reasonable steps to provide for maintenance and repair of emission control systems. The revisions are being proposed to assure the continuation of these actions and compliance by any new manufacturers requesting vehicle certification.

DATES: EPA will hold a public hearing beginning at 9:00 a.m., EST, April 26, 1988, in Ann Arbor, Michigan.

Persons wishing to provide testimony at the hearing should notify Mr. Cole, as noted below, not later than April 19, 1988. Any written comments must be received on or before May 26, 1988.

ADDRESSES: Interested parties are encouraged to participate in this rulemaking procedure by submitting comments to: Central Docket Section, U.S. Environmental Protection Agency, Room 4, South Conference Center (LE–131), Waterside Mall, 401 M Street SW., Washington, DC 20460; Attention: Docket No. A–85–30. Copies of materials relevant to this rulemaking proceeding are contained in Public Docket A–85–30 at the U.S. Environmental Protection Agency, Central Docket Section, Room 4, South Conference Center (LE–131), Waterside Mall, 401 M Street SW., Washington, DC 20460, and are available for review during normal business hours (8:00 a.m.–3:00 p.m.). As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services. The public hearing will be held at the Motor Vehicle Emission Laboratory, 2565 Plymouth Road, Ann Arbor, MI 48105.

FOR FURTHER INFORMATION CONTACT: Charles D. Cole, Certification Policy and Support Branch, Certification Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, MI 48105, (313) 668–4444.

SUPPLEMENTARY INFORMATION:

I. Background

A. The Clean Air Act

Section 203(a)(1) of the Clean Air Act (the Act) prohibits the sale, offering for sale, the introduction into commerce, the delivery for introduction into commerce, or the importation (except by persons specified by regulation by the Administrator) of any new motor vehicle unless the vehicle is covered by a certificate of conformity issued by the Administrator under the authority of section 206 of the Act. Section 203(b) of the Act provides two exceptions to this requirement. The exceptions are: (1) The Administrator may exempt a vehicle for certain specified purposes (i.e., research, investigations, demonstration, training, or national security); and (2) a vehicle may be imported under regulations prescribed by the Administrator and the Secretary of the Treasury (U.S. Customs Service (Customs)) which ensure that the vehicle will be brought into conformity with applicable standards.

In addition, the Act places a limit on the maximum amount of durability mileage accumulation that EPA can require for certification purposes for those small-volume manufacturers whose projected total sales in the United States for any model year will not exceed 300 units. Section 206(a)(1) prohibits the Administrator from prescribing regulations requiring more than 5,000 miles or 160 hours to be accumulated on any test vehicle or engine for these manufacturers. Instead, the Administrator is directed to "apply such adjustment factors as he deems appropriate to assure that each such vehicle or engine will comply during its useful life." The determination of appropriate adjustment factors, known as deterioration factors (d.f.'s), is a primary focus of this proposal.

B. Applicable EPA Regulations

Under authority of the Act, EPA has not only promulgated regulations governing the certification of vehicles [1] to emission standards ("certification regulations"), but in addition has promulgated regulations governing the importation of nonconforming motor vehicles and motor vehicle engines [2] ("imports regulations"). EPA recently promulgated substantial revisions to the imports regulations [52 FR 36136, September 25, 1987]. Under the revised regulations, independent commercial importers (ICI's) ultimately will be required to obtain a certificate of conformity prior to importing and modifying most nonconforming vehicles or engines. EPA anticipates that the majority of these manufacturers will be eligible to seek certification under the EPA's current small-volume manufacturers certification regulations as discussed below.

The certification regulations historically have included special provisions [for example, see 40 CFR 86.085–24 (e)] which allow small-volume manufacturers [3] to request a reduction in the number of required test vehicles and allow certification to be based on d.f.'s provided by EPA rather than actual durability test results. The d.f.'s provided by EPA are often referred to as "assigned d.f.'s." Beginning in 1975, EPA published applicable assigned d.f.'s for each vehicle or engine category through EPA's advisory circular manufacturer guidance system.

The assigned d.f.'s obviate the need for the manufacturer to spend the money necessary to build, accumulate mileage and emission test a durability-data vehicle to develop its own d.f.'s. No other specific durability tests are required of the manufacturer as part of the current small-volume manufacturer certification program. Nonetheless, as with other manufacturers, those manufacturers certifying under the small-volume manufacturer certification regulations are responsible under the Act and the regulations for compliance of their in-use vehicles for their statutory useful lives, so long as the vehicles are properly maintained and used.

Deterioration factors are used to predict useful life emission performance from the results of low mileage test vehicles. These low mileage test vehicles (known as emission-data test vehicles) currently are tested at a mileage (typically between 2,500 and 5,000 miles) which the manufacturer determines is at or beyond the point where new engine and emission control system emission performance has stabilized. The likelihood of compliance with the applicable emission standards is then projected by comparing the emission-data vehicle test results, adjusted by the d.f.'s, to the applicable standards. The d.f. adjustment is intended to account for expected useful life in-use emission performance deterioration. Absent other information which would indicate the significant potential for in-use emission noncompliance, if these predicted emission values are equal to or less than the emission standards, emission compliance is sufficiently demonstrated to permit issuance of a certificate of conformity. The use of assigned d.f.'s significantly reduces the amount of time and cost incurred by the manufacturer in obtaining d.f.'s by performing actual durability testing. However, since an emission-data test vehicle is not subject to actual durability testing, there is some risk that the assigned d.f.'s may understate actual production vehicle deterioration in some cases. If production vehicles actually deteriorate at a faster rate than represented by the assigned d.f.'s, there is an increased possibility of in-use noncompliance and excess in-use emissions.[4]

Significant revisions to the small-volume manufacturers certification procedure were promulgated (46 FR 16259) in March 1981 to lessen the administrative and cost burden of the certification regulations on small-volume manufacturers. The optional (assigned d.f.) certification procedures were extended to small-volume manufacturers whose total yearly projected sales were fewer than 10,000 units. Some additional, relatively small manufacturers then could qualify for the durability exemption. The number of emission-data test vehicles was also reduced and the reporting burden greatly simplified, all for the purpose of reducing small-volume manufacturers' compliance demonstration costs.[5]

EPA realized that, without vehicle demonstration of emission control durability, there was some risk that the vehicles certified under the small-volume procedures might fail emission standards in use. However, the Agency anticipated no significant air quality risk under the revised regulations for several reasons. First, only a small number of manufacturers were expected to certify under the expanded regulations. Second, most small-volume manufacturers certifying at that time were using original equipment manufacturer (OEM) engine, drive line and emission control components which had been fully developed and evaluated for in-use durability by the OEM. Third, those small-volume manufacturers using other manufacturers' components typically had cooperative agreements with the OEM. These small-volume manufacturers then knew what running changes (e.g., new calibrations, emission control designs, etc.) were implemented by the OEM in the production of engine, drive train, or emission control components that could affect the small-volume manufacturer's vehicles.

In October 1981, EPA promulgated cost reduction revisions to the general certification regulations applicable to manufacturers with sales of 10,000 or more units. Included in these revisions was a provision which allows these larger manufacturers to certify up to 10,000 units of sales using assigned d.f.'s. Since this provision is very similar to that included in the small-volume manufacturer regulations, EPA is proposing similar revisions to both programs to assure technical improvements in assessing the expected emission performance of engine families the manufacturers wish to certify.

C. The Impact of Additional New Small-Volume Manufacturers

In general, the recent revisions to the rules covering the importation of nonconforming vehicles ultimately will require ICI's to obtain certification to import such vehicles. Most manufacturer-importers [6] that previously imported under "modification and test" provisions, rather than under a certificate of conformity, will eventually have to come in under the certification process. (The modification and test alternative will be reduced during a phase-in period between 1988–1993 and eventually limited to vehicles over five production years old (40 CFR 85.1509).) The vast majority of these importers are expected to certify according to the small-volume manufacturers certification regulations.

In addition, EPA has noted an increase in inquiries from prospective domestic manufacturers which could qualify for small-volume certification. The expected number of ICI and new domestic manufacturers seeking certification could substantially increase usage of the small-volume manufacturers' certification regulations.

The current certification procedures should result in improved in-use emission performance of the imported nonconforming vehicles brought in under the certification option since, via the assigned d.f.'s, some anticipated emission performance deterioration is considered prior to certification. However, the large-scale use of the small-volume manufacturers certification procedures by numerous new manufacturers, including domestic manufacturers as well as ICI's, was not envisioned at the time the current regulations were promulgated in 1981. As previously discussed, although small-volume certified vehicles demonstrate compliance with emission standards at low mileage, the useful life emission compliance of some vehicles may be questionable. EPA has no formal program or procedure for evaluating each small-volume manufacturer's vehicle designs for physical signs that in-use emission deterioration may be excessively high. However, on occasion, EPA has noted potentially inadequate designs which, in EPA's opinion, presented a high risk of emission failure. For example, although passing emission standards at low mileage, a vehicle with an emission-related hose or electrical wire routed too close to a high temperature source such as an exhaust manifold or catalytic converter, could rapidly deteriorate under extended in-use operation. The hose or wire could fail causing an emission control system malfunction and vehicle emission failure potentially undetected by the vehicle operator. In the high-risk cases discovered by EPA, EPA has been successful in working with the vehicle manufacturer to improve its design. However, with the new potential for expanded use of the small-volume manufacturer regulations, it will be more difficult for EPA to detect each potentially inadequate design. EPA wants to limit to the extent possible the in-use noncompliance risk associated with certifying such potentially inadequate or unproven designs. Therefore, EPA is proposing revisions to the certification procedure to improve EPA's ability to screen out potentially inadequate designs and limit the number of unproven designs before these designs are certified.

---

[1] Unless otherwise specified, references to vehicles also pertain to heavy-duty engines.

[2] An imported nonconforming motor vehicle or engine is defined as a motor vehicle or engine which is not covered by a certificate of conformity prior to final or conditional importation and which has not been finally admitted into the United States under 40 CFR 85.1505, 85.1509, or 85.1512 (if applicable).

[3] Prior to the 1982 model year, EPA regulations only allowed small-volume certification procedures to a manufacturer whose projected annual sales in the United States were less than 2,000 units in any vehicle or engine category

[4] Receipt of a certificate of conformity should not be interpreted as a license or approval to produce noncomplying vehicles. The certification program serves as a screen to prevent as many problem designs as possible from entering production. Vehicles which have been properly maintained and used, which later are determined to be failing emissions standards, are subject to recall by EPA under its authority in section 207(c) of the Act.

[5] The purpose of the small-volume certification regulations is to minimize the cost of running tests to demonstrate compliance with emissions standards prior to the sales of new vehicles. However, there is no relaxation in the manufacturer's responsibility under the Act to perform testing necessary to develop and build a product which will comply with emission standards over the regulated useful life. A key feature of the small-volume certification procedures is to draw upon information a responsible manufacturer should have available to assure itself that its product has been sufficiently developed and evaluated so that it and EPA can reasonably expect the product will comply with emission standards during in-use operation.

[6] Under section 216(1) of the Clean Air Act, any person engaged in importing new motor vehicles for resale is included in the definition of "manufacturer."

II. Summary of the Proposals

A. Durability Demonstration

EPA proposes to address durability requirements for three categories of manufacturers: (1) Small-volume manufacturers whose annual sales do not exceed 300 units, (2) small-volume manufacturers with annual sales between 300 and 10,000 units, and (3) large-volume manufacturers (with annual sales of 10,000 units or greater) wishing to certify small-volume engine families. The durability procedures which the manufacturer is required to comply with will vary depending on the manufacturer's annual sales.

The Act limits the amount of durability mileage accumulation EPA can require on vehicles built by manufacturers whose annual sales do not exceed 300 vehicles. It will continue to be EPA's responsibility to determine appropriate d.f.'s for these firms. Currently the guidelines for determining these d.f.'s are contained in Advisory Circular Number (A/C No.) 51C. A copy of A/C No. 51C has been placed in the public docket. As is current practice, the manufacturer has the responsibility for providing sufficient information and/or data on the manufacturer's vehicles and emission control systems to allow EPA to determine the appropriate assigned d.f.'s.

EPA is proposing revised durability requirements for manufacturers with total projected annual sales between 300 and 10,000 units. Changes to the existing regulation are minimized for manufacturers using proven emission control components or systems (and fuel metering systems) [7] because EPA believes that deterioration of these components or systems is adequately represented by assigned d.f.'s. This less stringent requirement is meant to encourage manufacturers to use proven components in their small-volume designs. EPA is proposing more extensive changes for manufacturers using unproven emission components (and fuel metering components) in their designs. These changes will increase EPA's confidence in the ability of a vehicle equipped with unproven emission control components and systems [8] to meet emission standards for the vehicle's useful life.

EPA proposes to allow manufacturers using proven emission components and systems (and fuel metering systems) to continue to certify using assigned d.f.'s. However, the assigned d.f.'s will no longer be supplied by EPA, but will be determined by the manufacturer based on good engineering judgment, subject to certain conditions as described in the following paragraph. Not allowing a manufacturer to simply assume the validity of EPA-supplied d.f.'s to its product is consistent with the intent of the existing regulations and the Act which presume that the manufacturer has determined that its vehicles are likely to comply in use prior to requesting a certificate. In addition, the manufacturer is likely to have development data and other relevant information available for the purpose of assuring itself of this expected in-use compliance. These data and other information should be directly useful in determining the appropriateness of potential assigned d.f.'s. Therefore, requiring the manufacturers to determine the appropriateness of the assigned d.f.'s used in certification should represent an insignificant additional burden on manufacturers that have been complying with the Act.

EPA proposes that the manufacturer-determined assigned d.f.'s not be less than the average of the d.f.'s. from all engine families previously certified by the manufacturer (hereinafter referred to as manufacturer-specific average d.f.'s). In certain circumstances, the manufacturer-specific average d.f.'s may be greater than the 70th percentile of the d.f.'s from all engine families previously certified by the manufacturer (hereinafter referred to as manufacturer-specific 70th percentile d.f.'s) due to outlier data. In these limited cases, the manufacturer may use the manufacturer-specific 70th percentile d.f.'s to offset the data from engine families with unusually high d.f.'s ("outlier data"). If the manufacturer does not have at least two data points to calculate manufacturer-specific average d.f.'s, the manufacturer-determined assigned d.f.'s may not be lower than the 70th percentile industrywide assigned d.f.'s as calculated by EPA.

For manufacturers using previously unproven emission control systems (and fuel metering systems) EPA is proposing to require durability mileage accumulation for emission control systems representing a percentage of the manufacturers' sales equipped with unproven emission control components or systems (and fuel metering systems). The manufacturer will be required to complete a durability demonstration

---

[7] Proven emission control components or systems (and fuel metering systems) are components or systems that have completed full durability testing evaluation over a vehicle's useful life in some other certified engine family or are, as determined by EPA, of comparable functional quality and manufactured using comparable materials and production techniques as components or systems which have been durability demonstrated in some other certified engine family.

[8] Unproven emission control components or systems (and fuel metering systems) are components or systems that have not completed full durability testing evaluation over the useful life of a vehicle in some other certified engine family. In addition, unproven emission control components or systems (and fuel metering systems) are components or systems that are not of comparable functional quality, and manufactured using similar production materials and techniques, as components which have been demonstrated to be durable in some other certified engine family.

each year on remaining or new unproven engine/emission control system combinations representing a minimum of 25 percent of the manufacturer's "unproven" sales. The remainder of the manufacturer's annual unproven sales will be certified using assigned d.f.'s determined by the manufacturer, but no lower than those assigned d.f.'s used to certify its proven systems.

Manufacturers with annual sales greater than 10,000 units will be allowed to certify up to 10,000 units per year using assigned d.f.'s. These manufacturers must determine the appropriate d.f.'s in the same manner as described above for manufacturers in the 300 to 10,000 sales group.

B. Aggregation of Firms for the Purpose of Determining Applicability of Small-Volume Regulations

Presently when determining the applicability of small-volume certification procedures, EPA aggregates the sales of multiple importers who have contractual agreements or are subsidiaries of the same parent automobile manufacturer. EPA proposes to clarify the wording of the current aggregation criteria to assure appropriate implementation and intended effect.

C. Other Changes

EPA is also proposing the following changes to the certification procedures which will be applicable to both small-volume manufacturers and other manufacturers.

Vacuum hose routing—EPA proposes to require light-duty vehicle and light-duty truck manufacturers to include a vacuum hose routing diagram on the vehicle emission control information label. This information is currently required by the State of California for vehicles sold in that state and is voluntarily being included on other vehicles by most manufacturers.

Minimum EDV mileage—The current rules set no lower mileage limit for EDV's. EPA now proposes a 2,000 mile minimum (62 hours for catalyst equipped heavy-duty engines) requirement on all EDV's. In practice, no manufacturer has used an EDV with less than 2,000 miles to certify.

In-use vehicle maintenance—EPA is requesting public comment on whether availability of service by small-volume manufacturers will be adequate to meet the warranty requirements of section 207(b) of the Act. In the event that EPA decides that service and parts availability may be a problem, EPA is proposing changes which should increase the likelihood that owners will also be able to obtain proper maintenance and warranty service. EPA is proposing that each small-volume manufacturer provide a statement to EPA at the time it requests certification stating that it has provided the vehicle purchaser a list of emission and emission-related parts and instructions for performing any maintenance which might be expected to affect emission performance. Additionally, EPA proposes that the manufacturer notify the owner, at the time of sale, of the nearest maintenance location if maintenance service is not available at the authorized point of sale for its vehicle, and assure the purchaser that emission-related service parts will be available at or through these service locations. Finally, EPA is proposing that all manufacturers already required to have an insurance policy guaranteeing warranty service [40 CFR 85.1510], provide evidence of the fully paid policy or proof of a contractual agreement to purchase insurance as a prerequisite to certification.

Reduction in the number of EDV's—EPA is proposing to reduce the number of EDV's required to one vehicle in those engine families certified by large-volume manufacturers under the small-volume engine family certification procedure.

Elimination of EPA-determined assigned d.f.'s in specific cases—EPA is proposing to eliminate EPA-assigned d.f.'s in those categories where the current certification regulations direct the manufacturer to determine the appropriate emissions deterioration. The applicable categories are light-duty trucks (LDT's) or heavy-duty engines (HDE's) for exhaust emissions and light-duty vehicles (LDV's) and LDT's for evaporative emissions.

III. Proposed Revisions to the Small-Volume Manufacturers and Small-Volume Engine Family Certification Durability Program

A. Durability Requirements

The current small-volume manufacturers certification procedure allows eligible small-volume manufacturers to certify up to 9,999 units (combined total sales of LDV's, LDT's and HDE's) per year using assigned d.f.'s. Under the current regulations no other durability demonstration is required. As a result, the small-volume manufacturer certifying its product line has the same durability demonstration responsibility whether it uses components with proven or unproven emission durability in its design. Only when EPA has information indicating that a system is likely to be non-durable will EPA not certify until EPA's concerns are resolved.

EPA is proposing to change the small-volume manufacturers' durability demonstration by: (1) Proposing to use manufacturer-specific d.f.'s when sufficient data is available; (2) proposing durability procedures for unproven emission control components and systems (and fuel metering systems); and (3) proposing to eliminate the availability of assigned d.f.'s in those applications where the current certification procedures direct the manufacturer to determine appropriate deterioration factors for the vehicles.

1. Manufacturers Certifying Systems With Proven Technology Using Manufacturer-Specific D.F.'s

The current regulations provide EPA with wide discretion on how to determine appropriate assigned d.f.'s. EPA is proposing to revise the certification regulations to change the method used in determining assigned d.f.'s. Under this proposal, the current EPA policy of industrywide assigned d.f.'s would be replaced by manufacturer-determined assigned d.f.'s in certain circumstances.

EPA is proposing that these assigned d.f.'s be determined by the manufacturer using its good engineering judgment subject to certain conditions as previously described.[9] EPA is also proposing that the manufacturer-determined d.f.'s be no lower than the manufacturer-specific average d.f.'s to preclude manufacturers from determining inappropriately low assigned d.f.'s. Using this method may result in specific cases where the manufacturer-specific average d.f.'s of a particular firm are higher than the manufacturer-specific 70th percentile d.f.'s for that same firm due to outlier data. In these limited cases, the manufacturer may use the manufacturer-specific 70th percentile d.f.'s for certification to reduce the impact of the outlier data.[10]

---

[9] Note that, as discussed below, EPA is proposing to no longer provide assigned d.f.'s for LDT and LDV evaporative emissions and LDT and HDE exhaust emissions for manufacturers with annual sales of over 300 units. Therefore, for these manufacturers, assigned d.f.'s would only apply to the general engine and emission control system categories of gasoline-fueled and diesel-fueled LDV's.

[10] Of course, if the high d.f.-producing engine family is still in production it must continue to use its own specific d.f.'s for certification of that particular engine family unless the manufacturer completes a replacement durability vehicle which produces lower d.f.'s.

If the manufacturer does not have sufficient data points to derive manufacturer-specific d.f.'s (i.e., d.f.'s from less than two engine families), then the manufacturer-determined assigned d.f.'s must not be less than the industrywide d.f.'s as published by EPA.[11] For example, if a small-volume manufacturer has generated actual durability test results for a portion of its product line, assigned d.f.'s can be calculated on the basis of manufacturer-specific data. However, if a small-volume manufacturer has not previously generated sufficient durability test results, EPA will continue to publish industrywide assigned d.f.'s for proven systems. EPA is also proposing to specify in the certification regulation that the EPA-provided assigned d.f.'s will be periodically redetermined to estimate the 70th percentile industrywide d.f.'s.

Manufacturer-determined assigned d.f.'s would be more representative of a manufacturer's particular technological capability than the current practice of using industrywide data to determine assigned d.f.'s. Experience has shown that each unique emission system design is liable to perform differently in use, and therefore each system is likely to deteriorate at a different rate. Actual certification d.f.'s generated using durability-data vehicles often vary widely between manufacturers. Therefore, industrywide assigned d.f.'s are not in all cases accurate predictors of every manufacturer's designs. Manufacturer-determined d.f.'s benefit manufacturers with good designs because they get lower d.f.'s. By the same token, it is appropriate for manufacturers with a history of deterioration higher than the industry average to be assigned higher d.f.'s. Since these data are specific to a particular manufacturer and, therefore, represent a manufacturer's actual capability, it is more appropriate to use the manufacturer-determined assigned d.f.'s rather than industrywide d.f.'s.

Incorporating the basis for the assigned d.f.'s more specifically in the small-volume manufacturers certification regulations is intended to more clearly identify the method to be used to certify small-volume manufacturer and small-volume engine family sales. By putting more specific language in the regulations, the industry will be kept as aware as possible of procedures that will have an impact on them. Secondarily, putting the procedural details in the regulations should reduce the need for additional guidance and therefore reduce the administrative burden of the small-volume manufacturers' program.

EPA realizes that the majority of the small-volume manufacturers (manufacturers with total sales of less than 10,000 units) do not have current durability-data vehicle results to use to calculate their manufacturer-specific d.f.'s. Small-volume manufacturers were previously not required to test and evaluate durability-data vehicles. Thus, EPA will provide industrywide assigned d.f.'s for small-volume manufacturers (using proven emission systems) who have not run sufficient (i.e., two) durability vehicles to calculate manufacturer-specific assigned d.f's within an engine and emission control system category.[12] Since section 206(a)(1) of the Act does not permit EPA to require that manufacturers of fewer than 300 vehicles per year complete full durability testing, the industrywide d.f.'s will also be available to them.

2. Manufacturers Certifying Systems With Unproven Technology

EPA is proposing placing new durability vehicle requirements on small-volume manufacturers with sales over 300 units when certifying vehicles equipped with unproven technology emission systems. EPA will define unproven technology as emission control components or systems (and fuel metering systems) which have not been previously certified by EPA on engine families which have been certified with full (e.g., 50,000 mile) durability demonstration. For systems with unproven components, EPA often lacks information that would demonstrate that the emission system is sufficiently durable, and sometimes has insufficient data to determine which particular set of d.f.'s are the most technically appropriate for those system components. In the current program, if EPA has information suggesting that a system is *not* likely to be sufficiently durable, then the Agency will elect not to certify the vehicle design until the Agency's concerns are resolved. Otherwise, EPA has typically certified the unproven design on the basis of industrywide assigned d.f.'s. In such cases, EPA would prefer to rely on durability vehicle data to demonstrate compliance.

EPA considered two alternatives for durability demonstration when small-volume manufacturers use unproven emission control components or systems: (1) Require testing of durability vehicles representing all of the manufacturer's sales equipped with unproven emission control components or systems; or (2) require new durability vehicles representing some percentage of the manufacturer's sales each year in each compliance category that is equipped with unproven emission control components or systems.

The first alternative would provide durability testing representing all of the manufacturer's vehicles equipped with unproven emission control technology. This alternative provides the highest degree of confidence in the vehicles' abilities to comply with emission standards for the vehicles' useful lives. However, this alternative could also be the most costly for a small-volume manufacturer. EPA is not proposing this alternative.

To lessen the cost impact of durability demonstrations on the manufacturers, EPA is proposing the second alternative for manufacturers of more than 300 vehicles per year. The second alternative would require such manufacturers each year to first test and evaluate durability vehicles representing some percentage of the unproven technology sales in each engine and emission control system category equipped with unproven technology. Carryover data could not be used to satisfy this durability data requirement. Upon successful completion of the durability testing requirement and certification of those vehicles, the remainder of these small-volume manufacturers' unproven emission control technology sales for that year may be certified using manufacturer-determined assigned d.f.'s.

EPA is proposing to require durability data for engine/emission control system combinations representing a minimum of 25 percent of each manufacturer's unproven technology sales each year. Twenty-five percent durability demonstration would provide reasonable, short-term confidence that the manufacturer is capable of designing and building vehicles which will have useful life emissions compliance. In addition, requiring only 25 percent of the unproven systems to be represented by durability-data vehicles each year would minimize the yearly cost impact on the manufacturer and allow a phase-in period for the manufacturer to demonstrate the durability of its unproven technology and to generate the data necessary to calculate manufacturer-specific assigned d.f.'s.

Once a durability-data vehicle has been run successfully to represent an unproven technology system, that system and closely comparable system designs of that manufacturer would become proven technology.[13] The manufacturer could use the d.f.'s generated for those systems for certification of the sales represented by the durability vehicles during that year and for carryover purposes in subsequent years.

Of course, for manufacturers of less than 300 vehicles per year, EPA will continue to allow the use of industrywide assigned d.f.'s for certification of all vehicles, including those vehicles equipped with unproven technology, meeting the guidelines of A/C No. 51C.

3. Exhaust Emissions for LDT's and HDE's and Evaporative Emissions for LDV's and LDT's

EPA is proposing that EPA-derived assigned d.f.'s no longer be made available to small-volume manufacturers with sales over 300 units per year for the purpose of certifying LDT's or HDE's for exhaust emissions or for certifying LDV's and LDT's for evaporative emissions. This proposal also applies to large-volume manufacturers certifying according to the small-volume engine family certification regulations. In each of these cases, the current regulations (e.g., 40 CFR 86.085–24(c)) direct each manufacturer not covered by the small-volume procedures to determine its own d.f.'s. The manufacturers are to use good engineering judgment in selecting the engines, subsystems, or components used to determine the emission deterioration so that their emissions deterioration may be expected to represent that of in-use vehicles or engines. This proposal extends this provision (for determining their own d.f.'s) to small-volume manufacturers with sales over 300 units per year and large-volume manufacturers certifying small-volume engine families.

In adopting the existing regulations, EPA anticipated that a manufacturer might make use of development data, bench test data or other available sources of information to develop appropriate d.f.'s. Using this information would be less costly to the manufacturer compared to running a durability-data vehicle for its useful life. In this regard, allowing a manufacturer to determine its own d.f.'s can provide substantial cost savings similar to the savings afforded to manufacturers by assigned d.f.'s. In addition, by providing this flexibility and using these other data, manufacturers should be able to come up with d.f.'s which are more technically representative of emissions deterioration than EPA-derived assigned d.f.'s. Under this proposal, these benefits will also be realized by small-volume manufacturers with sales over 300 units per year and large-volume manufacturers certifying small-volume engine families.

Moreover, in these specific certification categories, there appears to be no technical benefit in using EPA-derived assigned d.f.'s rather than manufacturer-derived d.f.'s. Further, the current assigned d.f. program requires a manufacturer to demonstrate the appropriateness of the assigned d.f.'s to the manufacturer's vehicles. The manufacturer's responsibility under the assigned d.f. program is very similar to the manufacturer's responsibility when it is required to independently determine the appropriate d.f.'s under the current certification procedures. Finally, for large-volume manufacturers certifying small-volume engine families the manufacturer-specific d.f.'s for these categories of vehicles and engines would be based on manufacturer-determined d.f.'s for the rest of the product line.

For these reasons, EPA is proposing to delete the assigned d.f. option for all manufacturers with sales over 300 units for the specific applications of LDT exhaust and evaporative emission, and LDV evaporative emissions and HDE exhaust emissions. This proposal does not extend to manufacturers with annual sales of 300 units or less. Consistent with section 206(a)(1) of the Act, EPA will continue to provide assigned d.f.'s for these manufacturers. These very small manufacturers may not have as much development data and other sources of durability information to allow them to as easily determine appropriate design-specific d.f.'s as larger volume manufacturers would have.

4. Cost Impact of Durability Program Revisions

EPA analyzed the cost impact of the proposed revisions to the small-volume manufacturers durability program. Manufacturers using unproven emission control components or systems will be required to complete some durability vehicle testing which will increase the cost of certification for these manufacturers. However, the d.f.'s developed from the durability-data vehicles should be more representative of the vehicles' emission deterioration than assigned d.f.'s. This will provide greater assurance of useful life emission compliance. Also, EPA anticipates that manufacturers often will elect to use proven emission control hardware (which is usually readily available at a reasonable cost) rather than unproven systems due to (1) emission performance reliability and (2) lower compliance demonstration costs.

There should be no significant cost impact from the proposed changes to provide for manufacturer-determined assigned d.f.'s, and the proposed elimination of assigned d.f.'s for exhaust emission for LDT's and HDE's and evaporative emissions for LDV's and LDT's, for manufacturers with sales over 300 units per year.

EPA's analysis of the cost impact of the proposed revisions to the small-volume manufacturers and small-volume engine family durability program has been placed in Public Docket No. A–85–30.

B. Maintenance and Warranty Service

The current certification program presumes: (1) That emissions warranty coverage required by sections 207(a) and 207(b) of the Act will be supplied by the manufacturer to correct any covered emission and emission-related problems identified during a vehicle's useful life; and (2) that manufacturers will have qualified service facilities and maintenance parts available for use by their customers. In-use emission performance is likely to be worse than that predicted in the certification program if, due to lack of either of these services, vehicles are unable to obtain proper maintenance and warranty service.

EPA is concerned that some small-volume manufacturer vehicles might not be assured warranty service by the manufacturer. In the case of ICI's, the recent imports regulations amendments (52 FR 36136, September 25, 1987) address this issue by requiring the certificate holder who modifies imported nonconforming vehicles to obtain an insurance policy to assure payment of in-use emission warranty repairs if the manufacturer defaults on its obligation. While EPA expects that in most cases the existing regulations (including the recent imports regulation amendments) will assure the availability of warranty service, in some cases (e.g., due to inexperience of some small-volume manufacturers), they may not.

---

[11] Industrywide assigned d.f.'s currently are calculated using the 70th percentile of the industrywide durability data base. The 70th percentile d.f.'s provide a larger safety margin than, say, the 50th percentile or average d.f.'s and were chosen in part to reflect that the data is not specific to one manufacturer.

[12] These manufacturers will determine their own most appropriate d.f.'s. However, the d.f.'s used cannot be lower than the industrywide d.f.'s provided.

[13] A closely comparable design is a design that would qualify under EPA's guidelines for durability data carryover from a system that has completed durability testing to another system. The carryover guidelines are contained in A/C No. 17F. A copy of A/C No. 17F has been placed in the public docket.

Therefore, EPA is proposing that proof of this insurance be provided to EPA at the time of the manufacturer's application for certification. This makes the availability of the insurance a condition of receiving certification and will help ensure that small-volume manufacturers fulfill their warranty responsibility. Requiring the manufacturer to provide proof that the insurance policy has been purchased or proof of a contractual agreement to purchase insurance prior to receiving certification should pose no additional burden to the manufacturer except that the manufacturer may have to obtain the insurance policy a month or two earlier than if proof of purchase were not a condition of certification.

Second, without adequate service facilities and maintenance parts the vehicle owners cannot properly maintain their vehicles. EPA is somewhat concerned that under the existing regulations some vehicles might be certified as capable of complying with emission standards for the vehicles' useful lives (if properly maintained and used) when in fact some emission and emission-related parts might not be available to properly maintain the vehicles. Without proper maintenance, the in-use emission deterioration is likely to be significantly greater than predicted in the certification program.

Although the small-volume manufacturer is subject to the same sanctions as the large-volume manufacturer under the Act, other considerations may make the large-volume manufacturer more likely to make service facilities available for maintenance and warranty service for the emission systems of vehicles they sell. The large-volume manufacturer's future vehicle sales are in part based on current customer satisfaction which can be influenced by the vehicle manufacturer's maintenance services. Further, most dealerships for large-volume manufacturers view their service facilities as a major source of revenue. These incentives are substantial, as evidenced by the fact that it is most common for large-volume manufacturers to combine their sales dealerships with full service facilities. Therefore, EPA sees no need for further assurance that large-volume manufacturers will make service available.

By contrast, the small-volume manufacturers' future sales may not be as closely influenced by the manufacturers' maintenance services. Small-volume manufacturers' vehicles are, in most cases, exotic, expensive, "one of a kind" limited production, or, as in the case of ICI's, modified versions of OEM vehicles. Some small-volume manufacturer sales are probably substantially influenced by brand familiarity. Other small-volume manufacturer sales may be influenced by the consumer's desire to purchase an exotic vehicle. In either case, the consumer may travel considerable distances to purchase the vehicle, thereby making it difficult to return to the dealer for maintenance. As a result, the purchaser may not be as influenced by the dealer's maintenance services, or the lack of maintenance services. In addition, some small-volume manufacturer vehicles, especially the more exotic vehicles, may be once-in-a-lifetime purchases. Again, since the consumer may never purchase another exotic vehicle or at least not the same make, the consumer may not be influenced by the availability of maintenance services.

In the case of ICI's, some vehicle purchasers may think that service is available from the OEM maintenance shop. The vehicle purchaser may not care (at the time of purchase) about such issues and the ICI may not have a marketing incentive to identify available service locations. Moreover, that same consumer may not be aware of, or may not be willing to make any significant effort to have repaired an emission system malfunction that does not otherwise affect the normal operation (i.e., driveability) of the vehicle. Therefore, although EPA currently believes that small-volume manufacturer warranty service generally should be available, EPA is concerned that, under the current program, some small-volume manufacturers may not have sufficient incentives to provide adequate service availability. Without additional incentive to these manufacturers to provide maintenance and warranty service, EPA would be somewhat concerned that the emission systems of some of these vehicles might not be properly maintained. EPA invites public comment on whether availability of service by small-volume manufacturers will be adequate to meet the warranty requirements of section 207(b) of the Act.

In the event that EPA decides that service and parts availability may be a problem, EPA is proposing two changes which should increase the likelihood that owners will also be able to obtain proper maintenance and warranty service from small-volume manufacturers. For the reasons just discussed, these changes will only apply to small-volume manufacturers. The first proposal addresses the availability of emission and emission-related parts and service. The second proposal addresses alternatives to ensure that warranty service will be performed.

First, EPA is proposing that as a condition of certification, the small-volume manufacturer provide a written statement prior to certification affirming that it will have qualified service facilities [14] and repair parts conveniently available [15] in the field for its customers. Specifically, prior to certification the manufacturer must state that it will provide each vehicle purchaser a list of emission and emission-related service parts, including part number designations and sources of parts, for all engine and emission control system parts which might affect vehicle emission performance throughout the full useful life of the vehicle. It must also state that the manufacturer will have qualified service facilities and emission and emission-related spare parts available to service its vehicles. In addition, the small-volume manufacturer must agree to provide the vehicle purchaser at the time of sale with information identifying the closest service facility to the point of sale authorized to perform emission-related warranty service if this service is not available at the point of sale. The manufacturer must also state in its application for certification that vehicle purchasers will be informed of the closest service facility if service is not available at the point of sale.

Second, in addition to the above statement, EPA proposes to require that the small-volume manufacturer provide EPA, upon request, evidence or other information demonstrating that: (1) Qualified service facilities are available at the point of sale of the manufacturer's vehicles, or the vehicle purchaser will be notified of the closest service facilities at the time of sale; and (2) that necessary emission and emission-related parts are readily available at or through these repair facilities. Failure to fulfill this requirement could result in the certificate of conformity being suspended or revoked. Examples of the evidence or other information EPA currently considers acceptable as

---

[14] Qualified service facilities are service facilities which have: Vehicle maintenance instructions; trained service personnel; applicable tools and equipment, including special tools if required; and spare parts for the manufacturer's vehicles.

[15] Conveniently Available—For small-volume manufacturers "conveniently available" means that the vehicle manufacturer maintains an inventory of all spare parts or has made arrangements for the parts manufacturers to supply the parts by expedited shipment (e.g., UPS, overnight express, etc.).

demonstrating service facilities and spare parts availability include: Photographs of service facilities; personnel rosters with personnel qualifications; inventory list of spare parts available at the service facility and/or the manufacturers; copy of nearest service facility location notice the manufacturer issued to the vehicle purchaser, if applicable.

EPA analyzed the potential impact of the provisions in the event EPA determines that they are necessary. Providing the information proposed in this section should represent an insignificant administrative burden for the manufacturers, since the responsible manufacturer should already be obtaining the required insurance and providing these services and parts in order to meet its obligations under the Act and the existing regulations.

C. Vacuum Hose Routing Diagram

EPA is proposing that a vacuum hose routing diagram be included on the vehicle emission control information label. This will aid in-use vehicle inspection by making it easier for vehicle inspectors to verify that the emission control hardware is properly installed. Further, it should assist mechanics in checking their work for proper installation. Such a vacuum hose routing diagram is currently required by State of California motor vehicle regulations and is voluntarily included on the vast majority of vehicles sold in the rest of the U.S. Although most manufacturers are already voluntarily installing a vacuum hose routing diagram on all their vehicles, EPA wants to be sure that all manufacturers, including new manufacturers, also include a routing diagram on their vehicles. Therefore, EPA proposes that all manufacturers be required to include a vacuum hose routing diagram on their vehicles. Since this is a standard industry practice voluntarily being implemented by most manufacturers, EPA believes this amendment will represent an insignificant burden to manufacturers.

EPA analyzed the impact of the proposed revision to the vehicle emission control information label. EPA estimates that the cost for including the proposed additional information on the label should not result in a significant increase in the manufacturer's costs. The additional cost is estimated to be only a few cents per label. EPA believes that the additional information on the label will significantly improve maintenance of the vehicles. EPA anticipates that the improved maintenance benefits will far outweigh the additional cost of the label. (See cost analysis in Public Docket A-85-30.)

D. Aggregation

EPA put in place several constraints to stop a large manufacturer from attempting to certify as several small-volume subdivisions when it adopted its 1981 regulations (46 FR 16259, March 12, 1981). In the existing regulations and in their implementation, EPA has aggregated the projected sales of all firms having any significant financial or managerial link, including common ownership. Section 86.085-1(e) of the regulations specifies that "vehicles produced at facilities leased, operated, controlled, supervised, or in ten percent or greater part owned by the manufacturer shall be counted in calculating the total sales of the manufacturer." Also, according to § 86.084-14(b)(2), where there is more than one importer or distributor of vehicles manufactured by the same person, the sales of all these importers and distributors shall be aggregated. EPA generally has not applied this provision to aggregate sales of genuinely independent ICI's who import nonconforming vehicles for resale, modify these vehicles to allow them to meet emission standards, and thus become manufacturers of the vehicle.

EPA proposes to add three provisions to the current regulations. First, EPA proposes to change the wording of 40 CFR 86.085-1(e) in order to preclude possible misunderstanding and to clarify its interpretation. EPA is proposing to make clear that if one firm leases, operates, controls, supervises or in ten percent or greater part owns production facilities used by another manufacturer, then the combined sales of both manufacturers (or multiple manufacturers in the case of three or more) is used to determine the eligibility of each manufacturer to certify under the small-volume manufacturer rules. EPA has always interpreted the reference to "manufacturer" in this provision as applying to all manufacturers in the relationship. Thus, EPA has always used the combined sales of both manufacturers in determining small-volume manufacturer eligibility for each and every manufacturer involved in the arrangement.

Second, in order to clarify the interpretation of "controlled" as used in 40 CFR 86.085-1(e), EPA proposes to add the wording that where two or more firms have common corporate officers who are responsible for the overall direction of the companies, the sales should be grouped together. The interrelationship resulting from such common corporate officers is consistent with the other financial and managerial links which result in sales aggregation.

Third, EPA proposes to amend the regulations to clarify mutual equity ownership, (i.e., to specify aggregating the sales of two or more firms if a third party has equity ownership of ten percent or more in each of the firms). This is a natural extension of current language which specifies that one firm will be aggregated with another if one of them owns ten percent or more of the other.

E. Changes to Emission-Data Vehicle (EDV) Mileage Requirements

EPA is proposing to establish a minimum mileage requirement for EDV's for all manufacturers. Prior to the certification procedure revisions of March 12, 1981 and October 13, 1981, manufacturers were required to accumulate 4,000 miles on each EDV to assure that its emission performance had stabilized prior to being emission tested. The 1981 certification procedure revisions allowed manufacturers to determine the minimum amount of mileage accumulation required to stabilize the vehicle's emission performance. A review of the certification data base indicates that manufacturers have typically accumulated a minimum of around 2,500 miles on EDV's to assure the vehicles emission performance had stabilized. No manufacturer accumulated less than 2,000 miles on an EDV.

EPA is somewhat concerned that in the future some manufacturers may use this flexibility in mileage accumulation to determine, whether intentionally or inadvertently, inappropriately low EDV test results. Specifically, when new, a catalyst has exceptionally high performance and is very effective at converting most hydrocarbon, carbon monoxide and oxides of nitrogen emissions coming out of the engine, thus keeping the regulated emissions atypically low. This exceptional catalyst performance quickly drops off as mileage accumulates until the catalyst conversion efficiency stabilizes and then deteriorates much more gradually with additional mileage. If a manufacturer chooses to test its EDV's prior to the stabilized emission mileage, the manufacturer could take advantage of this exceptional catalyst performance and obtain emission test results uncharacteristically low compared to a stabilized vehicle. Application of the d.f.'s to such results would predict an inappropriately low useful life emission. Allowing EDV testing before the vehicle has stabilized could mean that a vehicle

BEST COPY AVAILABLE

design is inappropriately certified (i.e., the certification test data predicted useful life compliance but in reality this prediction was too low). Therefore, EPA proposes to establish a minimum mileage requirement of 2,000 miles for EDV's (62 hours for catalyst equipped heavy-duty engines) regardless of manufacturer size. EPA expects that these low mileage EDV concerns would be eliminated by this minimum mileage requirement.

The impact of the proposed 2,000-mile minimum for EDV mileage accumulation on the cost of the manufacturers' certification program was analyzed. Since all current manufacturers have accumulated at least 2,000 miles on EDV's, the 2,000-mile minimum mileage requirement will not cause an impact on them. For those manufacturers using unproven emission control systems, EPA also believes that the proposed change would have little or no impact on them given that virtually all such manufacturers who have certified new designs in the past have accumulated at least 2,000 miles prior to emission data testing. In such a case, the proposed regulation change would have no impact on these manufacturers.

F. Reduction in the Number of Required Emission-Data Vehicles

The current regulations applicable to manufacturers with sales of 10,000 units or more require the testing of two EDV's in those small-volume engine families certified with assigned d.f.'s. For manufacturers with sales of less than 10,000 units, the regulations require only one EDV per engine family. EPA proposes to also require only one emission-data test vehicle for small-volume engine families certified using assigned d.f.'s by manufacturers with sales of 10,000 units or more. This proposal will reduce the regulatory burden in these manufacturers. However, given the limited diversity of designs typical of these small-volume engine families, the increased risk of inappropriately certifying an engine due to less emission test data is insignificant. This proposal will make the small-volume manufacturer's and small-volume engine family certification requirements consistent for all engine families certified with assigned d.f.'s.

G. Other Changes

The Agency proposes to standardize the worst-case EDV (engine) selection criteria contained in the certification procedures. Currently, the small-volume manufacturer worst-case EDV selection criteria differs slightly from the EDV selection criteria applicable to manufacturers whose projected sales exceed 10,000 units per year. The differences (e.g., heaviest (including options) vehicle versus heaviest equivalent test weight (including options) and largest frontal area vs. highest road load horsepower, etc.) resulted when the Agency promulgated changes to the EDV selection criteria (46 FR 50464, October 13, 1981) for large-volume manufacturers. The larger manufacturers have a more diverse product line; therefore, the Agency was more definitive than in the small-volume manufacturer certification procedure.

Changing the small-volume manufacturer EDV selection criteria to be consistent with the larger volume manufacturer vehicle selection criteria should not impact the small-volume manufacturer worst-case vehicle selections. The majority of the small-volume manufacturer engine families have only one vehicle with few, if any, options. Therefore, the same EDV would be selected under the revised selection criteria as under the original small-volume manufacturer EDV selection criteria. In addition, the Agency is proposing that larger volume manufacturers utilize the small-volume manufacturer EDV selection criteria when certifying engine families under the optional certification procedures (§ 86.090–24(e)(2)) available to larger manufacturers for small-volume engine families. Therefore, revising the small-volume manufacturer EDV selection criteria to be consistent with the larger volume manufacturer vehicle selection criteria should reduce potential confusion resulting from differing EDV selection criteria for these larger manufacturers.

IV. Regulatory Flexibility

The Regulatory Flexibility Act of 1980 requires Federal agencies to identify potentially adverse impacts of proposed Federal regulations upon small entities. In instances where significant impacts are possible on a substantial number of these entities, agencies are required to perform a preliminary Regulatory Flexibility Analysis (RFA). EPA has determined that the certification revisions proposed herein will not have a significant impact on a substantial number of small-volume manufacturers.

The actual impact of the proposed revisions on each manufacturer is affected by the emission control system chosen by the manufacturer. Under the proposed revisions, the previous certification history of the emission control system (and fuel metering system) the manufacturer chooses to use on its vehicles or engines will determine the durability demonstration requirements the manufacturer must complete. Manufacturers using proven emission control systems (and fuel metering systems) will not incur significant additional costs. Therefore, there will be no significant impact on these manufacturers.

If a manufacturer chooses on its own volition to use unproven emission control or fuel metering systems, EPA is proposing to require additional durability demonstration. In most cases it is unlikely that the manufacturer would choose to use unproven emission control or fuel metering systems. Proven emission control systems and fuel metering systems are readily available from OEM's (or the suppliers of OEM equipment), generally at less cost to the small-volume manufacturer than developing a new, unique system. However, if the small-volume manufacturer is projecting a large number of vehicle sales in an engine family the cost of system development and durability demonstration could be less, on a per-vehicle basis, than purchasing previously proven emission control systems. The manufacturer will likely make the decision to use either previously proven or unproven emission control or fuel metering systems based on economic considerations.

EPA analyzed the potential impact of the durability requirements associated with the use of unproven emission control or fuel metering systems on the small-volume manufacturer. A copy of the economic impact analysis has been placed in the public docket. Those manufacturers choosing to use unproven emission control or fuel metering systems will incur additional time and cost to complete the certification process. The amount of time required to complete a durability-data vehicle considerably lengthens the certification process. Approximately four months are required to accumulate the necessary durability mileage (e.g., 50,000 miles for light-duty vehicles) versus less than one month for EDV mileage accumulation (i.e., typically between 2,500 and 5,000 miles). EPA estimates that, for the initial year these regulations are in effect, less than 15 percent of the small-volume manufacturers may choose to use unproven emission control systems. Once these unproven systems are initially evaluated, subsequent model years should see significantly less unproven systems certified. This low incidence should not represent a significant number of small entities. Furthermore, even for those designs certified with unproven systems, the additional costs due to durability demonstration should not exceed three percent of the purchase price of an

average vehicle for that initial model year. The estimated increase in the purchase price of an average vehicle varies significantly with the number of vehicles represented by the durability demonstration. The estimated price increase for sixty typically imported vehicles is less than three percent, whereas the price increase decreases to about one-half (0.5) percent per vehicle for sales of 300 vehicles. Therefore, there is not a significant impact on these specific manufacturers.

Therefore, based on the above, the certification revisions proposed herein should not have a significant impact on a substantial number of small entities.

V. Economic Impact

Section 3(b) of Executive Order 12291 requires EPA to determine whether a rule it intends to propose or to issue is a major rule and to prepare a Regulatory Impact Analysis (RIA) for all major rules. EPA has determined that this action is not a "major rule" requiring preparation of an RIA since it will not have an annual effect on the economy of $100 million or more. Additionally, it will not result in a major increase in overall industry costs or prices. Finally, this action will not have a significant adverse effect overall on industry, competition, employment, investment, productivity, innovation, or the ability of domestic businesses to compete with foreign companies since imported vehicles are a small portion of the total number of vehicles sold in the U.S. Therefore, a preliminary RIA has not been prepared. Potential economic effects of the proposed small-volume certification rules, however, have been addressed in an economic impact analysis which was prepared in accord with the RIA requirements. The Agency's economic impact analysis for the recent rule on the importation of nonconforming motor vehicles and motor vehicle engines also is incorporated by reference herein and has been placed in the public docket for this rulemaking. The estimated first year cost for the proposed revision to the certification procedure is less than $500,000 for the industry. The estimated cost for the second and subsequent years would likely be reduced substantially by the use of data carryover. The use of maximum carryover of emission data could reduce costs to less than $6,000 for the industry. This analysis has been placed in the Public Docket for this rulemaking. The combined rules will not have an annual effect on the economy of $100 million or more.

VI. OMB Review

This action was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB to EPA and any EPA response to those comments are available for public inspection at Public Docket A–85–30 located in EPA's Central Docket Section (LE–131), 401 M Street SW., Washington, DC 20460.

VII. Paperwork Reduction Act

The information collection requirements in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* An Information Collection Request document has been prepared by EPA (ICR No. 783) and a copy may be obtained from IPB Desk Officer Carla Levesque, Information Policy Branch, EPA, 401 M Street SW. (PM–223), Washington, DC 20460 or by calling (202) 382–2740. Comments on these requirements may be submitted to EPA and the Office of Information and Regulatory Affairs, OMB, 726 Jackson Place NW., Washington, DC 20503 marked "Attention: Desk Officer for EPA." The final rule will respond to any OMB or public comments on the information collection requirements.

List of Subjects in 40 CFR Part 86

Administrative practice and procedure, Air pollution control, Gasoline, Motor vehicles, Labeling, Motor vehicle pollution, Reporting and recordkeeping requirements.

Authority: Secs. 202, 203, 206, 207, 208, 215, and 301(a) of the Clean Air Act, as amended; 42 U.S.C. 7521, 7522, 7524, 7525, 7541, 7542, 7549, 7550, and 7601(a).

Date: February 26, 1988.

Lee M. Thomas,

Administrator.

APPENDIX—EXPLANATION OF SPECIFIC CHANGES

Section	Change	Reason
1. Part 86, Authority	None.	
2. Add new § 86.090–1:		To implement the following changes for the 1990 model year
(a)	Revise language to specify year of applicability	First year regulations are applicable.
(d)	do	Do.
(e)	Revise language to include heavy-duty vehicles and vehicles or engines imported under 40 CFR 85.1505 and 40 CFR 85.1509.	To include all vehicle or engine categories in manufacturer's combined total sales.
3. Add new § 86.090–2	Revise to include new definitions	To include definitions of proven and unproven emission control systems.
4. Amend § 86.091–2	Incorporated definitions contained in § 86.090–2	To continue definitions.
5. Add new § 86.090–14:		
(b)(1)	Revise language to include heavy-duty vehicles and all vehicles or engines imported under 40 CFR 85.1505 and 40 CFR 85.1509.	To include all vehicles or engines in manufacturer's combined total sales.
(b)(2)	Revise language to specify aggregated relationships	To define all relationships which cause manufacturer's sales to be combined with another manufacturers.
(b)(2)(i)	Added language specifying relationships which will result in aggregation.	Do.
(b)(2)(ii)	do	Do.
(b)(2)(iii)	do	Do.
(b)(2)(iv)	do	Do.
(c)(7)(i)(A)	Revised language to specify one emission-data test vehicle (engine) per engine family.	Clarification.
(c)(7)(i)(A)(*1*)	Revised language defining worst-case vehicle selection criteria	To be consistent with criteria contained in § 86.090–24(b).
(c)(7)(i)(A)(*2*)	Revised language defining worst-case engine selection criteria	Do.
(c)(7)(i)(B)	Revised language to include minimum service accumulation distance or time.	To include new requirement of minimum service accumulation.
(c)(7)(i)(C)	Revised language to identify new requirements	To include new durability requirements.

APPENDIX—EXPLANATION OF SPECIFIC CHANGES—Continued

Section	Change	Reason
(c)(7)(i)(C)(*1*)	Add language to define durability requirements for manufacturers with aggregated total sales less than 300 units per year and to define assigned deterioration factors provided by the Administrator.	To include new durability requirements and define assigned deterioration factors.
(c)(7)(i)(C)(*2*)	Add language to define durability requirements for manufacturers with aggregated total sales of 300 through 9,999 units per year.	To include new durability requirements.
(c)(7)(i)(C)(*2*)(*i*)	Add language to define exhaust emissions durability requirements for light-duty vehicles equipped with proven emission control systems.	Do.
(c)(7)(i)(C)(*2*)(*ii*)	Add language to define exhaust emissions durability requirements for light-duty vehicles equipped with unproven emission control systems.	Do.
(c)(7)(i)(C)(*2*)(*iii*)	Add language to define durability requirements for light-duty vehicles, light-duty trucks, and heavy-duty vehicle evaporative emission and light-duty truck and heavy-duty engine exhaust emissions.	Do.
(c)(8)	Revise language to clarify maintenance requirements for durability-data vehicles or engines and maintenance instructions provided to vehicle or engine purchaser.	Clarification to make consistent § 86.088–25.
(c)(9)(i)	Redesignation of (c)(9) and added language to make section 26 of this subpart applicable.	To incorporate mileage and service accumulation requirements.
(c)(9)(ii)	Added to continue nonapplicability of section 27 of this subpart.	Added due to redesignation of (c)(9).
(c)(11)(ii)(B)(*1*)	Added evaporative emission family name	Clarification.
(c)(11)(ii)(B)(*2*)	Added the word "carline"	Clarification.
(c)(11)(ii)(B)(*10*)	Added the words "surface area" and "total precious metal loading".	Clarification.
(c)(11)(ii)(B)(*18*)	Added language requiring submission of proof of insurance coverage required by 40 CFR 85.1510(b), if applicable.	New Requirement.
(c)(11)(iii)(D)(*7*)	Added language requiring statement concerning maintenance facilities and emission and emission-related service parts.	To include new requirement.
(c)(11)(iii)(E)	Added language requiring submission of information on manufacturer-determined deterioration factors.	To include new requirement.
6. Add New § 86.090–24:		To implement the following changes for 1990 model year.
(e)(1)	Deleted contents and reserve subparagraph	No longer required, requirements included in subparagraph (e)(2).
(e)(2)	Revised language to reference § 86.090–14	To include new durability and emission-data test vehicle requirements consistent with § 86.090–14.
7. Add New § 86.090–26:		To implement the following changes for the 1990 model year.
(a)(3)(i)(A)	Added language to include minimum mileage requirements, and recording and reporting of vehicle mileage.	New requirement.
(a)(3)(ii)(A)	do	Do.
(b)(4)(i)(A)	do	Do.
(b)(4)(ii)(A)	do	Do.
(c)(4)	Added language specifying minimum service accumulation time for engines equipped with catalyst.	Do.
8. Add New § 86.090–35:		To implement the following changes in the 1990 model year.
(a)(1)(iii)(C)	Added language to identify new requirement	To include requirement for vacuum hose routing diagram.
(a)(1)(iii)(J)		To include labeling requirement specified in 40 CFR 85.1510.
(a)(2)(iii)(L)	do	To include requirement for vacuum hose routing diagram.
(a)(2)(iii)(M)	do	To include labeling requirement specified in 40 CFR 85.1510.
(a)(3)(iii)(L)	do	To include labeling requirement specified in 40 CFR 85.1510.
(a)(4)(iii)(F)	do	Do.
9. Amended § 86.091–35	Added language to incorporate labeling requirement implemented in the 1990 model year as defined in No. 8 above.	To implement labeling requirements as specified in No. 8 above for the 1991 model year.

For reasons set forth in the preamble, 40 CFR Part 86 is proposed to be amended as follows:

PART 86—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES: CERTIFICATION AND TEST PROCEDURES

1. The authority citation for Part 86 continues to read as follows:

Authority: Secs. 202, 203, 206, 207, 208, 215, and 301(a)(1) of the Clean Air Act as amended; 42 U.S.C. 7521, 7522, 7524, 7525, 7541, 7542, 7549, 7550, and 7601(a)(1).

2. A new § 86.090–1, which is identical to § 86.085–1, except for revisions to paragraphs (a), (d), and (e), is added to read as follows:

§ 86.090–1 General applicability.

(a) The provisions of this subpart apply to 1990 and later model year new gasoline-fueled and diesel light-duty vehicles, 1990 and later model year new gasoline-fueled and diesel light-duty trucks, and 1990 and later model year new gasoline-fueled and diesel heavy-duty engines.

(b) *Optional applicability.* A manufacturer may request to certify any heavy-duty vehicle 10,000 pounds GVWR or less in accordance with the light-duty truck provisions. Heavy-duty engine or vehicle provisions do not apply to such a vehicle.

(c) [Reserved]

(d) *Alternative Durability Program.* For 1990 and later model year light-duty vehicles and light-duty trucks, a manufacturer may elect to participate in the Alternative Durability Program. This optional program provides an alternative method of determining exhaust emission control system durability. The general procedures and a description of the programs are contained in § 86.085–13 and specific provisions on test vehicles and compliance procedures are contained in § 86.090–24 and § 86.088 28 respectively.

(e) *Small volume manufacturers.* Special certification procedures are available for any manufacturer whose projected combined U.S. sales of light-duty vehicles, light-duty trucks, heavy-duty vehicles, and heavy-duty engines in its product line (including all vehicles and engines imported under the provisions of 40 CFR 85.1505 and 40 CFR 85.1509) are fewer than 10,000 units for the model year in which the manufacturer seeks certification. In order to certify its product line under these optional procedures, the small-volume manufacturer must first obtain the Administrator's approval. The manufacturer must meet the eligibility criteria specified in § 86.090–14(b) before the Administrator's approval will be granted. The small-volume manufacturer's certification procedures are described in § 86.090–14.

(f) *Optional Procedures for Determining Exhaust Opacity.* (1) The provisions of Subpart I apply to tests which are performed by the Administrator, and optionally, by the manufacturer.

(2) Measurement procedures, other than that described in Subpart I, may be used by the manufacturer provided the manufacturer satisfies the requirements of § 86.088–23(f).

(3) When a manufacturer chooses to use an alternative measurement procedure it has the responsibility to determine whether the results obtained by the procedure will correlate with the results which would be obtained from the measurement procedure in Subpart I. Consequently, the Administrator will not routinely approve or disapprove any alternative opacity measurement procedure or any associated correlation data which the manufacturer elects to use to satisfy the data requirements for Subpart I.

(4) If a confirmatory test(s) is performed and the results indicate there is a systematic problem suggesting that the data generated under an optional alternative measurement procedure do not adequately correlate with Subpart I data, EPA may require that all certificates of conformity not already issued be based on data from Subpart I procedures.

3. A new § 86.090–2 is added, to read as follows:

§ 86.090–2 Definitions.

The definitions of § 86.088–2 remain effective. The definitions listed in this section apply beginning with the 1990 model year.

Proven emission control systems are emission control systems (and fuel metering systems) that have completed full durability testing evaluation over the vehicle's or engine's useful life in some other certified engine family or are, as determined by the Administrator, of comparable functional quality and manufactured using comparable material and production techniques as systems which have been durability demonstrated in some other certified engine family.

Unproven emission control systems are emission control systems (and fuel metering systems) that have not completed full durability testing evaluation over the vehicle's or engine's useful life in some other certified engine family or are not of comparable functional quality and manufactured using comparable materials and production techniques as systems which have been durability demonstrated in some other certified engine family.

4. The introductory text in § 86.091–2 is revised to read as follow:

§ 86.091–2 Definitions.

The definitions of § 86.090–2 remain effective. The definitions listed in this section apply beginning with the 1991 model year.

* * * * *

5. A new § 86.090–14 is added to read as follows:

§ 86.090–14 Small-volume manufacturers certification procedures.

(a) The small-volume manufacturers certification procedures described in paragraphs (b) and (c) of this section are optional. Small-volume manufacturers may use these optional procedures to demonstrate compliance with the general standards and specific emission requirements contained in this subpart.

(b)(1) The optional small-volume manufacturers certification procedures apply to light-duty vehicles, light-duty trucks, heavy-duty vehicles, and heavy-duty engines produced by manufacturers with U.S. sales including all vehicles and engines imported under the provisions of 40 CFR 85.1505 and 40 CFR 85.1509 (for the model year in which certification is sought) of fewer than 10,000 units (LDV, LDT, HDV and HDE combined).

(2) For the purpose of determining the applicability of paragraph (b)(1) of this section, the sales the Administrator shall use shall be the aggregate of the projected or actual sales of those vehicles and/or engines in any of the groupings identified below in this subparagraph. If the aggregate sales is equal to or greater than 10,000 units, then each firm involved will be denied use of the small-volume manufacturers certification procedures, even if they operate as independent firms.

(i) Vehicles and/or engines produced by two or more firms, one of which is 10 percent or greater part-owned by another.

(ii) Vehicles and/or engines produced by two or more firms having a common corporate officer(s) who is (are) responsible for the overall direction of the companies;

(iii) Vehicles and/or engines produced by any two or more firms if a third party has equity ownership of 10 percent or more in each of the firms;

(iv) Vehicles and/or engines imported or distributed by all firms where the vehicles and/or engines were manufactured by the same person and the importer or distributer is an authorized agent of the person.

(c) Small-volume manufacturers shall demonstrate compliance with the applicable sections of this subpart as follows:

(1) Sections 1 through 11 of this subpart are applicable.

(2) Section 12 of this subpart is not applicable.

(3) Sections 13 through 20 of this subpart are applicable.

(4) Small-volume manufacturers shall include in their records all of the information that EPA requires in section 21 of this subpart. This information will be considered part of the manufacturer's application for certification. However, the manufacturer is not required to submit the information to the Administrator unless the Administrator requests it.

(5) Section 22 of this subpart is applicable except as noted below.

(i) Small-volume light-duty vehicle and light-duty truck manufacturers may satisfy the requirements of paragraph (e) of section 22 by including a statement of compliance on adjustable parameters in the application for certification. In the statement of compliance the manufacturer shall state that the limits, stops, seals, or other means used to inhibit adjustment have been designed to accomplish their intended purpose based on good engineering practice and past experience. If the vehicle parameter is adjustable the vehicle must meet emission standards with the parameter set any place within the adjustable range (Reference section 21 of this subpart).

(ii) Paragraphs (a), (b), (c), and (d) of section 22 of this subpart are not applicable.

(6) Section 23 of this subpart is applicable.

(7) Section 24 of this subpart is applicable except as noted below.

(i) Small-volume manufacturers may satisfy the requirements of paragraphs

(b) and (c) of section 24 of this subpart by:

(A) *Emission-data*—Selecting one emission-data test vehicle (engine) per engine family by the worst-case emissions criteria as follows:

(*1*) *Light-duty vehicles and light-duty trucks.* The manufacturer shall select the vehicle with the heaviest equivalent test weight (including options) within the engine family. Then within that vehicle the manufacturer shall select, in the order listed, the highest road load power, largest displacement, the transmission with the highest numerical final gear ratio (including overdrive), the highest numerical axle ratio offered in the engine family, and the maximum fuel flow calibration.

(*2*) *Heavy-duty gasoline-fueled engines.* The manufacturer shall select one emission-data engine first based on the largest displacement within the engine family. Then within the largest displacement the manufacturer shall select, in the order listed, highest fuel flow at the speed of maximum-rated torque, the engine with the most advance spark timing, no EGR or lowest EGR flow, and no air pump or lowest actual flow air pump.

(*3*) *Heavy-duty diesel engines.* The manufacturer shall select one emission data engine based on the highest fuel feed per stroke, primarily at the speed of maximum-rated torque and secondarily at rated speed.

(B) Testing light-duty vehicles or light-duty truck emission-data vehicles at any service accumulation distance of at least 2,000 miles (3,219 kilometers) or, catalyst—equipped heavy-duty emission-data engines at any service accumulation time of at least 62 hours, or non-catalyst-equipped heavy-duty engine emission-data engines at any service accumulation time determined by the manufacturer to result in stabilized emissions. The emission performance of the emission-data vehicle or engine must be stabilized prior to emission testing.

(C) *Durability data*—Satisfying the durability-data requirements by complying with the applicable procedures below:

(*1*) Manufacturers with aggregated sales which would not exceed 300 motor vehicles and motor vehicle engines per year may use assigned deterioration factors that the Administrator determines and prescribes. The factors will be the Administrator's estimate, periodically updated and published in an advisory letter or advisory circular, of the 70th percentile deterioration factors calculated using the industrywide data base of previously completed durability-data vehicles or engines used for certification. However, the manufacturer may, at its option, accumulate miles (hours) on a durability-data vehicle (engine) and complete emission tests for the purpose of establishing its own deterioration factor(s).

(*2*) Manufacturers with aggregated sales from and including 301 through 9,999 motor vehicles and motor vehicle engines per year shall use:

(*i*) For light-duty vehicle exhaust emissions from vehicles equipped with proven emission control systems, assigned deterioration factors that the manufacturer determines based on its good engineering judgment. However, the manufacturer may not determine deterioration factors less than either the manufacturer's specific average or 70th percentile deterioration factors, whichever is less (or the EPA supplied industrywide deterioration factors if the manufacturer does not have at least two data points to calculate manufacturer specific average deterioration factors.) The manufacturer specific average deterioration factors are the average of the deterioration factors from all engine families, within the same vehicle/engine-fuel usage category (e.g., gasoline-fueled light-duty vehicle, etc.), previously certified to the same emission standards by the manufacturer. The manufacturer's specific 70th percentile deterioration factors are calculated using the same data base. The manufacturer may, at its option, accumulate miles on durability-data vehicles and complete emission tests for the purpose of establishing its own deterioration factors.

(*ii*) For light-duty vehicle exhaust emissions from vehicles equipped with unproven emission control systems, deterioration factors that the manufacturer determines from official certification durability data generated on vehicles run on engine families representing a minimum of 25 percent of the manufacturer's sales equipped with unproven emission control systems. The sales projections are to be based on total sales projected for each engine/system combination. The durability-data vehicle (engine) mileage accumulation and emission tests are to be conducted according to section 26. The manufacturer must develop deterioration factors by generating durability data in accordance with section 26 of this subpart on a minimum of 25 percent of the manufacturer's projected sales (by engine/system combination) that is equipped with unproven emission control systems. The manufacturer must complete the 25 percent durability requirement before the remainder of the manufacturer's sales equipped with unproven emission control systems is certified using manufacturer-determined deterioration factors. The manufacturer may, at its option, accumulate miles on durability-data vehicles and complete emission tests for the purpose of establishing its own deterioration factors on the remaining sales.

(*iii*) For light-duty vehicle, light-duty truck, and heavy-duty vehicle evaporative emissions and light-duty truck, and heavy-duty engine exhaust emissions, deterioration factors determined in accordance with section 24 of this subpart.

(ii) Paragraphs (d) and (e) of section 24 of this subpart are not applicable.

(8) Section 25 of this subpart is applicable to maintenance performed on durability-data light-duty vehicles, light-duty trucks, heavy-duty vehicles, and heavy-duty engines when the manufacturer completes durability-data vehicles or engines; section 38 of this subpart is applicable to the recommended maintenance the manufacturer includes in the maintenance instructions furnished the purchasers of new motor vehicles and new motor vehicle engines under section 38 of this subpart.

(9)(i) Section 26 of this subpart is applicable if the manufacturer completes durability-data vehicles or engines.

(ii) Section 27 of this subpart is not applicable.

(10) Sections 28 and 29 of this subpart are applicable.

(11)(i) Section 30 of this subpart is applicable, except for paragraph (a) (2) and (b) of that section. In the place of these paragraphs, small-volume manufacturers shall comply with paragraphs (c)(11) (ii) through (11)(v) of this section, as shown below.

(ii) Small-volume manufacturers shall submit an application for certification containing the following:

(A) The names, addresses, and telephone numbers of the persons the manufacturer authorizes to communicate with us.

(B) A brief description of the vehicles (or engines) covered by the certificate (the manufacturers' sales data book or advertising, including specifications, may satisfy this requirement for most manufacturers). The description shall include, as a minimum, the following items as applicable:

(*1*) Engine evaporative family names and vehicle (or engine) configurations.

(*2*) Vehicle carlines or engine models to be listed on the certificate of conformity.

(*3*) The test weight and horsepower setting for each vehicle or engine configuration.

(*4*) Projected sales.

(*5*) Combustion cycle.

(*6*) Cooling mechanism.

(*7*) Number of cylinders.

(*8*) Displacement.

(*9*) Fuel system type.

(*10*) Number of catalytic converters, volume, composition, surface area, and total precious metal loading.

(*11*) Method of air aspiration.

(*12*) Thermal reactor characteristics.

(*13*) Suppliers' and/or manufacturer's name and model number of any emission-related items of the above, if purchased from a supplier who uses the items in its own certified vehicles(s) or engine(s).

(*14*) A list of emission component part numbers.

(*15*) Drawings, calibration curves, and descriptions of emission-related components, including those components regulated under paragraph (e) of section 22 of this subpart, and schematics of hoses and other devices connecting these components.

(*16*) Vehicle adjustments or modifications necessary for light-duty trucks, to assure that they conform to high-altitude standards.

(*17*) A description of the light-duty vehicles and light-duty trucks which are exempted from the high-altitude emission standards.

(*18*) Proof that the manufacturer has obtained or entered an agreement to purchase, when applicable, the insurance policy, required by § 85.1510(b). The manufacturer may submit a copy of the insurance policy or purchase agreement as proof that the manufacturer has obtained or entered an agreement to purchase the insurance policy.

(C) The results of all emission tests the manufacturer performs to demonstrate compliance with the applicable standards.

(D)(*1*) The following statement signed by the authorized representative of the manufacturer: "The vehicles (or engines) described herein have been tested in accordance with [list the applicable Subparts A, B, D, I, N, or P] of Part 86, Title 40, United States Code of Federal Regulations, and on the basis of those tests are in conformance with that subpart. All of the data and records required by that subpart are on file and are available for inspection by the EPA Administrator. We project the total U.S. sales of vehicles (engines) subject to this subpart to be fewer than 10,000 units."

(*2*) A statement as required by and contained in paragraph (c)(5) of this section signed by the authorized representative of the manufacturer.

(*3*) A statement that the vehicles or engines described in the manufacturer's application for certification are not equipped with auxiliary emission control devices which can be classified as a defeat device as defined in section 2 of this subpart.

(*4*) A statement of compliance with section 206(a)(3) of the Clean Air Act.

(*5*) A statement that, based on the manufacturer's engineering evaluation and/or emission testing, the light-duty vehicles comply with emission standards at high altitude unless exempt under paragraph (h) of section 8 of this subpart.

(*6*) A statement that, based on the manufacturer's engineering evaluation and/or emission testing, the light-duty trucks sold for principal use at designated high-altitude locations comply with the high-altitude emission requirements and that all other light-duty trucks are at least capable of being modified to meet high-altitude standards unless exempt under paragraph (g)(2) of section 9 of this subpart.

(*7*) A statement affirming that the manufacturer will provide a list of emission and emission-related service parts, including part number designations and sources of parts, to the vehicle purchaser for all emission and emission-related parts which might affect vehicle emission performance throughout the useful life of the vehicle. Secondly, it must state that qualified service facilities will be available to service its vehicles. In addition, the manufacturer must indicate that the vehicle purchaser will be provided information identifying the closest authorized service facility to the point of sale if service facilities are not available at the point of sale. Such information should also be made available to the Administrator upon request.

(E) Manufacturers utilizing deterioration factors determined by the manufacturer based on its good engineering judgment (regarding paragraph (e)(7)(i)(C) of this section) shall provide a description of the method(s) used by the manufacturer to determine the deterioration factors.

(iii) If the manufacturer meets requirements of this subpart, the Administrator will issue a certificate of conformity for the vehicles or engines described in the application for certification.

(iv) The certificate will be issued for such a period not to exceed one model year as the Administrator may determine and upon such terms as he may deem necessary to assure that any vehicle or engine covered by the certificate will meet the requirements of the Act and of this subpart.

(v)(A) If, after a review of the statements and descriptions submitted by the manufacturer, the Administrator determines that the manufacturer has not met the applicable requirements, the Administrator shall notify the manufacturer in writing of his intention to deny certification, setting forth the basis for his determination. The manufacturer may request a hearing on the Administrator's determination.

(B) If the manufacturer does not request a hearing or present the required information the Administrator will deny certification.

(12) Sections 31 and 32 of this subpart are not applicable.

(13) Under section 33 of this subpart, small-volume manufacturers are covered by the following.

(i) Small-volume manufacturers may make production changes (running changes) without receiving the Administrator's prior approval. The manufacturer shall assure (by conducting emission tests as it deems necessary) that the affected vehicles (engines) remain in compliance with the requirements of this part.

(ii) The manufacturer shall notify the Administrator within seven days after implementing any production-related change (running change) that would affect vehicle emissions. This notification shall include any changes to the information required under paragraph (c)(11)(ii) of this section. The manufacturer shall also amend as necessary its records required under paragraph (c)(4) of this section to conform with the production design change.

(14) Section 34 of this subpart is not applicable.

(15) Sections 35 through 39 of this subpart are applicable.

6. A new § 86.090–24, which is identical to § 86.085–24, except for revisions to paragraphs (e)(1) and (e)(2), is added as follows.

§ 86.090–24 Test vehicles and engines.

(a) (1) The vehicles or engines covered by an application for certification will be divided into groupings of engines which are expected to have similar emission characteristics throughout their useful life. Each group of engines with similar emission characteristics shall be defined as a separate engine family.

(2) To be classed in the same engine family, engines must be identical in all the following respects:

(i) The cylinder bore center-to-center dimensions.

(ii)—(iii) [Reserved]

(iv) The cylinder block configuration (air cooled or water cooled; L–6, 90° V–8, etc.).

(v) The location of the intake and exhaust valves (or ports).

(vi) The method of air aspiration.

(vii) The combustion cycle.

(viii) Catalytic converter characteristics.

(ix) Thermal reactor characteristics.

(x) Type of air inlet cooler (e.g., intercoolers and after-coolers) for diesel heavy-duty engines.

(3)(i) Engines identical in all the respects listed in paragraph (a)(2) of this section may be further divided into different engine families if the Administrator determines that they may be expected to have different emission characteristics. This determination will be based upon a consideration of the following features of each engine:

(A) The bore and stroke.

(B) The surface-to-volume ratio of the nominally dimensioned cylinder at the top dead center positions.

(C) The intake manifold induction port size and configuration.

(D) The exhaust manifold port size and configuration.

(E) The intake and exhaust valve sizes.

(F) The fuel system.

(G) The camshaft timing and ignition or injection timing characteristics.

(ii) Light-duty trucks and heavy-duty engines produced in different model years and distinguishable in the respects listed in paragraph (a)(2) of this section shall be treated as belonging to a single engine family if the Administrator requires it, after determining that the engines may be expected to have similar emission deterioration characteristics.

(4) Where engines are of a type which cannot be divided into engine families based upon the criteria listed in paragraphs (a)(2) and (a)(3) of this section, the Administrator will establish families for those engines based upon those features most related to their emission characteristics. Engines that are eligible to be included in the same engine family based on the criteria in paragraphs (a)(2) and (a)(3)(i) of this section may be further divided into different engine families if the manufacturer determines that they may be expected to have different emission characteristics. This determination will be based upon a consideration of the following features of each engine:

(i) The dimension from the center line of the crankshaft to the center line of the camshaft.

(ii) The dimension from the center line of the crankshaft to the top of the cylinder block head face.

(iii) The size of the intake and exhaust valves (or ports).

(5) The gasoline-fueled vehicles covered by an application for certification will be divided into groupings which are expected to have similar evaporative emission characteristics throughout their useful life. Each group of vehicles with similar evaporative emission characteristics shall be defined as a separate evaporative emission family.

(6) For gasoline-fueled light-duty vehicles and light-duty trucks to be classed in the same evaporative emission family, vehicles must be similar with respect to:

(i) Type of vapor storage device (e.g., canister, air cleaner, crankcase).

(ii) Basic canister design.

(iii) Fuel system.

(7) Where vehicles are of a type which cannot be divided into evaporative emission families based on the criteria listed above, the Administrator will establish families for those vehicles based upon the features most related to their evaporative emission characteristics.

(8)(i) If the manufacturer elects to participate in the Alternative Durability Program, the engine families covered by an application for certification shall be grouped based upon similar engine design and emission control system characteristics. Each of these groups shall constitute a separate engine family group.

(ii) To be classed in the same engine family group, engine families must contain engines identical in all of the following respects:

(A) The combustion cycle.

(B) The cylinder block configuration (air-cooled or water-cooled; L–6, V–8, rotary, etc.).

(C) Displacement (engines of different displacement within 50 cubic inches or 15 percent of the largest displacement and contained within a multi-displacement engine family will be included in the same engine family group).

(D) Catalytic converter usage and basic type (non-catalyst, oxidation catalyst only, three-way catalyst equipped).

(9) Engine families identical in all respects listed in paragraph (a)(8) of this section may be further divided into different engine family groups if the Administrator determines that they are expected to have significantly different exhaust emission control system deterioration characteristics.

(10) A manufacturer may request the Administrator to include in an engine family group, engine families in addition to those grouped under the provisions of paragraph (a)(8) of this section. This request must be accompanied by information the manufacturer believes supports the inclusion of these additional engine families.

(11) A manufacturer may combine into a single engine family group those light-duty vehicle and light-duty truck engine families which otherwise meet the requirements of paragraphs (a)(8) through (a)(10) of this section.

(12) The gasoline-fueled heavy-duty vehicles covered by an application for certification will be divided into groupings of vehicles on the basis of physical features which are expected to affect evaporative emissions. Each group of vehicles with similar features shall be defined as a separate evaporative emission family.

(13) For gasoline-fueled heavy-duty vehicles to be classed in the same evaporative emission family, vehicles must be identical with respect to:

(i) Method of fuel/air metering (i.e., carburetion versus fuel injection).

(ii) Carburetor bowl fuel volume, within a 10 cc range.

(14) For gasoline-fueled heavy-duty vehicles to be classed in the same evaporative emission control system, vehicles must be identical with respect to:

(i) Method of vapor storage.

(ii) Method of carburetor sealing.

(iii) Method of air cleaner sealing.

(iv) Vapor storage working capacity, within a 20g range.

(v) Number of storage devices.

(vi) Method of purging stored vapors.

(vii) Method of venting the carburetor during both engine off and engine operation.

(viii) Liquid fuel hose material.

(ix) Vapor storage material.

(15) Where gasoline-fueled heavy-duty vehicles are types which cannot be divided into evaporative emission family-control system combinations based on the criteria listed above, the Administrator will establish evaporative emission family-control system combinations for those vehicles based on features most related to their evaporative emission characteristics.

(b) *Emission data*—(1) *Emission-data vehicles.* Paragraph (b)(1) of this section applies to light-duty vehicle and light-duty truck emission-data vehicles.

(i) Vehicles will be chosen to be operated and tested for emission data based upon engine family groupings. Within each engine family, one test vehicle will be selected based on the following criteria: The Administrator shall select the vehicle with the heaviest equivalent test weight (including options) within the family. Then within that vehicle the Administrator shall select, in the order listed, the highest road-load power, largest displacement, the transmission with the highest numerical final gear ratio (including overdrive), the highest numerical axle ratio offered in that engine family, and the maximum fuel flow calibration.

(ii) The Administrator shall select one additional test vehicle from within each engine family. The vehicle selected shall be the vehicle expected to exhibit the highest emissions of those vehicles remaining in the engine family. If all vehicles within the engine family are similar the Administrator may waive the requirements of this paragraph.

(iii) Within an engine family and exhaust emission control system, the manufacturer may alter any emission-data vehicle (or other vehicles such as including current or previous model year emission-data vehicles, fuel economy data vehicles, and development vehicles provided they meet emission-data vehicles' protocol) to represent more than one selection under paragraphs (b)(1) (i), (ii), (iv), or (vii) of this section.

(iv) If the vehicles selected in accordance with paragraphs (b)(1) (i) and (ii) of this section do not represent each engine-system combination, then one vehicle of each engine-system combination not represented will be selected by the Administrator. The vehicle selected shall be the vehicle expected to exhibit the highest emissions of those vehicles remaining in the engine family.

(v) For high-altitude exhaust emission compliance for each engine family, the manufacturer shall follow one of the following procedures:

(A) The manufacturer will select for testing under high-altitude conditions the vehicle expected to exhibit the highest emissions from the nonexempt vehicles selected in accordance with paragraphs (b)(1) (ii), (iii), and (iv) of this section or,

(B) In lieu of testing vehicles according to paragraph (b)(1)(v)(A) of this section, a manufacturer may provide a statement in its application for certification that, based on the manufacturer's engineering evaluation of such high-altitude emission testing as the manufacturer deems appropriate,

(*1*) All light-duty vehicles not exempt under § 86.087–8(h) comply with the emission standards at high altitude; and

(*2*) Light-duty trucks sold for principal use at designated high-altitude locations comply with the high-altitude emission requirements unless exempt under § 86.088–9(g)(2), and that all light-duty trucks sold for principal use at low altitude, which are not exempt under § 86.088–9(g)(2), are capable of being modified to meet high-altitude standards.

(vi) If 90 percent or more of the engine family sales will be in California, a manufacturer may substitute emission-data vehicles selected by the California Air Resources Board criteria for the selections specified in paragraphs (b)(1)(i), (b)(1)(ii), and (b)(1)(iv) of this section.

(vii) (A) Vehicles of each evaporative emission family will be divided into evaporative emission control systems.

(B) The Administrator will select the vehicle expected to exhibit the highest evaporative emissions, from within each evaporative family to be certified, from among the vehicles represented by the exhaust emission-data selections for the engine family, unless evaporative testing has already been completed on the vehicle expected to exhibit the highest evaporative emissions for the evaporative family as part of another engine family's testing.

(C) If the vehicles selected in accordance with paragraph (b)(1)(vii)(B) of this section do not represent each evaporative emission control system, then the Administrator will select the highest expected evaporative emission vehicle from within the unrepresented evaporative system.

(viii) For high-altitude evaporative emission compliance for each evaporative emission family, the manufacturer shall follow one of the following procedures:

(A) The manufacturer will select for testing under high-altitude conditions the one nonexempt vehicle previously selected under paragraphs (b)(1)(vii) (B) or (C) of this section which is expected to have the highest level of evaporative emissions when operated at high altitude or

(B) In lieu of testing vehicles according to paragraph (b)(1)(viii)(A) of this section, a manufacturer may provide a statement in its application of certification that based on the manufacturer's engineering evaluation of such high-altitude emission testing as the manufacturer deems appropriate,

(*1*) All light-duty vehicles not exempt under § 86.087–8(h) comply with the emission standards at high altitude, and

(*2*) Light-duty trucks sold for principal use at designated high-altitude locations comply with the high-altitude emission requirements unless exempt under § 86.088–9(g)(2), and that all light-duty trucks sold for principal use at low-altitude, which are not exempt under § 86.088–9(g)(2), are capable of being modified to meet high-altitude standards.

(ix) Vehicles selected under paragraph (b)(1)(v)(A) of this section may be used to satisfy the requirements of paragraph (b)(1)(viii)(A) of this section.

(x) (Light-Duty Trucks Only) (A) The manufacturer may reconfigure any of the low-altitude emission-data vehicles to represent the vehicle configuration required to be tested at high altitude.

(B) The manufacturer is not required to test the reconfigured vehicle at low altitude.

(2) *Gasoline-fueled heavy-duty emission-data engines.* Paragraph (b)(2) of this section applies to gasoline-fueled heavy-duty engines.

(i)—(ii) [Reserved]

(iii) The Administrator shall select a maximum of two engines within each engine family based upon features indicating that they may have the highest emission levels of the engines in the engine family as follows:

(A) The Administrator shall select one emission-data engine first based on the largest displacement within the engine family. Then within the largest displacement the Administrator shall select, in the order listed, highest fuel flow at the speed of maximum-rated torque, the engine with the most advanced spark timing, no EGR or lowest EGR flow, and no air pump or lowest actual flow air pump.

(B) The Administrator shall select one additional engine, from within each engine family. The engine selected shall be the engine expected to exhibit the highest emissions of those engines remaining in the engine family. If all engines within the engine family are similar, the Administrator may waive the requirements of this paragraph.

(iv) If the engines selected in accordance with paragraphs (b)(2) (ii) and (iii) of this section do not represent each engine displacement-exhaust emission control system combination, then one engine of each engine displacement-exhaust emission control system combination not represented shall be selected by the Administrator.

(v) Within an engine family/displacement/control system combination, the manufacturer may alter any emission-data engine (or other engine including current or previous model year emission-data engines and development engines provided they meet the emission-data engines' protocol) to represent more than one selection under paragraph (b)(2)(iii) of this section.

(3) *Diesel heavy-duty emission-data engines.* Paragraph (b)(3) of this section applies to diesel heavy-duty emission-data vehicles.

(i) Engines will be chosen to be run for emission data based upon engine family groupings. Within each engine family,

OL

SS
46
MR
9,
988
MI

the requirements of this paragraph must be met.

(ii) Engines of each engine family will be divided into groups based upon their exhaust emission control systems. One engine of each engine system combination shall be run for smoke emission data and gaseous emission data. Either the complete gaseous emission test or the complete smoke test may be conducted first. Within each combination, the engine that features the highest fuel feed per stroke, primarily at the speed of maximum rated torque and secondarily at rated speed, will usually be selected. If there are military engines with higher fuel rates than other engines in the same engine system combinations, then one military engine shall also be selected. The engine with the highest fuel feed per stroke will usually be selected.

(iii) The Administrator may select a maximum of one additional engine within each engine-system combination based upon features indicating that it may have the highest emission levels of the engines of that combination. In selecting this engine, the Administrator will consider such features as the injection system, fuel system, compression ratio, rated speed, rated horsepower, peak torque speed, and peak torque.

(iv) Within an engine family control system combination, the manufacturer may alter any emission-data engine (or other engine such as including current or previous model year emission-data engines and development engines provided they meet the emission-data engines' protocol) to represent more than one selection under paragraphs (b)(3) (ii) and (iii) of this section.

(c) *Durability data*—(1) *Light-duty vehicle durability-data vehicles.* Paragraph (c)(1) of this section applies to light-duty vehicle durability-data vehicles.

(i) A durability-data vehicle will be selected by the Administrator to represent each engine-system combination. The vehicle selected shall be of the engine displacement with the largest projected sales volume of vehicles with that control-system combination in that engine family and will be designated by the Administrator as to transmission type, fuel system, inertia weight class, and test weight.

(ii) A manufacturer may elect to operate and test additional vehicles to represent any engine-system combination. The additional vehicles must be of the same engine displacement, transmission type, fuel system and inertia weight class as the vehicle selected for that engine-system combination in accordance with the provisions of paragraph (c)(1)(i) of this section. Notice of an intent to operate and test additional vehicles shall be given to the Administrator no later than 30 days following notification of the test fleet selection.

(2) *Light-duty trucks.* Paragraph (c)(2) of this section applies to vehicles, engines, subsystems, or components used to establish exhaust emission deterioration factors for light-duty trucks.

(i) The manufacturer shall select the vehicles, engines, subsystems, or components to be used to determine exhaust emission deterioration factors for each engine-family control system combination. Whether vehicles, engines, subsystems, or components are used, they shall be selected so that their emissions deterioration characteristics may be expected to represent those of in-use vehicles, based on good engineering judgment.

(3) *Heavy-duty engines.* Paragraph (c)(3) of this section applies to engines, subsystems, or components used to establish exhaust emission deterioration factors for heavy-duty engines.

(i) The manufacturer shall select the engines, subsystems, or components to be used to determine exhaust emission deterioration factors for each engine-family control system combination. Whether engines, subsystems, or components are used, they shall be selected so that their emissions deterioration characteristics may be expected to represent those of in-use engines, based on good engineering judgment.

(d) For purposes of testing under § 86.090–26 (a)(9) or (b)(11), the Administrator may require additional emission-data vehicles (or emission-data engines) and durability-data vehicles (light-duty vehicles only) identical in all material respects to vehicles (or engines) selected in accordance with paragraphs (b) and (c) of this section, *provided* that the number of vehicles (or engines) selected shall not increase the size of either the emission-data fleet or the durability-data fleet by more than 20 percent or one vehicle (or engine), whichever is greater.

(e)(1) [Reserved]

(2) Any manufacturer may request to certify engine families with combined total sales of fewer than 10,000 light-duty vehicles, light-duty trucks, heavy-duty vehicles, and heavy-duty engines utilizing the procedures contained in § 86.090–14 of this subpart for emission-data vehicle selection and determination of deterioration factors. The deterioration factors shall be applied only to entire engine families.

(f) In lieu of testing an emission-data or durability-data vehicle (or engine) selected under paragraph (b) or (c) of this section, and submitting data therefore, a manufacturer may, with the prior written approval of the Administrator, submit exhaust emission data and/or fuel evaporative emission data, as applicable on a similar vehicle (or engine) for which certification has previously been obtained or for which all applicable data required under § 86.088–23 has previously been submitted.

(g)(1) This paragraph applies to light-duty vehicles and light-duty trucks, but does not apply to the production vehicles selected under paragraph (h) of this section.

(2) (i) Where it is expected that more than 33 percent of a carline, within an engine-system combination, may be equipped with an item (whether that item is standard equipment or an option), the full estimated weight of that item shall be included in the curb weight computation of each vehicle available with that item in that carline, within that engine-system combination.

(ii) Where it is expected that 33 percent or less of the carline, within an engine-system combination, will be equipped with an item (whether that item is standard equipment of an option), no weight for that item will be added in computing the curb weight for any vehicle in that carline, within that engine system combination, unless that item is standard equipment on the vehicle.

(iii) In the case of mutually exclusive options, only the weight of the heavier option will be added in computing the curb weight.

(iv) Optional items weighing less than three pounds per item need not be considered.

(3)(i) Where it is expected that more than 33 percent of a carline, within an engine-system combination, will be equipped with an item (whether that item is standard equipment or an option) that can reasonably be expected to influence emissions, then such items shall actually be installed (unless excluded under paragraph (g)(3)(ii) of this section) on all emission-data and durability-data vehicles of that carline, within that engine-system combination, on which the items are intended to be offered in production. Items that can reasonably be expected to influence emissions are: air conditioning, power steering, power brakes, and other items determined by the Administrator.

(ii) If the manufacturer determines by test data or engineering evaluation that the actual installation of the optional

equipment required by paragraph (g)(3)(i) of this section does not effect the emissions or fuel economy values, the optional equipment need not be installed on the test vehicle.

(iii) The weight of the options shall be included in the design curb weight and also be represented in the weight of the test vehicles.

(iv) The engineering evaluation, including any test data, used to support the deletion of optional equipment from test vehicles, shall be maintained by the manufacturer and shall be made available to the Administrator upon request.

(4) Where it is expected that 33 percent or less of a carline within an engine-system combination will be equipped with an item (whether that item is standard equipment or an option) that can reasonably be expected to influence emissions, that item shall not be installed on any emission-data vehicle or durability-data vehicle of that carline, within that engine-system combination, unless that item is standard equipment on that vehicle or specifically required by the Administrator.

(h) Alternative Durability Program durability-data vehicles. This section applies to light-duty vehicle and light-duty truck durability-data vehicles selected under the Alternative Durability Program described in § 86.085–13.

(1) In order to update the durability data to be used to determine a deterioration factor for each engine family group, the Administrator will select durability-data vehicles from the manufacturer's production line. Production vehicles will be selected from each model year's production for those vehicles certified using the Alternative Durability Program procedures.

(i) The Administrator shall select the production durability-data vehicle designs from the designs that the manufacturer offers for sale. For each model year and for each engine family group, the Administrator may select production durability-data vehicle designs of equal number to the number of engine families within the engine family group, up to a maximum of three vehicles.

(ii) The production durability-data vehicles representing the designs selected in paragraph (h)(1)(i) of this section will be randomly selected from the manufacturer's production. The Administrator will make these random selections unless the manufacturer (with prior approval of the Administrator) elects to make the random selections.

(iii) The manufacturer may select additional production durability-data vehicle designs from within the engine family group. The production durability-data vehicles representing these designs shall be randomly selected from the manufacturer's production in accordance with paragraph (h)(1)(ii) of this section.

(iv) For each production durability-data vehicle selected under paragraph (h)(1) of this section, the manufacturer shall provide to the Administrator (before the vehicle is tested or begins service accumulation) the vehicle identification number. Before the vehicle begins service accumulation the manufacturer shall also provide the Administrator with a description of the durability-data vehicle as specified by the Administrator.

(v) In lieu of testing a production durability-data vehicle selected under paragraph (h)(1) of this section, and submitting data therefore, a manufacturer may, with the prior written approval of the Administrator, submit exhaust emission data from a production vehicle of the same configuration for which all applicable data has previously been submitted.

(2) If, within an existing engine family group, a manufacturer requests to certify vehicles of a new design, engine family, emission control system, or with any other durability-related design difference, the Administrator will determine if the existing engine family group deterioration factor is appropriate for the new design. If the Administrator cannot make this determination or deems the deterioration factor not appropriate, the Administrator shall select preproduction durability-data vehicles under the provisions of paragraph (c) of this section. If vehicles are then certified using the new design, the Administrator may select production vehicles with the new design under the provisions of paragraph (h)(1) of this section.

(3) If a manufacturer requests to certify vehicles of a new design that the Administrator determines are a new engine family group, the Administrator shall select preproduction durability-data vehicles under the provisions of paragraph (c) of this section. If vehicles are then certified using the new design, the Administrator may select production vehicles of that design under the provisions of paragraph (h)(1) of this section.

7. A new § 86.090–26, which is identical to § 86.084–26, except for revisions to paragraphs (a)(3)(i)(A), (a)(3)(ii)(A), (b)(4)(i)(A), and (b)(4)(ii)(A), is added as follows:

§ 86.090–26 Mileage and service accumulation; emission measurements.

(a)(1) Paragraph (a) of this section applies to light-duty vehicles.

(2) The procedure for mileage accumulation will be the Durability Driving Schedule as specified in Appendix IV to this part. A modified procedure may also be used if approved in advance by the Administrator. Except with the advance approval of the Administrator, all vehicles will accumulate mileage at a measured curb weight which is within 100 pounds of the estimated curb weight. If the loaded vehicle weight is within 100 pounds of being included in the next higher inertia weight class as specified in § 86.129, the manufacturer may elect to conduct the respective emission tests at higher loaded vehicle weight.

(3) *Emission-data vehicles.* Unless as otherwise provided for in § 86.080–23(a), emission-data vehicles shall be operated and tested as follows:

(i) *Gasoline-fueled.* (A) The manufacturer shall determine, for each engine family, the mileage at which the engine-system combination is stabilized for emission-data testing. The manufacturer shall maintain, and provide to the Administrator if requested, a record of the rationale used in making this determination. The manufacturer may elect to accumulate 4,000 miles on each test vehicle within an engine family without making a determination. The manufacturer must accumulate a minimum of 2,000 miles (3,219 kilometers) on each test vehicle within an engine family. All test vehicle mileage must be accurately determined, recorded, and reported to the Administrator. Any vehicle used to represent emission-data vehicle selections under § 86.090–24(b)(1) shall be equipped with an engine and emission control system that has accumulated the mileage the manufacturer chose to accumulate on the test vehicle. Fuel economy data generated from certification vehicles selected in accordance with § 86.090–24(b)(1) with engine-system combinations that have accumulated more than 10,000 kilometers (6,200 miles) shall be factored in accordance with § 600.006–87(c). Complete exhaust and evaporative (if required) emission tests shall be conducted for each emission-data vehicle selection under § 86.090–24(b)(1). The Administrator may determine under § 86.090–24(f) that no testing is required.

(B) Emission tests for emission-data vehicle(s) selected for testing under § 86.090–24(b)(1) (v) or (viii) shall be conducted at the mileage (2,000 mile minimum) at which the engine-system combination is stabilized for emission testing under high-altitude conditions.

(C) Exhaust and evaporative emissions tests for emission-data vehicle(s) selected for testing under § 86.090–24(b)(1) (i), (ii), (iii), (iv), or (vii)(B) shall be conducted at the mileage (2,000 mile minimum) at which the engine-system combination is stabilized for emission testing under low-altitude conditions.

(D) For each engine family, the manufacturer will either select one vehicle previously selected under § 86.090–24(b)(1) (i) through (iv) to be tested under high-altitude conditions or provide a statement in accordance with § 86.090–24(b)(1)(v). Vehicles shall meet emission standards under both low- and high-altitude conditions without manual adjustments or modifications. In addition, any emission control device used to conform with the emission standards under high-altitude conditions shall initially actuate (automatically) no higher than 4,000 feet above sea level.

(ii) *Diesel.* (A) The manufacturer shall determine, for each engine family, the mileage at which the engine-system combination is stabilized for emission-data testing. The manufacturer shall maintain, and provide to the Administrator if requested, a record of the rationale used in making this determination. The manufacturer may elect to accumulate 4,000 miles on each test vehicle within an engine family without making a determination. The manufacturer must accumulate a minimum of 2,000 miles (3,219 kilometers) on each test vehicle within an engine family. All test vehicle mileage must be accurately determined, recorded, and reported to the Administrator. Any vehicle used to represent emission-data vehicle selections under § 86.090–24(b)(1) shall be equipped with an engine and emission control system that has accumulated the mileage the manufacturer chose to accumulate on the test vehicle. Fuel economy data generated from certification vehicles selected in accordance with § 86.090–24(b)(1) with engine-system combinations that have accumulated more than 10,000 kilometers (6,200 miles) shall be factored in accordance with § 600.006–87(c). Complete exhaust emission tests shall be conducted for each emission-data vehicle selection under § 86.090–24(b)(1). The Administrator may determine under § 86.090–24(f) that no testing is required.

(B) Emission tests for emission-data vehicle(s) selected for testing under § 86.090–24(b)(1)(v) shall be conducted at the mileage (2,000 mile minimum) at which the engine-system combination is stabilized for emission testing under high-altitude conditions.

(C) Exhaust and evaporative emissions tests for emission-data vehicle(s) selected for testing under § 86.090–24(b)(1) (i) through (iv) shall be conducted at the mileage (2,000 mile minimum) at which the engine-system combination is stabilized for emission testing under low-altitude conditions.

(D) For each engine family, the manufacturer will either select one vehicle previously selected under § 86.090–24(b)(1) (i) through (iv) to be tested under high-altitude conditions or provide a statement in accordance with § 86.090–24(b)(1)(v). Vehicles shall meet emission standards under both low- and high-altitude conditions without manual adjustments or modifications. In addition, any emission control device used to conform with the emission standards under high-altitude conditions shall initially actuate (automatically) no higher than 4,000 feet above sea level.

(4) *Durability-data vehicles.* Unless as otherwise provided for in § 86.088–23(a), durability-data vehicles shall be operated and tested as follows:

(i) *Gasoline-fueled.* Each gasoline-fueled durability-data vehicle selected by the Administrator or elected by the manufacturer under § 86.090–24(c)(1) shall be driven, with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objective of this procedure. Complete exhaust emission tests shall be made on all durability-data vehicles selected by the Administrator or elected by the manufacturer under § 86.090–24(c) at test point mileage intervals that the manufacturer determines. At a minimum, complete exhaust emission tests shall be made at 5,000 miles, and at 50,000 miles. The mileage interval between test points must be of equal length for the interval between zero miles and 5,000 miles, the final interval, and any interval before or after testing conducted in conjunction with vehicle maintenance as specified in § 86.088–25(a)(10). The Administrator may determine under § 86.090–24(f) that no testing is required.

(ii) *Diesel.* Each diesel durability-data vehicle shall be driven, with all emission control systems installed and operating, for 50,000 miles or such lesser distance as the Administrator may agree to as meeting the objectives of the procedure. Complete emission tests (see §§ 86.106 through 86.145) shall be made at test point mileage intervals that the manufacturer determines. At a mininum complete exhaust emission tests shall be made at 5,000 miles and at 50,000 miles. The mileage interval between test points must be of equal length for the interval between zero miles and 5,000 miles, the final interval, and any interval before or after testing conducted in conjunction with vehicle maintenance as specified in § 86.088–25(a)(10).

(iii) The manufacturer may, at its option, alter the durability-data vehicle at the selected test point to represent emission-data vehicle(s) within the same engine/system combination and perform emission tests on the altered vehicle. Upon completion of emission testing, the manufacturer may return the test vehicle to the durability-data vehicle configuration and continue mileage accumulation.

(5) (i) All tests required by this subpart on emission-data vehicles shall be conducted at a mileage equal to or greater than the mileage the manufacturer determines under paragraph (a)(3) of this section.

(ii) All tests required by this subpart on durability-data vehicles shall be conducted within 250 miles of each of the test points.

(6)(i) (A) The manufacturer may conduct multiple tests at any test point at which the data are intended to be used in the deterioration factor. At each test point where multiple tests are conducted, the test results from all valid tests shall be averaged to determine the data point to be used in the deterioration factor calculation, except under paragraph (a)(6)(i)(B) of this section. The test results from emission tests performed before maintenance affecting emissions shall not be averaged with test results after the maintenance.

(B) The manufacturer is not required to average multiple tests if the manufacturer conducts no more than three tests at each test point and if the number of tests at each test point is equal. All test points must be treated the same for all exhaust pollutants.

(ii) The results of all emission testing shall be supplied to the Administrator. The manufacturer shall furnish to the Administrator explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) may be submitted weekly to the Administrator, but shall be air posted or delivered to the Administrator within 7 days after completion of the test. In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.088–23. Where the Administrator conducts a test on a durability-data vehicle at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(iii) The results of all emission tests shall be rounded, using the "Rounding Off Method" specified in ASTM E 29–67, to the number of decimal places contained in the applicable emission standard expressed to one additional significant figure.

(7) Whenever a manufacturer intends to operate and test a vehicle which may be used for emission or durability data, the manufacturer shall retain in its records all information concerning all emissions tests and maintenance, including vehicle alterations to represent other vehicle selections. For emission-data vehicles, this information shall be submitted, including the vehicle description and specification information required by the Administrator, to the Administrator following the emission-data test. For durability-data vehicles, this information shall be submitted following the 50,000-mile test.

(8) Once a manufacturer submits the information required in paragraph (a)(7) of this section for a durability-data vehicle, the manufacturer shall continue to run the vehicle to 50,000 miles, and the data from the vehicle will be used in the calculations under § 86.088–28. Discontinuation of a durability-data vehicle shall be allowed only with the consent of the Administrator.

(9)(i) The Administrator may elect to operate and test any test vehicle during all or any part of the mileage accumulation and testing procedure. In such cases, the manufacturer shall provide the vehicle(s) to the Administrator with all information necessary to conduct this testing.

(ii) The test procedures in §§ 86.106 through 86.145 will be followed by the Administrator. The Administrator will test the vehicles at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other vehicles of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(10) Emission testing of any type with respect to any certification vehicle other than that specified in this part is not allowed except as such testing may be specifically authorized by the Administrator.

(11) This section does not apply to testing conducted to meet the requirements of § 86.088–23(b)(2).

(b)(1) Paragraph (b) of this section applies to light-duty trucks.

(2) There are three types of mileage or service accumulation applicable to light-duty trucks:

(i) Mileage or service accumulation on vehicles, engines, subsystems, or components selected by the manufacturer under § 86.090–24(c)(2)(i). The manufacturer determines the form and extent of this mileage or service accumulation, consistent with good engineering practice, and describes it in the application for certification.

(ii) Mileage accumulation of the duration selected by the manufacturer on emission-data vehicles selected under § 86.090–24(b)(1). The procedure for mileage accumulation will be the Durability Driving Schedule as specified in Appendix IV to this part. A modified procedure may also be used if approved in advance by the Administrator. Except with the advance approval of the Administrator, all vehicles will accumulate mileage at a measured curb weight which is within 100 pounds of the estimated curb weight. If the loaded vehicle weight is within 100 pounds of being included in the next higher inertia weight class as specified in § 86.129, the manufacturer may elect to conduct the respective emission tests at the test weight corresponding to the higher loaded vehicle weight.

(iii) Service or mileage accumulation which may be part of the test procedures used by the manufacturer to establish evaporative emission deterioration factors.

(3) Exhaust emission deterioration factors will be determined on the basis of the mileage or service accumulation described in paragraph (b)(2)(i) of this section and related testing, according to the manufacturer's procedures.

(4) Each emission-data vehicle shall be operated and tested as follows:

(i) *Gasoline-fueled.* (A) The manufacturer shall determine, for each engine family, the mileage at which the engine-system combination is stabilized for emission-data testing. The manufacturer shall maintain, and provide to the Administrator if requested, a record of the rationale used in making this determination. The manufacturer may elect to accumulate 4,000 miles on each test vehicle within an engine family without making a determination. The manufacturer must accumulate a minimum of 2,000 miles (3,219 kilometers) on each test vehicle within an engine family. All test vehicle mileage must be accurately determined, recorded, and reported to the Administrator. Any vehicle used to represent emission-data vehicle selections under § 86.090–24(b)(1) shall be equipped with an engine and emission control system that has accumulated the mileage the manufacturer chose to accumulate on the test vehicle. Fuel economy data generated from certification vehicles selected in accordance with § 86.090–24(b)(1) with engine-system combinations that have accumulated more than 10,000 kilometers (6,200 miles) shall be factored in accordance with § 600.006–87(c). Complete exhaust emission tests shall be conducted for each emission-data vehicle selection under § 86.090–24(b)(1). The Administrator may determine under § 86.090–24(f) that no testing is required.

(B) Emission tests for emission-data vehicle(s) selected for testing under § 86.090–24 (b)(1)(v) or (b)(1)(viii) shall be conducted at the mileage (2,000 mile minimum) at which the engine-system combination is stabilized for emission testing or at 6,436 kilometers (4,000 miles) under high-altitude conditions.

(C) Exhaust and evaporative emission tests for emission-data vehicle(s) selected for testing under § 86.090–24(b)(1) (ii), (iii), (iv)(A), or (vii)(B) shall be conducted at the mileage (2,000 mile minimum) at which the engine system combination is stabilized for emission testing or at 6,436 kilometer (4,000 mile) test point under low-altitude conditions.

(D) For each new engine family, the manufacturer will select one vehicle previously selected under § 86.090–24 (b)(1)(ii) through (b)(1)(iv) to be tested under high-altitude conditions. If the manufacturer recommends adjustments or modifications in order to conform to emission standards at high altitude, such adjustments or modifications shall be made to the test vehicle (in accordance with the instructions to be provided to the ultimate purchaser) before being tested under high-altitude conditions.

(ii) *Diesel.* (A) The manufacturer shall determine, for each engine family, the mileage at which the engine-system combination is stabilized for emission-data testing. The manufacturer shall maintain, and provide to the Administrator if requested, a record of the rationale used in making this determination. The manufacturer may elect to accumulate 4,000 miles on each test vehicle within an engine family without making a determination. The manufacturer must accumulate a minimum of 2,000 miles (3,219 kilometers) on each test vehicle within an engine family. All test vehicle mileage must be accurately determined, recorded, and reported to the Administrator. Any vehicle used to represent emission-data vehicle selections under § 86.090–24(b)(1) shall be equipped with an engine and emission control system that has accumulated the mileage the manufacturer chose to accumulate on the test vehicle. Fuel economy data generated from certification vehicles selected in accordance with § 86.090–24(b)(1) with engine-system combinations that have accumulated more than 10,000 kilometers (6,200 miles) shall be factored in accordance with § 600.006–87(c). Complete exhaust emission tests shall be conducted for each emission-data vehicle selection under § 86.090–24(b(1). The Administrator may determine under § 86.090–24(f) that no testing is required.

(B) Emission tests for emission-data vehicle(s) selected for testing under § 86.090–24(b)(1)(v) shall be conducted at the mileage (2,000 mile minimum) at which the engine-system combination is stabilized for emission testing or at the 6,436 kilometer (4,000 mile) test point under low-altitude conditions.

(C) Exhaust and evaporative emission tests for emission-data vehicle(s) selected for testing under § 86.090–24(b)(1) (ii), (iii), and (iv) shall be conducted at the mileage (2,000 mile minimum) at which the engine-system combination is stabilized for emission testing or at the 6,436 kilometer (4,000 mile) test point under low-altitude conditions.

(D) For each engine family, the manufacturer will select one vehicle previously selected under § 86.090–24 (b)(1)(ii) through (b)(1)(iv) to be tested under high-altitude conditions. If the manufacturer recommends adjustments or modifications in order to conform to emission standards at high-altitude, such adjustments or modifications shall be made to the test vehicle (in accordance with the instructions to be provided to the ultimate purchaser) before being tested under high-altitude conditions.

(iii) [Reserved]

(iv) All tests required by this subpart on emission-data vehicles shall be conducted at a mileage equal to or greater than the mileage the manufacturer determines under paragraph (b)(4) of this section.

(c)(1) Paragraph (c) of this section applies to heavy-duty engines.

(2) There are two types of service accumulation applicable to heavy-duty engines:

(i) Service accumulation on engines, subsystems, or components selected by the manufacturer under § 86.090–24(c)(3)(i). The manufacturer determines the form and extent of this service accumulation, consistent with good engineering practice, and describes it in the application for certification.

(ii) Dynamometer service accumulation on emission-data engines selected under § 86.090–24(b)(2) or § 86.090–24(b)(3). The manufacturer determines the engine operating schedule to be used for dynamometer service accumulation, consistent with good engineering practice. A single engine operating schedule shall be used for all engines in an engine family-control system combination. Operating schedules may be different for different combinations.

(3) Exhaust emission deterioration factors will be determined on the basis of the service accumulation described in paragraph (b)(2)(i) of this section and related testing, according to the manufacturer's procedures.

(4) The manufacturer shall determine, for each engine family, the number of hours at which the engine system combination is stabilized (no less than 62 hours for catalyst equipped) for emission-data testing. The manufacturer shall maintain, and provide to the Administrator if requested a record of the rationale used in making this determination. The manufacturer may elect to accumulate 125 hours on each test engine within an engine family without making a determination. Any engine used to represent emission-data engine under selections § 86.090–24(b)(2) shall be equipped with an engine system combination that has accumulated at least the number of hours determined under this paragraph. Complete exhaust emission tests shall be conducted for each emission-data engine selection under § 86.090–24(b)(2). Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system. The Administrator may determine under § 86.090–24(f) that no testing is required.

(d)(1) Paragraph (d) of this section applies to both light-duty trucks and heavy-duty engines.

(2)(i) The results of all emission testing shall be supplied to the Administrator. The manufacturer shall furnish to the Administrator explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. Tests between test points may be conducted as required by the Administrator. Data from all tests (including voided tests) may be submitted weekly to the Administrator but shall be air posted or delivered to the Administrator within 7 days after completion of the test. In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.088–23. Where the Administrator conducts a test on a durability-data vehicle at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be recorded and reported to the Administrator. These test results shall be rounded, in accordance with ASTM E 29–67, to the number of decimal places contained in the applicable emission standard expressed to one additional significant figure.

(3) Whenever a manufacturer intends to operate and test a vehicle (or engine) which may be used for emission data, the manufacturer shall retain in its records all information concerning all emissions tests and maintenance, including vehicle (or engine) alterations to represent other vehicle (or engine) selections. This information shall be submitted, including the vehicle (or engine) description and specification information required by the Administrator, to the Administrator following the emission-data test.

(4)—(5) [Reserved]

(6) Emission testing of any type with respect to any certification vehicle or engine other than that specified in this subpart is not allowed except as such testing may be specifically authorized by the Administrator.

8. A new § 86.090–35, which is identical to § 86.088–35, except for the addition of paragraphs (a)(1)(iii)(I), (a)(1)(iii)(J), (a)(2)(iii)(L), (a)(2)(iii)(M), (a)(3)(iii)(L), and (a)(4)(iii)(F) to read as follows:

§ 86.090–35 Labeling.

(a) The manufacturer of any motor vehicle (or motor vehicle engine) subject to the applicable emission standards and family particulate emission limits and family NO_x emission limits, as appropriate of this subpart, shall, at the time of manufacture, affix a permanent legible label, of the type and in the manner described below, containing the information hereinafter provided, to all production models of such vehicles (or engines) available for sale to the public and covered by a certificate of conformity under § 86.088–30(a).

(1) *Light-duty vehicles.* (i) A permanent, legible label shall be affixed in a readily visible position in the engine compartment.

(ii) The label shall be affixed by the vehicle manufacturer who has been issued the certificate of conformity for such vehicle, in such a manner that it cannot be removed without destroying or defacing the label. The label shall not be affixed to any equipment which is easily detached from such vehicle.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals, which shall be of a color that contrasts with the background of the label:

(A) The label heading: Vehicle Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches), engine, family identification and evaporative family identification;

(D) Engine tuneup specifications and adjustments, as recommended by the manufacturer in accordance with the applicable emission standards (or family particulate emission limit, as applicable), including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, initial injection timing, and valve lash (as applicable), as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(E) An unconditional statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations which apply to light-duty vehicles;

(F) For vehicles which are part of the diesel particulate averaging program, the family particulate emission limit to which the vehicle is certified;

(G) For vehicles that have been exempted from compliance with the emission standards at high altitude, as specified in § 86.087–8(h):

(*1*) A highlighted statement (e.g., underscored or boldface letters) that the vehicle is certified to applicable emission standards at low altitude only;

(*2*) A statement that the vehicle's unsatisfactory performance under high-altitude conditions makes it unsuitable for principal use at high altitude, and

(*3*) A statement that the emission performance warranty provisions of 40 CFR Part 85, Subpart V do not apply when the vehicle is tested at high altitude; and

(H) For vehicles that have been exempted from compliance with the emission standards at low altitude, as specified in § 86.087–8(i):

(*1*) A highlighted statement (e.g., underscore or boldface letters) that the vehicle is certified to applicable emission standards at high altitude only; and

(*2*) A statement that the emission performance warranty provisions of 40 CFR Part 85, Subpart V do not apply when the vehicle is tested at low altitude.

(I) The vacuum hose routing diagram applicable to the vehicles.

(J) Vehicles granted final admission under § 85.1505 must comply with the labeling requirements contained in § 85.1510.

(2) *Light-duty trucks.* (i) A legible, permanent label shall be affixed in a readily visible position in the engine compartment.

(ii) The label shall be affixed by the vehicle manufacturer who has been issued the certificate of conformity for such vehicle, in such a manner that it cannot be removed without destroying or defacing the label. The label shall not be affixed to any equipment which is easily detached from such vehicle.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals, which shall be of a color that contrasts with the background of the label.

(A) The label heading: Important Vehicle Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches) and engine family identification;

(D) Engine tune-up specifications and adjustments, as recommended by the manufacturer in accordance with the applicable emission standards (or family particulate limit, as appropriate, including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, initial injection timing, and valve lash (as applicable), as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tune-up and what accessories (e.g., air conditioner), if any, should be in operation. If adjustments or modifications to the vehicle are necessary to insure compliance with emission standards (or family particulate limit, or family NO_x emission limit, as appropriate) at either high or low altitude, the manufacturer shall either include the instructions for such adjustments on the label, or indicate on the label where instructions for such adjustments may be found. The label shall indicate whether the engine tune-up or adjustment specifications are applicable to high altitude, low altitude, or both;

(E) The prominent statement: "This vehicle conforms to U.S. EPA regulations applicable to 19__ Model Year New Light-Duty Trucks."

(F) If the manufacturer is provided an alternate useful life period under the provisions of § 86.088–21(f), the prominent statement: "This vehicle has been certified to meet U.S. EPA standards for a useful-life period of ______ years or ____ miles of operation, whichever occurs first. This vehicle's actual life may vary depending on its service application." The manufacturer may alter this statement only to express the assigned alternate useful life in terms other than years or miles (e.g., hours, or miles only).

(G) A statement, if applicable, that the adjustments or modifications indicated on the label are necessary to ensure emission control compliance at the altitude specified.

(H) A statement, if applicable, that the high-altitude vehicle was designated or modified for principal use at high altitude. This statement must be affixed by the manufacturer at the time of assembly or by any dealer who performs the high-altitude modification or adjustment prior to sale to an ultimate purchaser.

(I) For vehicles that have been exempted from compliance with the high-altitude emission standards, as specified in § 86.089–9(g)(2).

(*1*) A highlighted statement (e.g., underscored or boldface letters) that the vehicle is certified to applicable emission standards at low altitude only.

(*2*) A statement that the vehicle's unsatisfactory performance under high-altitude conditions makes it unsuitable for principal use at high altitude, and

(*3*) A statement that the emission performance warranty provisions of 40 CFR Part 85, Subpart I do not apply when the vehicle is tested at high altitude:

(J) For vehicles which are included in the diesel particulate averaging program, the family particulate emission limit to which the vehicle is certified.

(K) For vehicles which are included in the light-duty truck NO_x averaging program, the family NO_x— emission limit to which the vehicle is certified.

(L) The vacuum hose routing diagram applicable to the vehicles.

(M) Vehicles granted final admission under § 85.1505 must comply with the labeling requirements contained in § 85.1510.

(3) *Heavy-duty engines.* (i) A permanent legible label shall be affixed to the engine in a position in which it will be readily visible after installation in the vehicle

(ii) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(A) The label heading: Important Engine Information.

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches) and engine family and model designations;

(D) Date of engine manufacture (month and year). The manufacturer may, in lieu of including the date of manufacture on the engine label, maintain a record of the engine manufacture dates. The manufacturer shall provide the date of manufacture records to the Administrator upon request.

(E) Engine specifications and adjustments as recommended by the manufacturer. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(F) For gasoline-fueled engines the label should include the idle speed, ignition timing, and the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), and valve lash.

(G) For diesel engines the label should include the advertised hp at rpm, fuel rate at advertised hp in mm3/stroke, valve lash, initial injection timing, and idle speed.

(H) The prominent statement: "This engine conforms to U.S. EPA regulations applicable to 19 __ Model Year New Heavy-Duty Engines."

(I) If the manufacturer is provided with an alternate useful life period under the provisions of § 86.088–21(f), the prominent statement: "This engine has been certified to meet U.S. EPA standards for a useful-life period _____ of miles or _____ hours of operation, whichever occurs first. This engine's actual life may vary depending on its service application." The manufacturer may alter this statement only to express the assigned alternate useful life in terms other than miles or hours (e.g., years, or hours only).

(J) *For diesel* engines. The prominent statement: "This engine has a primary intended service application as a _____ heavy-duty diesel engine." (The primary intended service applications are light, medium, and heavy, as defined in § 86.085–2.)

(K) For gasoline-fueled engines one of the following statements, as applicable:

(*1*) For engines certified to the emission standards under § 86.088–10 (a)(1)(i), the statement: "This engine is certified for use in all heavyduty vehicles."

(*2*) For engines certified under the provisions of § 86.088–10(a)(3)(i), the statement: "This engine is certified for use in all heavy-duty vehicles under the special provision of 40 CFR 86.088–10(a)(3)(i)."

(*3*) For engines certified to the emission standards under § 86.088–10 (a)(1)(ii), the statement: "This engine is certified for use only in heavy-duty vehicles with a gross vehicle weight rating above 14,000 lbs."

(L) Engines granted final admission under § 85.1505 must comply with the labeling requirements contained in § 85.1510.

(iv) The label may be made up of one or more pieces; *Provided*, that all pieces are permanently attached to the same engine or vehicle part as applicable.

(4) (i) *Gasoline-fueled heavy-duty vehicles.* A permanent legible label shall be affixed in a readily visible position in the engine compartment. If such vehicles do not have an engine compartment, the label required in paragraphs (a)(4) and (g)(1) of this section shall be affixed in a readily visible position on the operator's enclosure or on the engine.

(ii) The label shall be affixed by the vehicle manufacturer ohas been issued the certificate of conformity for such vehicle, in such a manner that it cannot be removed without destroying or defacing the label. The label shall not be affixed to any equipment which is easily detached from such vehicle.

(iii) The label shall contain the following information lettered in the English language in block letters and numericals, which shall be of a color that contrasts with the background of the label:

(A) The label heading: Vehicle Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Evaporative family identification;

(D) The maximum nominal fuel tank capacity (in gallons) for which the evaporative control system is certified; and,

(E) An unconditioned statement of compliance with the appropriate model year U.S. Environmental Protection Agency regulations which apply to gasoline/fueled heavy-duty vehicles.

(F) Vehicles granted final admission under § 85.1505 must comply with the labeling requirements contained in § 85.1510.

(b) The provisions of this section shall not prevent a manufacturer from also reciting on the label that such vehicle (or engine) conforms to any applicable state emission standards for new motor vehicles (or new motor vehicle engines) or any other information that such manufacturer deems necessary for, or useful to, the proper operation and satisfactory maintenance of the vehicle (or engine).

(c)(1) The manufacturer of any light-duty vehicle or light-duty truck subject to the emission standards (or family particulate emission limits, or family NO_x emission limits, as appropriate) of this subpart shall, in addition and subsequent to setting forth those statements on the label required by the Department of Transportation (DOT) pursuant to 49 CFR 567.4, set forth on the DOT label or an additional label located in proximity to the DOT label and affixed as described in 40 CFR 567.4(b), the following information in the English language, lettered in block letters and numerals not less than three thirty-seconds of an inch high, of a color that contrast with the background of the label:

(i) The Heading: "Vehicle Emission Control Information."

(ii) (A) *For light-duty vehicles,* the statement: "This Vehicle Conforms to U.S. EPA Regulations Applicable to 19__ Model Year New Motor Vehicles."

(B) *For light-duty trucks: (1)* The statement: "This vehicle conforms to U.S. EPA regulations applicable to 19 __ Model Year New Light-Duty Trucks."

(2) If the manufacturer is provided an alternate-useful life period under the provisions of § 86.088–21(f), the prominent statement: "This vehicle has been certified to meet U.S. EPA standards for a useful-life period of _____ years or _____ miles of operation, whichever occurs first. This vehicle's actual life may vary depending on its service application." The manufacturer may alter this statement only to express the assigned alternate useful life in terms other than years or miles (e.g., hours, or miles only).

(iii) One of the following statements, as applicable, in letters and numerals not less than six thirty-seconds of an inch high and of a color that contrasts with the background of the label:

(A) For all vehicles certified as noncatalyst-equipped: NON-CATALYST"

(B) For all vehicles certified as catalyst-equipped which are included in a manufacturer's catalyst control program for which approval has been given by the Administrator: "CATALYST—APPROVED FOR IMPORT"

(C) For all vehicles certified as catalyst-equipped which are not included in a manufacturer's catalyst control program for which prior approval has been given by the Administrator: "CATALYST"

(2) In lieu of selecting either of the labeling options of paragraph (c)(1) of this section, the manufacturer may add the information required by paragraph (c)(1)(iii) of this section to the label required by paragraph (a) of this section. The required information will be set forth in the manner prescribed by paragraph (c)(1)(iii) of this section.

(d) Incomplete light-duty trucks or incomplete heavy-duty vehicles optionally certified as light-duty trucks shall have the following prominent statement printed on the label required by paragraph (a)(2) of this section in lieu of the statement required by paragraph (a)(2)(iii)(E) of this section: "This vehicle conforms to U.S. EPA regulations applicable to 19__ Model Year New Light-Duty Trucks when completed at a maximum curb weight of _____ pounds or at a maximum gross vehicle weight rating of _____ pounds or with a maximum frontal area of _____ square feet."

(e) Incomplete heavy-duty vehicles having a gross vehicle weight rating of 8,500 pounds or less shall have one of the following statements printed on the label required by paragraph (a)(3) of this section in lieu of the statement required by paragraph (a)(3)(iii)(H) of this section: "This engine conforms to U.S. EPA regulations applicable to 19 __ Model Year Heavy-Duty Engines when installed in a vehicle completed at a curb weight of more than 6,000 pounds or with a frontal area of greater than 45 square feet."

(f) The manufacturer of any incomplete light-duty vehicle or light-duty truck sha11 notify the purchaser of suclr vehicle of any curb weight, frontal area, or gross vehicle weight rating limitations affecting the emission certificate applicable to that vehicle. This notification shall be transmitted in a manner consistent with National Highway Traffic Safety Administration safety notification requirements published in 49 CFR Part 568.

(g)(1) Incomplete gasoline-fueled heavy-duty vehicles shall have the following prominent statement printed on the label required in paragraph (a)(4) of this section: "(Manufacturer's corporate name) has determined that this vehicle conforms to U.S. EPA regulations applicable to 19 __ Model Year New Gasoline-Fueled Heevy-Duty Vehicles when completed with a nominal fuel tank capacity not to exceed _____ gallons. Persons wishing to add fuel tank capacity beyond the above maximum must submit a written statement to the Administrator that the hydrocarbon storage system has been upgraded according to the requirements of 40 CFR 86.090–35(g)(2)."

(2) Persons wishing to add fuel tank capacity beyond the maximum specified on the label required in paragraph (g)(1) of this section shall:

(i) Increase the amount of fuel tank vapor storage material according to the following function:

$$\text{Cap}_f=\text{Cap}_i\left(\frac{\text{T. Vol.}}{\text{Max. Vol.}}\right)$$

Where:
Cap_f = final amount of fuel tank vapor storage material, grams.
Cap_i = initial amount of fuel tank vapor storage material, grams.
T. Vol. = total fuel tank volume of completed vehicle, gallons.
Max. Vol. = maximums fuel tank volume as specified on the label required in paragraph (g)(1) of this section, gallons.

(ii) Use, if applicable, hosing for fuel vapor routing which is at least as impermeable to hydrocarbon vapors as that used by the primary manufacturer.

(iii) Use vapor storage material with the same absorptive characteristics as that used by the primary manufacturer.

(iv) Connect, if applicable, any new hydrocarbon storage device to the existing hydrocarbon storage device in series such that the original hydrocarbon storage device is situated between the fuel tank and the new hydrocarbon storage device. The original hydrocarbon storage device shall be sealed such that vapors cannot reach the atmosphere. The elevation of the original hydrocarbon storage device shall be equal to or lower than the new hydrocarbon storage device.

(v) Submit a written statement to the Administrator that paragraphs (g)(2)(i) through (g)(2)(iv) of this section have been complied with.

(3) If applicable, the Administrator will send a return letter verifying the receipt of the written statement required in paragraph (g)(2)(v) of this section.

9. Section 86.091–35 is amended by adding paragraph (a)(l)(iii)(I), (a)(1)(iii)(J), (a)(2)(iii)(L), (a)(2)(iii)(M), (a)(3)(iii)(N), and (a)(4)(iii)(F) to read as follows:

§ 86.091–35 Labeling.

(a) * * *

(1) * * *

(iii) * * *

(I) The vacuum hose routing diagram applicable to the vehicles.

(J) Vehicles granted final admission under § 85.1505 must comply with the labeling requirements contained in § 85.1510.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

Proposed 1988–89 Migratory Game Bird Hunting Regulations (Preliminary)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The U.S. Fish and Wildlife Service (hereinafter the Service) proposes to establish hunting seasons, daily bag and possession limits, and shooting hours for designated groups or species of migratory game birds in the conterminous United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands during 1988–89. The Service annually prescribes migratory game bird hunting regulations. These regulations provide hunting opportunities, a popular form of outdoor recreation, to the public and aid Federal and State governments in the management of migratory game birds.

DATES: The comment period for proposed regulations frameworks for Alaska, Hawaii, Puerto Rico, and the Virgin Islands will end on June 22, 1988; for other early-season proposals (seasons opening before October 1) on July 18, 1988; and for late-season proposals (seasons opening on or about October 1 or later) on August 29, 1988. Public Hearings: Early-Season Regulations, including those for Alaska, Hawaii, Puerto Rico, and the Virgin Islands—June 22, 1988, at 9 a.m.; Late-Season Regulations—August 3, 1988, at 9 a.m.

ADDRESS: Comments and requests to testify may be mailed to Director, (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building—Room 536, Washington, DC 20240. Comments received may be inspected from 8 a.m. to 4 p.m. at the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Room 536, Matomic Building, 1717 H Street, NW., Washington, DC. The public hearings will be held in the Auditorium, Interior Department Building, 18th and C Streets, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Rollin D. Sparrowe, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, DC 20240, (202) 254–3207.

SUPPLEMENTARY INFORMATION: The Fish and Wildlife Service proposes to establish hunting seasons, bag and possession limits, and shooting hours for migratory game birds during 1988–89 under §§ 20.101 through 20.107, 20.109 and 20.110 of Subpart K of 50 CFR Part 20.

"Migratory game birds" are those migratory birds so designated in conventions between the United States and several foreign nations for the protection and management of these birds. For the 1988–89 hunting season, regulations will be proposed for certain designated members of the avian families *Anatidae* (ducks, geese, brant, and swans); *Columbidae* (doves and pigeons); *Gruidae* (cranes); *Rallidae* (rails, coots, and moorhens and gallinules); and *Scolopacidae* (woodcock and snipe). These proposals are described under *Proposed 1988–89 Migratory Game Bird Hunting Regulations (Preliminary)* in this document.

Notice of Intention to Establish Open Seasons

This notice announces the intention of the Director, U.S. Fish and Wildlife Service, to establish open hunting seasons, daily bag and possession limits, and shooting hours for certain designated groups or species of migratory game birds for 1988–89 in the contiguous United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

Factors Affecting Regulations Process

This is the first in a series of proposed and final rulemaking documents for migratory game bird hunting regulations. Proposed shooting hours and season frameworks, including daily bag and possession limits, are set forth for various groups of migratory game birds for which these regulations ordinarily do not vary significantly from year to year.

The proposals set forth here and the schedule by which more detailed proposals for these and other species will be developed depend upon a number of factors. Among these are the times when various annual population, habitat, and harvest surveys are conducted and results are available for analysis; times of migration and other biological considerations; and times during which hunting may be allowed. The regulatory process for migratory game birds is strongly influenced by the times when the best and latest information is available for consideration in the development of regulations. For these reasons, the overall regulations process for hunting seasons and limits is divided into the following segments: (1) Regulations for migratory game birds in Alaska, Puerto Rico, the Virgin Islands, and Hawaii; (2) seasons in the remainder of the United States opening prior to October 1 (early seasons); (3) seasons opening in the remainder of the United States about October 1 and later (late seasons) and (4) regulations for migratory game birds on certain Indian reservations and ceded lands. Regulations development for each of the four categories will follow similar but independent schedules. Proposals relating to the harvest of migratory game birds that may be initiated after publication of this proposed rulemaking will be made available for public review in supplemental proposed rulemakings to be published in the **Federal Register.** Also, additional supplemental proposals will be published for public comment in the **Federal Register** as population, habitat, harvest, and other information becomes available.

Because of the late dates when certain of these data become available, it is anticipated that comment periods on some proposals will necessarily be abbreviated. Special circumstances that limit the amount of time which the Service can allow for public comment are involved in the establishment of these regulations. Specifically, two considerations compress the time in which the rulemaking process must operate: the need, on one hand, to establish final rules at a time early enough in the summer to allow State agencies to adjust their licensing and regulatory mechanisms and, on the other hand, the lack before late-July of current data on the status of most waterfowl.

Publication of Regulatory Documents

The establishment of migratory game bird hunting regulations in the United States involves a series of regulatory announcements published in the **Federal Register** in accordance with the Administrative Procedure Act. The publication of these documents is divided into three phases, as follows:

1. Proposed rulemaking—proposals to amend Subpart K (and other subparts when necessary) of 50 CFR Part 20, including supplementary proposed migratory game bird hunting regulations, and/or regulations frameworks which prescribe shooting hours, season lengths, bag and possession limits, and outside dates within which States may make season selections.

2. Final rulemakings—frameworks. Final regulatory game bird regulations frameworks which prescribe shooting hours, season lengths, bag and possession limits, and outside dates within which States may make season selections.

Final rulemakings—season selections. Amendments to the various specific sections of Subpart K (and other subparts when necessary) of 50 CFR Part 20 based on the final regulations frameworks and on season selections communicated by the States to the Service.

Major steps in the 1988–89 regulatory cycle relating to public hearings and **Federal Register** notifications are illustrated in the accompanying diagram. Dates shown relative to publication of **Federal Register** documents are target dates.

NO PROPOSED CHANGES. SEE TITLE 50 CODE OF FEDERAL REGULATIONS, OCTOBER 1, 1987
MARCH - PROPOSED RULEMAKING, WITH PUBLIC COMMENT PERIODS ENDING 6/22 FOR ALASKA, PUERTO RICO, VIRGIN ISLANDS & HAWAII FRAMEWORKS; 7/18 FOR EARLY & 8/29 FOR LATE-SEASON FRAMEWORKS
JULY 7 - PROPOSED RULEMAKING WITH PUBLIC COMMENT PERIOD ENDING AUGUST 8
JUNE 1988 - SUPPLEMENTAL PROPOSED RULEMAKING
JULY 22 - SUPPLEMENTAL PROPOSED RULEMAKING
EARLY SEASONS
LATE SEASONS
JUNE 21 - SERVICE REGULATIONS COMMITTEE MEETING (PRE-PUBLIC HEARING)
JULY 25 - WATERFOWL STATUS MEETING
AUGUST 19 - FINAL RULEMAKING AMENDING TITLE 50 CFR FOR SEASONS ON CERTAIN FEDERAL INDIAN RESERVATIONS AND CEDED LAND
AUGUST 2 - SERVICE REGULATIONS COMMITTEE MEETING (PRE-PUBLIC HEARING)
JUNE 22 - PUBLIC HEARING ON PROPOSED EARLY SEASONS, INCLUDING ALASKA, PUERTO RICO, AND VIRGIN ISLANDS FRAMEWORKS
AUGUST 3 - PUBLIC HEARING ON PROPOSED WATERFOWL REGULATIONS
JULY 6 - SUPPLEMENTAL PROPOSED RULEMAKING FOR EARLY SEASONS FRAMEWORKS PUBLISHED IN THE *FEDERAL REGISTER* WITH PUBLIC COMMENT PERIOD ENDING JULY 18
JULY 27 - FINAL FRAMEWORKS FOR ALASKA, PUERTO RICO, AND VIRGIN ISLANDS, PUBLISHED IN THE *FEDERAL REGISTER*
AUGUST 17 - SUPPLEMENTAL PROPOSED RULEMAKING FOR LATE SEASONS FRAMEWORKS PUBLISHED IN THE *FEDERAL REGISTER*, WITH PUBLIC COMMENT PERIOD ENDING AUGUST 29
AUGUST 10 - FINAL EARLY SEASONS FRAMEWORKS PUBLISHED IN THE *FEDERAL REGISTER*
SEPTEMBER 16 - FINAL LATE SEASONS FRAMEWORKS PUBLISHED IN THE *FEDERAL REGISTER*
AUGUST 25 - FINAL RULEMAKING AMENDING TITLE 50 CFR FOR EARLY SEASONS, INCLUDING ALASKA, PUERTO RICO, AND THE VIRGIN ISLANDS PUBLISHED IN THE *FEDERAL REGISTER*
SEPTEMBER 27 - FINAL RULEMAKING AMENDING TITLE 50 CFR FOR LATE SEASONS PUBLISHED IN THE *FEDERAL REGISTER*
EARLY SEASONS LEAFLET - 1 FOR NATIONWIDE USE

*DATES SHOWN RELATIVE TO PUBLICATION OF *FEDERAL REGISTER* DOCUMENTS ARE TARGET DATES

BILLING CODE 4310-55-C

All dates shown for frameworks and seasons in the Service's regulatory documents are inclusive.

Non-toxic shot regulatory proposals and final regulations are published separately under § 20.21 of Subpart C and § 20.108 of Subpart K.

Objectives of the Migratory Bird Hunting Regulations

The objectives of these annual regulations are as follows:

1. To provide an opportunity to harvest a portion of certain migratory game bird populations by establishing legal hunting seasons.
2. To limit harvest of migratory game birds to levels compatible with their ability to maintain their populations.
3. To avoid the taking of endangered or threatened species so that their continued existence is not jeopardized, and their conservation is enhanced.
4. To limit taking of other protected species where there is a reasonable possibility that hunting is likely to adversely affect their populations.
5. To provide equitable hunting opportunity in various parts of the country within limits imposed by abundance, migration, and distribution patterns of migratory game birds.
6. To assist, at times and in specific locations, in preventing depredations on agricultural crops by migratory game birds.

The management of migratory birds in North America is international in scope, and involves other nations, notably Canada and Mexico. Within the United States, other Federal agencies, State conservation agencies, national and regional conservation groups, universities, and the public provide much support to the achievement of these objectives.

Data Used in Regulatory Decisions

The establishment of hunting regulations for migratory game birds in the United States during the 1988–89 season will take into consideration available population information, data from harvest surveys, and information on habitat conditions. Consideration will also be given to accumulated data and trends. The main sources of data are operational surveys conducted by the U.S. Fish and Wildlife Service in cooperation with the Canadian Wildlife Service, Direccion General Conservation Ecologica de los Recursos Naturales of Mexico, State and Provincial wildlife agencies, and others. The Service will also consider technical information provided by consultants of the four waterfowl flyway councils. The information from these sources will be analyzed by the Service with an opportunity for the public to review and provide comments on management rationales and proposed regulations, either in public hearings, by correspondence, or other communications.

Various surveys are used to ascertain the status, condition, and trends of migratory game bird populations. These include annual surveys of major waterfowl wintering habitats in the United States and in portions of Mexico each January; aerial surveys of major waterfowl production areas in the United States and Canada in May and early June for breeding population data, and again in July for production information; nationwide surveys in the United States and Canada of waterfowl hunters and the waterfowl harvest, including their geographical and temporal distributions, and species, age, and sex composition of the harvest; and band recovery information. Waterfowl breeding pair and production surveys also provide information on the abundance, duration, and quality of water and other habitat conditions in major production areas. Information on waterfowl populations and habitat conditions outside the aerial survey area is furnished by cooperating State, Provincial, and private agencies. Banding information provides insight into shooting pressures sustained by migratory game bird populations under different population levels and types of regulations. When viewed over many years, information on harvests and regulations is useful for predicting approximate harvest levels which may result from various regulations changes.

Many of the surveys conducted primarily for ducks also provided information on geese. In addition, satellite imagery is used to monitor the rate at which snow and ice disappear from subarctic and arctic breeding grounds traditionally used by most species and the greatest numbers of North American geese. Field observations of geese in the fall and winter also provide information on the production success of the past breeding season. Special population surveys are undertaken for many identifiable populations of geese throughout the year.

An annual call-count survey conducted nationwide in the United States in late May and early June provides information on the breeding population of mourning doves. Information from past years and the current year is used to establish population trends. An annual singing-ground survey is conducted throughout the woodcock breeding range in the eastern United States and Canada. Insight into production success is obtained from wing-collection surveys of woodcock hunters in the United States and Canada; data from these surveys indicate the age and sex composition of the harvest and its geographical and temporal distribution. Accumulated and current data are examined for possible long-term trends in population size and productivity. Information on white-winged dove populations in Texas and the Southwest is provided by cooperating State agencies. Spring surveys of sandhill cranes are conducted annually with emphasis on the key staging area of the species along the Platte River in central Nebraska. The Service also solicits information on these and other species from knowledgeable individuals.

Definitions of Flyways

Flyways are administrative units with broad biological-ecological similarities frequently used for reference in setting hunting regulations on many migratory game birds. They are defined as follows:

Atlantic Flyway: Connecticut, Delaware, Florida, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, and West Virginia.

Mississippi Flyway: Alabama, Arkansas, Illinois, Indiana, Iowa, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Ohio, Tennessee, and Wisconsin.

Central Flyway: Kansas, Nebraska, North Dakota, Oklahoma, South Dakota, and Texas; Colorado and Wyoming east of the Continental Divide; Montana east of Hill, Chouteau, Cascade, Meagher and Park Counties; and New Mexico east of the Continental Divide but outside the Jicarilla Apache Indian Reservation.

Pacific Flyway: Arizona, California, Idaho, Nevada, Oregon, Utah, and Washington; those portions of Colorado and Wyoming lying west of the Continental Divide; New Mexico west of the Continental Divide plus the Jicarilla Apache Indian Reservation; and in Montana, the counties of Hill, Chouteau, Cascase, Meagher, and Park, and all counties west thereof. Flights of most migratory game birds breeding or produced in Alaska are more strongly oriented to this flyway than to the other flyways.

Definitions of Mourning Dove Management Units

Mourning Dove Management Units are administrative units based upon a reasonable delineation of independent mourning dove population segments encompassing the principal breeding. migration, and United States wintering areas for each population. They are used for reference in setting mourning dove hunting regulations and are defined as follows:

Eastern Management Unit: Alabama, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, and Wisconsin.

Central Management Unit: Arkansas, Colorado, Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming.

Western Management Unit: Arizona, California, Idaho, Nevada, Oregon, Utah, and Washington.

Migratory Bird Hunting on Indian Reservations

In the September 3, 1985, **Federal Register** (50 FR 35762), the Service implemented interim guidelines for establishing special migratory bird hunting regulations on Federal Indian reservations and ceded lands, and amended § 20.110 of 50 CFR Part 20 by prescribing final hunting regulations for certain tribes in the 1985–86 and 1986–87 hunting seasons. The guidelines provide appropriate flexibility for tribal members to exercise their reserved hunting rights while ensuring that the migratory bird resource receives necessary protection. On January 21, 1988 (at 53 FR 1645), the Service gave notice of its intent to continue to employ the interim guidelines and establish special migratory bird hunting regulations for interested Indian tribes in the 1988–89 hunting season. The Service recognizes that some changes in the guidelines may be necessary and has kept the comment period on them open indefinitely. Use of the guidelines is not necessary of a tribe wishes to observe the hunting regulations established in the State(s) in which the reservation is located.

Hearings

Two public hearings pertaining to 1988–89 migratory game bird hunting regulations are scheduled. Both meetings will be conducted in accordance with 455 DM 1 of the Departmental Manual. On June 22 a public hearing will be held at 9 o'clock in the Auditorium of the Department of the Interior Building, on C Street, between 18th and 19th Streets, NW., Washington, DC. This hearing is for the purpose of reviewing the status of mourning doves, woodcock, band-tailed pigeons, white-winged and white-tipped doves, rails, gallinules and moorhens, common snipe, and sandhill cranes. Proposed hunting regulations will be discussed for these species plus regulations for migratory game birds in Alaska, Puerto Rico, and the Virgin Islands; September teal seasons in the Mississippi and Central Flyways; special September waterfowl seasons in designated States; special sea duck seasons in the Atlantic Flyway, and extended falconry seasons. On August 3 a public hearing will be held at 9 o'clock in the Auditorium of the Department of the Interior Building, address above. This hearing is for the purpose of reviewing the status and proposed regulations for waterfowl not previously discussed at the June 22 public hearing. The public is invited to participate in both hearings.

Persons wishing to participate in these hearings should write the Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building—Room 536, Washington, DC 20240, or telephone (202) 254–3207. Those wishing to make statements should file copies of them with the Director before or during each hearing.

Public Comments Solicited

Based on the results of current migratory game bird studies and having due consideration of all data and views submitted by interested parties, the amendments resulting from these proposals will specify open seasons, shooting hours, and bag and possession limits for doves, pigeons, rails, gallinules and moorhens, woodcock, common snipe, coots, cranes, and waterfowl in the contiguous United States; coots, cranes, common snipe and watefowl in Alaska; certain migratory game birds in Puerto Rico and the Virgin Islands; and mourning doves in Hawaii.

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons are invited to submit written comments, suggestions, or recommendations regarding the proposed amendments.

Final promulgation of migratory game bird hunting regulations will take into consideration all comments received by the Director. Such comments, and any additional information received, may lead the Director to adopt final regulations differing from these proposals. Interested persons are invited to participate in this rulemaking by submitting written comments to the address indicated under the caption ADDRESS.

Comments received on the proposed annual regulations will be available for public inspection during normal business hours at the Service's office in Room 536, Matomic Building, 1717 H Street, NW., Washington, DC. The Service will consider but may not respond in detail to each comment. Specific comment periods will be established for each of the four series of proposed rulemakings. All relevant comments will be accepted through the closing date of the last comment period on the particular proposal under consideration. As in the past, the Service will summarize all comments received during the comment period and respond to them.

Flyway Council Meetings

The Service published a final rule in the **Federal Register** dated December 22, 1981 (46 FR 62077) which established certain procedures in the development of the annual migratory game bird hunting regulations. This rule took effect on January 21, 1982. One provision is to publish notification of meetings of waterfowl flyway councils where Department of Interior officials will be in attendance. In this regard, Departmental representatives will be present at the following winter meetings of the various flyway councils:

Date: March 20, 1988:

—Atlantic Flyway Council, 8:30 a.m.
—Mississippi Flyway Council, 9:00 a.m.
—Central Flyway Council, 8:30 a.m.
—Pacific Flyway Council, 12:00 noon
—National Waterfowl Council, 3:00 p.m.

The Council meetings will be held at The Galt House, Louisville, Kentucky.

NEPA Consideration

In 1975 the Service determined that the annual migratory bird hunting regulations constituted a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969. Consequently, the "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was prepared and filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the **Federal Register** on June 13, 1975 (40 FR 25241). In addition, several environmental assessments have been prepared on specific matters which serve to supplement the material in the Final Environmental Statement (FES). These have addressed regulations for various species of migratory game birds and hunting strategies. In 1986 the Service initiated preparation of a supplemental environmental impact statement (SEIS) on the FES. A draft SEIS was released on September 1, 1987, and public hearings were held in several locations across the country in mid-November. Preparation of the final SEIS in early 1988 is anticipated.

Endangered Species Act Consideration

Prior to issuance of the 1988–89 migratory game bird hunting regulations, consideration will be given to provisions of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531–1543; hereinafter the Act), to insure that hunting is not likely to jeopardize the continued existence of any species designated as endangered or threatened or modify or destroy its critical habitat and is consistent with conservation programs for those species. Consultations under Section 7 of this Act may cause changes to be made to proposals in this and future supplemental proposed rulemaking documents.

Regulatory Flexibility Act, Executive Order (E.O.) 12291, and the Paperwork Reduction Act

In complying with these requirements during the 1981–82 regulatory development cycle, and with Office of Management and Budget concurrence, the Service prepared a Determination of Effects, a Preliminary Regulatory Impact Analysis (PRIA), a Final Regulatory Impact Analysis (FRIA), and a Memorandum of Law. For further information see the **Federal Register**, March 25, 1981, at 46 FR 18669; August 17, 1981, at 46 FR 41739; August 21, 1981, at 46 FR 42643; and September 18, 1981, at 46 FR 46543. The rules for the 1981–82 hunting season were determined to be "major," because the expenditures arising from these regulations exceed $100 million annually and represent a major Federal action.

An updated FRIA, focusing on waterfowl hunting, was completed by the Service on March 3, 1983. New economic information was utilized from the *1980 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation* which indicated that hunters expended $638 million for migratory bird hunting in 1980.

A Determination of Effects approved by the Assistant Secretary, Fish and Wildlife and Parks, on January 29, 1988 concluded that the hunting frameworks being proposed for 1988–89 were "major" rules, subject to regulatory analysis. In accordance with Office of Management and Budget instructions, the Service recently prepared an update of the 1981 Final Regulatory Impact Analysis for use in the development of the 1988–89 migratory bird hunting regulations to incorporate new economic information and waterfowl hunter and harvest information from the 1986–87 season. The summary of the 1988 update of the 1981 FRIA follows:

> New information which can be compared to that appearing in the 1987 update of the 1981 Final Regulatory Impact Analysis (FRIA) includes estimates of the 1986 fall flight of ducks from surveyed areas, and hunter activity and harvest information from the 1986–87 hunting season. The data indicate that the total 1986 fall flight of ducks and the fall flights in each flyway were predicted to be more than those of 1985. Because of the continued poor status of ducks, restrictive hunting regulations that were initiated in 1985 were continued in 1986. Hunter numbers decreased slightly from the previous year while hunter days and seasonal trips per hunter both shared modest increases. Continuation of the restrictive regulations that were established in 1985 was no doubt partly responsible for the reduced number of hunters. The fact that hunter days and seasonal trips per hunter increased even though the hunting regulations remained the same in 1986 as in 1985 reinforces conclusions of the 1981 FRIA that many nonregulatory factors also influence hunter participation and effort.

Copies of the updated FRIA are available upon request from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Matomic Building—Room 536, 18th and C Streets NW., Washington, DC 20240.

The Department of the Interior has determined that this document is a major rule under E.O. 12291 and certifies that this document will have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

The Service plans to issue its Memorandum of Law for the migratory game bird hunting regulations at the time the first of these rules is finalized.

Authorship

The primary author of the proposed rules on annual hunting regulations is Morton M. Smith, Office of Migratory Bird Management, working under the direction of Rollin D. Sparrowe, Chief, (202) 254–3207.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Transportation, Wildlife.

The rules that eventually will be promulgated for the 1988–89 hunting season are authorized under the Migratory Bird Treaty Act, sec. 3, Pub. L. 65–186, 40 Stat. 755 (16 U.S.C. 701–708h); sec. 3(h), Pub. L. 95–616, 92 Stat. 3112 (16 U.S.C. 712).

Proposed 1988–89 Migratory Game Bird Hunting Regulations (Preliminary)

The following general frameworks and guidelines for hunting certain waterfowl, sandhill cranes, mourning doves, white-winged doves, white-tipped doves, Zenaida doves, scaly-naped pigeons, band-tailed pigeons, moorhens and gallinules, rails, coots, common snipe, and woodcock during the 1988–89 season are proposed. Changes or possible changes, when noted, are in relation to 1986–87 final frameworks. In this respect, minor date changes due to annual variation in the calendar dates of specific days of the week, are regarded as "no change." All mentioned dates are inclusive. Where applicable information is provided about proposals for change already submitted to the Service or expected to be submitted in the near future. These and the Service's responses or comments follow the frameworks being proposed. Service views on the items in this proposed rulemaking are subject to change depending on public comments, and additional data and information that may be received later.

The proposed frameworks and guidelines, as compared to the 1987–88 final frameworks, are described below:

1. *Shooting hours.* (No change.) Basic shooting hours beginning one-half hour before sunrise and ending at sunset are proposed with the option that more restrictive shooting hours within this framework may be selected by the States or may be established for special seasons.

2. *Frameworks for ducks in the conterminous United States—outside dates, season length and bag limits.* In 1987, survey information indicated little change compared to 1986 in duck breeding populations and breeding habitat, although the latter was highly variable in quality and availability. The Service forecasted a 1987 fall flight of ducks similar to that of 1986. As a result, the Service esablished regulatory frameworks that continued the conservative harvest posture of the previous 2 years. Pending the availability of current duck population, habitat an harvest information, and the receipt of recommendations from the four flyway councils, specific duck framework proposals for opening and closing dates, season lengths and bag limits are deferred. Exceptions to the regular duck-season frameworks are

given in various numbered items that follow.

3. *American black ducks.* (Possible change.) Winter survey data indicate that black ducks have declined steadily in abundance since the 1950s. Restrictive regulations have been employed periodically since the 1960s to reduce harvest of black ducks and to determine whether such a reduced harvest would be associated with an increase in black duck numbers. The most recent effort to reduce black duck harvest in the Atlantic and Mississippi Flyways was a 5-year program beginning with the 1983–84 season. Winter population information is now available for each year of the program; however, the harvest information from the 1987–88 season will not be available until July 1988. Therefore, an evaluation of this 5-year harvest reduction effort is not yet available but, will be included in a report to be distributed prior to the 1988 late-season regulations meetings.

There exists the need to consider regulatory alternatives for the 1988–89 season. An Environmental Assessment (EA) on Porposed Hunting Regulations on Black Ducks, 1988, will be distributed prior to the late-season meetings. The EA will consider 4 regulatory options for harvest management of black ducks. These are:

1. *Continue with current regulations.* Bag limits would remain 1 per day with additional State restrictions to achieve a 25 percent reduction from 1977–81 levels. Restrictive regulations during the 1983–84 through 1986–87 seasons reduced black duck harvests in the Atlantic Flyway by 41 percent in the Mississippi Flyway by 35 percent compared to the average harvest during the 1977–81 period.

2. *Further restrict harvest regulations.* Bag limits would be 1 black duck per day (100 points) and the season length for hunting black ducks would be shorter (opening later and closing earlier) then the regular duck season permitted in 1987–88. This alternative would simplify the complex regulations used in recent years.

3. *Closed season on black ducks.* Under this alternative, no hunting season for black ducks would be permitted in the Atlantic or Mississippi Flyways. Although there would be some illegal kill, the harvest of black ducks should be at a minimum under this option.

4. *Experimental harvest program to determine the influence of different rates of harvest on black duck survival.* This alternative is an attempt to resolve questions about the effect of harvest on the black duck. This action would evaluate the effects of hunting on annual survival of black ducks during open and closed seasons. The program would require an 8 to 10 year commitment and include 2 to 3 non-consecutive years of periodic closed seasons.

The Service recognizes that the cooperation of the eastern Provinces of Canada and the Canadian Wildlife Service is desired in any black duck management effort. Their review and consideration of these four harvest options will be solicited.

4. *Wood ducks:* (Possible change.) In 1977 regulations for this species were changed to permit southeastern States the option of an early-October hunting season which no special wood duck bag and possession limits applied under conventional regulations; under point system regulations, the species was placed in the mid-point category. The criteria for such seasons were described in the **Federal Register** dated May 25, 1977 (42 FR 26969), and are summarized and updated for informational purposes:

The southeastern United States is defined as Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee and Virginia. The Service proposes to again consider regulations aimed at additional wood duck harvest in the southeastern States only within the following guidelines:

A. In 1988 States in the southeastern United States may split their regular duck hunting season in such a way that a hunting season not to exceed 9 consecutive days occurs between October 1 and October 15.

B. During this period under conventional regulations, no special restrictions within the regular daily bag and possession limits established for the Flyway in 1988 shall apply to wood ducks, and under the point system, the point value for wood ducks shall be reduced from the high to the mid-point category. For other species of ducks daily bag and possession limits shall be the same as established for the Flyway under conventional or point system regulations.

C. In addition, the extra teal option available to States in the Atlantic and Mississippi Flyways that select conventional regulations and do not have a September teal season may be applied during the period.

D. This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

E. This special provision for wood ducks shall be regarded as experimental, and subject to annual and final evaluations by participating States of population, harvest, banding, and other available information.

F. The experiment shall be conducted for a specified time period to be agreed upon between the Service and participating States.

Additional information. The question of special wood duck seasons and bag limits is currently under review. The Service now assembling available information and will be proposing an overall strategy for wood duck management during the 1988 regulatory cycle.

5. *Sea ducks.* (No change.) A maximum open season of 107 days for taking scoter, eider, and oldsquaw ducks is proposed during the period between September 15, 1988, and January 20, 1989, in all coastal waters and all waters of rivers and streams seaward from the first upstream bridge in Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut and New York; in any waters of the Atlantic Ocean and in any tidal waters of any bay which are separated by at least 1 mile of open water from any shore, island, and emergent vegetation in New Jersey, South Carolina, and Georgia; and in any waters of the Atlantic Ocean and in any tidal waters of any bay which are separated by at least 800 yards of open water from any shore, island, and emergent vegetation in Delaware, Maryland, North Carolina, and Virginia; and provided that any such areas have been described, delineated, and designated as special sea duck hunting areas under the hunting regulations adopted by the respective States. In all other areas of these States and in all other States in the Atlantic Flyway, sea ducks may be taken only during the regular open season for ducks and they must be included in the regular duck season conventional or point-system daily bag and possession limits.

The daily bag limit is 7 and the possession limit is 14, singly or in the aggregate of these species. Within the special sea duck areas, during the regular duck season, the States may set, in addition to the regular limits, a daily bag limit of 7 and a possession limit of 14 scoter, eider, and oldsquaw ducks, singly or in the aggregate of these species.

Any State desiring its sea duck season to open in September must make its selection no later than August 10, 1988. Those States desiring their sea duck season to open after September may make their selection at the time they select their regular waterfowl seasons.

6. *September teal season.* (Possible change.) An open season on all species of teal may be selected by Alabama,

Arkansas, Colorado (Central Flyway portion only), Illinois, Indiana, Kansas, Kentucky, Louisiana, Mississippi, Missouri, New Mexico (Central Flyway portion only), Ohio, Oklahoma, Tennessee, and Texas in areas delineated by State regulations.

Shooting hours are from sunrise to sunset daily. The reason may not exceed 9 consecutive days between September 1 and September 30, 1988, with a bag limit of 4 teal daily and 8 in possession. States must advise the Service of season dates and special provisions to protect non-target species by August 10, 1988.

Additional information. The Service notes that the breeding population of blue-winged teal has been generally depressed during the 1980s. In light of this, the Service believes liberalizations of the current regulations specific to bluewings are not appropriate and that current harvest management strategies (i.e., September teal seasons and extra teal option) should be examined for blue-winged teal. If populations decline further special seasons such as this may not be advisable.

7. *Extra teal option.* (Possible change.)

A. States in the Atlantic Flyway selecting neither an early duck season in September nor the point system may select an extra teal limit of no more than 2 blue-winged or 2 green-winged teal or 1 of each daily and no more than 4 singly or in the aggregate in possession for 9 consecutive days during the regular duck season.

B. States in the Mississippi and Central Flyways selecting neither a teal or early duck season in September nor the point system may select an extra daily bag and possession limit of 2 and 4 blue-winged teal, respectively, for 9 consective days designated during the regular duck season.

These extra teal limits are in addition to the regular duck season bag and possession limits.

Additonal information. See the additional information given under item 6.

8. *Experimental September Duck Seasons.* Kentucky, Tennessee and Florida have conducted experimental 5-day September duck hunting seasons since 1981. In 1987 the Mississippi Flyway Council's Lower Region Regulations Committee recommended continuation of the experimental duck hunting seasons in Kentucky and Tennessee, and the Atlantic Flyway Council reiterated its 1986 recommendation that the experimental duck hunting season in Florida be granted operational status. In response to similar recommendations in 1986, the Service noted its concern about the decrease in the survival rate of wood ducks measured by the studies in Kentucky and Tennessee, and the lack of adequate banding information needed to appraise the impacts stemming from the increased harvest of wood ducks measured by Florida's study. Several problems with regard to September duck hunting seasons were identified by the Service in the July 3, 1986, **Federal Register** (51 FR 24420). The Service stated that while September duck hunting seasons are in principle a feasible harvest management strategy, the current situation with regard to their evaluation, including the flyway-wide aspects of the management of target species, and their suitability for widespread application is under review. These concerns were repeated by the Service in 1987 (52 FR 7907, March 13, 1987). In the intervening period the Service continued the experimental seasons in Kentucky, Tennessee and Florida under the same regulatory provisions as provided during the study periods with the exception that in Kentucky and Tennessee the daily bag limit was restricted such that no more than 2 wood ducks could be included in the 4-duck daily bag. In addition, the Service is cooperating with Florida to provide an adquate sample of banded wood ducks

The Service reaffirms the need for cooperative studies that are flyway oriented in scope to better understood and manage wood ducks. The Service will propose a harvest management strategy to the Councils, with guidelines for banding and other data requirements prior to any final decisions on operational status of existing experimental seasons or initiation of new studies.

Iowa has conducted an experimental 5-day September duck hunting season since 1979.

In light of the Service's concerns regarding September duck hunting seasons, as noted above, the Service continued the experimental season in Iowa in 1986–87 and 1987–88 under the same regulatory provisions as provided during the study period.

The Service's review of September duck hunting seasons continues. In the interim, barring further declines in duck populations, the Service proposes to continue the experimental September duck hunting season in Kentucky, Tennessee, Florida and Iowa in 1988 under the regulatory provisions provided each in 1987.

9. *Special scaup season.* (No change.) States in the Atlantic, Mississippi, and Central Flyways may select a special scaup-only hunting season not to exceed 16 consecutive days, with daily bag and possession limits of 5 and 10 scaup, respectively, subject to the following conditions:

A. The season must occur between October 1, 1988, and January 31, 1989, all dates inclusive.

B. The season must occur outside the open season for any other ducks except sea ducks.

C. The season is limited to areas mutually agreed upon between the State and the Service prior to August 31, 1988, and

D. These areas must be described and delineated in State hunting regulations.

E. In lieu of a special scaup-only season, Vermont may, for the Lake Champlain Zone, select a special scaup and goldeneye season not to exceed 16 consecutive days, with a daily bag limit of 3 scaup or 3 goldeneyes or 3 in the aggregate, and a possession limit of 6 scaup or 6 goldeneyes or 6 in the aggregate, subject to the same provisions that apply to special scaup seasons elsewhere.

10. *Extra scaup option.* (No change.) As an alternative to a special scaup-only season, States in the Atlantic, Mississippi, and Central Flyways, except those selecting the point system, may select an extra daily bag and possession limit of 2 and 4 scaup, respectively, during the regular duck hunting season, subject to conditions C and D listed for special scaup seasons. These extra limits are in addition to the regular duck limits and apply during the entire regular duck season.

11. *Mergansers.* (No change.) States in the Atlantic and Mississippi Flyways may select separate bag limits for mergansers in addition to the regular duck bag limits during the regular duck season. The bag limit is 5 mergansers daily and 10 in possession. Elsewhere, mergansers are included within the regular daily bag and possession limits for ducks. The restriction on hooded mergansers of 1 daily and 2 in possession is continued in the Atlantic, Mississippi, and Central Flyways.

12. *Canvasback and redhead ducks.* (No change) Proposed seasons and bag limits for canvasbacks and redheads are unchanged from those in effect in 1987–88. The 1987–88 hunting season was the second consecutive season that the Atlantic, Mississippi and Central Flyways were closed to canvasback hunting. In both years the Eastern Population of canvasbacks was below the 3-year average breeding population level identified in the environmental assessment *Proposed Hunting Regulations on Canvasback Duck, 1983* at which closure of the hunting season on the population should be considered. The 1988 breeding population survey

data and harvest information from 1987–88 will be available in July. At that time the Service, in coordination with the four flyway councils, will review the data and consider the hunting frameworks for canvasbacks and redheads.

13. *Duck Zones.* In the March 21, 1986, **Federal Register** (51 FR 9862) the Service gave notice that it believes present duck hunting zones should not be modified and no new duck hunting zones should be initiated until some better informed judgments regarding their cumulative effect on the resource can be made.

States in all Flyways may split their waterfowl season into two segments. Previously, States in the Atlantic and Central Flyways, in lieu of zoning could split their seasons for ducks or geese into three segments. Since it is proposed that new duck zones not be authorized, a 3-way split is also not offered to States not presently utilizing that option for ducks.

14. *Frameworks for geese and brant in the conterminous United States—outside dates, season length and bag limits.* The Canadian Wildlife Service, the four waterfowl flyway councils, State conservation agencies, and others traditionally provide population and harvest information useful in setting annual regulations for geese and brant. The midwinter survey, the past season's waterfowl harvest surveys, and satellite imagery and ground studies for May and June of 1988 will provide additional information.

Atlantic Flyway. (No change.) Seasons and bag limits are deferred pending receipt of additional information and recommendations. No significant changes from those in effect in 1987–88 are anticipated at this time.

Mississippi Flyway. (No change.) Seasons and bag limits are deferred pending receipt of additional information and recommendations. No significant changes from those in effect in 1987–88 are anticipated at this time.

Central Flyway. (No change.) Seasons and bag limits are deferred pending additional information and recommendations. No significant changes from those in effect in 1987–88 are anticipated at this time.

Pacific Flyway. (No change.) Seasons and bag limits are deferred pending additional information and recommendations. No significant changes from those in effect in 1987–88 are anticipated at this time.

15. *Tundra Swan.* (No change.) The following frameworks for tundra swans are proposed. In Utah, Nevada, Montana (Central and Pacific Flyways), North Dakota and South Dakota, an open season for taking a limited number of tundra swans may be selected subject to the following conditions:

A. Except in the Central Flyway portion of Montana, the season must run concurrently with the duck season; in the Central Flyway portion of Montana, the season must run concurrent with the goose season.

B. In Utah, no more than 2,500 permits may be issued authorizing each permittee to take 1 tundra swan.

C. In Nevada, no more than 650 permits may be issued authorizing each permittee to take 1 tundra swan in either Churchill, Lyon, or Pershing Counties.

D. In Montana (Pacific Flyway portion only), no more than 500 permits may be issued authorizing each permittee to take 1 tundra swan in either Teton or Cascade Counties.

E. In Montana (Central Flyway portion only), no more than 500 permits may be issued authorizing each permittee to take 1 tundra swan.

F. In North Dakota, no more than 1000 permits may be issued authorizing each permittee to take 1 tundra swan.

G. In South Dakota, no more than 500 permits may be issued authorizing each permittee to take 1 tundra swan.

H. In North Carolina an experimental season for taking a limited number of tundra swans may be selected subject to the following conditions:

i. The season may be 90 days and must run concurrently with the snow goose season.

ii. The State must issue permits and obtain harvest and hunter participation data.

iii. No more than 6000 permits may be issued authorizing each permittee to take 1 tundra swan.

Additional information. A tundra swan hunt plan that addresses allowable harvest and allocation of harvest of Eastern Population tundra swans will be available prior to the late-season regulations meetings.

16. *Sandhill cranes.*

Central Flyway—Regular seasons (No change). Pending evaluation of harvest data from the 1987–88 seasons, sandhill crane hunting seasons may be selected within specified areas in Colorado, Kansas, Montana, North Dakota, South Dakota, Wyoming, New Mexico, Oklahoma and Texas with no substantial changes in dates from the 1987–88 seasons. The daily bag limit will be 3 and the possession limit 6 sandhill cranes. The provision for a Federal sandhill crane hunting permit is continued in all of the above areas.

Central and Pacific Flyways—Special seasons (No change). Pending evaluation of harvest data from the 1987–88 seasons, sandhill crane hunting seasons within the range of the Rocky Mountain Population may be selected by Arizona, Colorado, Idaho, Montana, New Mexico, Utah and Wyoming subject to the following conditions:

A. Outside dates are September 1–November 30, 1988.

B. Season(s) in any State may not exceed 30 days.

C. Daily bag limits may not exceed 3, and season limits may not exceed 9.

D. Participants must have in their possession while hunting a valid permit issued by the appropriate State.

E. Numbers of permits, areas open and season dates, protection plans for other species, and other provisions of seasons are consistent with the management plan and approved by the Central and Pacific Flyway Councils.

17. *Coots.* (No change.) Within the regular duck season, States in the Atlantic, Mississippi, and Central Flyways may permit a daily bag limit of 15 and a possession limit of 30 coots; States in the Pacific Flyway may permit 25 coots daily and in possession, singly or in the aggregate with gallinules.

Additional information. In the **Federal Register** dated June 3, 1987 (at 52 FR 20762), the Service noted the Central Flyway Council recommendation that the hunting season for coots coincide with all duck seasons. The Service observed the frameworks for coots were of longstanding but solicited additional comments. Subsequently information was received that none of the other flyway councils were interested in a change in the frameworks to permit the taking of coots in all duck seasons. The Service has limited coot hunting to the regular duck season and has traditionally limited special seasons to selected or similar appearing species. These have been "single species" seasons, e.g., teal or scaup, and other migratory birds have been deliberately excluded. The Service intends to continue to limit the taking of coots to only the regular duck seasons.

18. *Common Moorhens and Purple Gallinules.* (No change.) States in the Atlantic and Mississippi Flyways may select hunting seasons between September 1, 1988, and January 20, 1989, of not more than 70 days. Central Flyway States may select hunting seasons between September 1, 1988, and January 22, 1989, of not more than 70 days. Any state may split its moorhen/gallinule season without penalty. The daily bag and possession limits may not exceed 15 and 30 common moorhens and purple gallinules, singly or in the aggregate of the two species, respectively. States may select moorhen/gallinule seasons at the time they select their waterfowl seasons. In this case, daily bag and possession limits will remain the same.

States in the Pacific Flyway must select their moorhen/gallinule hunting seasons within the waterfowl seasons. A moorhen/gallinule season selected by any State or portion thereof in the Pacific Flyway may be the same as but not exceed its waterfowl season, and the daily bag and possession limits may not exceed 25 coots and moorhens, singly or in the aggregate of the two species.

19. *Rails.* (No change.) The States included herein may select seasons between September 1, 1988, and January 20, 1989, on clapper, king, sora, and Virginia rails as follows:

The season length for all species of rails may not exceed 70 days, and any State may split its rail season into two segments without penalty.

Clapper and king rails.

A. In Rhode Island, Connecticut, New Jersey, Delaware, and Maryland, the daily bag and possession limits may not exceed 10 and 20 clapper and king rails, respectively, singly or in the aggregate of these two species.

B. In Texas, Louisiana, Mississippi, Alabama, Georgia, Florida, South Carolina, North Carolina, and Virginia, the daily bag and possession limits may not exceed 15 and 30 clapper and king rails, respectively, singly or in the aggregate of the two species.

C. The season will remain closed on clapper and king rails in all other States.

Sora and Virginia rails.

In addition to the prescribed limits for clapper and king rails, daily bag and possession limits not exceeding 25, singly or in the aggregate of sora and Virginia rails, may be selected in States in the Atlantic, Mississippi, and Central Flyways, and portions of Colorado, Montana, New Mexico, and Wyoming in the Pacific Flyway. No hunting season is proposed for rails in the remainder of the Pacific Flyway.

20. *Common snipe.* (No change.) States in the Atlantic, Mississippi, and Central Flyways may select hunting seasons between September 1, 1988, and February 28, 1989, not to exceed 107 days, except that in Maine, Vermont, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Maryland, and Virginia the season must end no later than January 31. Seasons between September 1, 1988, and February 28, 1989, not exceeding 93 days, may be selected in the Pacific Flyway portions of Montana, Wyoming, Colorado, and New Mexico.

All States in the Pacific Flyway, except those portions of Colorado, Montana, New Mexico, and Wyoming in the Pacific Flyway, must select their snipe season to run concurrently with their regular duck season. In these Pacific Flyway States, except portions of the four States noted previously, it will be unlawful to take snipe when it is unlawful to take ducks.

Daily bag and possession limits may not exceed 8 and 16, respectively. Any State may split its snipe season into two segments.

States or portions thereof in the Atlantic, Mississippi, and Central Flyways may defer selection of snipe seasons until they choose their waterfowl seasons in August. In that event, the daily bag and possession limits will remain the same but shooting hours must conform with those for waterfowl.

21. *Woodcock.*

A. Central and Mississippi Flyways. (No change.)

States in the Central and Mississippi Flyways may select hunting seasons of not more than 65 days with daily bag and possession limits of 5 and 10, respectively, to occur between September 1, 1988 and February 28, 1989. States may split their woodcock season without penalty.

B. Atlantic Flyway. (No Change.)

The number of woodcock in the Atlantic Flyway has significantly declined since the 1960s. In 1985 the Service initiated a program whereby the hunting regulations for woodcock in the Atlantic Flyway were adjusted to bring harvest opportunities to a level commensurate with the current population status. No changes in seasons and bag limits from those in effect in 1987–88 are anticipated at this time pending an evaluation of the changes implemented. For the 1988–89 hunting season in the Atlantic Flyway the Service proposes the following:

States in the Atlantic Flyway may select hunting seasons of not more than 45 days with daily bag and possession limits of 3 and 6, respectively, to occur between October 1, 1988 and January 31, 1989. States may split their woodcock season without penalty.

New Jersey may select woodcock hunting seasons by north and south zones divided by State Highway 70. The season in each zone may not exceed 35 days.

22. *Band-tailed pigeons.* (No change.)

Pacific Coast States California, Oregon, and Washington and the *Nevada* counties of Carson City, Douglas, Lyon, Washoe, Humboldt, Pershing, Churchill, Mineral and Storey. These States may select hunting seasons not to exceed 16 consecutive days between September 7, 1988, and the Sunday closest to January 1, 1989. The daily bag and possession limits may not exceed 4 band-tailed pigeons. These frameworks are to continue through the 1989–90 season (3 years).

California may zone by selecting hunting seasons of 16 consecutive days for each of the following two zones:

A. In the counties of Alpine, Butte, Del Norte, Glenn, Humboldt, Lassen, Mendocino, Modoc, Plumas, Shasta, Sierra, Siskiyou, Tehama, and Trinity: and

B. The remainder of the State.

Four-Corners States (Arizona, Colorado, New Mexico, and Utah). These States may select hunting seasons not to exceed 30 consecutive days between September 1 and November 30, 1988. The daily bag and possession limits may not exceed 5 and 10, respectively. The season shall be open only in the areas delineated by the respective States in their hunting regulations. New Mexico may divide its State into a North Zone and a South Zone along a line following U.S. Highway 60 from the Arizona State line east to Interstate Highway 25 at Socorro and along Interstate Highway 25 from Socorro to the Texas State line. Between September 1 and November 30, 1988, in the North Zone, and Ocotber 1 and November 30, 1988, in the South Zone; hunting seasons not to exceed 20 consecutive days in each zone may be selected.

23. *Mourning doves.* (No change.) Outside framework dates—September 1, 1988 and January 15, 1989, except as otherwise provided. States in the Eastern (EMU) and Central (CMU) Management Units were offered an option of a season length of 70 half or full days with daily bag and possession limits of 12 and 24, respectively, *or* a season length of 60 half or full days with daily bag and possession limits of 15 and 30, respectively. EMU and CMU States were allowed to select hunting zones without penalty and to split the season into not more than 3 time periods. In the Western Management Unit (WMU), States were offered an option of a split season of 45 half or full days, with the first segment between September 1–15 and the remaining days after October 31, *or* a 30-consecutive-day season between September 1 and January 15; bag and possession limits were 10 and 20, respectively, for either option. Frameworks in the WMU are to continue through the 1989–90 season (3 years).

The Service proposes to offer these options again during the 1988–89 hunting season, pending results of the call-count survey and receipt of additional information and recommendations.

24. *White-winged and white-tipped doves.* (No change.) Arizona, California, Nevada, New Mexico, and Texas may select hunting seasons between September 1 and December 31, 1988, and daily bag limits as stipulated below.

Arizona may select a hunting season of not more than 30 consecutive days running concurrently with either the first period of a split mourning dove season or the full period of a consecutive-day mourning dove season (see mourning dove frameworks-WMU above). The daily bag limit may not exceed 10 mourning and white-winged doves in the aggregate, no more than 6 of which may be white-winged doves, and a possession limit twice the daily bag limit after opening day.

Nevada, in the counties of Clark and Nye, and in the *California* counties of Imperial, Riverside, and San Bernardino, the daily bag and possession limits of mourning and white-winged doves may not exceed 10 and 20, respectively, singly or in the aggregate, and the season length must conform to the mourning dove season (either a 45-day split season or a 30-day consecutive season as stipulated under mourning dove frameworks-WMU above).

New Mexico may select a hunting season with daily bag and possession limits not to exceed 12 and 24 (or 15 and 30 if the 60-day option for mourning doves is selected) white-winged and mourning doves, respectively, singly or in the aggregate of the 2 species. Dates, limits, and hours are to conform with those for mourning doves.

Texas may select a hunting season of not more than 4 days for the special white-winged dove area of the South Zone. The daily bag limit may not exceed 10 white-winged, mourning, and white-tipped doves in the aggregate, including no more than 2 mourning doves and 2 white-tipped doves; and the possession limit may not exceed 20 white-winged, mourning, and white-tipped doves in the aggregate including no more than 4 mourning doves and 4 white-tipped doves in possession.

In addition, Texas may also select a hunting season of not more than 70 (or 60 under the alternative) days to be held between September 1, 1988 (September 20, 1988, in South Zone), and January 25, 1989, and coinciding with the mourning dove season. The daily bag limit may not exceed 12 white-winged, mourning, and white-tipped doves (or 15 under the alternative) in the aggregate, of which not more than 2 may be white-winged and not more than 2 of which may be white-tipped doves. The possession limit may not exceed 24 white-winged, mourning, and white-tipped doves (or 30 under the alternative) in the aggregate, of which not more than 4 may be white-winged doves and not more than 4 of which may be white-tipped doves.

Florida may select a white-winged dove season of not more than 70 (or 60 under the alternative) days to be held between September 1, 1988, and January 15, 1989, and coinciding with the mourning dove season. The daily bag limit of both species in the aggregate may not exceed 12 (or 15 under the alternative), of which not more than 4 may be whitewings. The possession limit of both species in the aggregate may not exceed 24 (or 30 under the alternative) of which not more than 8 may be whitewings.

Additional information. In a letter to the Service dated January 22, 1988, Texas Parks and Wildlife Department requested a change in the frameworks that would permit an aggregate daily bag limit of 12 white-winged, mourning, and white-tipped doves to include no more than 2 white-tipped doves during the Special 4-day white-winged dove season in Texas. This proposal would liberalize the aggregate bag limit from 10 to 12 and allow up to 12 mourning doves (whereas the current limit restricts the number of mourning doves to 2). The Service will take this request under advisement and make a decision in June after further information is available and the Central Flyway Council has reviewed and considered the proposal through the regulatory process.

25. *Migratory bird hunting seasons in Alaska.* (No change.) The Service proposes to allow Alaska to continue their stabilized duck hunting frameworks during the 1987–88 season.

Proposed Frameworks for Selecting Open Season Dates

Outside Dates: Between September 1, 1988, and January 26, 1989, Alaska may select seasons on waterfowl, snipe, and sandhill cranes, subject to the following limitations:

Shooting Hours: One-half hour before sunrise to sunset daily.

Hunting Seasons:

Ducks, geese, and brant—107 consecutive days for ducks and geese but only 50 consecutive days for brant in each of the following: North Zone (State Game Management Units 11–13 and 17–26); Gulf Coast Zone (State Game Management Units 5–7, 9, 14–16, and 10-Unimak Island only); Southeast Zone (State Game Management Units 1–4); Pribilof and Aleutian Islands Zone (State Game Management Unit 10—except Unimak Island); Kodiak Zone (State Game Management Unit 8). The season may be split without penalty in the Kodiak Zone. Exceptions: The season is closed on Canada geese from Unimak Pass westward in the Aleutian Island chain. Throughout the State there is no open hunting season for Aleutian Canada geese, cackling Canada geese and emperor geese.

Snipe and sandhill cranes—An open season concurrent with the duck season.

Daily Bag and Possession Limits:

Ducks—Except as noted, a basic daily bag limit of 7 and a possession limit of 21 ducks. Daily bag and possession limits in the North Zone are 10 and 30, and in the Gulf Coast Zone they are 8 and 24, respectively. In addition to the basic limit, there is a daily bag limit of 15 and a possession limit of 30 scoter, eider, oldsquaw, harlequin, and American and red-breasted mergansers, singly or in the aggregate of these species.

Geese—A basic daily bag limit of 6 and a possession limit of 12, of which not more than 4 daily and 8 in possession may be Greater white-fronted (white-fronted) or Canada geese, singly or in the aggregate of these species. Throughout the State there is no open hunting season for Aleutian and Cackling Canada geese and emperor geese.

Brant—A daily bag limit of 2 and a possession limit of 4.

Common snipe—A daily bag limit of 8 and a possession limit of 16.

Sandhill cranes—A daily bag limit of 3 and a possession limit of 6.

26. *Migratory game birds in Puerto Rico and in the Virgin Islands.* (No change.)

Proposed Frameworks for Selecting Open Season Dates for Hunting Migratory Birds in Puerto Rico, 1988–89.

Shooting hours: Between one-half hour before sunrise and sunset daily.

Ducks, Coots, Moorhens, Gallinules, and Snipe

Outside Dates: Between November 5, 1988, and February 28, 1989, Puerto Rico may select hunting seasons as follows:

Hunting Seasons: Not more than 55 days may be selected for hunting ducks, common moorhens (common gallinules), and common snipe. The season may be split into 2 segments.

Daily Bag and Possession Limits:

Ducks—Not to exceed 4 daily and 8 in possession, except that the season is closed on the ruddy duck (*Oxyura jamaicensis*); the White-cheeked pintail (*Anas bahamensis*); West Indian whistling (tree) duck (*Dendrocygna arborea*); fulvous whistling (tree) duck (*Dendrocygna bicolor*), and the masked duck (*Oxyura dominica*), which are protected by the Commonwealth of Puerto Rico.

Coots—There is no open season on coots, i.e., common coots (*Fulica americana*) and Caribbean coots (*Fulica carabaea*).

Common Moorhens—Not to exceed 6 daily and 12 in possession, except that the season is closed on purple gallinules (*Porphyrula martinica*).

Common snipe—Not to exceed 6 daily and 12 in possession.

Closed Areas: No open season for ducks, moorhens and gallinules, and snipe is prescribed in the Municipality of Culebra and on Desecheo Island.

Doves and Pigeons

Outside Dates: Puerto Rico may select hunting seasons between September 1, 1988, and January 15, 1989, as follows:

Hunting Seasons: Not more than 60 days for Zenaida, mourning, and white-winged doves, and scaly-naped pigeons.

Daily Bag and Possession Limits: Not to exceed 10 doves of the species named herein, singly or in the aggregate, and not to exceed 5 scaly-naped pigeons.

Closed Areas: No open season for doves and pigeons is prescribed in the following areas:

Municipality of Culebra and Desecheo Island—closed under Commonwealth regulations.

Mona Island—closed to protect the reduced population of white-crowned pigeon (*Columba leucocephala*), known locally as "Paloma cabeciblanca."

El Verde Closure Area—consisting of those areas of the municipalities of Rio Grande and Loiza delineated as follows: (1) All lands between Routes 956 on the west and 186 on the east, from Route 3 on the north to the juncture of routes 956 and 186 (Km 13.2) in the south; (2) all lands between Routes 186 and 966 from the juncture of 186 and 966 on the north, to the Caribbean National Forest Boundary on the south; (3) all lands lying west of Route 186 for one (1) kilometer from the juncture of Routes 186 and 956 south to Km 6 on Route 186; (4) all lands within Km 14 and Km 6 on the west and the Caribbean National Forest Boundary on the east; and (5) all lands within the Caribbean National Forest Boundary whether private or public. The purpose of this closure is to afford protection to the Puerto Rican parrot (*Amazona vittata*) presently listed as an endangered species under the Endangered Species Act of 1973.

Cidra Municipality and Adjacent Closure Areas consisting of all of Cidra Municipality and portions of Aguas Buenas, Caguas, Cayey, and Comerio Municipalities as encompassed within the following boundary: beginning on Highway 172 as it leaves the Municipality of Cidra on the west edge, north to Highway 156, east on Highway 156 to Highway 1, south on Highway 1 to Highway 765, south on Highway 765 to Highway 763, south on Highway 763 to the Rio Guavate, west along Rio Guavate to Highway 1, southwest on Highway 1 to Highway 14, west on Highway 14 to Highway 729, north on Highway 729 to Cidra Municipality, and westerly, northerly, and easterly along the Cidra Municipality boundary to the point of beginning. The purpose of this closure is to protect the Plain (Puerto Rican plain) pigeon (*Columba inornata wetmorei*), locally known as "Paloma Sabanera," which is present in the above locale in small numbers and is presently listed as an endangered species under the Endangered Species Act of 1973.

Proposed Framework for Selecting Open Season Dates For Hunting Migratory Birds in the Virgin Islands, 1988–89

Shooting Hours: Between one-half hour before sunrise and sunset daily.

Ducks

Outside Dates: Between December 1, 1988, and January 31, 1989, the Virgin Islands may select a duck hunting season as follows:

Hunting Seasons: Not more than 55 consecutive days may be selected for hunting ducks.

Daily Bag and Possession Limits: Not to exceed 4 daily and 8 in possession, except that the season is closed on the ruddy duck (*Oxyura jamaicensis*); White-cheeked pintail (*Anas bahamensis*); West Indian whistling (tree) duck (*Dendrocygna arborea*); fulvous whistling (tree) duck (*Dendrocygna bicolor*), and the masked duck (*Oxyura dominica*).

Doves and Pigeons

Outside Dates: The Virgin Islands may select hunting seasons between September 1, 1988, and January 15, 1989, as follows:

Hunting Seasons: Not more than 60 days for Zenaida doves and scaly-naped pigeons throughout the Virgin Islands.

Daily Bag and Possession Limits: Not to exceed 10 Zenaida doves and 5 scaly-naped pigeons.

Closed Seasons: No open season is prescribed for common ground-doves or quail doves, or other pigeons in the Virgin Islands.

Local Names for Certain Birds.

Zenaida dove (*Zenaida aurita*)—mountain dove.

Bridled quail dove (*Geotrygon mystacea*)—Barbary, dove, partridge (protected).

Common Ground-dove (*Columbina passerina*)—stone dove, tobacco dove, rola, tortolita (protected).

Scaly-naped pigeon (*Columba squamosa*)—red-necked pigeon, scaled pigeon.

27. *Migratory game bird seasons for falconers.* (No change.)

Proposed Special Falconry Frameworks

Extended Seasons: Falconry is a permitted means of taking migratory game birds in any State meeting Federal falconry standards in 50 CFR 21.29(k). These States may select an extended season for taking migratory game birds in accordance with the following:

Framework Dates: Seasons must fall within the regular season framework dates and, if offered and accepted, other season framework dates for hunting.

Daily Bag and Possession Limits: Falconry daily bag and possession limits for all permitted migratory game birds shall not exceed 3 and 6 birds, respectively, singly or in the aggregate, during regular hunting seasons and extended falconry seasons.

Regulations Publication: Each State selecting the special season must inform the Service of the season dates and publish said regulations.

Regular Seasons: General hunting regulations, including seasons, hours, and limits, apply to falconry in each State listed in 50 CFR 21.29(k) which does not select an extended falconry season.

Note: Total season length for all hunting methods combined may not exceed 107 days for any species (or group of species) in a geographical area.

Additional information. As indicated above, current frameworks for special falconry seasons provide for seasons that must fall within the outside dates of regular season frameworks and, if offered and accepted, special season outside-dates frameworks. The North American Falconers Association has requested that the special falcontry frameworks be expanded such that States could select special falconry seasons within the outside dates of September 1 and March 10 (between August 15 and February 1 for woodcock and snipe in Atlantic Coast States wholly or in part north of Chesapeake Bay). Seven States have expressed support or no objection to the Association's request.

Response. The Service defers action pending receipt of additional information or comments on this request.

28. *Hawaii mourning doves.* (No change.) The mourning dove is the only migratory game bird occurring in Hawaii in numbers to permit hunting. It is proposed that mourning doves may be

taken in Hawaii in accordance with regulations set by the State of Hawaii as has been done in the past and subject to the applicable provisions of Part 20 of Title 50 CFR. Such a season must be within the constraints of applicable migratory bird treaties and annual regulatory frameworks. These constraints provide that the season must be within the period of September 1, 1988, and January 15, 1989, the length may not exceed 60 (or 70 under the alternative) days; and the daily bag and possession limits may not exceed 15 and 30 (or 12 and 24 under the alternative) doves, respectively. Other applicable Federal regulations relating to migratory game birds shall also apply.

28. *Migratory Bird Hunting on Indian Reservations.* In the September 3, 1985, **Federal Register** (50 FR 35762) the Service implemented interim guidelines for migratory bird hunting regulations on Federal Indian reservations and ceded lands, and has annually established special hunting regulations for certain tribes since the 1985–86 hunting seasons. The Service intends to employ the guidelines and establish special migratory game bird hunting regulations for interested Indian tribes in 1988–89; however, the comment period on the guidelines remains open. In the January 21, 1988, **Federal Register** (53 FR 1645), the Service published a notice requesting proposals from Indian tribes that wish to establish special 1988–89 migratory game bird hunting regulations be submitted no later than June 10, 1988. In a later **Federal Register** document for the Service will publish for public review the pertinent details of proposals received from tribes.

Dated: February 23, 1988.

Susan Recce,

Assistant Secretary for Fish and Wildlife and Parks.

Part V

Environmental Protection Agency

Endangered Species Protection; Notice of Proposed Program

ENVIRONMENTAL PROTECTION AGENCY

[OPP-36154; FRL-3338-8]

Endangered Species Protection Program

AGENCY: Environmental Protection Agency (EPA or Agency).

ACTION: Notice of proposed program.

SUMMARY: This notice invites public comment on an Endangered Species Protection Program which is intended to ensure that pesticide use is not likely to jeopardize endangered species. EPA had envisioned a program which depended upon pesticide product labeling and endangered species habitat maps to achieve the goal of protecting jeopardized endangered species. That concept is described in this notice. However, EPA is willing to entertain comments on other approaches which could achieve the goal, as well as comments on the original conceptual design. Initially, EPA proposed that the program would apply to certain pesticide products registered for use on rangeland and/or pastureland; on crops of corn, cotton, soybeans, sorghum, wheat, oats, barley, or rye; in forests; or as mosquito larvicides. However, enforceable labeling to protect endangered species will not be in effect for the 1988 growing season. Until the program takes effect, the Agency encourages voluntary actions by pesticide users and the states to protect endangered species.

The Agency is requesting public comment on the program described in this notice, and on alternative approaches to protecting endangered species from jeopardy that may be presented by the use of pesticides. Comments will be used in revising the program.

DATES: Written comments in response to this notice should be submitted by June 7, 1988.

ADDRESS: Written comments identified with the document control number "OPP-36154", should be submitted in triplicate, by mail to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

In person, bring comments to:

Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, Virginia.

Requests for lists of the counties, products and pesticide active ingredients potentially affected by the Endangered Species Protection Program, should be addressed to the Information Services Section at the address above.

FOR FURTHER INFORMATION CONTACT:

By mail: Larry Turner, Ecological Effects Branch, Hazard Evaluation Division (TS-769C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 815, CM #2, 1921 Jefferson Davis Highway, Arlington, Virginia, (703–557–1007).

SUPPLEMENTARY INFORMATION:

I. Background

A. The Need to Preserve Endangered Species

An endangered species is a plant or animal which is in danger of extinction throughout all or a significant portion of its range. In addition to their value as unique forms of life, endangered species can provide esthetic, ecological, educational, historical, recreational and scientific benefits to society. Preserving biological diversity by protecting endangered species also may contribute to preserving the overall quality of life.

Certain pesticides may pose a threat to the survival of America's endangered species if used in their remaining habitat. For example, pesticides may directly kill endangered plants or animals, or harm their habitat. It also is possible that pesticide drift, runoff, or leachate may contaminate water, soil or vegetation use by endangered species.

EPA's responsibility is to preclude the potential jeopardy to endangered species from pesticide use. At the same time, EPA wants to avoid placing any unnecessary limitations on the use of many important pesticides. Balancing these responsibilities has led to the development of the Endangered Species Protection Program.

B. The Role of the U.S. Fish and Wildlife Service (FWS)

The purpose of the Endangered Species Act (ESA) is to conserve endangered species. The ESA is administered by the FWS, of the Department of the Interior, which determines whether any species is endangered after reviewing the following factors:

(a) The present or potential harm to its habitat.

(b) Overutilization for commercial, recreational, scientific, or educational purposes.

(c) Disease or predation.

(d) The inadequacy of existing regulatory mechanisms.

(e) Other natural or manmade factors affecting its continued existence.

Within the United States, about 300 animals and 160 plants have been listed as endangered or threatened. Once a species is listed as endangered, the FWS also may designate its critical habitat to be protected from destruction or adverse modification. Petitions to add or to remove a species from the list are reviewed and decided upon by the FWS. The ESA makes it unlawful to kill, harm or collect endangered fish or wildlife, or to remove endangered plants from areas under Federal jurisdiction. The ESA also requires that other Federal agencies ensure that any action they carry out or authorize is not likely to jeopardize the continued existence of any endangered species, or to destroy or adversely modify its critical habitat.

C. The Role of the EPA

EPA registers pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). This is considered "authorization" under the ESA and, therefore, requires that EPA ensure that registered pesticide use is not likely to jeopardize endangered species.

To carry out this responsibility, the Agency reviews both new pesticides and existing registered pesticides, and estimates the maximum environmental concentration of each pesticide which could be expected under proper use. If this estimated concentration may affect an endangered species, then the pesticide is referred to the FWS for a consultation to determine whether specific pesticide uses are likely to jeopardize the continued existence of the endangered species.

If the FWS finds that the uses may cause jeopardy, then their findings will identify those reasonable and prudent alternatives which will preclude the jeopardy to endangered species. The alternatives recommended by the FWS usually prohibit or restrict use of the pesticide within the currently occupied habitat of the affected species. While risk-benefit analysis is not employed by the FWS in listing endangered species, EPA and other parties will use risk-benefit and other economic analysis techniques to help identify alternative measures to the FWS. Such alternatives would both preclude jeopardy to endangered species, and pose minimal economic impact on pesticide users.

Even if the FWS does not find jeopardy, it is required to establish an anticipated level of "incidental take" of the species from the permitted uses. It also may provide the Agency with reasonable and prudent measures to

ensure that the established level of incidental take is not exceeded. To date, the FWS has not prescribed such measures for EPA's program.

The Endangered Species Protection Program described here includes only those federally listed endangered species and pesticide uses for which biological opinions of jeopardy have been issued to EPA by the FWS. These opinions are available from the Information Services Section at the address listed above.

D. Development of the Endangered Species Protection Program

In the past, EPA consulted with the FWS on a case-by-case basis for specific registration actions on individual pesticides. Using this case-by-case approach, the Agency received over 50 biological opinions of jeopardy. A number of individual product labels then were modified to include specific limitations to protect endangered species. Unfortunately, this case-by-case review was very slow. Many older pesticides were not reviewed in a timely manner. On the other hand, new pesticides were being reviewed routinely as part of the registration process. Therefore, newer pesticides were more likely to receive biological opinions of jeopardy. The case-by-case approach created market inequities by requiring additional limitations only on a few pesticides, disproportionately restricting the newer ones. In addition, by not placing use limitations on many older pesticides that may pose a risk to endangered species, the case-by-case approach did not appear to provide adequate protection.

In response to these concerns the Agency adopted a new approach to managing the potential risks to endangered species from uses of pesticides. This was the "cluster approach," which entailed grouping together all pesticides registered for similar uses, and asking the FWS to review the clusters. The purpose of the cluster approach was to improve protection of endangered species by accelerating the review of a larger number of pesticides, and to eliminate market inequities by reviewing pesticides with similar uses as one group.

To date, four cluster reviews have been completed. They were selected on the basis of which pesticide uses present the greatest potential for exposure to endangered species. They include pesticides registered for use on forests, as mosquito larvicides, on rangeland or pastureland, or on the crops of barley, corn, cotton, oats, rye, sorghum, soybeans, or wheat. Subsequent clusters will include alfalfa, aquatic herbicides, non-cropland uses (such as rights-of-way, mosquito adulticides and vertebrate control), orchards, rice, and row crops.

E. Products Exempt From the Program

There are certain categories of pesticide use which will not be covered by the Endangered Species Protection Program. These categories have the concurrence of the FWS, and are:

1. Home and Garden Uses

These include products used directly on humans or pets; in, on, or around any structure, article, surface, or area associated with the household, including but not limited to areas such as outbuildings or noncommercial greenhouses; or in any preschool or day care facility, and which are labeled only for such uses.

2. Forest Uses

These include only those products which bear labeling specifying application only by the following methods or only on the following sites.

a. *Methods*. Direct individual plant spray and/or individual plant injection.

b. *Sites*. Seedbed orchards, nursery plantings, ornamental trees, and ornamental shrubs.

3. Uses on insect pests

Under the ESA, an insect determined by the Department of the Interior to constitute a pest, whose protection under the ESA would present an overwhelming and overriding risk to man, is not an endangered species.

II. Approaches to Implementation of the Endangered Species Protection Program

A. Labeling Approach

In 1986, EPA designed a program which responded to the jeopardy opinions which had been received from the FWS, and which attempted to minimize the impact on agricultural production. The program design relied on labeling of the affected pesticides to direct pesticide users to bulletins designating those specific areas within counties where the affected pesticides could not be used, in order to protect the endangered species. Approximately 110 active ingredients covering 250–300 species in 910 counties were affected in the initial four clusters named in Unit I.D. above. The following describes EPA's original concept of how the labeling approach would have worked.

In May of 1987, the Agency directed that registrants modify the labeling of their products to provide pesticide users with the information necessary to protect endangered species. The labeling would have listed the counties where pesticide use limitations applied, and would have required users to obtain additional information on where and what use limitations existed within those counties.

The Agency had intended that the labeling approach would take effect in the 1988 growing season. However, due to the difficulties in developing accurate bulletins, and in response to comments from other Federal agencies, the states and users, it is clear that this approach will not be ready for the 1988 growing season. Therefore, if EPA decides to pursue the labeling approach as originally envisioned, the earliest that bulletins containing pesticide use limitations would be available to users would be in the 1989 growing season.

Under this approach, labels would refer users to the Pesticide Use Bulletin for Protection of Endangered Species (county bulletin) for the county in which the product is to be used. It had been intended that users of products in the forest and mosquito larvicide clusters would be referred to a FWS field office for instructions, but the FWS has indicated that it would prefer for all information to be provided in some other manner. Any existing labeling for these two clusters would have to be amended accordingly.

The county bulletins would contain maps and/or habitat descriptions of the currently occupied habitat of the endangered species, and limitations on pesticide use to protect the species.

The FWS would determine the geographic areas where pesticide use limitations apply. Generally, limitations would apply only within the habitat that is currently occupied by the endangered species. EPA, the states, the FWS, and users would work together to make the maps and habitat descriptions clear and understandable for the user community.

County bulletins would be revised annually if acceptable information were provided to the FWS to indicate any inaccuracies in the maps, or if the FWS determined that changes had occurred in the habitat of a species. The bulletins also would be updated annually as endangered species were removed from or added to the Federal endangered species list, as changes were documented in the boundaries of currently occupied habitats, as any changes in the jeopardy opinions occurred for specific pesticides, or as additional pesticides were determined to jeopardize endangered species.

Under this labeling approach, future bulletins issued to add new pesticides or to address new use clusters would be published by EPA in draft form, for public comment, prior to their final approval.

County bulletins would be readily available to pesticide users through a number of public and private sources, including the U.S. Department of Agriculture, the U.S. Fish and Wildlife Service, EPA regional offices, State pesticide agencies, county extension offices, pesticide dealers, and others as appropriate.

B. Public Involvement Procedures for the Program

1. Public comment is requested on any aspect of the program described in this notice, as well as on any of the specific issues mentioned. The comments received will be considered in revising the program.

2. Informal public meetings around the country may be held to discuss and to receive comments on the program. The locations and times of any such meetings will be announced separately.

3. Within 90 days of the close of the public comment period, EPA intends to publish a summary of the comments received, and a description of the amended program.

4. Should EPA determine, after comments are received on this notice, to continue to pursue the labeling/bulletin approach, the Agency would establish the following procedures to facilitate public involvement in the implementation of the Endangered Species Protection Program:

(a) The public at any time could suggest to EPA that a pesticide either may or may not affect an endangered species, and recommend that EPA formally consult with the FWS for a jeopardy opinion. Such recommendations would have to be accompanied by a statement of the basis for the recommendation, including a citation of relevant scientific information. After review, EPA might refer the pesticide to the FWS for a biological opinion.

(b) At least once each year EPA would publish a public notice of its schedule for reviewing new use clusters, including re-initiation of review of previously completed clusters, if any.

(c) EPA would publish a public notice of the referral of a pesticide or group of pesticides to FWS for a biological opinion.

(d) EPA would publish a public notice of the availability of every draft and final FWS biological opinion. Comments on the draft opinions would have to be submitted to the EPA within the response dates given in the drafts.

C. Factors Critical to Success of the Program

Development of a national program as described above to protect endangered species from the potential adverse effects of pesticide use depends upon several factors for its success.

First, the assessment that a pesticide may affect an endangered species has to be based upon the best available scientific information.

Second, the biological opinions which link the use of specific pesticides with jeopardy to specific endangered species need to be based upon the best available scientific information.

Third, the maps and habitat descriptions also have to be based upon the best available scientific information.

Fourth, bulletins and other program information have to be available to users in a timely manner, well in advance of program implementation.

Fifth, pesticide manufacturers need adequate time to change the labeling of their products. While a transition period from old to new labeling is inevitable, a high percentage of products with amended labeling when the program begins would minimize any user confusion.

Finally, EPA, USDA and other cooperating Federal and State agencies need to conduct a broad program of user education and training. The program should include technical assistance in identifying and using efficacious pest control alternatives. Such a program would promote the understanding and cooperation needed to ensure a high level of voluntary compliance. This is an important goal: while endangered species labeling would be enforceable, the effectiveness of the program will depend upon voluntary compliance by the user community.

D. Recent History of the Labeling/Bulletin Approach

As stated earlier, it was intended that limitations on four use clusters would be implemented beginning in February 1988, followed by additional clusters in February 1989 and thereafter, until all major clusters had been implemented. The four initial clusters were forestry, mosquito larvicides, rangeland and pastureland, and eight crops (barley, corn, cotton, oats, rye, sorghum, soybeans, and wheat).

In the Fall of 1986, a meeting was held to describe the program to a broad range of interested groups. Following this meeting, plans were established for an outreach effort to inform, educate and train users and groups in the program requirements.

In May 1987, all registrants of pesticide products affected by the initial four clusters were notified by Pesticide Registration (PR) Notices 87–4 and 87–5 of the necessary labeling amendments. These registrants were directed not to release any affected product for shipment after February 1, 1988, unless the product bore the amended labeling described in the notices. Similarly, any persons holding products subject to the notices were not to distribute, sell, offer for sale, hold for sale, ship, deliver, or receive any such product after February 1, 1989, unless the product bore the amended labeling.

Finally, by the Fall of 1987, the draft maps to be included in county bulletins were sent out for review and comment.

E. Public Response to the Recent Activities

In the Fall of 1987, public response to the draft maps, and to the overall program, indicated a number of significant concerns:

(1) Many maps were inaccurate or misleading.

(2) A greater opportunity for public review and comment on the program was necessary.

(3) More time was needed to inform, educate and train both users and Federal and State agency personnel.

(4) Local species conditions and pesticide use patterns often were complex, or not well-known, and required a more tailored approach than just prohibition-of-use.

(5) Objections were raised concerning the findings of some biological opinions, indicating the need for additional communication to establish greater credibility for the opinions.

(6) Alternatives to the prohibition-of-use approach were possible, and might protect endangered species while allowing some uses of affected pesticides to continue.

(7) State and local agencies had much to offer the Agency and/or the FWS in terms of local knowledge of user practices, and of species locations and behavior.

(8) Many people believed that the program would drastically curtail pesticide use without corresponding benefits.

F. State-Initiated Plans to Protect Endangered Species

As a result of these concerns, in October 1987 the Agency invited the states to develop alternative plans to protect endangered species. These state-initiated plans would provide EPA with recommendations to achieve compliance with the ESA, while also reducing the

potential adverse impact on the user community.

The initial round of state-initiated plan development is scheduled to begin during the winter of 1988. Work plans, describing how each state proposes to develop its plan, and approximate schedules of activities through implementation, were due to be submitted to the Agency in February 1988. The work plans would describe the general process the state will employ to design its recommendations. Such elements as the different agencies, public groups and organizations that will help design the plan, the time estimated to resolve specific problems, provisions and tentative schedules for public meetings, and the agency responsible for the overall development of the plan would be included in the work plans.

State plans may recommend any alternative measures which will result in protection of the endangered species. Such alternatives, for example, could include changes in pesticide application rates, methods, and timing, or the use of non-pesticidal alternatives. Any such state-initiated plans that are approved by both the Agency and the FWS will be used to modify the Agency's Endangered Species Protection Program for such states. It should be noted that some approved alternatives, such as changes in maximum application rates, may affect pesticide registrants by requiring amended registrations and labeling for implementation.

While the state develops a plan, EPA would allow the state a reasonable period of time, and would defer implementation of the labeling use limitations described here, for those pesticides, uses, and locations being reviewed by the state. For other states, however, labeling use limitations for those pesticides, uses, and locations in the four clusters (crop, rangeland/pastureland, forest and mosquito larvicides), which were not subject to state-initiated planning would be implemented according to the EPA program described here, when implementation of the entire program began. However, as new clusters were added to the program, the states again would be given the opportunity to develop state-initiated plans, prior to EPA implementation.

Approved state plan recommendations would be implemented by EPA through the labeling approach. Any changes in the programs would be implemented not more often than once each year. In addition, the effectiveness of the approved alternatives would be subject to periodic review by the Agency and the FWS after the plans are in place. During such reviews, it would be determined if the approved alternatives have adequately protected endangered species. It also would be determined if the alternatives created any unnecessary limitations on the use of important pesticides. Therefore, the state-initiated recommendations may be periodically reapproved or modified, with participation and comment by the states, as appropriate.

III. Deferral of Program Implementation

It has become clear that implementing the Endangered Species Protection Program will be far more complex and time-consuming than anticipated.

Developing the Agency's responses to the concerns described in Unit II.E. of this document, and supporting the effort to develop state-initiated plans, will require a high degree of participation, coordination and cooperation among all the involved parties.

Therefore, it no longer is possible for the Agency to meet its original implementation goals for 1988 (labeling for products released for distribution and sale) and 1989 (labeling for products in all channels of trade). Accordingly, on January 7, 1988, EPA announced that it was deferring implementation of the Endangered Species Protection Program for the 1988 growing season.

For users, enforceable labeling requirements to protect endangered species will not be in effect during the 1988 growing season. Other provisions of the label continue to be enforceable.

For registrants, PR Notices 87–4 and 87–5 were rescinded on January 26, 1988, in PR Notice 88–1. It is anticipated that no new labeling requirements to protect endangered species will be issued until September 1988 at the earliest. Future notice(s) will detail the requirements and schedules applicable to registrants.

It is important to note that deferring implementation of EPA's Endangered Species Protection Program does not affect the user's responsibilities under the ESA. The ESA still makes it unlawful to kill, harm, or collect endangered fish or wildlife, or to remove endangered plants from areas under Federal jurisdiction. The FWS will continue to enforce these provisions of the ESA.

This deferral is in keeping with recent Congressional action which effectively deferred enforcement of the program's requirements on users through September 15, 1988. If the labeling approach remains a key element of the program after the public comments have been considered, then after September 15, 1988, the Agency would be able to issue new labeling requirements to pesticide registrants. However, it has been the Agency's experience that registrants have needed up to a year's lead time to place amended labeling on products to be released for sale to the public. From a practical standpoint, therefore, it is not likely that enforceable labeling could begin to be implemented for most, if not all, of the 1989 growing season. During this time, the Agency encourages voluntary actions by pesticide users and the states to protect endangered species.

EPA remains committed to the effective implementation of a comprehensive program to protect endangered species from the potential adverse effects of pesticide use. At the same time, EPA intends to implement a program that is reasonable, achieves its goals, as stated earlier, and has the participation and support of the user community, and other interested groups. For the program to be effective, it is important that the impacts on users be carefully considered, while still protecting endangered species. If parts of the program need more time to achieve effective implementation, EPA intends to take the necessary time.

In the meantime, EPA will devote significant effort to the coordination and planning necessary to make the program work effectively. In particular, EPA will:

(1) Consider all comments on the proposed label/bulletin and state plan approach, and develop a definitive plan for the future of the program.

(2) Work with individual states involved in state-initiated planning.

(3) Work with the FWS, other Federal agencies, and State and local agencies to refine the accuracy of maps; of currently occupied habitats; and of habitat descriptions.

(4) Improve coordination with the U.S. Department of Agriculture (USDA) and the U.S. Department of the Interior (USDI) to promote effective cooperation in the program by these agencies; for example, a recent meeting of the senior managers of these agencies resulted in an agreement to form a joint staff work group to coordinate endangered species protection activities.

(5) Work with pesticide registrants as they amend their product labeling.

(6) Develop education and training materials for use by Federal, State and local agencies.

(7) Conduct a broad outreach effort to solicit public input into program improvement.

IV. Major Issues for Public Comment

Comments are invited on every aspect of EPA's implementation of its responsibilities under the ESA.

Comments should be submitted within 90 days from the date of publication of this notice.

In addition to responding to this notice, comments are invited at the public meetings which may be held, as noted in Unit II.B. of this document, through the state-initiated plan development process, and by any other informal means. The Agency intends to consider the comments received in revising the program.

The Agency hopes that providing for extensive public involvement in this manner will serve both to strengthen the program and to resolve a number of major issues. To this end, EPA is particularly interested in receiving comments on the following major issues:

1. Alternatives To Use Prohibition As The Principal Method To Preclude Jeopardy To Endangered Species

At present, the principal method for prevention of jeopardy to endangered species, as proposed in this notice, is to prohibit use of the pesticide in the areas occupied by the species. Concerns have been expressed to EPA that any number of methods of regulating pesticides may be effective in precluding jeopardy to endangered species. It may be that other methods, such as limiting acceptable application techniques (e.g., ground application and/or chemigation versus aerial application), reduction of maximum application rates, and limiting the types of formulations (e.g., liquids versus granules), may be effective.

Comments are requested on which alternatives to the use prohibitions, as a means to preclude jeopardy to endangered species, would be effective and implementable. A related question is whether any adverse impacts from pesticide use could be allowed to occur without causing jeopardy. Finally, information is requested on the potential economic impacts of the alternatives on users and other affected people.

2. Appropriateness of the Mapping Approach

Mapping the currently occupied habitats of endangered species is the principal method used in the currently proposed EPA program to identify where pesticide use should be limited to protect endangered species. This mapping approach has been criticized because of a lack of up-to-date information on the current habitats of all the listed endangered species, and a lack of information to determine the size of buffer zones needed to protect the endangered species. A concern also has been expressed that since EPA has extended the currently mapped areas to the nearest recognizable boundaries (such as a road or a river), the affected areas have been increased unnecessarily. In some of the states, where the nearest recognizable boundary might be miles from occupied habitat, EPA will use alternatives to limit the affected areas to reasonable sizes.

One suggested alternative or supplement to mapping endangered species habitats would be to give a detailed description of the characteristics of the habitat in which the endangered species is found, to guide pesticide users as to which areas should be avoided. For example, habitats might be described within mapped areas, to assist users in determining where limitations might apply. EPA already intends to implement this "habitat description" approach for a number of species, in the proposed program.

In either case, mapping or habitat description, concern has been expressed that describing the actual location of endangered species might place them in jeopardy from vandals and collectors.

It is EPA's view that mapping probably is the most effective and appropriate approach for the accurate location of many endangered species. The Agency recognizes that some species are not amenable to mapping, and that alternatives and combinations of maps, habitat descriptions and other methods may be desirable.

Comments are requested on the feasibility of alternatives to the mapping approach.

3. Appropriateness of the Labeling Approach

Concerns have been expressed to EPA regarding the appropriateness of using enforceable labeling as the principal method of implementing an Endangered Species Protection Program. It has been asserted that the program needs a very high degree of voluntary compliance to achieve its goals, and that the emphasis upon enforceable labeling could serve the undermine users' willingness to comply.

Alternatives to labeling could include a focus exclusively upon education and training, which already is a major intended component of the proposed program. On the other hand, eliminating the ability for EPA and the states to enforce the program also could serve to undermine compliance, since there would be no means to take action against violations of use limitations. It should be noted that the FWS has enforcement authority, under the ESA, against killing or harming fish and wildlife. Nevertheless, achieving the proper balance of enforcement and education in EPA's program activities remains an open question.

It is EPA's view that labeling probably is the most effective method to alert pesticide users to endangered species issues. In some cases, alternative methods or combinations of methods may be desirable. As noted earlier, new labeling requirements may not be issued to pesticide registrants prior to September 15, 1988. The practical implication is that new labeling probably could not begin to appear in stores until late in the 1989 growing season, at the earliest.

Comments are requested on what would be the best mix of enforceable and educational approaches, and their feasibility, timing, and desirability for implementation.

4. Appropriateness of the Cluster Approach

EPA has chosen to evaluate pesticides on the basis of "clusters" of their uses, such as all the pesticides used on corn. This provides equity by evaluating all pesticides with similar uses for their effects on endangered species at the same time. In this way, older and potentially more toxic pesticides would not have the advantage of escaping review for effects on endangered species, while newer and potentially less toxic pesticides were reviewed and limitations applied on a case-by-case basis. Different use clusters would be evaluated each year, until all major uses of all pesticides had been reviewed.

This cluster approach has been criticized, however, because it could result in limitations on one use of a specific pesticide for one crop in a state, but no limitations on another use in the same area, simply because EPA had not yet evaluated the second use. This situation could confuse the end-user, and fail to protect fully the endangered species until the entire cluster review process was complete.

As an alternative to the use cluster approach, it has been suggested that EPA consider a "species" approach, reviewing all the pesticides which could significantly affect a given endangered species at one time. By focusing on the species, a complete set of reasonable and prudent alternatives could be developed at one time to ensure protection of the species. In this approach, and after consultation with the FWS, EPA would schedule which species would be reviewed each year, until all endangered species had been covered. This approach could require significantly increased resources and time for both EPA and the FWS, in that every relevant pesticide and use would

have to be reviewed at the same time, for each species. If more time were needed, protection for the species involved could be delayed.

A second alternative to the use cluster approach would be to review one chemical at a time, as data allowed.

Comments are requested on the feasibility of alternatives to the cluster approach.

5. Assuring Consistency Between Chemical-specific Jeopardy Opinions and Use Cluster Jeopardy Opinions

During the past several years, and as a result of the registration, reregistration, and special review procedures used by EPA to evaluate pesticides, a number of pesticides were referred to the FWS for pesticide-specific jeopardy opinions. The result was a number of findings of jeopardy to endangered species, and the adoption of specific limitations on the use of some individual pesticides. These limitations already appear on the labeling of these products.

It has been noted that, as the Endangered Species Protection Program proceeds, these individual pesticides might be treated differently from others registered for the same uses. For example, the label restriction may differ from those arising from the cluster approach. In another example, the full cluster might not be scheduled for review for several years, thus putting a reviewed pesticide at a competitive disadvantage. To promote consistency among comparable products, registrants might request changes in pesticide-specific labeling. It should be noted that any such requests would require both EPA and FWS approval.

Comments are requested on the feasibility and means of assuring that similar pesticides are subject to comparable restrictions at the same time to achieve marketplace equity.

6. Assuring Consistency With Other Federal Programs Which Establish Requirements for Pesticide Use

It has been observed that a number of other Federal and state programs encourage or require the use of pesticides to accomplish public goals. These other programs include, but are not limited to: Noxious weed control; soil conservation; mosquito abatement; research and demonstration; and boll-weevil control. EPA's Endangered Species Protection Program could result in pesticide use limitations which may conflict with these other programs.

Comments are requested to further identify on-going programs which encourage or require the use of pesticides, and on the feasibility of alternatives for reconciling the potential conflicts among these programs, FIFRA, and the ESA.

7. Providing Education, Training, and Technical Assistance to Non-traditional User Groups in Endangered Species Protection Measures

State/EPA training programs currently are designed principally for certified pesticide applicators only. Given the broader group of users potentially subject to limitations to protect endangered species, there is a need to provide education, training, and technical assistance to this larger audience.

Comments are requested on options and their feasibility for implementation (including the resources needed) for providing such endangered species information to those affected by the program.

8. Guidelines or Minimum Requirements For State Plans Recommending Alternative Measures To Protect Endangered Species

As noted earlier, EPA is providing the opportunity for the states to develop plans recommending alternative protective measures to those which might be used by EPA.

One concern which has been expressed is that the state plans might be inconsistent, both in approach and in quality. It has been suggested that EPA issue guidelines or minimum requirements for state planning efforts, to ensure some consistency in review and approval. On the other hand, it has been suggested that EPA guidelines or minimum requirements would stifle state innovation and reduce most states to the minimum effort.

Comments are requested on the need for appropriateness of guidelines. If deemed appropriate, comments also are requested on options and their feasibility for implementation for providing guidelines or minimum Federal requirements for state planning efforts. Suggestions for the criteria for such guidelines or requirements also are requested.

V. Conclusion

EPA began to implement its approach to protecting endangered species from the potential adverse effects of pesticide use a number of years ago. As the program has evolved, however, it has become increasingly complex. EPA has recognized the desirability of state involvement and leadership, the need for a high level of coordination among several Federal agencies, the need for broad public involvement, and a requirement for user education and training efforts.

The currently proposed Endangered Species Protection Program has aroused substantial public interest, and many suggestions for improvement. Given this constructive participation, the program will achieve its goals in the coming years.

EPA remains committed to implementing a program based upon accurate and credible information, developed by cooperative efforts, and supported by the understanding and willingness to comply of those involved.

Deferral of program implementation for the 1988 growing season provides the time to develop a stronger program. The ESA requires that EPA's registration of pesticides will not lead to jeopardy for endangered species. While enforcement is both possible and necessary to curb abuses, a truly effective Endangered Species Protection Program will depend upon user cooperation and voluntary compliance. The user community is closest to the environment and to endangered species. The health of both depends upon the wise use of pesticides.

Dated: February 29, 1988.

John A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

LIST OF PUBLIC LAWS

Last List March 3, 1988

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.R. 3923/Pub. L. 100-255

To make a technical correction to section 8103 of title 46, United States Code. (Mar. 4, 1988; 102 Stat. 23; 1 page) Price: $1.00

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Title 3—

The President

Proclamation 5775 of March 7, 1988

Women's History Month, 1988

By the President of the United States of America

A Proclamation

Women's History Month is a time for us to recognize and salute women's contributions to the American family and to society. Women have been making these contributions since this continent was explored and settled and America won its independence.

Women continue to strengthen the family and enrich our lives with intellectual gifts, creative talents, and an indomitable spirit—in business, government, volunteer activities, religious life, education, health, the military, sports, the arts, and many other areas. Historians will record the accomplishments of women at home as well, chronicling the tremendous contributions countless women have made by helping to raise children who adhere to the moral, ethical, civic, and patriotic principles that have made us, and kept us, a great country. We should be proud and grateful as we celebrate Women's History Month.

The Congress, by Senate Joint Resolution 262, has designated the month of March 1988 as "Women's History Month" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim March 1988 as Women's History Month. I call upon all Americans to observe this month with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this seventh day of March, in the year of our Lord nineteen hundred and eighty-eight, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Executive Order 12628 of March 8, 1988

United Nations Industrial Development Organization

By virtue of the authority vested in me as President by the Constitution and laws of the United States of America, including Section 1 of the International Organizations Immunities Act (22 U.S.C. 288), and in order to facilitate United States participation in the United Nations Industrial Development Organization, it is hereby ordered as follows:

Section 1. The United Nations Industrial Development Organization, whose Constitution was ratified by the United States on August 2, 1983, and entered into force on June 21, 1985, is hereby designated as a public international organization entitled to enjoy the privileges, exemptions, and immunities conferred by the International Organizations Immunities Act. This designation is not intended to abridge in any respect the privileges, exemptions, or immunities that such organization has acquired or may acquire by international agreements or by Act of Congress.

Sec. 2. This Order shall be effective immediately.

Ronald Reagan

THE WHITE HOUSE,
March 8, 1988.

Rules and Regulations

Federal Register
Vol. 53, No. 47
Thursday, March 10, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 292

[A.G. Order No. 1257-88]

Representation and Appearances

AGENCY: Executive Office for Immigration Review, Department of Justice.

ACTION: Final rule.

SUMMARY: The revisions bar foreign-licensed attorneys, who are outside the definition of 8 CFR 1.1(f), from representing persons before the Immigration and Naturalization Service, the Board of Appeals, and immigration judges in any matter conducted within the geographical confines of the United States.

The revisions also limit representation of persons by such foreign-licensed attorneys to proceedings conducted outside the geographical confines of the United States and only in those situations where the Service, in its discretion, allows such representation. These revisions are necessary to improve representation in immigration proceedings by providing additional assurances that those attorneys who appear before immigration judges, the Board, and Service adjudicators are competent to do so.

EFFECTIVE DATE: April 11, 1988.

FOR FURTHER INFORMATION CONTACT: Gerald S. Hurwitz, Counsel to the Director, Executive Office for Immigration Review, Suite 1609, 5203 Leesburg Pike, Falls Church, Virginia 22041, telephone (703)756-6470.

SUPPLEMENTARY INFORMATION: The revisions eliminate the representation of persons by foreign-licensed attorneys, who are outside the definition of 8 CFR 1.1(f), in all matters before the Service, the immigration judges, and the Board of Immigration Appeals (which are conducted within the United States) and limit representation by such foreign-licensed attorneys to matters before the Service outside the United States and to those instances where the Service, in its discretion, allows such representation.

These revisions are necessary because of the lack of control and oversight that the Service, the immigration judges, and the Board have of such foreign-licensed attorneys appearing before them.

Unlike United States licensed attorneys who, in the main, must graduate from a U.S. accredited law school and, in most cases, pass a bar examination, foreign-licensed attorneys, who are outside the definition of 8 CFR 1.1(f), are licensed in countries which may or may not have rigorous standards for bar membership. It would be difficult for the Service, immigration judges, or Board to know if such a person is properly or even minimally qualified to practice law before them. Therefore, for the protection of the persons appearing in various immigration proceedings and to assure the proper conduct of the proceedings, it is beneficial to eliminate the difficulties attached to representation by foreign-licensed attorneys, who are outside the definition of 8 CFR 1.1(f), by eliminating their appearances in proceedings in the United States.

In addition, since such foreign-licensed attorneys are not subject to standards of conduct and discipline as are attorneys who are members of various state bars, regulation of these attorneys by the Board or other U.S.-based authority is highly difficult. It is unlikely that the Board, for instance, would even be aware of a foreign disbarment or suspension. In contrast, U.S. disciplinary proceedings are general publicized in bar journals or state court proceedings and are usually known to the Service or other attorneys who practice immigration law.

Moreover, those foreign-licensing bodies which do supervise attorneys in their courts, have little reason to be interested in any activity relating to the Board, the immigration judges, or the Service. It is also unlikely that the immigration judges, the Board, or the Service would be able to effectively communicate with a foreign-licensing authority if the need should arise.

The revisions allow practice before the Service by foreign-licensed attorneys, who are outside the definition of 8 CFR 1.1(f), on a limited basis outside the United States. This privilege is preserved so that in foreign countries, where U.S. licensed attorneys are not readily available, representation will exist. Also, since each Service office affected is located in a particular foreign country, it is probable that Service officers will be familiar with and have better access to information regarding competency of foreign-licensed attorneys in that country. The provision that Service officers may allow such foreign-licensed attorneys the opportunity to appear as a matter of discretion should give the Service sufficient authority to remove such an attorney from representation if problems develop.

A notice of proposed rulemaking regarding this matter was published on January 29, 1987, at 52 FR 2951. A 30-day comment period was provided. There were serveral comments received regarding this proposal. All comments were considered. After careful consideration, the rule in final form was not changed.

One commenter strongly supported the proposal. This commenter basically agreed with the position that there are no assurances that foreign-licensed attorneys are competent to practice in an area of U.S. law and that disciplinary action by the foreign bar would be difficult at best.

Two commenters were critical of the proposal for several reasons. It was stated that this proposal would unduly limit representation for aliens to U.S. licensed attorneys. It was also stated that it was not proper as a matter of policy for the United States Government to bar representation by certain groups of attorneys. It was also pointed out that limiting appearances outside the U.S. to the discretion of Service officials would create undesirable difficulties.

A major purpose of this revision is to help assure that aliens are competently represented. This is an important and legitimate goal. The revision is designed to further that goal by creating additional assurances that aliens will be represented by competent counsel. It is also consistent with the Immigration and Nationality Act and basic tenants of administrative law that an agency may regulate those representatives who

VOL 53
ISS 47
MR 10
1988
UMI

appear before them. It is our view that limiting attorney practice to those who have exhibited a basic competency in U.S. law by being licensed in a U.S. jurisdiction is a reasonable step to assuring competent representation in immigration proceedings. Further, with regard to discretion, Service officials exercise discretion in many areas on a routine basis. They are quite capable of fairly deciding under what circumstances it would be appropriate to allow foreign-licensed attorneys to appear. It should be noted that under current procedures, Service officials may allow certain representatives to practice on a case-by-case basis and must exercise a discretion in doing so (see 8 CFR 292.1).

In accordance with 5 U.S.C. 605(b), the Attorney General certifies that this rule will not have a significant impact on a substantial number of small entities. This rule will not be a major rule within the meaning of paragraph 1(b) of E.O. 12291.

List of Subjects in 8 CFR Part 292

Administrative practice and procedures, Aliens.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

1. The authority citation for Part 292 continues to read as follows:

Authority: 8 U.S.C. 1103, 1362.

PART 292—REPRESENTATION AND APPEARANCES

2. In § 292.1, paragraph (a)(6) is revised to read as follows:

§ 292.1 Representation of others.

(a) * * *

(6) Attorneys outside the United States. An attorney other than one described in § 1.1(f) of this chapter who is licensed to practice law and is in good standing in a court of general jurisdiction of the country in which he/she resides and who is engaged in such practice. Provided that he/she represents persons only in matters outside the geographical confines of the United States as defined in section 101(a)(38) of the Act, and that the Service official before whom he/she wishes to appear allows such representation as a matter of discretion.

* * * * *

Dated: March 3, 1988.

Edwin Meese III,

Attorney General.

BILLING CODE 1531-26-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 21 and 36

[Docket No. 24929; Amendment Nos. 21–61 and 36–14]

Noise Standards for Helicopters in the Normal, Transport and Restricted Categories; Correction

AGENCY: Federal Aviation Administration [FAA], DOT.

ACTION: Final rule; Correction.

SUMMARY: In the February 5, 1988, issue of the **Federal Register** (53 FR 3534), the FAA published a final rule revising 14 CFR Parts 21 and 36. The final rule contains errors that require correction. In a document published on March 3, 1988 (53 FR 6793), FAA published some corrections. This document reprints those corrections and makes further corrections. The errors include omission of punctuation and words. There were also spelling errors. The "§" symbol should be spelled out when preceding an appendix section. Some sections were incorrectly referenced, one of the reference points and an angle for Figure 1 was cited incorrectly; one equation had a lower case letter when an upper case letter should have been used. This document serves to correct these errors.

FOR FURTHER INFORMATION CONTACT: Mr. Steven R. Albersheim (202) 267–3560.

Corrections to the Preamble

1. Page 3534, first column; title of the final rule—delete the words "Final Rule for".
2. Page 3534, third column, under 1. General, first paragraph, sixth line—"work" should read "word". Second paragraph, 19th line—"accoustical" should read "acoustical".
3. Page 3535, second column, sixth line, "§ A36.7" should read "Section A36.7"
4. Page 3536, third column, first full paragraph, 20th line—"techological" should read "technological".
5. Page 3537, first column, ninth line—"State" should read "Stage". Page 3537, first column, under "Rule Structure", third line, "recognized" should read "reorganized". Same column, under "Regulatory Impact Evaluation" second paragraph, seventh line—delete the word "their".
6. Page 3538, first column, second paragraph, sixth line, "occuring" should read "occurring". Under 2. *No-Correction Window*, first paragraph, ninth line, hyphenate "no correction".
7. Page 3538, third column, first full paragraph, second line, add the word "of" after the word "all". In same paragraph, sixth line, remove the word "for" before the word "requiring" and add the word "by".
8. Page 3538, third column, last paragraph, eighth line, add a period after the word "service".
9. Page 3539, first column, under 6. *Test Costs*, first paragraph, fifth line—hyphenate "no correction".
10. Page 3539, second column, first line, place a hyphen after the word "per". In second column, first full paragraph, ninth line, hyphenate "no correction".
11. Page 3539, third column, under *List of Subjects*, third line, "Accoustical" should read "Acoustical".

Corrections to the Rule

1. Page 3540, first column, under § 36.1 b.(2), fourth line—add additional "§" symbol. In first and second columns, under (g) (1), (3), and (4), "§ H36.305" should read "Section H36.305". Second column, eighth line from the bottom, "§ H36.305(b)" should read "Section H36.305(b)".
2. Page 3540, third column, under § 36.1581(e), seventh line—add additional "§" symbol.
3. Page 3540, third column, under § 36.801, seventh line—"FAA-FAA-approved" should read "FAA-approved".
4. Page 3541, first column, first line, "FAA-FAA-approved" should read "FAA-approved".
5. Page 3541, first column, under § 36.805(b), last line of paragraph, "§" should read "Section". Under § 36.805(c), fifteenth line, "§" should read "Section".
6. Page 3541, second column, under Section H36.3(a), change "(i), (ii), (iii), and (iv)" to read "(1), (2), (3), and (4)" respectively.
7. Page 3541, second column, under Section H36.3(d), tenth line, "stablized" should read "stabilized".
8. Page 3541, third column, fifth line, "(e)" should read "(f)".
9. Page 3542, second column, under Part B, Section H36.101(b), sixth line, "station" should read "stations".
10. Page 3542, third column, under Section H36.101(b)(7), fourth line, "§ H36.107 of this Part." should read "Section H36.107 of this part."
11. Page 3542, third column paragraph (9), third line—"§ H36.205" should read "Section H36.205". Fourth line, same paragraph, "a" should read "an". Under (9)(c) *Weather restrictions*—"test" should read "tests".

12. Page 3542, third column, under Section H36.101(c)(2), in the first and second lines, change "36 F and 95 F (2.2 C and 35 C)" to read "36 ° F and 95° F (2.2 °C and 35 °C)".
13. Page 3543, first column, under (6), sixth line, change "meterological" to "meteorological". Same column, under (7)(d), last word of paragraph, "Part" should not be capitalized.
14. Page 3543, third column, under Section H36.109(b)(3), first line, insert a comma after the word "equipment".
15. Page 3544, first column, under Section H36.109(6)(c)(2)(iii), sixth line, "Pecision" should read "Precision". Last word of the same paragraph, "Part" should not be capitalized.
16. Page 3544, second column, under Section H36.109(6)(d)(1), last word of the paragraph, "Part" should not be capitalized.
17. Page 3545, first column, forty-fifth line, second word, "Part" should not be capitalized.
18. Page 3545, second column, twenty-fifth line, "§ H36.111(c)(4)" should read "Section H36.111(c)(3)".
19. Page 3545, second column, under Section H36.111(b), fifth line, "§ H36.109" should read "Section H36.106". Under same section, (b)(5)(i), insert a period at the end of the sentence.
20. Page 3545, third column, third line, "§ H36.3" should read "Section H36.3". Same column, fortieth line, change "§ H36.205" to read "Section H36.205". Same column, forty-fourth line, change "§ A36.3(f)(3)" to read "Section A36.3(f)(3)".
21. Page 3546, first column, under Section H36.113(b), last word of paragraph, "Part" should not be capitalized.
22. Page 3546, first column, under Section H36.113(c)(2), change (2) to (iii) and (iii) to (2).
23. Page 3546, second column, under Section H36.205(a), fourth line, "§ H36.305"; should read "Section H36.305".
24. Page 3546, third column, seventh line, "subtracted" is misspelled. Same column, under Section H36.205(b)(i), second line, "§ H36.3" should read "Section H36.3". Same column, fifth line from bottom, "required" is misspelled.
25. Page 3547, first column, eighth line, insert a comma after the words "station A". Same column, ninth line, insert a period after the word "path". Same line, change "angle*" to "angle Φ".
26. Page 3547, third column, first line, insert the word "Section" before "H36.3(d)".
27. Page 3549, second column, first line, insert comma after "A" and change "M" to read "M_r".
28. Page 3549, third column, sixth line, insert a comma after the Greek letter eta.
29. Page 3551, first column, first line, insert a comma after the letter "A". Same column, seventh line, insert a comma after the letter "A".
30. Page 3551, first column, "f. *PNLT corrections.*" should read "(f) *PNLT corrections.*".
31. Page 3551, first column, under (f)(1)(i), "SPlic" should read "SPLic".
32. Page 3551, second column, under (3) *Sideline microphones.*, fifth equation, last word, "fly-over" should read "flyover".
33. Page 3551, second column, first line, change "L_rA_c" to read "L_rA". Same column, under (3) *Sideline microphones*, third equation, "take off" should be one word. Same column, under (4) *Level flyover flight path*, second line, "(f)(i)" should read "(f)(1)".
34. Page 3551, second column, under (g)(1), fourth line change "§ A36.5(d)(2)" to read "Section A36.5(d)(2)".
35. Page 3551, under § 36.205(g)(i), second column, change (a) to (i) and in the third column, change (b) to (ii), (c) to (iii), and (d) to (iv). Third column, eigthteenth line, "(iv) Level flyover flight paths" should not be italicized.
36. Page 3551, third column, fourth line, "Δ2" should read "Δ_s". Same column, under (iii), third line, "using formula" should read "using the formula".
37. Page 3551, third column, Section H36.305(a), fifth line, § H36.101" should read" "Section H36.305(a)".
38. Page 3552, second column, third line, "§ H36.203" should read "Section H36.203".

John H. Cassady,

Assistant Chief Counsel, Regulations and Enforcement Division, Office of the Chief Counsel.

[FR Doc. 88–5207 Filed 3–9–88; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 87–NM–145–AD; Amdt. 39–5872]

Airworthiness Directives; Boeing Model 757 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 757 series airplanes, which requires the installation of a door in the vertical fin access opening in the section 48 fuselage section, and the installation of covers in the four front spar access holes of the horizontal stabilizers. This action is needed because the vertical fin and horizontal stabilizers could be overpressurized to the point of structural failure in the event of a failure of the aft pressure bulkhead.

EFFECTIVE DATE: April 22, 1988.

ADDRESSES: The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Scott F. Romer, Airframe Branch, ANM–120S, telephone (206) 431–1966. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive which would require the installation of a vertical fin access door and horizontal stabilizer covers on Boeing Model 757 series airplanes, was published in the **Federal Register** on November 16, 1987 (52 FR 43769).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the four comments received.

One commenter requested the rule be withdrawn because of the fact that no cracks occurred during the fatigue test and because the risk of massive bulkhead rupture is extremely remote. The FAA does not agree. While the likelihood of a massive fatigue failure of the bulkhead is considered to be highly unlikely, service experience on other aircraft models has shown that other failure modes, such as extensive corrosion or accidental damage, are possible and, in fact, have resulted in catastrophic consequences. Therefore, the FAA considers this AD action to be appropriate.

Another commenter requested the rule be withdrawn since it is one of general applicability to all aircraft types and, thus, should be the subject of a Part 121 rule change. The FAA has, in fact, initiated a rulemaking project, the intent of which will be to address all areas of the structure, not just the area behind the aft pressure bulkhead. However, the

FAA has determined that this AD is necessary to eliminate the identified unsafe condition by requiring modification of Model 757 airplanes in a timely manner.

Another commenter suggested that the requirement of the AD be subject to a 10,000 cycle threshold. The FAA does not agree, since some damage modes are not related to the length of time the airplane has been in service or to cycles.

The final commenter requested more time be allotted for compliance due to delays in scheduled kit deliveries. A review of the delivery schedule of kits with the manufacturer has revealed that sufficient kits will not be available for airplanes undergoing major maintenance during the next few months. Accordingly, the FAA agrees with the commenter and has extended the compliance time from 15 months to 18 months. This change will ensure timely availability fo the required modification kits and will allow airplanes to be modified during scheduled maintenance rather than being removed from service.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change noted above.

It is estimated that 139 airplanes of U.S. registry will be affected by this AD, that it will take approximately 24 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. The cost of the kit is approximately $4,043. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $695,417.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities, because few, if any, Model 757 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 757 series airplanes listed in Boeing Service Bulletin 757–53–0038, dated August 27, 1987, certificated in any category. Compliance required within 18 months after the effective date of this AD, unless previously accomplished.

To prevent structure failure of the vertical fin and horizontal stabilizers in the event of a failure of the aft pressure bulkhead, accomplish the following:

A. Install a vertical fin access door and horizontal stabilizer covers in accordance with Boeing Service Bulletin 757–53–0038, dated August 27, 1987, or later FAA-approved revision.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective April 22, 1988.

Issued in Seattle, Washington, on March 3, 1988.

Wayne J. Barlow,

Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 87–NM–105–AD; Amdt. 39–5871]

Airworthiness Directives; Airbus Industrie A310–203, –221, and –222 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Airbus Industrie Model A310 series airplanes, which requires inspection, modification, and repair, if necessary, of the rear pressure bulkhead. This amendment is prompted by reports of cracks detected in the attachment angles during fatigue testing of the rear pressure bulkhead. This condition, if not corrected, could eventually lead to failure of the bulkhead.

EFFECTIVE DATE: April 22, 1988.

ADDRESS: The applicable service information may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Bob Huhn, Standardization Branch, ANM–113; telephone (206) 431–1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, which requires inspection, modification, and repair if necessary, of the rear pressure bulkhead on certain Airbus Industries Model A310 series airplanes was published in the **Federal Register** on September 28, 1987 (52 FR 36274).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

The first commenter stated that the Airbus service bulletin reflected in the proposed rule, which contains instructions for the x-ray inspections, modifications, and repairs, has been superseded by later revisions. These later revisions of the service bulletins correct certain errors which appeared in previous versions, and introduce eddy current inspection procedures which reduce the inspection time from 330 to 7.5 manhours. The commenter suggested that the AD be revised to reflect the latest revision to the service bulletin. The FAA has considered this information and concurs with the commenter. The final rule has been changed to reflect the latest revision of the service bulletin as an alternate means to accomplish the requirements of the AD. The FAA has determined that this change will not increase the economic burden on any operator, nor will it increase the scope of the AD.

The second commenter stated that the proposed initial inspection and modification would be required sooner than the time specified in the related French airworthiness directive (AD), and requested that the compliance time in the final rule be consistent with that of the French AD. In considering this request for a change in the originally proposed compliance time, the FAA has taken into account several items:

a. This AD action was prompted by cracks in certain aft pressure bulkhead attachment angles, discovered during fatigue testing, which appeared after approximately 32,000 to 37,500 simulated flights.

b. The French AD specifies that the initial inspection and modification be accomplished prior to the accumulation of 12,000 landings, whereas, the manufacturer, in its service bulletin, recommends this action be accomplished prior to the accumulation of 6,000 landings. Further investigation by FAA as to the reason for this difference revealed that the French AD specifies 12,000 landings as the *maximum* number of landings permissible before inspection and modification action must be accomplished to eliminate the potential for additional fatigue damage to aft pressure bulkhead attachment structure, while the service bulletin considers 6,000 landings as the *minimum* number.

c. The only U.S. operator affected by this AD, indicated that its high cycle Airbus Model A310–200 airplane had accumulated only 2,700 landings, as of October 20, 1987.

In consideration of the foregoing, the FAA has revised the final rule to require accomplishment of the initial inspection and modification prior to accumulating 9,000 landings, or within the next 3,000 landings after the effective date of the final rule, whichever occurs later. The FAA has determined that this revision of the number of landings permissible prior to the initial compliance time is both prudent and appropriate in maintaining an acceptable level of safety.

The final commenter stated that the Airbus service bulletin and the French AD specify that only those airplanes modified between 6,000 and 12,000 landings would be subject to the initial and subsequent repetitive inspections; these inspections would not be required for planes modified prior to 6,000 landings. Since the proposed rule would require the initial inspection and modification prior to 6,000 landings, it appears to be more restrictive than the service bulletin and French AD. In response to this commenter, the FAA notes that, as discussed above, the final rule has been revised to require the initial inspection and modification to be accomplished prior to the accumulation of 9,000 landings, rather than 6,000 landings, as proposed. However, due to the critical nature of the bulkhead area, the FAA considers it imperative that, prior to incorporating the modification, an inspection be performed to detect and repair, if necessary, any fatigue damage present in the area.

The FAA has reconsidered paragraph B. of the rule, which describes the repetitive inspection requirements, and has determined that, as worded in the proposal, its intent could be misinterpreted. Therefore, paragraph B. of the final rule has been revised to clarify that only those airplanes which have incorporated the modification after the accumulation of 6,000 landings are subject to the repetitive inspection requirements.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule, with the changes noted above.

It is estimated that 3 airplanes of U.S. registry will be affective by this AD. It will take approximately 330 manhours per airplane to accomplish the X ray inspection or 7.5 manhours per airplane to accomplish the eddy current inspection; it will take approximately 280 manhours per airplane to accomplish the required modification. The average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $70,800 or $32,100, depending upon which inspection procedure is accomplished.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model A310 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

Aviation Safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Airbus Industrie: Applies to certain Model A310 series airplanes, as listed in Service Bulletin A310–53–2025, Revision 3, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent failure of the rear pressure bulkhead, accomplish the following:

A. Prior to the accumulation of 9,000 landings or within the next 3,000 landings after the effective date of this AD, whichever occurs later, accomplish the following:

1. Inspect the rear pressure bulkhead for cracks, using X-ray procedures, in accordance with paragraph 2., Accomplishment Instructions, of Airbus Industrie Service Bulletin A310–53–2024, Revision, 1, dated June 20, 1986; or using eddy current procedures, in accordance with paragraph 2., Accomplishment Instructions, of Airbus Industrie Service Bulletin A310–53–2024, Revision 3, dated February 17, 1987. If any cracks are detected, repair prior to further flight in accordance with paragraph 2.C., Repair, of the applicable service bulletin.

2. Modify the attachment of the rear pressure bulkhead to FR 80/82 in accordance with paragraph 2., Accomplishment Instructions, of Airbus Industries Service Bulletin A310–53–2025, dated April 21, 1986, or Airbus Industrie Service Bulletin A310–53–2025, Revision 3, undated.

B. For airplanes that were modified in accordance with paragraph A.2., above, after the accumulation of 6,000 landings: Within 6,000 landings after the modification, and thereafter at intervals not to exceed 12,000 landings, repeat the X-ray or eddy current inspection, as applicable, of the rear pressure bulkhead required by paragraph A.1., above.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective April 22, 1988.

Issued in Seattle, Washington, on March 3, 1988.

Wayne J. Barlow,

Director, Northwest Mountain Region

14 CFR Part 39

[Docket No. 87–NM–147–AD; Amdt. 39–5873]

Airworthiness Directives; Sud Aviation Model Caravelle SE 210 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Sud Aviation Caravelle series airplanes, which requires inspections for cracking and repair, if necessary, of the wing lower skin panels adjacent to wing rib No. 31. This amendment is prompted by reports of cracking detected in the area around the ends of stiffeners K 8.5 and C 8.5. This condition, if not corrected, could lead to failure of the wing.

EFFECTIVE DATE: April 22, 1988.

ADDRESSES: The applicable service information may be obtained from Aerospatiale, 316 Rue de Bayonne, 31060 Toulouse Cedex 03, France. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Bob Huhn, Standardization Branch, ANM–113; telephone (206) 431–1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, which requires inspection for cracking, and repair, if necessary, of the wing lower skin panels adjacent to wing rib No. 31 on certain Sud Aviation Model Caravelle SE 210 series airplanes, was published in the **Federal Register** on December 17, 1987 (52 FR 47946).

Interested parties have been afforded an opportunity to participate in the making of this amendment. No comments were received in response to the proposal.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 32 airplanes of U.S. registry will be affected by this AD, that it will take approximately 8 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $10,240 for the initial inspection.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane ($320). A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Sud Aviation: Applies to Sud Aviation Caravelle series airplanes, listed in Sud Aviation Caravelle Service Bulletin No. 57–56, Revision 2, dated February 28, 1985, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent failure of the wing, accomplish the following:

A. Within 100 landings after the effective date of this AD or prior to the accumulation of the number of landings specified in the schedule, below, whichever occurs later, accomplish the requirements of subparagraphs A.1. or A.2, below, as applicable.

Schedule I

(1) 30,000 landings on airplanes whose maximum take-off weight [1] is 48 tons or less;

(2) 20,000 landings on airplanes whose maximum take-off weight [1] exceeds 48 tons but is no more than 52 tons;

(3) 10,000 landings on airplanes whose maximum take-off weight [1] exceeds 52 tons.

1. For airplanes without external doubler, perform visual and nondestructive testing inspections (NDI) for cracking adjacent to wing rib No. 31 in accordance with Sud Aviation Caravelle Service Bulletin No. 57–56, Revision 2, dated February 28, 1985.

2. For airplanes with external doublers, perform visual and radiographic inspections for cracking adjacent to wing rib No. 31 in accordance with Sud Aviation Caravelle Service Bulletin No. 57–56, Revision 2, dated February 28, 1985.

B. If no cracks are detected, repeat the inspections required by paragraph A., above, at the intervals specified in Sud Aviation Caravelle Service Bulletin No. 57–56, Revision 2, dated February 28, 1985, Figure 1, Wing Lower Surface Inspection Frequencies.

C. Any cracks detected during the inspections required by paragraph A. or B., above, must be repaired, prior to further flight, in accordance with Sud Aviation Caravelle Service Bulletin No. 57–56, Revision 2, dated February 28, 1985.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

---

[1] Maximum take-off weight as defined in the FAA-approved airplane flight manual.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Aerospatiale, 316 Rue de Bayonne, 31060 Toulouse Cedex 03, France. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective April 22, 1988.

Issued in Seattle, Washington, on March 3, 1988.

Wayne J. Barlow,

Director, Northwest Mountain Region.

BILLING CODE 4910–13–M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 399

[Docket No. 80215–8015]

Removal of Validated License Controls on Jig Grinders Exported to Country Groups QWY

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Bureau of Export Administration maintains the Commodity Control List (CCL), which specifies those items subject to Department of Commerce export controls. This rule amends the validated export license controls on certain jig grinders described in Export Control Commodity Number (ECCN) 1091A on the CCL according to a finding of foreign availability under section 5(f) of the Export Administration Act of 1979, as amended. Jig grinders that can be equipped with numerical control units with 2 simultaneously coordinated axes, with positioning accuracies greater (coarser) than ±0.005 mm (0.00020 in.) for machines with a total length of axis travel equal to or less than 300 mm (12 in.) or ±(0.005 + (0.002 × ((L–300)/300))) mm (with L expressed in mm) [or 0.0002 + (0.000080 × ((L–12)/12)) in. (with L expressed in inches)] for machines with a total length of axis travel, L, greater than 300 mm (12 in.) no longer require a validated export license except to Country Groups S and Z.

Although technical control parameters were relaxed for certain jig grinders, this rule continues to maintain nuclear non-proliferation controls on these jig grinders and does not relax current nuclear controls to Western destinations. The Commodity Control List is amended to indicate that favorable consideration will be given to licenses to export jig grinders controlled solely for nuclear non-proliferation reasons to Country Groups Q, W, and Y, and the People's Republic of China. These jig grinders continue to be exported under General License G–DEST to countries listed in Supplement Nos. 2 and 3 to 15 CFR Part 373.

Notice of the foreign availability determination on this equipment was published on December 9, 1987 (52 FR 46634). Regulations that eliminated the validated license requirements for exports of this commodity to free world destinations were published on December 14, 1987 (52 FR 47388).

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTRACT: Larry Hall, Office of Technology and Policy Analysis, Department of Commerce, Washington, DC 20230, Telephone: (202) 377–8550.

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

1. Because this rule concerns a foreign and military affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has been or will be prepared.

2. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedures Act (APA) (5 U.S.C. 553) including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Section 13(b) of the EAA does not require that this rule be published as a proposed rule because this rule does not impose a new control. Further, no other law requires that a notice of proposed rulemaking and opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, as with other Department of Commerce rules, comments from the public are always welcome. Comments should be submitted to Joan Maguire, Office of Technology and Policy Analysis, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553), or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. This rule involves a collection of information subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). This collection has been approved by the Office of Management and Budget under control number 0625–0001.

5. This rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612.

List of Subjects in 15 CFR Part 399

Exports, Reporting and recordkeeping requirements.

Accordingly, Part 399 of the Export Administration Regulations (15 CFR Parts 368–399) is amended as follows:

PART 399—[AMENDED]

1. The authority citation for Part 399 continues to read as follows:

Authority: Pub. L. 96–72, 93 Stat. 503 (50 U.S.C. app. 2401 *et seq.*), as amended by Pub. L. 97–145 of December 29, 1981 and by Pub. L. 99–64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 95–223 of December 28, 1977 (50 U.S.C. 1701 *et seq.*); E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985) as affected by notice of September 4, 1986 (51 FR 31925, September 8, 1986); Pub. L. 99–440 of October 2, 1986 (22 U.S.C. 5001 *et seq.*); and E.O. 12571 of October 27, 1986 (51 FR 39505, October 29, 1986).

Supplement No. 1 to § 399.1—Commodity Control List [Amended]

2. In Supplement No. 1 to § 399.1 (the Commodity Control List), Commodity Group (Metal-Working Machinery), ECCN 1091A is amended by revising the *Validated License Required* and *Reason for Control* paragraphs to read as set forth below; by redesignating paragraph (b)(ii) as (b)(iii); by adding a new paragraph (b)(ii); and by revising the newly redesignated paragraph (b)(iii) introductory text to read as set forth below; and by adding a new Advisory Note 3 to the end of the entry to read as follows:

OL
53
ISS
47
MR
10
988
MI

1091A Numerical control units, numerically controlled machine tools, dimensional inspection machines, direct numerical control systems, specially designed sub-assemblies, and "specially designed software". (See § 376.11 for special information to include on the validated license application and reexport request.)

Controls for ECCN 1091A

* * * * *

Validated License Required: Country Groups QSTVWYZ. Jig grinders that meet the parameters of Advisory Note 3 can be exported under General License G-DEST to countries listed in Supplement No. 2 or 3 to 15 CFR Part 373.

* * * * *

Reason for Control: National security; nuclear non-proliferation, except exports to those countries listed in Supplement No. 2 or 3 to Part 373. Jig grinders that meet the parameters of Advisory Note 3 are controlled only for nuclear non-proliferation reasons.

* * * * *

List of Commodities Controlled by ECCN 1091A

* * * * *

(b) * * *

(ii) Jig grinders having all of the following characteristics:

(1) Overall positioning accuracy in any axis greater (coarser) than:

(A) ± 0.005 mm (0.0002 in.) for machines with a total length of axis travel equal to or less than 300 mm (12 in.), *or*

(B) ± (0.005 + (0.002 x ((L–300)/300))) mm (with L expressed in mm) [or 0.0002 + (0.000080 x ((L–12)/12)) in. (with L expressed in inches)] for machines with a total length of axis travel, L, greater than 300 mm (12 in.); and

(2) Not more than 2 simultaneously coordinated axes.

(iii) Machines tools (other than boring mills, milling machines, machining centers, and jig grinders, described in paragraphs (b)(i) and (ii) above) and dimensional inspection machines, having all of the following characteristics:

* * * * *

Advisory Note 3: Licenses are likely to be approved for export to satisfactory end-users in Country Groups QWY and the People's Republic of China for jig grinders covered under paragraph (b) above provided that the following conditions are met:

(a) Overall positioning accuracy in any axis equal to or greater (coarser) than:

(1) ± 0.002 mm (0.000080 in.) for jig grinders with a total length of axis travel equal to or less than 300 mm (12 in.); or

(2) ± (0.002 + (0.001/300) (L–300) mm for jig grinders with a total length of axis travel, L, greater than 300 mm (12 in.).

(b) Not more than 2 axes capable of simultaneously coordinated contouring motion.

Dated: March 2, 1988.

Dan Hoydysh,

Director, Office of Technology and Policy Analysis.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 882

[Docket No. R–88–1205; FR-1829]

Shared Housing in the Section 8 Existing Housing Certificate Program; Amendment to Final Rule; Correction

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule; correction.

SUMMARY: The Shared Housing final rule published in the **Federal Register** on February 16, 1988 (53 FR 4388) contained an erroneous date in the effective date section of the rule. The purpose of this rule is to correct that date.

EFFECTIVE DATE: March 28, 1988.

FOR FURTHER INFORMATION CONTACT: Susan Loritz, Existing Housing Division, Office of Multifamily Housing Programs, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–8000, telephone (202) 755–6887. (This is not a toll-free number.)

Accordingly, the effective date for the final rule on Shared Housing in the Section 8 Existing Housing Certificate Program that appeared in FR Doc. 88–3206, published in the **Federal Register** issue dated February 16, 1988 (53 FR 4388), the effective date section, third column, last sentence, is corrected to read as follows:

EFFECTIVE DATE: * * * Therefore the June 1986 rule as amended by this rule will become effective on March 28, 1988, a date by which the required waiting period for this rule will have expired.)

Dated: March 7, 1988.

Grady J. Norris,

Assistant General Counsel for Regulations.

BILLING CODE 4210-27-M

DEPARTMENT OF JUSTICE

28 CFR Part 16

[AAG/A Order No. 10–88]

Exemption of Records Systems Under the Privacy Act

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: The Department of Justice is exempting a Privacy Act system of records from subsections (c)(3) and (d) of the Privacy Act, 5 U.S.C. 552a. This system is the "Central Index File and Associated Records, JUSTICE/OSC–001." Records contained in this system relate to official Federal investigations and matters of law enforcement. The exemptions are needed to protect ongoing investigations, as well as the privacy of third parties and the identities of confidential sources involved in such investigations.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: J. Michael Clark, (202) 272–6474.

SUPPLEMENTARY INFORMATION: A proposed rule with invitation to comment was published in the **Federal Register** on December 21, 1987 (52 FR 48279). The public was given 30 days to comment. No comments were received.

Pursuant to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612, it is hereby stated that this order will not have "a significant economic impact on a substantial number of small entities."

List of Subjects in 28 CFR Part 16

Administrative practice and procedure, Courts, Freedom of information, Privacy and Sunshine Acts.

Pursuant to the authority vested in the Attorney General by 5 U.S.C. 552a and delegated to me by Attorney General Order No. 793–78, the Department amends 28 CFR Part 16 by adding § 16.78 as set forth below.

Dated: February 25, 1988.

Harry H. Flickinger,

Assistant Attorney General for Administration.

1. The authority for Part 16 continues to read as follows:

Authority: 28 U.S.C. 509, 510; 5 U.S.C. 301, 552, 552a; 31 U.S.C. 483a unless otherwise noted.

2. 28 CFR Part 16 is amended by adding § 16.78 to read as follows:

§ 16.78 Exemption of the Special Counsel for Immigration-Related, Unfair Employment Practices Systems.

(a) The following system of records is exempt from 5 U.S.C. 552a(c)(3) and (d).

(1) Central Index File and Associated Records, JUSTICE/OSC–001.

These exemptions apply to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a(k)(2).

(b) Exemptions from the particular subsections are justified for the following reasons:

(1) From subsection (c)(3) because the release of the disclosure accounting would permit the subject of an investigation to obtain valuable information concerning the nature of that investigation. This would permit record subjects to impede the investigation, e.g., destroy evidence, intimidate potential witnesses, or flee the area to avoid inquiries.

(2) From subsection (d) because access to the records might compromise ongoing investigations, reveal confidential informants, or constitute unwarranted invasions of the personal privacy of third parties who are involved in a certain investigation.

[FR Doc. 88–5224 Filed 3–9–88; 8:45 am]

BILLING CODE 4410-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 917

Approval of an Amendment to the Kentucky Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: The Director of OSMRE is announcing the approval of a proposed amendment submitted by the Commonwealth of Kentucky as a modification to its permanent regulatory program [hereinafter referred to as the Kentucky program] under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment revises the Kentucky blaster certification regulations.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. W. Hord Tipton, Director, Lexington Field Office, Office of Surface Mining Reclamation and Enforcement, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504; Telephone (606) 233–7327.

SUPPLEMENTARY INFORMATION:

I. Background on the Kentucky Program

The Kentucky program was conditionally approved by the Secretary of the Interior effective upon publication in the May 18, 1982 **Federal Register** (47 FR 21404–21435). Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Kentucky program can be found in the May 18, 1982 **Federal Register**. Other actions concerning the approval, the subsequent program amendments, and required amendments are identified at 30 CFR 917.13, 917.15, 917.16, and 917.17.

II. Submission of Proposed Amendment

On December 10, 1985, OSMRE published in the **Federal Register** (50 FR 50293) the approval of the Kentucky Administrative Regulations (KAR) at 405 KAR 7:070 concerning the blaster certification program. By letter dated June 17, 1987 (Administrative Record KY–739), Kentucky submitted to OSMRE an amendment to the Kentucky program that modified the existing procedures for certification of persons responsible for blasting operations incident to coal exploration and surface coal mining.

On July 13, 1987, OSMRE published a notice in the **Federal Register** (52 FR 26159–26160) announcing receipt of the proposed amendment and inviting comment on its adequacy. The public comment period ended August 12, 1987. The public hearing scheduled for August 7, 1987, was not held because no one requested an opportunity to testify.

On September 11, 1987 (Administrative Record KY–761), Kentucky submitted additional proposed modifications to 405 KAR 7:070. This new submittal supersedes the proposed amendment submitted on June 17, 1987.

The September 11, 1987 submittal is substantively the same as the June 17, 1987 submittal, with the following exceptions: The term "surface blasting operations" is now defined in section 1 of the regulations; the provisions that apply when information in certification applications is falsified or misrepresented have been revised in section 2(7)(b); the grace period for certification renewal has been extended in section 3(2)(b); the time period during which a blaster may contest a cited violation has been revised in section 4(2)(c)2; the provisions requiring that revoked, suspended, and invalid certificates be delivered by hand to the Department for Surface Mining Reclamation and Enforcement have been removed from sections 4(6)(d)2 and (7)(a); and several minor changes have been made to improve clarity of the regulations without altering the original intent.

On October 22, 1987, OSMRE published a notice in the **Federal Register** (52 FR 39540–39541) announcing receipt of the resubmitted amendment and soliciting public comment on its adequacy. The public comment period ended November 6, 1987.

III. Director's Findings

As submitted on June 17, 1987, and revised on September 11, 1987, the amendment to Kentucky's blaster certification regulations at 405 KAR 7:070 generally expands upon the provisions originally approved on December 10, 1985 (50 FR 50293). Kentucky noted that its experience in implementing those regulations revealed a need for revisions to clarify requirements, resolve implementation problems and remove obsolete, redundant or inefficient provisions.

The amendment reorganizes 405 KAR 7:070; elminates obsolete language pertaining to the original effective date of the regulations; and adds various specific administrative, procedural and application content requirements clarifying the vaguer general provisions originally approved. It includes numerous additional minor changes of an editional nature to improve clarity without altering the original intent of the regulations. As revised, the rules also apply to coal exploration operations, not just surface coal mining operations. Other new provisions include language explicitly granting the Natural Resources and Environmental Protection Cabinet ("the Cabinet") the authority to verify any information submitted in the application and to deny the application if the applicant cannot be expected to conduct himself or herself in a responsible manner. New section 7 requires blasters to notify the Cabinet of any changes in name, address, telephone number, or place of employment within 30 days of the change.

While the revisions discussed in the preceding paragraph lack direct Federal counterparts, none conflict with the Federal requirements for State blaster certification programs, as contained in

30 CFR Part 850. Nor do any of the revisions adversely affect the basis on which the Director approved Kentucky's blaster training, examination and certification program (50 FR 50293, December 10, 1985). Therefore, the Director finds that these revisions to 405 KAR 7:070 are not inconsistent with the requirements of SMCRA or the Federal regulations at 30 CFR Part 850.

In addition to the revisions discussed above, Kentucky has revised the definition of "blaster" at 405 KAR 7:070 Section 1(1)(a) to mean, in part, "a person who is directly responsible for surface blasting operations", rather than a person "directly responsible for the use of explosives" as in the previous rule and the corresponding Federal regulation at 30 CFR 850.5. However, at 405 KAR 7:070 Section 1(1)(b), Kentucky has added a definition of the term "surface blasting operations", which, among other things, includes the use of explosives. Therefore, the Director finds the Kentucky definitions of "blaster" and "surface blasting operations" to be no less effective than the Federal definition of "blaster".

IV. Public and Agency Comment

Federal Agency Comments

Pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(10)(i), comments were solicited from various Federal agencies. Only one set of substantive comments, from the Forest Supervisor of the Daniel Boone National Forest, was received. A summary of the comments and their disposition appears below:

1. The Supervisor stated that 405 KAR 7:070 section 2(6) should require that an applicant failing the examination complete an approved training course prior to retaking the examination. In response, the Director notes that this provision, which requires an applicant failing the examination once to wait 30 days before retaking it and an applicant failing the examination twice to repeat the entire training and application process, remains substantively unchanged from the previous rule, which was found to be consistent with all Federal requirements.

2. The Supervisor commented that a blaster should be able to appeal or request a formal hearing when his or her application for certification is denied. Although 405 KAR 7:070 section 2 (applications), unlike sections 3 (renewals) and 4 (suspension and revocation), does not expressly provide for appeal of a decision denying certification, the general administrative review provisions of 405 KAR 7:090 section 5 allow appeals of all Cabinet determinations. Denial of an application would be one such determination.

3. Finally, the Supervisor stated that the Cabinet should not have a delay issuance of an order to suspend certification under 405 KAR 7:070 section 4(2)(b) until an investigation determines whether a violation seems likely to occur or has occurred. The Director does not agree. The proposed rule at 405 KAR 7:070 section 4(2)(b) requires the Cabinet to immediately suspend the blaster's certification if further operations conducted by or under the direction of the blaster may reasonably be expected to constitute an imminent danger to the health and safety of the public or cause significant, imminent environmental harm. Although the rule does require the Cabinet to determine that the blaster is or has been in violation before suspending the certification, the Director finds this provision to be reasonable and in accordance with the corresponding Federal regulations at 30 CFR 850.15(b), which establish specific grounds on which the regulatory authority may, after making an appropriate finding, suspend or revoke a blaster's certificate. The grounds enumerated in the Federal rule are similar to the violations listed in the State rule. With respect to public protection, as noted, the State and Federal rules provide for expedited suspension procedures under certain circumstances. Where these would be insufficient to abate an imminent danger or threat of harm, the inspector has the authority, under other provisions of the Kentucky program, to order cessation of operations on specific sites as necessary.

Public Comments

OSMRE solicited public comment on the proposed amendment in the July 13, 1987 **Federal Register** (51 FR 26159–26160) with the comment period closing on August 12, 1987. Since no one requested an opportunity to testify, the public hearing scheduled for August 7, 1987, was canceled. Upon receipt of a revised version of the amendment (September 11, 1987), OSMRE reopened the comment period until November 6, 1987 (52 FR 39540–39541, October 22, 1987).

One set of comments was received, from Thomas J. FitzGerald on behalf of the Kentucky Resources Council. Mr. FitzGerald stated that the amendment fails to provide for imposition of civil penalties for violations of the certification requirements or substantive violations of performance standards, and thus is less effective than the Federal rule at 30 CFR 955.17. The Director does not agree. Section 5 of 405 KAR 12:010 states that any person who violates any provision of Title 405, Chapters 7 through 24, or who fails to perform the duties imposed by such provisions, or who fails to comply with an order or determination of the Cabinet pursuant to such provisions shall be subject to civil and criminal penalties. The amendment under consideration is a part of Chapter 7 and thus would be covered by these provisions.

Furthermore, the Federal standards for State blaster certification programs, as set forth at 30 CFR Part 850, contain no specific civil penalty provisions. The Federal rule referenced by the commenter, 30 CFR 955.17, applies only to Federal programs. Therefore, the Kentucky rule as amended is no less effective than the applicable Federal rules.

V. Director's Decision

Based on the above findings, the Director is approving the proposed amendment to 405 KAR 7:070, as submitted on June 17, 1987, and modified on September 11, 1987. The Federal rules at 30 CFR Part 917 are being amended to implement the Director's decision. This final rule is being made effective immediately to expedite the State program amendment process and encourage States to conform their programs to the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

VI. Procedural Determinations

1. Compliance With the National Environmental Policy Act

The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Compliance With Executive Order 12291

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a regulatory impact analysis and regulatory review by OMB.

3. Compliance With the Regulatory Flexibility Act

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

4. Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 917

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Date: March 3, 1988.

James W. Workman,

Deputy Director, Operations and Technical Services.

For the reasons set out in the preamble, Title 30, Chapter VII, Subchapter T of the Code of Federal Regulations is amended as set forth below.

PART 917—KENTUCKY

1. The authority citation for Part 917 is revised to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. In § 917.15, the heading is revised, paragraph (y) is redesignated as paragraph (x), and a new paragraph (y) is added to read as follows:

§ 917.15 Approval of regulatory program amendments.

* * * * *

(y) The following amendment to the Kentucky Administrative Regulations (KAR) as submitted to OSMRE on June 17, 1987, and modified on September 11, 1987, is approved effective March 10, 1988: Revisions to 405 KAR 7:070 concerning blaster certification requirements and procedures.

BILLING CODE 4310-05-M

---

30 CFR Part 935

Removal of Requirement To Amend the Ohio Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing the removal of a requirement that the State of Ohio amend its permanent regulatory program (hereinafter referred to as the Ohio program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment as formerly required by 30 CFR 935.16(c) pertained to performance bond replacement following the incapacity of a bank or surety company.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Ms. Nina Rose Hatfield, Director, Columbus Field Office, Office of Surface Mining Reclamation and Enforcement, Room 202, 2242 South Hamilton Road, Columbus, Ohio 43232; Telephone: (614) 866–0578.

SUPPLEMENTARY INFORMATION:

I. Background on the Ohio Program

The Ohio program took effect on August 16, 1982, following the conditional approval of the Secretary of the Interior. Information pertinent to the general background, revisions, modifications, and amendments to the Ohio program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Ohio program can be found in the August 10, 1982 **Federal Register** (47 FR 34688). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 935.11, 935.12, 935.15, and 935.16.

II. Background on the Required Amendment

By letter dated December 1, 1986 (Administrative Record Number OH–0799), the Ohio Department of Natural Resources, Division of Reclamation, proposed to amend several provisions of Ohio Administrative Code (OAC) section 1501:13–7–03. On June 19, 1987 (52 FR 23265), the Director approved these portions of the proposed revisions to OAC 1501:13–7–03(B)(5)(g) and 1501:13–7–03(B)(7)(h) which extend from sixty to ninety days the period an operator losing surety or collateral bond coverage has to obtain replacement coverage. However, the Director disapproved that portion of proposed OAC 1501:13–7–03(B)(5)(g) which would have allowed operators to continue to mine an additional ninety days beyond the initial ninety days without replacing the bond in full. The Director also added a new paragraph (c) to 30 CFR 935.16 requiring Ohio to amend its program to reflect the disapproval by disallowing continued mining without adequate bond coverage.

On January 16, 1987 (Administrative Record Number OH–0887), Ohio submitted an amendment revising numerous State regulations, including OAC 1501:13–7–03(B)(5)(g). As revised, the State rule requires that operators who lose their bond coverage cease coal extraction and begin permanent reclamation operations immediately upon expiration of the time allowed for bond replacement, which is not to exceed ninety days.

As stated in the **Federal Register** notice approving this amendment (52 FR 216959, July 17, 1987), the Director found this provision to be similar to and therefore no less effective than the corresponding Federal regulations at 30 CFR 800.16(e)(2). Therefore, on December 7, 1987, the Director announced his intention to remove the requirement that Ohio amend its program in accordance with the provisions of 30 CFR 935.16(c). In the same notice, he requested public comment on the appropriateness of this action (52 FR 46379, December 7, 1987).

III. Public Comment

The public comment period announced in the December 7, 1987 **Federal Register** ended January 6, 1988. No comments were received. The public hearing scheduled for January 4, 1988, was not held since no person requested an opportunity to testify at the hearing.

Pursuant to 30 CFR 732.17(h)(1)(i) and section 503(b) of SMCRA, comments were also solicited from various Federal agencies. No comments were received.

IV. Director's Findings and Decision

Imposition of the required program amendment at 30 CFR 935.16(c) and the partial disapproval of OAC 1501:13–7–03(B)(5)(g) at 30 CFR 935.12(b) were both based on the failure of the December 1, 1986 version of this State rule to require bond coverage in a manner no less effective than that specified in 30 CFR 800.16(e)(2). As discussed in the portion of this notice entitled "Background on the Required Amendment", on July 17, 1987, the Director found OAC 1501:13–7–03(B)(5)(g), as submitted in revised form on January 16, 1987, to be no less effective than the corresponding Federal regulations at 30 CFR 800.16(e)(2).

Therefore, the Director finds that Ohio has met the requirements of 30 CFR 935.16(c). Based on this finding, the Director is amending 30 CFR Part 935 to remove paragraph (c) of § 935.16 and paragraph (b) of § 935.12.

This final rule is being made effective immediately to expedite the State program amendment process and to encourage States to conform their programs with the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

V. Procedural Determinations

1. Compliance with the National Environmental Policy Act

The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C., 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Compliance with Executive Order No. 12291

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

3. Compliance with the Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

4. Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 161

[CGD 86-082a]

Identification of the Horizontal Datum Referenced in the Coast Guard Regulations

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The purpose of this final rule is to inform the public that due to the ability to establish global reference systems that provide more accurate geographic positions (latitude and longitude), the horizontal datums referenced on maps and charts are being revised and during the interim, various horizontal datums may be encountered. The geographic positions listed in the regulations in Title 33 Part 161 are referenced to various horizontal datums such as the North American Datum of 1927, U.S. Standard Datum, and others; however, the datum is not identified in the regulation. The National Oceanic and Atmospheric Administration (NOAA) has identified the North American Datum of 1983 (NAD 83) to replace the various horizontal datums currently in use. This rulemaking inserts cautionary reminders that during the conversion there may be discrepancies between the positions described in the existing regulations and the charted positions.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Frank Parker, (202) 267-0357.

SUPPLEMENTARY INFORMATION: A final rule was previously published for this regulation (33 FR 33809; September 8, 1987); however, one section was inadvertently omitted. This rulemaking is being made effective in less than 30 days. This rulemaking does not substantively change the existing regulations. It merely provides a means of identifying when geographic positions are referenced to NAD 83. Therefore, the Coast Guard finds that an opportunity for notice and comment is unnecessary under 5 U.S.C. 553(b)(B). Because of the different datums referenced on the many maps and charts that are produced, and in view of the necessity for individuals to be able to identify the horizontal datum referenced in the published geographic positions, it has been determined that good cause exists under 5 U.S.C. 553(d)(3) to make this rule effective in less than 30 days.

Drafting Information

The principle persons involved in drafting this rulemaking are Mr. Frank Parker, Project Manager, and Mrs. Christena Green, Project Attorney, Office of the Chief Counsel.

Discussion of the Regulation

Through the use of satellites and other modern surveying techniques, it is now possible to establish global reference systems which provide more accurate geographic positions. Currently, several datums such as the North American Datum of 1927, U.S. Standard Datum, and others are in use. The National Oceanic and Atmospheric Administration (NOAA) has identified the North American Datum of 1983 (NAD 83) to replace the various datums used in the past on maps and charts. NOAA has begun converting geographic positions to NAD 83. Over time, all maps and charts will reference NAD 83, except for nautical charts of the Pacific Territory Islands, which will be compiled on World Geodetic System 1984 (WGS 84). For the accuracy required for charting purposes, geographic positions referenced to WGS 84 are essentially equivalent to the geographic positions referenced to NAD 83. The entire conversion is expected to be accomplished over a ten-year period.

During the period of conversion, some maps and charts will be referenced to the new NAD 83, while others will still be referenced to the former datums, such as the North American Datum of 1927, U.S. Standard Datum, and others. Corrections must be made to the geographic positions from the previous referenced datum to NAD 83. As a result of applying these corrections the geographic position descriptions will change; however, the location of objects in relation to surrounding land does not change.

The regulations in Title 33, Part 161 are being amended to include a notice that indicates when the datums of the geographic positions in these regulations are referenced to NAD 83.

Evaluation

This final rule is considered to be non-major under Executive Order 12291 and non-significant under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this final rule has been found to be so minimal that further evaluation is

unnecessary. This rule is merely adding information to clarify the existing regulations. This final rule will not have a quantifiable cost impact. Since the impact of this final rule is expected to be minimal, the Coast Guard certifies that it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 161

Vessel traffic management.

For reasons set out in the preamble, Title 33, Chapter I, Part 161 of the Code of Federal Regulations, is amended as set forth below.

PART 161—[AMENDED]

1. The authority citation for Part 161 continues to read as follows:

Authority: 33 U.S.C. 1231; 49 CFR 1.46.

2. Section 161.301(d) is added to read as follows:

§ 161.301 Purpose and applicability.

* * * * *

(d) Geographic coordinates expressed in terms of latitude or longitude, or both, are not intended for plotting on maps or charts whose referenced horizontal datum is the North American Datum of 1983 (NAD 83), unless such geographic coordinates are expressly labeled NAD 83. Geographic coordinates without the NAD 83 reference may be plotted on maps or charts referenced to NAD 83 only after application of the appropriate corrections that are published on the particular map or chart being used.

* * * * *

Dated: March 7, 1988.

Martin H. Daniell,

Rear Admiral, U.S. Coast Guard Chief, Office of Navigation.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[PP 8F3579/R942; FRL-3339-2]

Pseudomonas fluorescens EG-1053; Exemption From the Requirement of a Tolerance

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rule establishes an exemption from the requirement for a tolerance for residues of the biofungicide *Pseudomonas fluorescens* EG-1053 in or on cottonseed and cotton forage. This exemption was requested by Ecogen, Inc., Langhorne, PA 19047-1810. This rule will expire on March 2, 1990.

DATE: Effective on March 2, 1988.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: By mail: Lois Rossi, Product Manager 21, Registration Division (TS-767C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 227, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-1900.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of December 16, 1987 (52 FR 47754), which announced that Ecogen, Inc., 2005 Cabot Blvd. West, Langhorne, PA 19047-1810, had submitted pesticide petition (PP) 8F3579 to EPA, proposing to amend 40 CFR Part 180 by establishing a regulation to exempt from the requirement of a tolerance the residues of the biolfungicide *Pseudomonas fluorescens* EG-1053 in or on the raw agricultural commodity cotton. In the **Federal Register** of February 24, 1988 (53 FR 5458), it was announced that Ecogen, Inc., had amended PP 8F3579 to replace cotton specifically with cottonseed and cotton forage for exemption from the requirement of a tolerance. Ecogen's strain of the bacterium *Pseudomonas fluorescens* was isolated from soil in Mississippi and has not been genetically altered. This microorganism is a natural soil isolate and has not been altered or improved. Microorganisms known as *Pseudomonas fluorescens* constitute a rather diverse complement of bacteria that occur in both soil and aquatic habitats. They can be isolated from these sources using enrichment with appropriate media. The proposed use of the biofungicide is for control of the *Pythium/Rhizoctonia* seedling disease complex of cotton.

The data submitted in the petition and all other relevant material have been evaluated. The toxicological data considered in support of the exemption from the requirement of a tolerance include an acute oral toxicity/pathogenicity study in the rat, an acute dermal toxicity study in the rabbit, an acute pulmonary toxicity/pathogenicity study in the rat, acute intravenous toxicity/pathogenicity study in the mouse, primary eye irritation study in the rabbit, and hypersensitivity study in the guinea pig. These studies were performed on the active ingredient and the end-use product Dagger™. A review of these studies indicates that the biofungicide was not toxic to test animals when administered via the oral, dermal, or pulmonary routes. The active ingredient, *P. fluorescens* EG-1053, was not infective or pathogenic for test animals when administered via the oral, pulmonary, or intravenous route. The end-use product Dagger™ G biofungicide did not elicit a delayed type of hypersensitivity reaction in guinea pigs. The end-use product was mildly irritating to the eye. All the toxicity studies submitted are considered acceptable. The toxicity data provided are sufficient to show that there are no foreseeable human or domestic health hazards likely to arise from use of the biofungicide on cotton.

As a condition of registration, the Agency is requiring Ecogen, Inc., to perform further taxonomic characterization of its *P. fluorescens* strain, so that placement to the level of biovar can be made. As part of the characterization, a growth curve that establishes the upper temperature limits for growth of the *P. fluorescens* strain also must be done. It is reported by Ecogen, Inc., that *Pseudomonas fluorescens* is a ubiquitous soil bacterium, and it is reasonable to assume that most people are exposed daily to this organism.

P. fluorescens has been associated with disease in fish. In most cases, identification was confidently established at the genus level, but identification to the species level was accomplished in only about half of the cases. The Agency is not aware of disease occurrence with *Pseudomonas* in aquatic invertebrates.

Avian testing on the active ingredient, *P. fluorescens* EG-1053, by both the oral and injection route showed no adverse effects at levels of 6.9×10^6 and 4.8×10^6 colony-forming units per bird. The Agency believes that there will not be any adverse effects to avian species through the use of *P. fluorescens* EG-1053 on cotton. Also, intravenous injection studies using mice show no pathogenic or toxic signs attributable to *P. fluorescens* EG-1053. Therefore, the Agency believes that the use of this product will not cause adverse effects to feral mammals. Since the use is an in-furrow treatment to be applied at planting time, no insects are expected to be exposed to the active ingredient. Therefore, the Agency does not expect any adverse effects on beneficial insects. Testing in nontarget plants showed that, in most cases, the active ingredient caused an increase in growth after germination. The exceptions were cabbage, which showed a significant decrease in seedling height, and lettuce, which showed a significant decrease in fresh weight at the end of 4 weeks. No phytotoxic effects were seen in any of the species tested. The submitted ecological effects data indicate that, in general, *P. fluorescens* EG–1053 should not pose a threat to most plants. There is a possibility that some crop species may be affected. The Agency does not feel that there will be a "may effect" situation for endangered terrestrial wildlife, insects, or plants thorugh the use of *P. fluorescens* EG–1053 on cotton. No "may effect" determination can be made for endangered fish until an acceptable fish study is submitted.

Because of the inability to predict with some measure of confidence the number of bacteria reaching aquatic ecosystems from terrestrial applications and what will occur once they reach the ecosystem, the effect on aquatic organisms that may be affected by *P. fluorescens* EG–1053 must be tested. The Agency is requiring the registrant to submit within 9–12 months of conditional registration, the following studies:

1. Freshwater fish testing (154–19).
2. Freshwater aquatic invertebrate testing (154–20).
3. Target area phytotoxicity tests (2) (121–1). The previously submitted tests may be upgraded to core if the percent of active ingredient is reported and the test microorganism is confirmed as the same one being proposed for registration.
4. Seedling germination/vegetative vigor (Tier I) (122–1).
5. Seedling germination/vegetative vigor (Tier II).

Until these studies are completed, the granting of an exemption from the requirement of a tolerance would be in the public interest because of the beneficial role of this biofungicide in or on cotton. This rule will expire on March 2, 1990. Based on the review of the new data, the Agency will consider extending the rule.

Acceptable daily intake (ADI) and maximum permissible intake (MPI) considerations are not relevant to this petition. No enforcement actions are expected. Therefore, the requirement for an analytical method for enforcement purposes is not applicable to this exemption request. This is the first exemption from the requirement of a tolerance for this biofungicide.

Pseudomonas fluorescens EG–1053 is considered useful for the purpose for which the exemption from the requirement of a tolerance is sought. Based on the information considered, the Agency concludes that establishment of the exemption will protect the public health. Therefore, the regulation is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objection. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recordkeeping and reporting requirements.

Therefore, 40 CFR Part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. New § 180.1088 is added to read as follows:

§ 180.1088 *Pseudomonas fluorescens* EG-1053; exemption from the requirement of tolerance.

An exemption from the requirement of a tolerance is established for residues of the biofungicide *Pseudomonas fluorescens* EG–1053 in or on cottonseed and cotton forage. This rule will expire on March 2, 1990.

Dated: March 2, 1988.

Douglas D. Campt,

Director, Office of Pesticide Programs.

[FRL-3339-]

Standards Applicable to Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities; Closure/Post-Closure and Financial Responsibility Requirements

AGENCY: Environmental Protection Agency.

ACTION: Final rule; correction.

SUMMARY: This notice corrects errors in the preamble discussion of a final rule for hazardous waste management facility closure requirements that appeared in the **Federal Register** on Friday, May 2, 1986 (51 FR 16422). Certain provisions of the May 2 rule were erroneously described as less stringent than the previous Federal program. The correct characterization of these provisions is now being provided.

FOR FURTHER INFORMATION CONTACT: The RCRA/Superfund Hotline at (800) 424–9346 (toll free) or (202) 382–3000 in Washington, DC or Marty Madison, Office of Solid Waste (WH-563B), U.S. Environmental Protection Agency, Washington, DC 20460, (202) 382–2229.

SUPPLEMENTARY INFORMATION: On March 19, 1985, the Environmental Protection Agency (EPA) proposed to amend portions of the closure and post-closure care and financial responsibility requirements applicable to owners and operators of hazardous waste treatment, storage and disposal facilities (TSDFs) under the Resource Conservation and Recovery Act (RCRA). See 50 FR 11068. On May 2, 1986, EPA promulgated these amendments in final form. See 51 FR 16422.

In the preamble accompanying the May 2 rule, the section entitled "Effect Upon State Authorization", 51 FR 16442, indicated that certain of the newly promulgated requirements were considered to be less stringent than or to reduce the scope of the previous Federal requirements. Authorized States must revise their programs to adopt provisions equivalent to or more stringent then Federal requirements. Authorized States are not required to revise their programs to be equivalent to less stringent provisions.

Upon subsequent review of the May 2 requirements, however, EPA has recognized that certain sections or subsections of the rule were mischaracterized in the premable as less stringent than the previous Federal closure and post-closure standards in Parts 264 and 265. These sections are, in fact, more stringent standards. Thus,

they should not have been included on the list of less stringent sections provided in the preamble at 51 FR 16442.

If a section was characterized as less stringent, but was divided into subsections, some more and some less stringent, only the subsections that should have been identified as more stringent will be recharacterized. However, if a section was not divided into subsections, but contained both more and less stringent parts, the entire section will be recharacterized as more stringent.

The following sections and subsections previously and erroneously characterized as less stringent should have been classified as more stringent: 264.115, 264.118(a), 264.143(a)(10), 264.143(b)(4)(ii), 264.143(c)(5), 264.143(d)(8), 264.143(e)(5), 264.145(a)(11), 264.145(b)(4)(ii), 264.145(c)(5), 264.145(d)(9), 264.145(e)(5), 265.112(d)(1), 265.115, 265.118(a), 265.118(e), 265.118(f), 265.143(a)(10), 265.143(b)(4)(ii), 265.143(c)(8), 265.143(d)(5), 265.145(a)(11), 265.145(b)(4)(ii), 265.145(c)(9) and 265.145(d)(5).

States which have not yet modified their regulations for this May 2, 1986 final rule must do so on the basis of today's correction. States which have already modified their regulations to conform to the May 2, 1986 final rule but have chosen to omit the sections erroneously characterized as less stringent, will have to make further program modifications. This correction notice does not alter the time provided for States to revise their programs to reflect the Federal program, including the sections identified today as more stringent. 40 CFR 271.21(e) (51 FR 33722, September 22, 1986) provides for extensions of time at the discretion of the Regional Administrator for States to adopt changes to their regulations and/or statutes to conform to changes in the Federal program.

Application of these extensions to the May 2, 1986 final rule would allow the States until January 1, 1989 to make the appropriate modifications to their program envisioned by this correction notice. In regard to States that have already modified their regulations but have chosen to omit the erroneously characterized sections, the Regional Administrator may grant these extensions where appropriate. In addition, if these recharacterized sections are unable to be adopted by January 1, 1989, the Regional Administrator may further extend the deadlines, taking into account the State's regulatory and/or legislative procedures.

Dated: March 4, 1988.

J.W. McGraw,

Acting Assistant Administrator for Office of Solid Waste and Emergency Response.

The following correction is made in the preamble for [SWH–FRL2891–9] (FR Doc. 86–6368), Standards Applicable to Owners and Operators of Hazardous Waste Treatment, Storage and Disposal Facilities; Closure/Post-Closure and Financial Responsibility Requirements published in the **Federal Register** issue of May 2, 1986 (51 FR 16422).

On page 16442, column three, the third full paragraph, the list of sections containing provisions that are considered less stringent than or a reduction in the scope of the previous Federal requirements is corrected to read as follows: "Those provisions appear in Sections: 264.112(a)(2), 264.112(b)(7), 264.112(d)(1), 264.112(e), 264.113(a), 265.112(a), 265.112(b)(7), 265.112(e), and 265.113(a)."

BILLING CODE 6560-50-M

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

41 CFR Part 50–201

General Regulations Under the Walsh-Healey Public Contract Act

AGENCY: Wage and Hour Division, Employment Standards Administration, Labor.

ACTION: Final rule.

SUMMARY: The Department of Labor (DOL) is revising the regulatory provisions regarding the involvement of the Small Business Administration (SBA) in the administrative procedures for determining whether a small business concern qualifies for award of Government supply contracts as either a "manufacturer" or "regular dealer," to whom the award of covered contracts is restricted by the Walsh-Healey Public Contracts Act (PCA). SBA requested revisions to the regulations which would eliminate the provision for SBA to render PCA eligibility determinations in protest cases in which the contracting officer has found a small business bidder to be eligible under the PCA. Additional revisions will streamline the processing of eligibility determination cases between the contracting agencies, SBA, and the DOL and help speed up procurement activities in certain instances.

EFFECTIVE DATE: May 9, 1988.

FOR FURTHER INFORMATION CONTACT: Paula V. Smith, Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Room S–3502, 200 Constitution Avenue, NW., Washington, DC 20210, Telephone: (202) 523–8305. (This is not a toll free number.)

SUPPLEMENTARY INFORMATION: On March 13, 1987, the Department of Labor (DOL) published in the **Federal Register** (52 FR 7892) proposed changes to 41 CFR 50–201.101(b), containing the administrative procedures to be followed by contracting agencies, SBA, and DOL in determining the eligibility status of business concerns as either "manufacturers" or "regular dealers," as required for award of Government contracts subject to the PCA. Persons interested in the rulemaking were allowed 60 days to submit comments. Four comments were received from Federal agencies. This document provides the text of the final rule and explains any changes from the proposal that were made in response to the comments received.

Background

The PCA provides labor standards for employee working on Federal contracts in excess of $10,000 calling for the manufacturer or furnishing of materials, supplies, articles or equipment. Section 1(a) of the PCA provides that contracts subject to the Act may only be awarded to a manufacturer of or a regular dealer in the materials, supplies, articles, or equipment to be manufactured or used in the performance of the contract. Contracting agencies must determine in the first instance whether a bidder in line for contract award qualified for award according to criteria in DOL regulations (41 CFR Parts 50–201 and 50–206). Such agency determinations are subject to review by DOL. In cases involving small businesses, the Small Business Act, as amended, however, empowers the SBA to overturn, on review, a contracting agency's finding of ineligibility and to certify a small business to be eligible to perform a particular government contract.

As set forth in 41 CFR 50–201.101(b), the present procedures for small businesses require SBA review of all contracting agency findings of ineligibility, as well as all protests which challenge an agency's finding of eligibility. SBA requested revisions to the existing regulations which would eliminate SBA review under the following circumstances: (1) Competitor protest cases which challenge the contracting officer's determination, after review of the protest, that a small business firm is eligible under PCA; (2) Cases involving contracts awarded by agencies which are not subject to the Small Business Act because they are outside the Executive Branch (e.g., contracts with the U.S. Postal Service and District of Columbia Government); and (3) Cases where either the contracting officer or SBA has found that the firm is to be denied award for procurement reasons other than a finding of ineligibility under PCA (e.g., determination of "non-responsibility" where SBA has declined to issue a Certificate of Competency).

SBA also requested revisions to provide that if a firm did not contest the initial finding of ineligibility and submitted no information on its own behalf to SBA, such ineligibility determination would become final and would not be referred by SBA to DOL. However, it was determined upon review that since the language of section 8(b)(7)(B) of the Small Business Act mandates that SBA forward such cases to the Secretary of Labor for final disposition, this part of SBA's request was precluded by law and could not, therefore, be adopted by regulation.

Summary of Comments

SBA suggested that the reference in the proposal to "Administrator of the Small Business Administration" be changed to reflect SBA's current regional operating structure, under which questions as to a small business concern's eligibility are currently referred to the appropriate regional office of SBA for the location of the affected business concern. The regulation will be revised in appropriate places to add "authorized representative," to address SBA's suggestion.

The Defense Logistics Agency (DLA) recommended changes to proposed § 50–201.101(b)(6), pertaining to the award of contracts under emergency conditions prior to receiving an eligibility determination. The proposed section provided that contract awards would be held in abeyance until a final determination is rendered in those cases subject to SBA review. DLA suggested that, in order to be consistent with a pending change in the governmentwide Federal Acquisition Regulation (48 CFR 22.608–4; FAR Case 84–53), award should be held in abeyance in such cases until the contracting officer receives a determination of eligibility from SBA, or notification that SBA has forwarded the case to DOL for review. This would allow SBA the appropriate opportunity for review as provided in the Small Business Act (15 U.S.C. 637(b)(7)(B)), yet not indefinitely delay the award unnecessarily in cases of exigency, where the items are urgently required or a failure to make the award promptly would create substantial hardship for the Government. DLA's suggestion is a constructive one, and it will be adopted.

The General Services Administration (GSA) recommended that the effective date of the final rule be delayed sufficiently to allow the Federal Acquisition Regulation to be modified to conform to this rule, and thus avoid confusion that might be created from conflicting rules. For this reason, the effective date of this rule will be delayed for sixty days following the date of publication in the **Federal Register**, until May 9, 1988.

Although no change was proposed in the regulation concerning the circumstances in which agencies must investigate and affirmatively determine the Walsh-Healey eligibility status of a bidder, GSA recommended that more weight be placed on the self-certification of the offeror in determining eligibility. GSA suggested deleting subparagraph (b)(2)(i), which precludes reliance on the representation of a bidder if that bidder is in line for award and has not previously been awarded a contract subject to the Act by the individual procuring office, and/or if a pre-award investigation or survey of the bidder's operations is otherwise being made to determine the bidder's technical and production capability, plant facilities and equipment, and subcontracting and labor resources.

The language of the Act and its legislative history makes clear Congress' intent that covered contracts are to be awarded only to contractors who are currently capable of qualifying for award under the Act as a bona fide manufacturer or a bona fide regular dealer. If the legislative purposes are to be effectively achieved, the contracting agency must obtain and consider evidence which affirmatively shows that the eligibility standards are, in fact, presently met prior to any award of a contract subject to the Act. To permit otherwise would serve to encourage the very abuses which Congress sought to eliminate. Moreover, there is no adequate remedy available to correct the error after the fact, other than disrupting the procurement, if a firm that is not eligible under PCA is incorrectly awarded a contract subject to the Act. The only possible recourse is for the Government to exercise its right to terminate the contract and enter into other contracts or make open market purchases, as provided in 41 CFR 50–201.101(a)(3)(i)(B), when a bidder does not act in good faith and misrepresents its PCA eligibility status.

For these reasons, the existing regulations have long provided that a bidder's mere representation or affirmation that it qualifies under the Act is insufficient (*see* 41 CFR 50–206.51(d)), and, further, that a bidder's eligibility status on a previous PCA contract or its performance as a subcontactor on PCA contracts are not determinative of the bidder's present eligibility status (*see* 41 CFR 50–206.51(g)). On balance, when viewed in the context of the Act's legislative intent, the Department does not believe that sufficient justification has been presented to warrant deleting, as GSA proposes, the longstanding criteria in 41 CFR 50–201.101(b)(2)(i) for when to conduct preaward investigations of a bidder's PCA qualifications. Accordingly, the current policies will be maintained.

Classification—Executive Order 12291

This rule is procedural in character. It is not classified as a "major rule" under Executive Order 12291 on Federal Regulation because it is not likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, no regulatory impact analysis is required.

Final Regulatory Flexibility Analysis

In accordance with the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, the Department included an Initial Regulatory Flexibility Analysis in its Notice of Proposed Rulemaking published on March 13, 1987 (52 FR 7893). That analysis concluded that the revised rule would not, if adopted, have a "significant economic impact on a substantial number of small entities" within the meaning of the Regulatory Flexibility Act. No comments were received on any aspect of this analysis. Accordingly, the Initial Analysis is being adopted as the Final Regulatory Flexibility Analysis, without change. Members of the public may obtain copies of the analysis from the **Federal Register** of March 13, 1987 (52 FR 7893–94), or by contacting the Wage and Hour Division at the address and telephone

number listed above under **FOR FURTHER INFORMATION CONTACT**.

Paperwork Reduction Act

This rule is not subject to section 3504(h) of the Paperwork Reduction Act, 44 U.S.C. 3504(h), since it does not involve the collection of information from the public.

This document was prepared under the direction and control of Paula V. Smith, Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor.

List of Subjects in 41 CFR Part 50–201

Administrative practice and procedure, Child labor, Government contracts, Government procurement, Minimum wages, Penalties, Reporting and recordkeeping requirements, Wages.

Accordingly, for the reasons set out in the preamble, 41 CFR 50–201.101(b) is revised as set forth below.

Signed at Washington, DC, this 4th day of March 1988.

Fred W. Alvarez,

Assistant Secretary for Employment Standards.

Paula V. Smith,

Administrator, Wage and Hour Division.

41 CFR Part 50–201 is amended as follows:

PART 50–201—GENERAL REGULATIONS

1. The authority citation for Part 50–201 continues to read as follows:

Authority: Sec. 4, 49 Stat. 2038; 41 U.S.C. 38. Interpret or apply sec. 6, 49 Stat. 2036, as amended; 41 U.S.C. 40.

2. In § 50–201.101, paragraph (b) is revised to read as follows:

§ 50–201.101 Manufacturer or regular dealer.

* * * * *

(b) *Determination of eligibility.* (1) The responsibility for applying the stated eligibility requirements to determine before award whether a bidder qualifies as a manufacturer or regular dealer rests in the first instance with the contracting agency pursuant to authority delegated by the Secretary of Labor in accordance with section 4 of the Act. (Circular Letter 8–61.) Contracting agencies shall obtain and consider all available factual evidence essential to eligibility determinations for all bidders in line for award of contracts subject to the Act. Any decision of the contracting agency is subject to review by the Department of Labor according to the procedures outlined below. The Department of Labor shall give great weight to the technical knowledge and expertise of the contracting agencies and shall uphold the contracting agencies' initial determinations unless the determinations are found to be arbitrary, capricious or otherwise not in accordance with the evidence presented or with the law. The decision of the Department of Labor shall be final with respect to the procurement or procurements at issue. The Department of Labor may determine the qualifications of a bidder in the first instance in the absence of any decision by the contracting agency.

(2) The contracting agency shall investigate and determine the Walsh Healey eligibility status of a bidder and shall not merely rely on the representation or affirmation of a bidder in at least the following circumstances:

(i) Where the bidder (or bidders) in line for contract award has not previously been awarded a contract subject to the Act by the individual procuring office and/or where a preaward investigation or survey of such bidder's operations is otherwise made to determine the technical and production capability, plant facilities and equipment, subcontracting and labor resources of such bidder (or bidders).

(ii) Where there is a protest of a bidder's eligibility; and

(iii) Where a contracting officer has reason to question a bidder's eligibility, such as where the proposed place of contract performance and shipment is other than the location of the bidder's place of business.

(3) If the contracting officer determines that an apparently successful bidder or offeror that is *not* a small business concern is ineligible, the contracting officer shall (i) promptly notify the bidder or offeror in writing that:

(A) It does not meet the eligibility requirements, and the specific reason therefor; and

(B) It may protest such determination by submitting any evidence concerning its eligibility to the contracting officer within a reasonable time as set by the contracting officer.

(ii) If, after review of the evidence submitted by the bidder or offeror, the contracting officer does not reverse the decision, the contracting officer shall notify the bidder or offeror of the determination and the reasons therefor.

(iii) If the bidder or offeror still disagrees with the finding, the bidder's or offeror's protest, together with all pertinent evidence, will be forwarded to the Administrator of the Wage and Hour Division of the Department of Labor for a final determination, and the bidder or offeror will be so notified.

(iv) If a bidder has been conclusively denied award for procurement reasons other than a finding of ineligibility under the Walsh-Healey Act (e.g., a finding of nonresponsibility), the Walsh-Healey eligibility status becomes moot and the case need not be processed further, regardless of whether the contracting officer rendered an initial finding of ineligibility under Walsh-Healey.

(4) In the case of a small business concern, the notification and protest procedures in paragraph (b)(3) of this section, shall be followed except that any finding of ineligibility rendered by an agency of the executive branch subject to the requirements of the Small Business Act (15 U.S.C. 637c.) shall be forwarded with all pertinent evidence to the Administrator of the Small Business Administration, or authorized representative, whether or not the small business concern protests the determination, and the bidder or offeror shall be so notified. The Administrator of the Small Business Administration, or authorized representative, shall review the finding of the contracting officer and shall either dismiss it and certify the small business concern to be eligible for the contract award in question, or if it concurs in the finding, forward the matter to the Administrator of the Wage and Hour Division for a final determination, in which case the Small Business Administration may certify the small business concern only if the Wage and Hour Division finds the small business concern to be eligible. The Small Business Administration is bound by the regulations and interpretations of the Department of Labor in making its determinations of eligibility under the Walsh-Healey Act.

(5) When another bidder or offeror challenges the eligibility of the apparently successful bidder or offeror prior to award, the contracting officer shall promptly notify the protestor and the apparently successful bidder or offeror in writing that:

(i) They may submit evidence concerning the matter to the contracting officer within a reasonable time as set by the contracting officer; and

(ii) After review of such evidence the contracting officer will direct a preaward survey, if necessary, and reach a decision on all the evidence and notify the protestor and successful bidder of his/her finding. If either party disagrees with the finding, the contracting officer shall notify the parties and then forward the decision and entire record to the Administrator of the Wage and Hour Division for a final determination. However, if the apparently successful bidder or offeror is a small business concern and the contracting officer has found the small business concern to be ineligible, the protest and all pertinent evidence will be forwarded to the authorized representative of the Administrator of the Small Business Administration, and the procedures set forth in § 50-201.101(b)(4) shall be followed.

(6)(i) If the contracting officer forwards the case to the Small Business Administration for review of eligibility under the Act pursuant to § 50-201.101(b) (4) or (5), award will be held in abeyance until the contracting officer receives a determination of eligibility from the Small Business Administration or notification that the Small Business Administration has forwarded the case to the Department of Labor. (ii) If the contracting officer or the Small Business Administration forwards a case to the Department of Labor for review of eligibility under the Act, award will be held in abeyance until the contracting officer receives a final determination from the Department of Labor, unless the contracting officer finds that award should be made immediately because:

(A) The items to be procured are ungently required; or

(B) Delay of delivery or performance by failure to make the award promptly will result in substantial hardship to the Government.

(iii) If the contracting officer decides to proceed with the award, the contracting officer shall give written notice of the decision to proceed to the protester, the Department of Labor and to other concerned parties.

(iv) If an award is made under paragraph (b)(6)(ii) of this section, the contracting officer shall submit to the Department of Labor documentation explaining the need for making an award prior to the receipt of a final determination from the Administrator of the Wage and Hour Division.

(7) A protest received after award, but before final completion of the contract, shall be investigated and processed under the provisions outlined in paragraph (b)(5) of this section and forwarded to the Department of Labor, and the protestor shall be so notified.

(8) If the contract has been completed before receipt of the protest, the protester shall be notified that no action will be taken on the protest.

BILLING CODE 4510-27-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

45 CFR Part 12

Surplus Real Property—Use for Facilities To Assist the Homeless

AGENCY: Department of Health and Human Services.

ACTION: Final rule.

SUMMARY: The Department of Health and Human Services amends its regulations at 45 CFR Part 12, "Disposal and Utilization of Surplus Real Property for Public Health Services," to permit the lease of surplus Federal real property to assist the homeless. These amendments allow the implementation of Title V of the Stewart B. McKinney Homeless Assistance Act.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Wyman Williams (202) 245-7426.

SUPPLEMENTARY INFORMATION: On July 22, 1987, the President signed Pub. L. 100-77, the "Stewart B. McKinney Homeless Assistance Act." Title V of that Act provides for the identification and use of surplus Federal property for facilities to assist the homeless. Section 501(d)(2) of that Act directs the Secretary of Health and Human Services to issue regulations permitting leases of surplus Federal buildings and other real property for use for facilities to assist the homeless. That section further provides that the use of such property is to be included as a permissible use in the protection of public health within the meaning of section 203(k) of the Federal Property and Administrative Services Act of 1949.

This Department's regulations under the Federal Property and Administrative Services Act of 1949 are found at 45 CFR Part 12. Based on the requirements of the Act referred to above, we are amending these regulations to permit the lease of surplus Federal real property for facilities to assist the homeless. Section 12.3(e) is amended to identify the provision of assistance to the homeless as one of the purposes for which property may be provided under the Federal Property and Administrative Services Act of 1949. In addition, the table set forth as Exhibit A to 45 CFR Part 12 is amended to permit a public benefit allowance of 100 percent for leases of property to assist the homeless. This amendment permits the leases to be executed without a requirement of payment to the Federal government by the organization providing assistance to the homeless.

The regulation is further amended to permit, for purposes of leases within the scope of Title V of Pub. L. 100-77, the lease of surplus Federal real property to nonprofit organizations, whether or not they are tax-exempt organizations under section 501(c)(3) of the Internal Revenue Code. While the tax-exempt requirement normally applies to entities seeking the use of surplus property under Part 12, because section 501(c) of Pub. L. 100-77 identifies eligible applicants as "private nonprofit organizations, units of local government, and States," the Department has concluded that Congress intended that any nonprofit organization be eligible to obtain a lease for purposes of assisting the homeless. Accordingly, we are amending section 12.1(j) and section 12.3(b) to permit leases for purposes of assisting the homeless to any nonprofit organization.

Waiver of Proposed Rulemaking and of Delayed Effective Date

Because the amendments set forth below simply incorporate into existing regulations the statutory provisions of Pub. L. 100-77, and because the speedy implementation of this program of assistance to the homeless will benefit the intended beneficiaries of this legislation, the Secretary has determined that proposed rulemaking is unnecessary and not in the public interest and that there is good cause for waiving such requirement. On the same basis, the Secretary has determined that there is good cause for making these regulations effective upon publication.

The Department will monitor the implementation of this program and, should matters arise where further amendment to these regulations with respect to the homeless assistance program is needed, we will undertake further rulemaking as appropriate.

E.O. 12291

This rule does not require a Regulatory Impact Analysis because it is not a "major rule" as defined in Executive Order 12291, dated February 17, 1981. It is unlikely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

I certify under 5 U.S.C. 605(b) that this rule will not have a significant economic

impact on a substantial number of small entities, including small businesses, small organizations and small local governments. Therefore, a regulatory flexibility analysis is not required by 5 U.S.C. 603.

Reporting and Recordkeeping Requirements

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget under control number 0990-0148.

List of Subjects in 45 CFR Part 12

Public health, reporting and recordkeeping requirements, surplus government property.

Dated: February 10, 1988.

Otis R. Bowen,

Secretary.

PART 12—[AMENDED]

Accordingly, 45 CFR Part 12 is amended as follows:

1. The Authority citation for 45 CFR Part 12 is amended by removing the period and adding:

Authority: * * *; sec. 501 of Pub. L. 100-77, 101 Stat. 509-10, 42 USC 11411.

§ 12.1 [Amended]

2. 45 CFR 12.1(j) is revised to read as follows:

* * * * *

(j) "Nonprofit institution" means any institution, organization, or association, whether incorporated or unincorporated, no part of the net earnings of which inures or may lawfully inure to the benefit of any private shareholder or individual, and (except for institutions which lease property to assist the homeless under Title V of Pub. L. 100-77) which has been held to be tax-exempt under section 501(c)(3) of the Internal Revenue Code of 1954.

* * * * *

§ 12.3 [Amended]

3. 45 CFR 12.3(b) is revised to read as follows:

* * * * *

(b) Transfers may be made only to States, their political subdivisions and instrumentalities, tax-supported public health institutions, and nonprofit public health institutions which (except for institutions which lease property to assist the homeless under Title V of Pub. L. 100-77) have been held tax-exempt under section 501(c)(3) of the Internal Revenue Code of 1954.

* * * * *

4. 45 CFR 12.3(e) is revised to read as follows:

* * * * *

(e) Organizations which may be eligible include those which provide care and training for the physically and mentally ill, including medical care of the aged and infirm, clinical services, other public health services (including water and sewer), or similar services devoted primarily to the promotion and protection of public health. In addition, organizations which provide assistance to the homeless may be eligible for leases under Title V of Pub. L. 100-77. Except for services to the homeless, services which have as their principal purpose the providing of custodial or domiciliary care are not eligible. The property applied for must be for a purpose which the eligible organization is authorized to carry out.

* * * * *

Exhibit A—Public Benefit Allowance for Transfer of Real Property for Health Purposes [Amended]

5. Exhibit A to 45 CFR Part 12 is amended by adding at the bottom of the "Classification" column "Assistance to the Homeless" and in the corresponding locations at the bottom of the "Basic public benefit allowance" and "maximum public benefit allowance" columns " ²100".

BILLING CODE 4150-04-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 2, 31, 34, 58, 71, 76, 91, 95, 107, 108, 109, 146, 147, 167, 176, 181, 189, and 193

[CGD 84-044]

Hazardous Materials Used as Ships' Stores On Board Vessels

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is revising the rules for hazardous materials used as ships' stores on board vessels. Except for minor amendments, the present rules have remained unchanged since January 18, 1941. Many of the citations, terms, and definitions have become outdated. This revision updates the text and replaces lengthy tables by cross referencing existing Department of Transportation Hazardous Materials regulations and Consumer Product Safety Commission labeling regulations. It also eliminates the requirement for hazardous materials to be certified for use as ships' stores on board vessels to reduce the paperwork burden for industry and the Coast Guard, while maintaining the current level of safety. Materials presently listed which are no longer used as ships' stores are removed.

DATES: This rule is effective on April 11, 1988.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 11, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Carl Rivkin, Hazardous Materials Branch, Office of Marine Safety, Security and Environmental Protection, (202) 267-1217.

SUPPLEMENTARY INFORMATION: On July 7, 1987, a notice of proposed rulemaking, entitled "Hazardous Materials Used as Ships' Stores Aboard Vessels", was published in the **Federal Register** (52 FR 25409). The Coast Guard received two written comments on this proposed rulemaking. A public hearing was not requested and one was not held.

Drafting Information

The principal persons involved in drafting this rule are Mr. Carl Rivkin, Project Manager, and Mr. Stephen H. Barber, Project Counsel, Office of Chief Counsel.

Related Projects

On March 22, 1984, the Coast Guard published a notice of proposed rulemaking in the **Federal Register**, entitled "Carriage and Use of Liquefied and Non-liquefied Flammable Gas as Cooking Fuels on Vessels Carrying Passengers for Hire" (57 FR 10685), which would allow the use of liquefied petroleum gas (LPG) and compressed natural gas (CNG) as fuel for cooking on passenger vessels (CGD 83-013). The requirements in this rule (CGD 84-044) relating to cooking fuels (§ 147.50) restate the previous regulations. This section will be amended, if necessary, to conform to CGD 83-013, above, when that rulemaking is published as a final rule.

Under a separate rulemaking project, entitled "Revision of the Regulations on Outer Continental Shelf Activities" (CGD 84-098), the Coast Guard plans to propose that the hazardous ships' stores regulations be made applicable to OCS facilities. The hazards associated with the use of these materials on OCS facilities is comparable to those on vessels. Comments on this project should reference docket number CGD 84-098.

Discussion of Comments Received

One comment requested that cylinders manufactured in foreign countries that are not Department of Transportation (DOT) approved be permitted for use in containing compressed gases for use as ships' stores on U.S. vessels when cylinders that meet DOT specifications are not available. Because there are no international standards for the manufacture of cylinders, the Coast Guard cannot give an alternate requirement for foreign cylinders. The use of foreign cylinders will be considered under the general waiver provision (§ 147.9). Therefore, the requirement in § 147.60(a)(2) that DOT specification cylinders be used was not changed.

One comment questioned the need for volume limitations for the carriage of acetylene and oxygen in the previous and proposed rules. It stated that those limitations are impracticable for vessels involved in industrial operations (e.g. pipe laying, diving, and offshore drilling) and should be removed for those vessels. Sections 147.70 and 147.85 in the final rule do not have acetylene and oxygen volume limitations for vessels engaged in industrial operations. This lifting of the volume limitation for vessels engaged in industrial operations is made with the qualification that they meet the safety requirements for acetylene and oxygen carried as packaged cargo. Though this qualification will allow vessels engaged in industrial activities to carry more acetylene and oxygen than the previous or proposed rules provide, it will ensure that an acceptable level of safety can be maintained without hindering industrial operations.

Discussion of Changes to the Notice

1. The limits in the proposed §§ 147.70 and 147.85 for acetylene and oxygen on board vessels for use as ships' stores were dropped for vessels engaged in industrial operations, as discussed in the "Discussion of Comments Received" section.

2. Under the notice of proposed rulemaking, hazardous materials not listed by name in proposed § 147.27 would have to be certified by the Coast Guard under proposed § 147.22 before they could be carried on board vessels as ships' stores. Under proposed § 147.30, both materials listed by name and materials certified for carriage would have to meet basically the same labeling requirements. The only exception was for "consumer commodities", as defined in § 147.3. Consumer commodities would not have to be listed by name or be certified but would be permitted on board if they were labeled under § 147.30 or under the Federal Hazardous Substance Act regulations in 16 CFR Part 1500.

After reconsidering this process, the Coast Guard has determined that it can ensure the same level of safety without certifying hazardous materials as ships' stores and has therefore, eliminated the certification requirements in the final rule. The end result would be that a "hazardous material" (as defined in § 147.3 and 49 CFR 171.8) may be carried on board a vessel for use as ships' stores if it meets the labeling requirements of § 147.30 and the stowage and special requirements, listed in Subpart B. With the elimination of certification, all existing certificates are null and void (§ 147.1(c)).

In addition to reducing the administrative and paperwork burden on industry and the Coast Guard, deletion of the certification process will also eliminate the confusion surrounding the certification program. Frequently, purchasers of certified products are led to believe by vendors that "certified by the Coast Guard" meant that the Coast Guard had approved the product as being effective for its intended purpose, as well as eligible to be carried on board a vessel as ships' stores. Approval of the product's effectiveness was never intended by the Coast Guard.

3. New § 147.40 is added to require Coast Guard approval before Class A Explosives, Class A poisons, forbidden materials listed in 49 CFR 172.101, and flammable gases not specifically named in Subpart B of Part 147 are permitted on board vessels as ships' stores. These materials are unusually dangerous and will likely require that special precautions be followed to be permitted on board vessels as ships' stores. Coast Guard approval of these materials as ships' stores is effectively the same as certification under the previous and proposed rules. Therefore, no new burdens are imposed by this provision.

4. The final rule contains a new requirement (§ 147.60(a)(1)) that compressed gas cylinders be used only for the materials for which the cylinders are authorized. The absence of this requirement in the notice was an oversight. The intent and common understanding of these regulations, as well as the previous regulations, has always been that compressed gases must be put in cylinders for which they are authorized. The correction of this oversight is a clerical change and not an extension of the requirements stated in the notice.

5. In § 147.100 on radioactive materials, the phrase "used as radioactive tracers or sealed sources" was inserted in the proposal to give examples of the radioactive materials being addressed. Because it can be misconstrued as limiting the materials addressed to those used as tracers or sealed sources, the phrase is deleted in the final rule. It is intended that all radioactive materials on board meet the Nuclear Regulatory Commission's regulations.

6. In proposed § 147.65(c) on carbon dioxide and halon fire extinguishing systems, the cross reference to § 147.60(a)(2) for re-marking and retesting requirements was incorrect. The final rule substitutes the correct references (§ 147.60 (a)(3) and (a)(4)). Paragraph (a)(2) concerns construction, not re-marking and testing.

7. In § 147.95(c), the container requirements for ships' signals and emergency equipment were overly stringent and were changed to give more latitude in the choice of containers.

Incorporation by Reference

The following material has been approved for incorporation by reference by the Director of the Federal Register under 5 U.S.C. 552 and 1 CFR Part 51:

American Boat and Yacht Council, Inc. (ABYC)
  ABYC H-25-81—Portable Fuel Systems and Portable Containers for Flammable Liquids, May 12, 1981.
American Society of Heating, Refrigerating, and Air-Conditioning Engineers, Inc. (ASHRAE)
  ANSI/ASHRAE 34-78—Number Designation of Refrigerants, approved 1978.
Public Health Service, Department of Health and Human Services (DHHS)
  DHHS Publication No. (PHS) 84-2024—The Ships' Medicine Chest and Medical Aid at Sea, revised 1984.
Underwriters Laboratories, Inc. (UL):
  UL 30—Standard for Metal Safety Cans, 7th Ed, March 11, 1985, revised March 12, 1985 and March 3, 1987.
  UL 1185—Standard for Portable Marine Fuel Tanks, Second Edition, March 13, 1978, revised July 6, 1984.
  UL 1313—Standard for Nonmetallic Safety Cans for Petroleum Products, 1st Ed., March 15, 1982, revised January 3, 1984 and March 22, 1985.
  UL 1314—Standard for Special-Purpose Containers, 1st Ed., July 7, 1983, revised February 7, 1984 and September 23, 1986.

The material incorporated by reference is on file at the Library of the Office of the Federal Register, Room 8301, 1100 L Street NW., Washington, DC 20408 and is available for inspection or copying at Coast Guard Headquarters, Hazardous Materials Branch, Room 1214, 2100 Second Street SW., Washington, DC 20593-0001. Copies of the material may be purchased at the addresses listed in § 147.7(c).

If substantive changes are made by the publisher to the materials incorporated, those changes may be considered for incorporation. However, before taking final action, the Coast Guard will publish a separate notice in the **Federal Register** for public comment.

Regulatory Evaluation

These regulations are considered to be non-major under Executive Order 12291 and nonsignificant under the Department of Transportation (DOT) regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of these regulations has been found to be so minimal that further evaluation is unnecessary.

The principal objectives of this rule are to simplify previous requirements and to update the regulations to take into account changes in laws and related regulations. This rule does not increase costs already imposed by the previous regulations but reduces overall costs for both industry and the Coast Guard.

Under the previous regulations, manufacturers of hazardous products intended for use as ships' stores had to apply first to the Coast Guard in writing to obtain a ships' stores certificate for their product. This rule eliminates the need for Coast Guard certification of hazardous ships' stores and saves the applicants approximately $347.00 per application. For the approximately 40 new applications received each year, the industry wide savings will be approximately $13,880.00. In addition, the Coast Guard will save the approximately 120 manhours ($1744.00) required annually to process these applications. This reduction in paperwork costs to industry and the Coast Guard is twice the amount stated in the notice. The reason for this increase in savings is due to the fact that, of the approximately 40 applications received each year, the proposal would have eliminated only about 20; whereas, with the complete removal of certification, all 40 applications would be eliminated.

Also, this rule eliminates the need to have certificates renewed every three years (existing 46 CFR 147.03-9). This change will save industry approximately $28.00 per renewal for the approximately 48 certificates due for renewal each year and save the Coast Guard approximately 72 manhours per year or $946.40.

In the notice of proposed rulemaking, certain classes of hazardous materials, i.e., flammable gases not named in the regulations, Class A Explosives, Class A Poisons, and forbidden materials listed in 49 CFR Part 172.101, would require certification to be used as ships' stores. In the final rule, these classes of materials require Commandant (G-MTH) approval to be used as ships' stores aboard vessels and a list of approved materials will be maintained by Commandant (G-MTH). There have been no requests for certification of any material that falls into these classes for use as ships' stores. Therefore, there probably will be few, if any, requests for Commandant (G-MTH) approval and little, if any, resulting paperwork burden.

Coast Guard inspections of vessels to determine compliance with Part 147 are conducted at the same time as other planned or routine inspections. This rule does not require added manpower.

In conclusion, this rule creates no new costs, but reduces applicant and Coast Guard costs and simplifies the regulations for the maritime industry.

Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 601 through 612), the Coast Guard must consider whether this rule is likely to have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses which are not dominant in their field and which would otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632).

As described in the Regulatory Evaluation section above, the effect of this rule is to reduce Coast Guard and industry costs. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This rule contains information collection requirements in the following sections: §§ 147.9, 147.30, 147.40, and 147.60(c)(2). These items have been submitted to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and have been approved by OMB. Part 147 has been assigned OMB Control Number 2115-0139.

Environmental Assessment

The Coast Guard has considered the environmental impact of this rule and concluded that, under section 2.B.2.1. of Commandant Instruction M16475.1B, this rule is categorically excluded from further environmental documentation. This rule revises existing regulations to improve formatting and readability and to remove materials no longer used as ships' stores.

For the reasons set out in the preamble, Title 46, Parts 2, 31, 34, 58, 71, 76, 91, 95, 107, 108, 109, 146, 147, 167, 176, 181, 189, and 193 of the Code of Federal Regulations are amended as follows:

PART 2—VESSEL INSPECTIONS

1. The authority citation for Part 2 is revised to read as follows and all other authority citations are removed:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

2. By revising § 2.75-60 to read as follows:

§ 2.75-60 Hazardous ships' stores.

Hazardous ships' stores, as defined in § 147.3 of this chapter, must not be brought on board or used on any vessel unless they meet the requirements of Part 147 of this chapter.

PART 31—INSPECTION AND CERTIFICATION

3. The authority citation for Part 31 is revised to read as follows and all other authority citations are removed:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

4. In § 31.10-18, by revising Table 31.10-18(b), footnote 1, and Table 31.10-18(c), footnote 1, to read as follows:

§ 31.10-18 Fire fighting equipment: General — TB/ALL.

* * * * *

(b) * * *

TABLE 31.10-18(b)

* * * * *

[1] Cylinders must be tested and marked, and all flexible connections and discharge hoses of semi-portable carbon dioxide and halon extinguishers must be tested or renewed, as required by §§ 147.60 and 147.65 of this chapter.

* * * * *

(c) * * *

TABLE 31.10-18(c)

* * * * *

[1] Cylinders must be tested and marked, and all flexible connections on fixed carbon dioxide and halon extinguishers must be tested or renewed, as required by §§ 147.60 and 147.65 of this chapter.

* * * * *

PART 34—FIRE FIGHTING EQUIPMENT

5. The authority citation for Part 34 is revised to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

6. In § 34.15-20, by revising paragraph (i) to read as follows:

§ 34.15-20 Carbon dioxide storage—T/ALL.

* * * * *

(i) All cylinders used for storing carbon dioxide must be fabricated, tested, and marked in accordance with §§ 147.60 and 147.65 of this chapter.

* * * * *

PART 58—MAIN AND AUXILIARY MACHINERY AND RELATED SYSTEMS

7. The authority citation for Part 58 is revised to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

8. In § 58.20-5, by revising paragraph (b) to read as follows:

§ 58.20-5 Design.

* * * * *

(b) For refrigeration systems other than those for reliquefaction of cargo, only those refrigerants under § 147.90 of this chapter are allowed.

PART 71—INSPECTION AND CERTIFICATION

9. The authority citation for Part 71 is revised to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

10. In § 71.25-20, by revising Table 71.25-20(a)(1), footnote 1, and Table 71.25-20(a)(2), footnote 1, to read as follows:

§ 71.25-20 Fire detecting and extinguishing equipment.

(a) * * *

(1) * * *

TABLE 71.25-20(a)(1)

* * * * *

[1] Cylinders must be tested and marked, and all flexible connections and discharge hoses of semi-portable carbon dioxide and halon extinguishers must be tested or renewed, as required by §§ 147.60 and 147.65 of this chapter.

* * * * *

(2) * * *

TABLE 71.25-20(a)(2)

TABLE 91.25-20(a)(2)

* * * * *

[1] Cylinders must be tested and marked, and all flexible connections on fixed carbon dioxide systems must be tested or renewed, as required by §§ 147.60 and 147.65 of this chapter.

* * * * *

PART 95—FIRE PROTECTION EQUIPMENT

15. The authority citation for Part 95 is revised to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

16. In § 95.15-20, by revising paragraph (i) to read as follows:

§ 95.15-20 Carbon dioxide storage.

* * * * *

(i) All cylinders used for storing carbon dioxide must be fabricated, tested, and marked in accordance with §§ 147.60 and 147.65 of this chapter.

PART 107—INSPECTION AND CERTIFICATION

17. The authority citation for Part 107 is revised to read as follows and all other authority citations are removed:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3306; 46 App. U.S.C. 86; 49 CFR 1.46 Section 107.05 also issued under 44 U.S.C. 3507; 49 CFR 1.45.

18. In § 107.235, by revising the note following paragraph (b)(3) to read as follows:

§ 107.235 Servicing of hand portable fire extinguishers, semi-portable fire extinguishers and fixed fire-extinguishing systems.

* * * * *

(b) * * *

(3) * * *

* * * * *

Note.—All carbon dioxide cylinders and discharge hoses of semi-portable carbon dioxide and halon extinguishers must be tested and marked in accordance with §§ 147.60 and 147.65 of this chapter.

PART 108—DESIGN AND EQUIPMENT

19. The authority citation for Part 108 is revised to read as follows and all other authority citations are removed:

Authority: 46 U.S.C. 3306; 46 App. U.S.C. 86; 49 CFR 1.46.

20. In § 108.431, by revising the section heading and adding a new paragraph (c) to read as follows:

§ 108.431 Carbon dioxide systems: General.

* * * * *

(c) Each carbon dioxide system cylinder must be fabricated, tested, and marked in accordance with § 147.60 and 147.65 of this chapter.

§ 108.451 [Amended]

21. In § 108.451, by removing paragraph (h).

PART 109—OPERATIONS

22. The authority citation for Part 109 is revised to read as follows and all other authority citations are removed:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3306; 46 App. U.S.C. 86; 49 CFR 1.46. Sections 109.411 and 109.413 also issued under 46 U.S.C. 6101. Section 109.431 also issued under 46 U.S.C. 10104.

23. By revising § 109.558 to read as follows:

§ 109.558 Hazardous ships' stores.

The master or person in charge shall ensure that hazardous ships' stores, as the term is defined in § 147.3 of this chapter, which are on board a unit are labeled, stowed, and used only in accordance with Part 147 of this chapter.

PART 146—TRANSPORTATION OR STORAGE OF MILITARY EXPLOSIVES ON BOARD VESSELS

24. The authority citation for Part 146 is revised to read as follows and all other authority citations are removed:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

25. In § 146.01-5, by revising paragraph (b) to read as follows:

§ 146.01-5 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

* * * * *

(b) *Display.*

Subchapter N part or section where identified or described	Current OMB Control No.
§ 146.02-20	2115-0054
§ 146.29-13	2115-0013
Part 147	2115-0139

26. By revising Part 147 to read as follows:

PART 147—HAZARDOUS SHIPS' STORES

Subpart A—General Provisions

Sec.
147.1 Purpose and applicability.
147.3 Definitions.
147.5 Commandant (G-MTH); address.
147.7 Incorporation by reference.
147.9 Waivers.
147.15 Hazardous ships' stores permitted on board vessels.
147.30 Labeling.

Subpart B—Stowage and Other Special Requirements for Particular Materials

147.35 Purpose of subpart.
147.40 Materials requiring Commandant (G-MTH) approval.
147.45 Flammable and combustible liquids.
147.50 Fuel for cooking, heating, and lighting.
147.60 Compressed gases.
147.65 Carbon dioxide and halon fire extinguishing systems.
147.70 Acetylene.
147.85 Oxygen.
147.90 Refrigerants.
147.95 Explosives.
147.100 Radioactive materials.
147.105 Anesthetics, drugs, and medicines.

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

Subpart A—General Provisions

§ 147.1 Purpose and applicability.

(a) This part prescribes regulations designating what hazardous materials may be on board vessels as ships' stores and prescribes requirements for the labeling, stowage, and use of those materials.

(b) This part applies to all vessels listed in 46 U.S.C. 3301 as subject to inspection under Part B of 46 U.S.C. Subtitle II. On foreign vessels in the navigable waters of the United States, the Captain of the Port or District Commander may prohibit the unsafe use or stowage of hazardous ships' stores under 33 CFR 160.109.

(c) All certifications previously issued by the Coast Guard under this part permitting the use of particular materials or products as ships' stores are null and void.

§ 147.3 Definitions.

As used in this part:

"Accommodation, control, or service spaces" means living quarters, including walkways, dining rooms, galleys, pantries, lounges, lavatories, cabins, staterooms, offices, hospitals, cinemas, and game and hobby rooms; areas containing controls for equipment and navigation; workshops, other than those forming part of machinery spaces; and store rooms adjacent to these spaces.

"Combustible liquid" means "combustible liquid" as the term is defined in 49 CFR 173.115(b).

"Compressed gas" means "compressed gas" as the term is defined in 49 CFR 173.300.

"Consumer commodity" means a commodity, such as a polish, insecticide, cleaning compound, or distillate, that is packaged and distributed in a form and quantity intended for sale through retail sales establishments.

"Flammable liquid" means "flammable liquid" as the term is defined in 49 CFR 173.115(a).

"Hazardous material" means "hazardous material" as the term is defined in 49 CFR 171.8.

"Hazardous ships' stores" means ships' stores that are hazardous materials.

"Proper shipping name" means the name of the hazardous ships' stores shown in Roman print (not in italics) in 49 CFR 172.101.

"Ships' stores" means materials which are on board a vessel for the upkeep, maintenance, safety, operation, or navigation of the vessel (except for fumigants under Part 147A of this chapter, for fuel and compressed air used for the vessel's primary propulsion machinery, or for fixed auxiliary equipment) or for the safety or comfort of the vessel's passengers or crew.

"Technical name" means the recognized chemical name used in scientific or technical publications.

§ 147.5 Commandant (G-MTH); address.

Commandant (G–MTH) is the Marine Technical and Hazardous Materials Division of the Coast Guard Office of Marine Safety, Security and Environmental Protection. The address is Commandant (G–MTH–1), U.S. Coast Guard Headquarters, Washington, DC 20593–0001, and the telephone number is (202) 267–1577.

§147.7 Incorporation by reference.

(a) In this part, portions or the entire text of certain standards and specifications are incorporated by reference as the governing requirements for materials, equipment, tests, or procedures to be followed. These standards and specification requirements specifically referred to in this part are the governing requirements for the subject matters covered, unless specifically limited, modified, or replaced by the regulations.

(b) These materials are incorporated by reference into this part under 5 U.S.C. 552(a) with the approval of the Director of the Federal Register. The Office of the Federal Register publishes a table, "Material Approved for Incorporation by Reference," which appears in the Finding Aids section of this volume. To enforce any edition other than the one listed in paragraph (c) of this section, notice of the change must be published in the **Federal Register** and the material made available. All approved material is on file at the Office of the Federal Register Information Center, Room 8301, 1100 L Street, NW., Washington, DC 20408 and at U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593–0001. Copies may be obtained from the sources indicated in paragraph (c) of this section.

(c) The materials approved for incorporation by reference in this part are:

American Boat and Yacht Council, Inc. (ABYC), P.O. Box 806, Amityville, NY 11701
  ABYC H–25–81—Portable Fuel Systems and Portable Containers for Flammable Liquids, May 12, 1981.
American Society of Heating, Referigerating, and Air-Conditioning Engineers, Inc. (ASHRAE),
  Publication Sales Department, 1791 Tullie Circle, NE, Atlanta, GA 30329
  ANSI/ASHRAE 34–78—Number Designation of Refrigerants, approved 1978.
Public Health Service, Department of Health and Human Services (DHHS),
  Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402
  DHHS Publication No. (PHS) 84–2024—The Ship's Medicine Chest and Medical Aid at Sea, revised 1984.
Underwriters Laboratories, Inc. (UL), Publications Stock, 333 Pfingsten Road, Northbrook, IL 60062
  UL 30—Standard for Metal Safety Cans, 7th Ed., March 11, 1985, revised March 12, 1985 and March 3, 1987.
  UL 1185—Standard for Portable Marine Fuel Tanks, Second Edition, March 13, 1978, revised July 6, 1984.
  UL 1313—Standard for Nonmetallic Safety Cans for Petroleum Products, 1st Ed., March 15, 1982, revised January 3, 1984 and March 22, 1985.
  UL 1314—Standard for Special-Propose Containers, 1st Ed., July 7, 1983, revised February 7, 1984 and September 23, 1986.

§ 147.9 Waivers.

(a) Any requirement in this part may be waived on a case by case basis if it is determined by Commandant (G–MTH) that the requirement is impracticable under the circumstances and that an acceptable level of safety can be maintained.

(b) Requests for issuance of a waiver must be in writing and contain a detailed explanation of—

(1) Why the requirement is impracticable; and

(2) What measures will be taken to maintain an acceptable or equivalent level of safety.

§ 147.15 Hazardous ships' stores permitted on board vessels.

Unless prohibited under Subpart B of this part, any hazardous material may be on board a vessel as ships' stores if the material—

(a) Is labeled according to § 147.30; and

(b) Meets the requirements, if any, in Subpart B of this part applicable to the material.

§ 147.30 Labeling.

(a) Except as provided in paragraph (b) of this section, all immediate receptacles, containers, or packages containing hazardous ships' stores must be labeled in English with the following information concerning the contents:

(1) Technical name or proper shipping name.

(2) For hazardous ships' stores other than liquid fuels, manufacturer's or supplier's name and address.

(3) Hazard classification under 49 CFR 172.101 and 173.2.

(4) For hazardous ships' stores other than liquid fuels, step by step procedures for proper use.

(5) First aid instructions in the event of personnel contact, including antidotes in the event of ingestion.

(6) Stowage and segregation requirements.

(b) Hazardous ships' stores that are consumer commodities labeled in accordance with the Federal Hazardous Substances Act Regulations in 16 CFR Part 1500 need not be labeled as specified in paragraph (a) of this section.

Subpart B—Stowage and Other Special Requirements for Particular Materials

§147.35 Purpose of subpart.

This subpart prescribes special requirements applicable to particular, named materials. These requirements are in addition to the general requirements in Subpart A applicable to those materials.

§ 147.40 Materials requiring Commandant (G-MTH) approval.

(a) Commandant (G–MTH) approval is required before the following hazardous materials may be on board a vessel as ships' stores:

(1) Class A poisons.

(2) Class A explosives.

(3) Flammable gases, other than those addressed specifically in this subpart.

(4) Forbidden materials listed in 49 CFR 172.101.

(b) Request for approval must be submitted to the Commandant (G–MTH), identify the material, and explain the need for its use.

(c) Upon approval, the material is added to the list of materials approved under this section. A copy of this list is available from the Commandant (G–MTH) at the address in § 147.5.

§ 147.45 Flammable and combustible liquids.

(a) This section applies to the stowage and transfer of flammable and combustible liquids (including gasoline and diesel oil), other than liquids used as fuel for cooking, heating, and lighting under § 147.50.

(b) No flammable or combustible liquids may be stowed in any accommodation, control, or service space (other than a paint locker).

(c) No more than 19 liters (five gallons) of flammable liquids may be stowed in any machinery space. The flammable liquids must be in containers of 3.8 liters (one gallon) or less.

(d) No more than 208 liters (55 gallons) of combustible liquids may be stowed in any machinery space.

(e) An aggregate of more than 7.6 liters (two gallons) of flammable or combustible liquids stowed outside of an accommodation, control, or service, space (other than a paint locker) or outside of a machinery space must be stowed in a paint locker that is marked with a warning sign indicating flammable or combustible liquid storage.

(f) Flammable and combustible liquids used as fuel for portable auxiliary equipment must be stored in—

(1) Integral tanks that form part of the vessel's structure;

(2) An independent tank meeting the requirements of Subpart 58.50 of Part 58 of this chapter;

(3) A container meeting the requirements of Subpart D of 49 CFR 173.119 for the storage of flammable or combustible liquids;

(4) A protable outboard fuel tank meeting the specifications of ABYC H–25-81 or one identified by Underwriters Laboratories as meeting the specifications of UL 1185;

(5) A portable safety container identified by Underwriters Laboratories as meeting the specifications of UL 30 or UL 1313; or

(6) A portable safety container identified by Underwriters Laboratories as meeting the requirements of UL 1314.

(g) Each portable container of flammable or combustible liquid used for portable auxiliary equipment must be stowed in a paint locker or an open location designated by the master.

(h) Fuel tanks for portable auxiliary equipment using flammable or combustible liquids may only be refilled on a vessel—

(1) By using a container described in paragraphs (f)(2), (f)(4), or (f)(5) of this section which has a capacity not exceeding 23 liters (6 gallons); or

(2) In the case of portable outboard fuel tanks described in paragraph (f)(3) of this section, in accordance with paragraph (i) of this section.

(i) Portable containers or portable outboard fuel tanks may be refilled from a larger container of flammable or combustible liquid on the weather deck of a vessel, other than a small passenger vessel subject to Subchapter T of this chapter, provided that—

(1) A drip pan of adequate size is used to collect any drippings; and

(2) At least one Coast Guard approved Type B, Size I, fire extinguisher is within three meters (9.75 feet) of the refilling location.

§ 147.50 Fuel for cooking, heating, and lighting.

(a) Flammable and combustible liquids and gases not listed in this section are prohibited for cooking, heating, or lighting on any vessel, with the exception of combustible liquids on cargo vessels.

(b) Fluid alcohol is prohibited for cooking, heating, or lighting on ferry vessels. Fluid alcohol burners, where wet primed, must have a catch pan not less than ¾ of an inch deep secured inside of the frame of the stove or have the metal protection under the stove flanged up ¾ of an inch to form a pan.

(c) Containers of solidified alcohol must be secured on a fixed base.

(d) Liquefied or non-liquefied gas is prohibited for cooking, heating, or lighting on ferry and passenger vessels but may be used on other inspected vessels, if the system in which it is used meets the requirements of Subpart 58.16 of Part 58 of this Chapter or is approved by the Commandant (G–MTH).

(e) Kerosene and commercial standard fuel oil No. 1, No. 2, and No. 3 are prohibited for cooking, heating, or lighting on ferry or passenger vessels, unless the following conditions are met:

(1) Pressure or gravity feed must be used.

(2) Where wet priming is used in a cooking device, the device must have a catch pan not less than three fourths of an inch deep secured inside the frame of the device or a metal protector under the device with a least a three fourths inch flange to form a pan.

(3) Where wet priming is used, a non-flammable priming liquid must be used.

(4) Fuel tanks for fixed stoves must be separated from the stove and mounted in a location open to the atmosphere or mounted inside a compartment with an outside fill and vent.

(5) Fuel lines must have an easily accessible shut-off valve at the tank.

(6) If the fuel tank is outside of a stove compartment, a shut-off valve must be fitted at the stove.

§ 147.60 Compressed gases.

(a) *Cylinder requirements.* Cylinders used for containing hazardous ships' stores that are compressed gases must be—

(1) Authorized for the proper shipping name of the gas in accordance with 49 CFR 172.101 and 49 CFR Part 173;

(2) Constructed in accordance with Subpart C of 49 CFR Part 178 or exempted under 49 CFR Part 107;

(3) Filled, marked, and inspected in accordance with 49 CFR 173.301 through 173.308; and

(4) Except as provided in § 147.65, maintained and retested in accordance with 49 CFR 173.34

(b) *Stowage and care of cylinders.* (1) Cylinders must always be secured and, when not in use, they must be stowed in a rack in an upright position, with the valve protection cap in place.

(2) Lockers or housings must be vented to the open air near the top and bottom for positive circulation of vapors.

(3) Cylinders must be protected from all sources of heat which may cause the cylinders to be heated to a temperature higher than 130°F.

(c) *Pressure vessels other than cylinders.* Pressure vessels, other than cylinders subject to paragraph (a) of this section, used for containing ships' stores that are compressed gases must—

(1) Be constructed and inspected in acordance with Part 54 of this chapter; and

(2) Carry only nitrogen or air, unless permission is granted by Commandant (G-MTH) to do otherwise.

§ 147.65 Carbon dioxide and halon fire extinguishing systems.

(a) Carbon dioxide or halon cylinders forming part of a fixed fire extinguishing system must be retested, at least, every 12 years. If a cylinder is discharged and more than five years have elapsed since the last test, it must be retested before recharging.

(b) Carbon dioxide or halon cylinders must be rejected for further service when they—

(1) Leak;

(2) Are dented, bulging, severely corroded, or otherwise in a weakened condition;

(3) Have lost more than five percent of their tare weight; or

(4) Have been involved in a fire.

(c) Cylinders which have contained carbon dioxide or halon and have not been tested within five years must not be used to contain another compressed gas on board a vessel, unless the cylinder is retested and re-marked in accordance with § 147.60 (a)(3) and (a)(4).

(d) Flexible connections between cylinders and distribution piping of semi-portable or fixed carbon dioxide fire extinguishing systems and discharge hoses in semi-portable carbon dioxide fire extinguishing systems must be renewed or tested at a pressure of 6.9 MPa (1000 psig). At test pressure, the pressure must not drop at a rate greater than 1.03 MPa (150 psi) per minute for a two minute period. The test must be performed when the cylinders are retested.

(e) Flexible connections between cylinders and distribution piping of fixed halon fire extinguishing systems must be tested at a pressure of one and one-half times the cylinder service pressure as marked on the cylinder. At test pressure, the pressure must not drop at a rate greater than 1.03 MPa (150 psi) per minute for a two minute period. The test must be performed when the cylinders are retested.

§ 147.70 Acetylene.

(a) Seventeen cubic meters (600 standard cubic feet) or less of acetylene may be stowed on or below decks on any vessel.

(b) More than 17 m³ (600 standard cubic feet) of acetylene may be on board a vessel engaged in industrial operations, if it is stowed on deck.

§ 147.85 Oxygen.

(a) Eighty five cubic meters (3000 standard cubic feet) or less of oxygen may be on board any vessel.

(b) More than 85 m³ (3000 standard cubic feet) of oxygen may be on board a vessel engaged in industrial operations, if it is stowed on deck or in a well ventilated space.

§ 147.90 Refrigerants.

(a) Only refrigerants listed in ANSI/ASHRAE 34–78 may be carried as ships' stores.

(b) Refrigerants contained in a vessel's operating system are not considered as being carried as ship's stores.

§ 147.95 Explosives.

(a) *Explosives—general.* Except as provided for elsewhere in this subchapter, explosives, as defined in 49 CFR 173.50, which are hazardous ships' stores must be stowed in a magazine which is constructed and located in accordance with 49 CFR 176.135 through 176.150.

(b) *Small arms ammunition.* (1) No person shall bring, have in their possession, or use on board a vessel any small arms ammunition, except by express permission of the matter of the vessel.

(2) All small arms ammunition must be stowed in a locked metal magazine or locker. The key to the locker must be kept in the possession of the master or a person designated by the master.

(c) *Ships' signals and emergency equipment.* (1) Explosive ships' signals and emergency equipment, including pyrotechnic distress signals and line throwing equipment, must be stowed in watertight containers or wood lined magazine chests.

(2) All pyrotechnic distress signals, rockets, and line throwing guns must be stowed in accordance with the requirements of 49 CFR 176.83.

§ 147.100 Radioactive materials.

(a) Radioactive materials must not be brought on board, used in any manner, or stored on the vessel, unless the use of the materials is authorized by a current license issued by the Nuclear Regulatory Commission (NRC) under 10 CFR Parts 30 and 34.

(b) Stowage of radioactive materials must conform to the requirements of the NRC license.

§ 147.105 Anesthetics, drugs, and medicines.

Anesthetics, drugs, and medicines must be stowed and dispensed in accordance with the DHHS Publication No. (PHS) 84–2024.

PART 167—PUBLIC NAUTICAL SCHOOL SHIPS

27. The authority citation for Part 167 is revised to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

28. In § 167.45–1, by revising the section heading and paragraph (a)(8) to read as follows:

§ 167.45–1 Steam, carbon dioxide, and halon fire extinguishing systems.

(a) * * *

(8) Carbon dioxide and halon cylinders carried on board nautical school ships must be tested and marked in accordance with the requirements of §§ 147.60 and 147.65 of this chapter.

* * * * *

PART 176—INSPECTION AND CERTIFICATION

29. The authority citation for Part 176 is revised to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

30. In § 176.25–25, by revising the introductory text of paragraph (c) and the introductory text of the note following paragraph (c)(3) to read as follows:

§ 176.25–25 Fire extinguishing equipment.

* * * * *

(c) In addition to the other requirements of this section, §§ 147.60 and 147.65 of this chapter requires that—

* * * * *

(3) * * *

Note: Section 147.65 of this chapter includes a requirement that the cylinder must be retested and re-marked under the following conditions:

* * * * *

PART 181—FIRE PROTECTION EQUIPMENT

31. The authority citation for Part 181 is revised to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

32. In § 181.20–30, by revising paragraph (c) to read as follows:

§ 181.20–30 Cylinders.

* * * * *

(c) All cylinders used for storing carbon dioxide must be fabricated, tested, and marked in accordance with the requirements of §§ 147.60 and 147.65 of this chapter.

* * * * *

PART 189—INSPECTION AND CERTIFICATION

33. The authority citation for Part 189 is revised to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

34. In § 189.25–20, by revising footnote 1 to Table 189.25–20(a)(1) and footnote 1 to Table 189.25–20(a)(2) and removing the Note after footnote 1 to Table 189.25–20(a)(2) as follows:

§ 189.25–20 Fire extinguishing equipment.

(a) * * *

(1) * * *

TABLE 189.25–20(a)(1)

* * * * *

[1] Cylinders must be tested and marked and all flexible connections and discharge hoses of semiportable carbon dioxide and halon extinguishers must be tested or renewed as required in §§ 147.60 and 147.65 of this chapter.

* * * * *

(2) * * *

TABLE 189.25–20(a)(2)

* * * * *

[1] Cylinders must be tested and marked and all flexible connections on fixed carbon dioxide and halon systems must be tested or renewed as required in §§ 147.60 and 147.65 of this chapter.

* * * * *

PART 193—FIRE PROTECTION EQUIPMENT

35. The authority citation for Part 193 is revised to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

36. In § 193.15–20, by revising paragraph (i) to read as follows:

§ 193.15–20 Carbon dioxide storage.

* * * * *

(i) All cylinders used for storing carbon dioxide must be fabricated, tested, and marked in accordance with the requirements of §§ 147.60 and 147.65 of this chapter.

Dated: March 7, 1988.

J.W. Kime,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety Security and Environmental Protection.

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[CC Docket No. 81–893; FCC 88–3]

Procedures for Implementing the Detariffing of Customer Premises Equipment and Enhanced Services; Second Computer Inquiry

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action determines the regulatory classification of the Bell Operating Companies embedded customer premises equipment (CPE) remaining under regulated and tariffed service. Embedded digital network channel terminating equipment (NCTE) is detariffed, while other types of embedded CPE owned by the BOC's remains under tariffed service. The BOCs are required to follow the detariffing procedures for digital NCTE set forth in the *AT&T CPE Detariffing Order* (48 FR 57168, Dec. 28, 1983) as modified in the *Fourth Notice* (50 FR 43735, Oct. 29, 1985) and in this Order.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Rose Crellin, Common Carrier Bureau, (202) 632–9342.

SUPPLEMENTARY INFORMATION: This is a summary of the Common Carrier Bureau's Eighth Report and Order in CC Docket 81–893 adopted January 6, 1988 and released January 29, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The full text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Washington, DC 20037.

Summary of Order

1. In the *Fourth Notice,* in this proceeding, the Commission sought to address the regulatory treatment of the narrow classes of embedded CPE that remained with the BOCs at divestiture. The Commission was persuaded by the record in this proceeding, consistent with the earlier recommendation of AT&T and the decision of the Divestiture Court in approving the Plan of Reorganization for AT&T, that the majority of this CPE should remain with the BOCs. In response to the *Fourth Notice* in this proceeding, the BOCs identified a multitude of problems regarding detariffing of this embedded CPE. These problems derive from the fact that the equipment is now largely obsolete, of minimal value, no competitive market exists for this CPE, and it is difficult and expensive to transfer to the customer. Thus, the Commission was persuaded that the interests of the users of this equipment would be better protected if it remained subject to regulation. Accordingly, in this Order, the Commission concluded that embedded CPE owned by the BOCs, except digital NCTE CPE, should remain in the regulated equipment category and may be tariffed in the appropriate jurisdiction. The Commission concluded that many of the problems identified with respect to detariffing the CPE it proposed to detariff in the *Fourth Notice* do not exist with respect to embedded digital NCTE. Because these factors do not apply, and a competitive market does exist that can provide choice to customers, the Commission concluded that embedded digital NCTE CPE should be deregulated and must be detariffed.

2. Thus, the Commission concluded that the final treatment of the subject BOC embedded CPE generally includes: (1) Permitting relevant state commissions to decide the appropriate treatment of CPE located at Public Service Answering Points used in connection with 911 emergency service; (2) continuing the current treatment, *i.e.*, retaining pay telephone, official services equipment, extensions to pay telephone, 101 electronic switching system (ESS) switches, identifiers, Centrex CPE and other remaining embedded BOC CPE in the regulated equipment category; and (3) requiring the BOCs to detariff embedded digital NCTE.

3. The Commission requires the BOCs to follow the detariffing procedures set forth in the *AT&T CPE Detariffing Order* as modified in the *Fourth Notice* and this Order for detariffing digital NCTE. In the *Fourth Notice,* the Commission proposed to require the BOCs to follow generally the procedures described in the *AT&T CPE Detariffing Order* for the deregulation of multi-line CPE owned by AT&T with some modifications. The Commission proposed to require the BOCs to offer embedded CPE for sale to subscribers during a two-year transition period after detariffing. The detariffing process described in the *Fourth Notice* provided for detariffing on a national basis since there are few BOCs, their operations are familiar and they tend to own standard types of equipment which were acquired when they were part of the Bell System. Although we proposed in the *Fourth Notice* to retain the bulk of the detariffing procedures of the *AT&T CPE Detariffing Order,* we presented modifications to those procedures that would require the BOCs to: (1) Offer the embedded CPE for sale at prices that do not exceed net book value plus reasonable transaction costs in the aggregate for each category of equipment; (2) maintain fixed sale prices throughout the transition period; (3) adjust month-to-month lease rates, if applicable, only at eight-month intervals to reflect increases in the Consumer Price Index (CPI). The Commission also proposed to incorporate additional requirements specified in the *AT&T CPE Detariffing Order.* Those requirements included: (1) A 90 day warranty for the equipment sold to customers; (2) a one year notification to the customer prior to a CPE phase-out; (3) the use of net book value in the aggregate by type of CPE as the valuation standard for transfer of the embedded CPE to the unregulated category; (4) nationwide lease rates set at 70% of the highest state tariff in a category of equipment, or the statistical median of such state tariffs; (5) filing a monthly report of number of sales, net book value and revenues with this Commission, during the price predictability period; (6) providing a detailed statement of the items included in transaction costs to this Commission; and (7) establishing a regional sales program.

4. In the *Fourth Notice,* the Commission also proposed to require the BOCs to follow the procedures in the *AT&T CPE Detariffing Order* that pertain to restrictions on the transfer and reformating of customer proprietary information, the continuation of maintenance and support of the embedded CPE during the transition period, and the transfer to CPE subsidiaries of deferred tax reserve accounts and investment tax credits. Moreover, the Commission observed that in addition to the CPE to be transferred, the BOCs may have supporting assets that must also be

transferred to unregulated accounts. The Commission proposed to require the BOCs to follow the procedures outlined in our *AT&T CPE Detariffing Order* with respect to these assets. Specifically, the Commission proposed to require the BOCs to transfer land and buildings to their CPE subsidiaries at appraised value. All other supporting assets, however, would be transferred at new book value. Under the proposals of the *Fourth Notice*, the BOCs would also be required to follow the accounting requirements of the *AT&T CPE Detariffing Order*, as well as subsequent accounting orders in the sale of embedded CPE and the transfer of unsold CPE. The BOCs must either include the same items in transactions costs as we required for AT&T in the *CPE Detariffing* or provide a detailed statement of the items to be included in transaction costs for review within 90 days of the release of this Order. The benefit of this requirement is that a consistent set of items will define transactions costs during the sales program.

5. The Order requires that the BOCs file a quarterly report with this Commission during the price predictability period from July 1, 1988 through June 30, 1990. The quarterly report must indicate total net book value, sales revenues and transactions cost of sales in the aggregate of embedded digital NCTE, and must also indicate the percentage of equipment sold. Moreover, because of the small amount of equipment involved, the Commission does not require the BOCs to establish regional sales programs. The Order does require that each customer receive notification of the opportunity to purchase its embedded NCTE by July 1, 1988. Moreover, the Order requires that customers be notified of sales prices and transactions costs within 30 days of a request by a customer to a BOC.

6. The price predictability period shall begin July 1, 1988 and shall end June 30, 1990. The BOCs should continue to use existing lease rates in the customer's state as the basis for monthly lease rates. The use of existing rates with increases no greater than the increases in the CPI, in eight month intervals that begin with the first increase no sooner than eight months after detariffing, will provide customers with time to determine whether to continue to lease or purchase the CPE without price pressures.

7. In the *Third Order* in CC Docket 81–893 (49 FR 43667, Oct. 31, 1984), the Commission provided a framework for states to detariff embedded CPE owned by Independent Telephone Companies (ITCs). In this Order, the Commission determined that certain types of CPE owned by the BOCs should remain under tariff. Since ITC's may own the same types of embedded CPE and central office equipment, we conclude that states may allow such CPE owned by the ITCs to remain under tariff. Those states that have already complied with the requirements of the *Third Order* may revise their plans for detariffing, if desired. Such states need not file their plan revisions with this Commission. Those states required to follow the Commission plan must treat the subject embedded CPE owned by ITCs in the same manner as the BOC embedded CPE has been treated in this Order.

8. In the *Fourth Notice*, the Commission postponed a decision on Southwestern's two petitions seeking permission to detariff and transfer Automatic Call Distribution (ACD) equipment to its CPE subsidiary, Southwestern Bell Telecommunications, Inc. By letter dated September 20, 1984, to William C. Sullivan, Southwestern, the Chief, Common Carrier Bureau, requested more specific information regarding the CPE involved. In its response, Southwestern agreed to charge customers lease rates equal to tariffed leased rates for two years after the transfer, but did not commit to offering the equipment for sale. The Commission views the sale requirement as essential to the satisfaction of the equitable principles of the *Democratic Central Committee*. The Order requires that all ACD equipment owned by the BOCs remain under tariff as required herein. Therefore, the petitions are dismissed.

9. *It is ordered* that, pursuant to sections 1, 4(i), 4(j), and 201–205, 213, 218, 220 and 403 of the Communications Act of 1934, 47 U.S.C. sections 151, 154(i), 154(j), 201–205, 213, 218, 220 and 403, the policies, rules, and requirements set forth in this Order *are adopted*.

10. *It is further ordered*, that the motion to defer or consolidate proceeding filed by Bell Atlantic *is denied*.

11. *It is further ordered*, that the petitions filed by Southwestern Bell Telephone Company to detariff and transfer ACD equipment to Southwestern Telecommunications, Inc. *are denied*.

Federal Communications Commission.

H. Walker Feaster III,

Acting Secretary.

47 CFR Part 73

[MM Docket No. 84–14; RM–4631, RM–4720, RM–4828, RM–5180, RM–5181, & RM–5182]

Radio Broadcasting Services; Cookeville, Donelson, Livingston, Lebanon, Celina, South Pittsburg, Goodlettsville and Smyrna, TN

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document amends the FM Table of Allotments and denies petitions for reconsideration filed by William O. Barry and Bart Walker directed against actions in the *Report and Order* in this proceeding. William O. Barry asserts that the *Report and Order* failed to consider his proposal for Channel 234A at Lebanon, Tennessee and did not allot available Channel 294A to Donelson, Tennessee. This document states that it was not necessary to consider a proposal for Channel 234A at Lebanon because no party expressed an interest in applying for this allotment. In addition, failure to allot Channel 294A to Donelson was not error because this proposal was not advanced in any timely comments in this proceeding. In response to a separate petition, it is now appropriate to consider this Donelson proposal in a separate proceeding.

Bart Walker argues that the proposal for Channel 231A at Woodbury, Tennessee should not have been dismissed for lack of expression of interest in applying for this allotment because he expressed such an interest, albeit untimely, in reply comments. This document states that a defective proposal is not cured by a subsequent untimely expression of interest. However, an alternate channel (285A) proposal for Woodbury, with a site restriction, will now be considered in a separate proceeding.

This document also grants a petition for reconsideration by Smyrna Broadcasting Corporation to the extent of allotting Channel 231A to Smyrna, Tennessee, as its first FM Channel.

DATES: Effective April 11, 1988. The window period for filing will open on April 12, 1988, and close on May 12, 1988.

FOR FURTHER INFORMATION CONTACT: Robert Hayne, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Opinion and Order, MM Docket No. 84–14, adopted January 27, 1988, and released February 24, 1988.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transportation Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC. 20037.

BILLING CODE 6712-01-M

VETERANS ADMINISTRATION

48 CFR Parts 810, 836 and 852

Acquisition Regulations; Specifications

AGENCY: Veterans Administration.

ACTION: Final rule.

SUMMARY: The Veterans Administration (VA) is amending the VA Acquisition Regulations (VAAR) to provide agency guidance on the use of specifications, standards, and other purchase descriptions in the acquisition process. The regulation is being published as a final rule in order to supplement Federal Acquisition Regulations (FAR) 10.004(b) (2) and (3) to provide required detailed agency procedures, guidance and necessary clauses for VA contracting officers' use.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Marsha J. Grogan, Policy and Interagency Service (91A), Office of Procurement and Supply, Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420, (202) 233–3784.

SUPPLEMENTARY INFORMATION: On January 5, 1987, there was published on page 280 of the **Federal Register** a notice of interim final rulemaking. After the interim rule was issued, five additional internal changes were made to provide guidance to contracting officers in the use of descriptive literature, bid samples, contract architect-engineer specifications, the brand name or equal clause, and the restriction on submission and use of equal products clause.

Section 810.004–70(b) was revised to require contracting officers, when issuing solicitations that include "brand name or equal" purchase descriptions, to include the FAR provision at 52.214–21, Descriptive Literature, and to review the requirements of FAR 14.202–5(d) when utilizing the descriptive literature provision.

Section 810.004–70(e) was revised to inform contracting officers, when requiring bid samples, to include the provision set forth at FAR 52.214–20, Bid Samples.

In § 836.202, paragraph (c) was renumbered and a new paragraph (b) was added to prohibit the use of "brand name or equal" or other restrictive specifications by contract architect-engineers without the prior written approval of the contracting officer during the design stage. Contracting officers were also notified to inform prospective architect-engineers of this requirement prior to award of a contract for design.

The prescription of the "Brand Name or Equal" clause found at 852.210–77 was revised to change an obsolete citation.

I. Background

When the FAR was issued, it contained a new Part 10 dedicated to the use of specifications. Part 10 does not, however, provide guidance in the use of "brand name or equal" purchase descriptions and other restrictive specfications. On January 5, 1987, the VA published a VAAR interim final rule to supplement the FAR coverage by providing guidance to VA contracting officers.

One comment was received from the Office of Federal Procurement Policy, Office of Management and Budget. They noted the published VAAR change, recognized the relevance to all Federal agencies, and recommended that VA pursue a FAR revision. VA was advised by the Civilian Agency Acquisition Council to publish a final rule while FAR coverage is being developed.

II. Executive Order 12291

Pursuant to the memorandum from the Director, Office of Management and Budget, to the Administrator, Office of Information and Regulatory Affairs, dated December 13, 1984, this final rule is exempt from section 3 and 4 of Executive Order 12291.

III. Regulatory Flexibility Act (RFA)

Because this final rule does not come within the term "rule" as defined in the RFA (5 U.S.C. 601(2)), it is not subject to the requirements of that Act. In any case, this change will not have a significant impact on a substantial number of small entities because the provisions implement the requirements of the Competition in Contracting Act (CICA) as required by the FAR. The provisions are primarily internal procedures which will not impact the private sector.

IV. Paperwork Reduction Act

This final rule requires no additional information collection or recordkeeping requirement upon the public.

List of Subjects in 48 CFR Parts 810, 836 and 852

Government procurement.

Approved: March 1, 1988.

Thomas K. Turnage,

Administrator.

In 48 CFR Chapter 8, Parts 810, 836 and 852 are amended as follows:

1. The authority citation for Parts 810, 836 and 852 continues to read as follows:

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

2. In section 810.004–70, paragraphs (b) and (e) are revised to read as follows:

810.004–70 Sealed bidding.

* * * * *

(b) Solicitations using "brand name or equal" purchase descriptions will contain the "brand name or equal" provision in 852.210–77, and the provision set forth at FAR 52.214–21, Descriptive Literature. Contracting officers are cautioned to review the requirements at FAR 14.202–5(d) when utilizing the descriptive literature provision.

* * * * *

(e) When a solicitation contains "brand name or equal" purchase descriptions, bidders who offer brand name products, including component parts, referenced in such descriptions shall not be required to furnish bid samples of the referenced brand name products. However, solicitations may require the submission of bid samples in the case of bidders offering "or equal" products. If bid samples are required, the solicitation shall include the provision set forth at FAR 52.214–20, Bid Samples. The bidder must still furnish all descriptive literature in accordance with and for the purpose set forth in the "Brand Name of Equal" clause, 852.210–77(c)(1) and (2), even though bid samples may not be required.

3. In section 836.202, paragraph (b) is redesignated paragraph (c), a new paragraph (b) is added, and the first sentence in newly redesignated paragraph (c) is revised, to read as follows:

836.202 Specifications.

* * * * *

(b) The use of "brand name or equal" or other restrictive specifications by contract architect-engineers is specifically prohibited without the prior written approval of the contracting officer shall inform prospective architect-engineers of this requirement during the negotiation phase, prior to award of a contract for design.

(c) If it is determined that only one product will meet the Government's minimum needs and the VA will not allow the submission of "equal" products, the bidders must be placed on notice that the "brand name or equal" provisions of the "Material and Workmanship" clause found at FAR 52.236.5 and any other provision which may authorize the submission of an "equal" product, will not apply.* * *

852.210–77 [Amended]

4. In 852.210–77, in the introductory paragraph, remove "810.005" and add, in its place, "810.004."

852.236–90 [Amended]

5.a. In 852.236–90, in the introductory paragraph remove "836.202(b)" and add, in its place, "836.202(c)".

b. In the clause in 852.236–90 titled Restriction on Submission and Use of Equal Products (November 1986), an introductory paragraph is added immediately below the heading to the clause to read as follows:

852.236–90 Restriction on submission and use of equal products.

* * * * *

This clause applies to the following items:

____

____

____

* * * * *

[FR Doc. 88–5276 Filed 3–9–88; 8:45 am]

BILLING CODE 8320-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611, 672, and 675

[Docket No. 71267–8024]

Foreign Fishing; Groundfish of the Gulf of Alaska; Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule to implement Amendments 16 and 11a to the Fishery Management Plans for Groundfish of the Gulf of Alaska and the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMPs), respectively. These amendments accomplish the following: (1) Catcher/processor and mothership processor vessels operating in the Gulf of Alaska and Bering Sea and Aleutian Islands area are required to maintain onboard a transfer log and to report information weekly about transfers of groundfish products; (2) prohibited species in the Gulf of Alaska domestic and foreign fisheries are redefined, and three other categories of species are respecified; (3) the reserve category for some species of groundfish in the Gulf of Alaska is removed; (4) the term "target quotas" is changed to "total allowable catches" for groundfish in the Gulf of Alaska; (5) the starting date for the public comment period for proposed annual specifications is changed; (6) the Gulf of Alaska groundfish FMP is reorganized and edited; and (7) a section on vessel safety is added to the Gulf of Alaska FMP.

Items 1 through 5, above, are implemented by regulations, which are contained in the attached final rulemaking. Items 6 and 7, above, are not implemented by regulations. An additional regulatory change, not part of the amendment, expressly authorizes inseason reapportionments of domestic annual processing (DAP) groundfish amounts to joint venture processing (JVP) in the Gulf of Alaska. These regulations are intended to promote full accounting of groundfish catches in both management areas and to make clear the species in the Gulf of Alaska that are considered to be prohibited species. The reasons for these changes are given in the preamble for the proposed rule. They are necessary to adjust to the changing nature of the Alaska groundfish fisheries that are being increasingly dominated by U.S. fishermen. This action provides conservation and management measures to further the goals and objectives of the FMPs.

EFFECTIVE DATE: April 7, 1988.

ADDRESS: Copies of the amendments, environmental assessment (EA), and the regulatory impact review/final regulatory flexibility analysis (RIR/FRFA) may be obtained by contracting the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510, 907–271–2809.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg (Fishery Biologist, NMFS), 907–586–7230.

SUPPLEMENTARY INFORMATION: Domestic and foreign groundfish fisheries in the exclusive economic zones (EEZ) of the Gulf of Alaska and the Bering Sea and Aleutian Islands area are managed in accordance with the FMPs, which were developed by the North Pacific Fishery Management Council (Council) under authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act) and implemented by regulations appearing at 50 CFR 611.92 and 611.93 and Parts 672 and 675.

The Council approved for submission to the Secretary of Commerce (Secretary) the parts of Amendment 16 to the FMP for Groundfish of the Gulf of Alaska that are listed in the above summary. The Council adopted the same changes to reporting requirements as Amendment 11a to the FMP for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area.

The Secretary received these amendments on November 18, 1987, for review. The Magnuson Act requires the Secretary, or his designee, to approve, disapprove, or partially disapprove FMPs and FMP amendments before the close of the 95th day following receipt. Following receipt of Amendments 16 and 11a, the Director of NMFS, Alaska Region (Regional Director), immediately commenced a review of the amendments to determine whether they were consistent with the provisions of the Magnuson Act and any other applicable law. A Notice of Availability of the amendments was published in the **Federal Register** on November 25, 1987 (52 FR 45215). A proposed rule was filed with the Office of the Federal Register on December 16, 1987 and published on December 21, 1987 (52 FR 48303). The Notice of Availability invited review and comment on the amendments until Janaury 16, 1988. The proposed rule invited public review and comment on the regulations until January 30, 1988. This final rule implementing Amendments 16 and 11a takes comments received into account.

Comments received are summarized and responded to below.

The preamble to the proposed rule described and presented the reasons for each part of the amendments. The Secretary has reviewed each part of the proposed rule and the reasons for it. During this review, the Secretary has considered comments received from the public, fishing associations, and interested agencies. He has determined that each part of the amendment is consistent with the Magnuson Act and other applicable law. He has therefore approved each of the proposals as authorized by section 304 of the Magnuson Act within the time it requires. The following is a summary from the proposed rule of what each part requires or accomplishes:

1. New Reporting Requirements for Catcher/Processor and Mothership Processor Vessels

A. Maintain Onboard a Cargo Transfer/Off Loading Log

Operators of catcher/processor and mothership processor vessels, i.e., those vessels which process groundfish catch onboard as specified under § 672.2, will be required to maintain onboard their vessels a Cargo Transfer/Offloading Log. For each transfer of offloading of any fishery product from a regulated vessel in the EEZ, outside the EEZ, within any States' territorial waters, or within the internal waters of any State, this log will contain the following information: (a) The time, date, and location of the transfer or offloading; (b) the product weight and product type, by species or species group; (c) the name and permit number of the vessel receiving the product or, if to a shoreside location, the name of the location and commercial facility receiving the product; and (d) the intended port or destination of the receiving vessel in transferred to another vessel.

B. Submit Reports of Transferred Product Weight

Operators of catcher/processor and mothership processor vessels will be required to submit a Product Transfer Report. This report will be required for each Sunday through Saturday period, including even a zero report if no transfer is made. If a transfer is made, the report must include the product weight and the number of cartons transferred or offloaded, by product type, by species or species group.

C. Changes to the Currently Required Weekly Catch/Receipt Report

The currently required weekly catch report by catcher/processor and mothership processor vessels is renamed "Weekly Catch/Receipt and Production Report." In addition to other currently required information, information on the number of cartons and unit net weight of a carton of processed fish by species or species group is required.

2. Definition of Prohibited Species—FMP for Groundfish of the Gulf of Alaska

Four categories of species or species groups in the Gulf of Alaska are subject to management under the FMP. One of these is prohibited species. The category prohibited species includes: Any of the species of Pacific salmon (*Oncorhynchus* spp.), steelhead trout (*Salmo gairdneri*), Pacific halibut (*Hippoglossus stenolepis*), Pacific herring (*Clupea harengus pallasi*), king crab (*Paralithodes* spp., and *Lithodes* spp.) and Tanner crab (*Chionoecetes* spp.).

The other three categories are: Target species, other species, and non-specified species. The category, target species, includes pollock, Pacific cod, flounders, rockfish, and sablefish. The category, other species, includes Atka mackerel, squid, sculpins, sharks, skates, eulachon, smelts, capelin, and octopus. The category, non-specified species, are those taken incidentally in the groundfish fisheries but are not managed by the FMP. Catch records for non-specified species need not be kept.

3. Other FMP Amendments Which Require Regulatory Changes.

Regulatory changes are made to paragraphs (c) and (f) in § 672.20 to implement FMP changes in sections 4.2.1.1 and 4.2.3.1. These changes will require public comments to be invited on proposed annual specifications and prohibited species catch limits for 30 days following the date of filing of the notice for public inspection with the Office of the Federal Register. The Secretary has determined that this is a technical change to current regulations and finds that no further analysis under other Federal law is required.

4. Regulatory Changes in Addition to Those Implementing FMP Amendments

A regulatory change is made to § 672.20(d)(2) that explicitly authorizes reapportionments of surplus DAP to JVP. The Secretary has determined that this is a technical change to current regulations and finds that no further analysis under other Federal law is required.

Changes From the Proposed Rule in the Final Rule

In responses to Comment 6 (see Public Comments Received), § 672.20(c)(1) is reworded to make clear the priority of DAP over JVP in the allocation process.

Amendatory language in Items 5 and 7 for §§ 672.5 and 675.5 in the proposed rule inadvertently gave the impression that the Council intended to eliminate the current paragraphs (a)(3)(iv)(E) from each section. The FMP amendment package made available to the public by notice of availability on November 25, 1987 (52 FR 45215) clearly states that the Council intended to retain the requirement currently listed in § 672.5(a)(3)(iv)(E) and § 675.5(a)(3)(iv)(E). Therefore, in the final rule, current paragraphs (a)(3)(iv)(E) and (F) are redesignated as (F) and (G), respectively, the new paragraph (E) from the proposed rule is retained in the final rule, and the new paragraph (G) in the proposed rule is renamed paragraph (H) in the final rule.

Public Comments Received

Letters of comments were received from certain Federal agencies and from representatives of fishing associations. These comments are summarized and responded to below.

Comment 1: The new reporting requirements of catcher/processor and mothership processor vessels do not provide sufficient information that is needed to address identified fishery management problems and, therefore, the requirements will not accomplish the FMPs' conservation goals and will create enforcement inefficiencies. Therefore, National Standards 1 and 7 are violated.

Response: National Standard 1 requires that conservation and management measures shall prevent overfishing. "Overfishing" is a complex term, but NOAA has defined it as that level of fishing mortality that jeopardizes the capacity of a stock or stocks to recover to a level at which it can produce maximum biological yield or economic value on a long term basis. The new requirements for a transfer/offloading log and weekly reports of transfers and offloads will allow fisheries enforcement officials to quickly compare catch and offload information with the amount of groundfish product actually observed onboard the vessel. Thus, the new reporting requirements will provide a check against gross underlogging or misspecifying of products transferred at sea, which

BEST COPY AVAILABLE

otherwise might never be accounted for should they not go through a U.S. port where they could be subject to on-site inspections to determine compliance with the requirement to submit fish ticket reports. NMFS will use the new reporting requirements to better account for total fishing mortality, leading to a better understanding of the size and well-being of groundfish stocks, and the effectiveness of measures to conserve them. Thus, the new reporting requirements are entirely consistent with National Standard 1.

National Standard 7 requires that conservation and management measures shall, where practicable, minimize costs and avoid unnecessary duplication. Since NMFS will provide reproducible forms for the Cargo Transfer/Offloading Log and the Product Transfer Log to vessel operators, standardization of recordkeeping by the operators will be fostered. Thus, inspection officers will be able to conduct inspections more efficiently and more easily identify instances of gross underlogging, which is entirely consistent with National Standard 7.

Comment 2: Up-to-date entries in the logs at least every 24 hours should be required in the regulations and in the FMPs.

Response: The Secretary has determined that the twelve hours already provided for updating entries is sufficient time and does not constitute a burden on vessel operators.

Comment 3: The information contained in the Product Transfer Report is of little use, because it adds nothing that is not already contained in fish tickets and the new Cargo Transfer/Offloading Log and in the production part of the new Weekly Catch/Receipt and Production Report.

Response: The Product Transfer Report is necessary for operators of catcher/processor and mothership processor vessels to commit to writing and report the amount of product transferred during the week. Otherwise, operators of such vessels could transfer large quantities of groundfish products at sea and then change any entries previously made in the Cargo Transfer/Offloading Log to reflect lower than actual amounts transferred. NMFS will use the Product Transfer Report as a check against products transferred but not logged. This would be evidence of any underlogging. Such information cannot be obtained from fish tickets, which are only required when catcher/processor and mothership processor vessels return to port, and cannot be used to document product transfers made covertly at sea. Evidence of underlogging cannot be obtained from the weekly production report, since that document yields only numbers of cartons and representative weights of product that NMFS will use to compile a database to determine conversion rates and variability thereof.

Comment 4: The need to submit a fish ticket is questionable when the weekly production report and the transfer log system are used.

Response: The weekly production report and transfer log system serve different purposes from those of the fish ticket. Any discrepancies are rectified. The Weekly Catch/Receipt and Production Report is intended as a hail weight report for purposes of inseason management by NMFS. Weekly production information from the Weekly Catch/Receipt and Production Report is intended only to provide NMFS information on numbers of cartons of production and representative weights of a carton. NMFS will use this information to compile a database for determining conversion rates and variability thereof. It has nothing to do with information from fish tickets. The transfer log system, i.e., the Cargo Transfer/Offloading Log is intended to document amounts of product transferred at sea. Thus, it has a different purpose from that of a fish ticket.

The fish ticket, on the other hand, represents an edited catch report. It is edited by the Alaska Department of Fish and Game (ADF&G) when it is received. ADF&G checks the accuracy of the information submitted, including the amount of the catch, the species caught, and the statistical area where the catch came from. It contains certain information that is in addition to the Weekly Catch/Receipt and Production Report. Because it is checked, it serves as the confirmation report and supersedes the hail weight information submitted earlier in the Weekly Catch/Receipt and Production Report. Fish tickets from catcher/processors commonly are received too late for inseason management purposes.

Comment 5: Inviting comments on a proposed notice of preliminary specifications and apportionments for 30 days from date of filing, instead of date of publication, with the Office of the Federal Register would reduce the public's opportunity to perform any meaningful analysis of the notice material, and, therefore, the regulation should not be changed.

Response: As a practical matter, the interested public receives information on preliminary specifications and apportionments through the Council process, either during the meeting when recommendations are made, or from Council mailings. Because the amount of time between the December Council meetings and the first day of a new fishing year is so short, the Secretary finds that concluding the review process within a shorter time but still within standards set forth by the Administrative Procedure Act is in the public interest.

Comment 6: Regulatory text at § 672.20(c)(1), which sets a new year's DAP and JVP as the amounts harvested during the previous year plus amounts the Secretary determines will be harvested by the U.S. industry, gives the impression that the JVP specifications will actually be set without regard to DAP specifications. This section should be revised to accurately detail the workings of the domestic processor preference.

Response: The Secretary assures the respondent that domestic processor preference will continue to be upheld during the allocation process. The existing regulation has been reworded accordingly.

Classification

The Regional Director determined that the FMP amendments are necessary for the conservation and management of the groundfish fisheries in the Gulf of Alaska and Bering Sea/Aleutian Islands and that they are consistent with the Magnuson Act and other applicable law.

The Council prepared an environmental assessment (EA) for these amendments. The Assistant Administrator, Fisheries, found that no significant impact on the environment will occur as a result of this rule. A copy of the EA may be obtained from the Council at the address above and comments on it are requested.

The Assistant Secretary, NOAA, determined that this rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. This determination is based on the regulatory impact review/final regulatory flexibility analysis (RIR/FRFA) prepared by the Council. A copy of the RIR/FRFA may be obtained from the Council at the address above.

The RIR/FRFA also describes the effects this rule will have on small entities. The analysis contained in the RIR/FRFA is substantially the same as that contained in the RIR/IRFA. A copy of the FRFA may be obtained from the Council at the above address. The Assistant Secretary, NOAA, determined the action could have a significant economic impact on a substantial number of small entities.

This rule contains a collection-of-information requirement subject to the Paperwork Reduction Act. The collection of information has been approved by the Office of Management and Budget under Control Number 0648-0016.

The Council determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of Alaska. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act. The State did not respond; therefore, consistency is automatically implied.

This final rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

List of Subjects

50 CFR Part 611

Fisheries, Foreign fishing.

50 CFR Parts 672 and 675

Fisheries, Reporting and recordkeeping requirements.

Dated: March 7, 1988.

Carmen J. Blondin,

Acting Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, Parts 611, 672, and 675 are amended as follows:

PART 611—[AMENDED]

1. The authority citation for 50 CFR Part 611 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*, 16 U.S.C. 971 *et seq.*, 22 U.S.C. 1971 *et seq.*, and 16 U.S.C. 1361 *et seq.*

2. In § 611.92, paragraph (b), paragraph (c)(1) heading, and (c)(1)(i) are revised to read as follows:

§ 611.92 Gulf of Alaska groundfish fishery.

* * * * *

(b) *Categories of species.* Four categories of species are recognized for regulatory purposes and they are set forth in Table 1. The term "groundfish" means species in all categories except the "prohibited species" category.

TABLE 1.—CATEGORIES OF SPECIES INVOLVED IN THE GULF OF ALASKA GROUNDFISH FISHERY

Target species [1]	"Other Species" [2]	Prohibited species [3]	Nonspecified [4]
Pollock, Pacific cod, flounders, sablefish, rockfish, and thornyhead rockfish.	Sculpins, sharks, skates, eulachon, smelts, capelin, octopus, Atka mackerel, and squid.	Pacific herring (Clupea harengus pallasi); salmonids (Salmonidae); Pacific halibut (Hippoglossus stenolepis); king crab (Paralithodes spp. and Lithodes spp.); Tanner crab (Chionoecetes spp).	All species not included in these categories.

[1] Commercially important; specific TAC applies to each species or species group; records must be maintained.

[2] The target quota for these species as a category is set at five percent of the combined target quotas of the target species. Records of the catch or receipt of "other species" must be kept.

[3] Except to the extent that their harvest is authorized under other applicable law, the catch or receipt of these species must be minimized and, if caught or received, they must be returned to the sea immediately in accordance with § 611.11 of this Part. Records must be maintained as required by these §§ 611.9, 611.90(e)(2), and this section. Any species of fish for which there is no foreign allocation must be treated in the same manner as "prohibited species" and records must be maintained for any catches or receipts of these species, except for non-specified species.

[4] The term "non-specified species" means for purposes of this section those species that are not listed in paragraphs (b)(1), (2), and (3) of this section and are not managed under authority of other fishery management plans or under authority of the International Pacific Halibut Commission. Catch records need not be kept.

(1) The term "target species" means, for purposes of this section, species that are commercially important and are generally targeted upon by the groundfish fishery. They include pollock, Pacific cod, flounders, sablefish, rockfish, and thornyhead rockfish. Records of the catch or receipt of each target species or species group must be kept.

(2) The term "other species" means, for purposes of this section, species that currently have only slight economic value and are not generally targeted upon, but which are significant components of the ecosystem or have economic potential. They include sculpins, sharks, skates, eulachon, smelts, capelin, octopus, Akta mackerel, and squid. The total allowable catch (TAC) for those species as a category is set at five percent of the combined quotas of the TACs of the target species. Records of the catch or receipt of "other species" must be kept.

(3) The term "prohibited species" means for purposes of this section: Pacific herring (*Clupea harengus pallas*); salmonids (Salmonidae); Pacific halibut (*Hippoglossus stenolepis*); king crab (*Paralithodes* spp. and *Lithodes* spp.); Tanner crab (Chionoecetes spp.) Except to the extent that their harvest is authorized under other applicable law, the catch or receipt of these species must be minimized and, if caught or received, they must be returned to the sea immediately in accordance with § 611.11 of this Part. Records must be maintained as required by §§ 611.9, 611.90(e)(2), and this section. Any species of fish for which there is no foreign allocation must be treated in the same manner as "prohibited species" and records must be maintained of any catches or receipts of these species, except for "non-specified species". Catches or receipts of "non-specified species" must be treated in the same manner as "prohibited species", but records are not required of catches or receipts of these species.

(4) The term "non-specified species" means, for purposes of this section, species that are not listed in paragraphs (b)(1), (2), and (3) of this section and are not managed under authority of other fishery managment plans or under authority of the International Pacific Halibut Commission. Catch records need not be kept.

(c) (1) *TAC's, TALFF's, Reserves, and PSC limits.* (i) See 50 CFR Part 672, Subpart B, for procedures to determine total allowable catches (TACs), domestic annual processing (DAP), joint venture processing (JVP), reserves, total allowable level of foreign fishing (TALFF), and prohibited species catch limits. Species listed in paragraph (b)(3) and Table 1 of this section as "prohibited species," species listed in paragraph (b)(4) of this section as "non-specified species," and species for which the TALFF is zero, including species for which a PSC limit has been specified, will be treated in the same manner as prohibited species under § 611.11.

* * * * *

PARTS 672 AND 675—[AMENDED]

3. The authority citation for 50 CFR Parts 672 and 675 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

4. In § 672.3, paragraph (a) is revised to read as follows:

§ 672.3 Relation to other laws.

(a) *Federal law.* For regulations governing foreign fishing for groundfish in the Gulf of Alaska, see 50 CFR 611.92; for those governing foreign fishing for

OL

groundfish in the Bering Sea and Aleutian Islands, see 50 CFR 611.93. For regulations governing fishing for groundfish in the Bering Sea and Aleutian Islands by vessels of the United States, see 50 CFR 675; for those governing salmon fishing off Alaska, see 50 CFR Part 674; for those governing permits and certificates of inclusion for the taking of marine mammals, see 50 CFR 216.24. For regulations governing fishing for Pacific halibut by vessels of the United States, see the regulations of the International Pacific Halibut Commission at 50 CFR Part 301.

* * * * *

5. In § 672.5, paragraph (a)(3)(iv) introductory text is revised, paragraphs (a)(3)(iv)(E) and (F) are redesignated as (F) and (G), respectively, and new paragraphs (a)(3)(iv)(E), (a)(3)(iv)(H), and (a)(3)(v) are added to read as follows:

§ 672.5 Reporting requirements.

(a) * * *

(3) * * *

(iv) *Catch/receipt and product transfer report.* After notification of starting fishing by a vessel under paragraph (a)(3)(i) of this section, and continuing until that vessel's entire catch or cargo of fish has been offloaded, the operator of that vessel must submit a weekly catch/receipt and product transfer report, including reports of zero tons caught or received, for each weekly period, Sunday through Saturday, GMT, or for each portion of such a period. The catch/receipt and product transfer report must be sent to the Regional Director within one week of the end of the reporting period through such means as the Regional Director will prescribe upon issuing that vessel's permit under § 672.4 of this part. This report must contain the following information:

* * * * *

(E) The number of cartons of fish product, and the estimated unit net weight, in kilograms or pounds, of the carton of processed fish by species or species group produced by that vessel during the reporting period;

* * * * *

(H) The product weight, rounded to the nearest one-tenth of a metric ton (0.1 mt) and the number of cartons transferred or offloaded by product type and by species or species group.

(v) *Cargo transfer/offloading log.* For each transfer or offloading of fish product in the EEX, outside the EEZ, within any State's territorial waters, or within the internal waters of any State, the operator of each regulated fishing vessel must record, in a separate transfer log, the following information within twelve hours of the completion of the transfer or offloading:

(A) The time and date (GMT) and location (in geographic coordinates or if within a port, the name of the port) the transfer or offloading began and was completed;

(B) The product weight and product type, by species or species group of all fish products transferred or offloaded to the nearest one-tenth of a metric ton (0.1 mt);

(C) The name and permit number of the vessel receiving the product or, if offloaded to a shoreside location, the name of the location and commercial facility receiving the product; and

(D) The intended port or destination of the receiving vessel if transferred to another vessel.

* * * * *

6. In § 672.20, paragraph (a)(2)(i) is redesignated as (a)(2)(ii), paragraph (a)(2) introductory text is revised, a new paragraph (a)(2)(i) is added, and paragraphs (c)(1), (d)(2) and (d)(5)(i), (e)(1), and the third sentence of (f)(2)(i) are revised to read as follows:

§ 672.20 General limitations.

(a) * * *

(2) Total Allowable Catch (TAC). The Secretary, after consultation with the North Pacific Fishery Management Council (Council), will specify the annual TAC for each calendar year for each target species and the "other species" category, and will apportion the TACs among DAP, JVP, reserves, and total allowable level of foreign fishing (TALFF).

(i) The sum of the TACs specified must be within the OY range of 116,000 to 800,000 mt for target species and the "other species" category. Initial reserves are established for pollock, Pacific cod, flounder, and "other species" which are equal to twenty percent of the TACs for these species or species groups.

TABLE 1.—INITIAL (AS OF JANUARY 1, EACH YEAR) TOTAL ALLOWABLE CATCH (TAC), DOMESTIC ANNUAL HARVEST (DAH), DOMESTIC ANNUAL PROCESSING (DAP), JOINT VENTURE PROCESSING (JVP), AND TOTAL ALLOWABLE LEVEL OF FOREIGN FISHING (TALFF), ALL IN METRIC TONS. TAC=DAH+RESERVE+TALFF; DAH=DAP+JVP.

Species	Area [1]	Code	TAC	DAH	DAP	JVP	Reserve	TALFF

Shelf demersal Rockfish [4]	SEO						NA [2]	
Thornyheads	G–W	749					NA [2]	
Other sp. [5]	G–W							

[1] See Figure 1 of § 672.20 for description of regulatory area and districts. W=Western, C=Central, E=Eastern, G–W=Gulf-Wide, SE=Southeast.

[2] NA not applicable. Reserves are not established.

[3] The category "other rockfish" includes all fish of the genus (Sebastes) except the category shelf demersal rockfish as defined in footnote 3 below and *Sebastolobus* (thornyhead rockfish).

[4] Shelf demersal rockfish include *Sebastes paucispinis* (bocaccio), *S. nebulosus* (China rockfish), *S. caurinus* (copper rockfish), *S. maliger* (quillback rockfish), *S. proriger* (redstripe rockfish), *S. helvomaculatus* (rosethorn rockfish), *S. brevispinis* (silvergrey rockfish), *S. nigrocinctus* (tiger rockfish), *S. ruberrimus* (yelloweye rockfish), *S. pinniger* (canary rockfish).

[5] The category "other species" includes sculpins, sharks, skates, eulachon, smelts, octopus, Atka mackerel, and squid. The TAC is equal to 5 percent of the TACs of the target species.

* * * * *

(c) * * *

(1) *Notices of harvest limits and PSC limits.* As soon as practiable after October 1 of each year, the Secretary, after consultation with the Council, will publish a notice in the **Federal Register** specifying preliminary annual TAC, DAP, JVP, TALFF, reserves, and applicable PSC amounts for each target species, "other species" category, any species determined to be fully utilized by the DAP fisheries. The preliminary specifications of DAP will be the amounts harvested during the previous year plus any additional amounts the Secretary finds will be harvested by the U.S. fishing industry for delivery to U.S. processors. The preliminary specifications of JVP will be the amounts harvested during the previous year plus any additional amounts the Secretary finds will be harvested by the U.S. fishing industry for delivery to foreign processors, subject to reductions to accommodate increasing DAP. These additional amounts will reflect as accurately as possible to projected increases in U.S. processing and harvesting capacity and the extent to which U.S. processing and harvesting will occur during the coming year. Public comment on these amounts will be accepted by the Secretary for 30 days after the notice is filed for public inspection with the Office of the Federal Register. The Secretary will consider timely comments and, after consultation with the Council, specify the final PSC limits and annual TAC for each target species, the "other species" category, and apportionments thereof among DAP, JVP, TALFF, and reserves. These final amounts will be published as a notice in the **Federal Register** on or about January 1 of each year. These amounts will replace the corresponding amounts for the previous year.

* * * * *

(d) * * *

(2) *Apportionment of surplus DAP to JVP and surplus DAH to TALFF.* In accordance with paragraph (d)(5) of this section and as soon as practicable after April 1, June 1, and August 1, and on such other dates as he determines necessary, the Secretary will apportion to JVP any part of the DAP amounts that he determines will not be processed by U.S. processors, and may apportion to TALFF any part of the DAH amounts that he determines will not be harvested by U.S. fishermen during the remainder of the year.

* * * * *

(5) * * *

(i) *General.* The Secretary, under paragraphs (d)(1) and (d)(2) of this section, may apportion to TALFF only those amounts that he determines will not be harvested by vessels of the United States during the remainder of the fishing year, and shall apportion to JVP only those amounts he determines will be harvested by vessels of the United States during the remainder of the fishing year but will not be processed by United States processors. The amount of reserve that the Regional Director determines will be harvested by vessels of the United States may, at the discretion of the Secretary, either be apportioned to DAP or JVP, or retained in the reserves as eligible for later apportionment under paragraph (d) of this section.

* * * * *

(e) * * *

(1) Prohibited species, for the purpose of this Part, are any of the species of Pacific salmon (*Oncorhynchus* spp.), steelhead trout (*Salmo gairdneri*), Pacific halibut (*Hippoglossus stenolepis*), Pacific herring (*Clupea harengus pallasi*), king crab (*Paralithodes* spp., and *Lithodes* spp.) and Tanner crab (*Chionoecetes* spp.) caught by a vessel regulated under this Part while fishing for groundfish in the Gulf of Alaska, unless retention is authorized by other applicable law, including the regulations of the International Pacific Halibut Commission.

* * * * *

(f) * * *

(2) * * *

(i) As soon as practicable after October 1 of each year, the Secretary, after consultation with the Council, will publish a notice in the **Federal Register** specifying the proposed halibut PSC limits for JVP vessels and DAP vessels. Each halibut PSC may be apportioned among the regulatory areas and districts of the Gulf of Alaska. Public comments on the proposed halibut PSC limits will be accepted by the Secretary for 30 days after the notice is filed for public inspection with the Office of the Federal Register. The Secretary will consider timely comments in determining, after consultation with the Council, the final halibut PSC limits for the next year. A notice of these final halibut PSC limits will be published in the **Federal Register** as soon as practicable after December 15 and will also be made available to the public by the Regional Director through other suitable means.

* * * * *

PART 675—[AMENDED]

7. In § 675.5, paragraph (a)(3)(iv) introductory text is revised, current paragraphs (a)(3)(iv) (E) and (F) are redesignated as (F) and (G), respectively, and new paragraphs (a)(3)(iv)(E), (a)(3)(iv)(H), and (a)(3)(v) are added to read as follows:

§ 675.5 Reporting requirements.

(a) * * *

(3) * * *

(iv) *Catch/receipt and product transfer report.* After notification of starting fishing by a vessel under paragraph (a)(3)(i) of this section, and continuing until that vessel's entire catch or cargo of fish has been offloaded, the operator of that vessel must submit a weekly catch/receipt and product transfer report, including reports of zero tons caught or received, for each weekly period, Sunday through Saturday, GMT, or for each portion of such a period. The catch/receipt and product transfer report must be sent to the Regional Director within one week of the end of the reporting period through such means as the Regional Director will prescribe upon issuing that vessel's permit under § 675.4 of this Part. This report must contain the following information:

* * * * *

(E) The number of cartons of fish product, and the estimated unit net weight, in kilograms or pounds, of the carton of processed fish by species or species group produced by that vessel during the reporting period;

* * * * *

(H) The product weight, rounded to the nearest one-tenth of a metric ton (0.1 mt) and the number of cartons transferred or offloaded by product type and by species or species group.

(v) *Cargo transfer/offloading log.* For each transfer or offloading of fish product in the EEZ, outside the EEZ, within any State's territorial waters, or

VOL 53
ISS 47
MR 10 1988
UMI

within the internal waters of any State, the operator of each regulated fishing vessel must record, in a separate transfer log, the following information within twelve hours of the completion of the transfer or offloading:

(A) The time and date (GMT) and location (in geographic coordinates or if within a port, the name of the port) the transfer or offloading began and was completed;

(B) The product weight and product type, by species or species group, of all fish products transferred or offloaded to the nearest one-tenth of a metric ton (0.1 mt);

(C) The name and permit number of the vessel receiving the product or, if to a shoreside location, the name of the location and commercial facility receiving the product; and

(D) The intended port of destination of the receiving vessel if transferred to another vessel.

§§ 611.92, 672.20, 672.22, and 672.24 [Amended]

8. In addition to the amendments set forth above, remove the initials "TQ" and add, in their place, the initials "TAC" in the following places:
§ 611.92(c)(2)(ii)(A); Newly redesignated § 672.20(a)(2)(ii) introductory text and (ii) (A) and (B), (b)(1), and (c)(2) (i) and (ii) and (iii) (A) and (B);
§ 672.22(a)(1)(iii), (2)(i)(B) and (iii), and (3)(vi); § 672.24(b)(1), (2), and (3) (i) and (ii).

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 53, No. 47
Thursday, March 10, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 890

Federal Employees Health Benefits Program: Continuation of Coverage During Military Service

AGENCY: Office of Personnel Management.

ACTION: Proposed rulemaking.

SUMMARY: The Office of Personnel Management (OPM) is proposing to revise its Federal Employees Health Benefits (FEHB) Program regulations to permit an employee or annuitant who enters the military on active duty or active duty for training to continue his or her FEHB enrollment for up to 12 months. OPM is taking this action to make the FEHB Program consistent with the Federal Employees' Group Life Insurance (FEGLI) Program.

DATE: Comments must be received on or before May 9, 1988.

ADDRESSES: Written comments may be sent to Reginald M. Jones, Jr., Assistant Director for Retirement and Insurance Policy, Retirement and Insurance Group, Office of Personnel Management, P.O. Box 57, Washington, DC 20044, or delivered to OPM, Room 4351, 1900 E Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Bob MacKinnon, (202) 632-4634.

SUPPLEMENTARY INFORMATION: A provision of Pub. L. 99-335, the Federal Employees Retirement System Act of 1986, amended the Federal Employees' Group Life Insurance (FEGLI) law to allow the FEGLI coverage of an employee who enters the military on active duty or active duty for training to continue for up to 12 months in the same way coverage is continued for employees in other types of nonpay status.

Most individuals who need to maintain life insurance coverage would also need to maintain health insurance coverage while on military leave. Therefore, we are changing the FEHB Program to make it consistent with the FEGLI Program.

While the FEHB law permits an employee to continue his or her enrollment while in a leave-without-pay status not to exceed 1 year, it delegates the authority to OPM to prescribe regulations in this area. The current regulations require an agency to terminate the FEHB enrollment of an employee placed in leave without pay to enter the military on active duty or active duty for training in excess of 30 days. The regulations also apply to annuitants who enter active duty military service for more than 30 days. The enrollment is automatically reinstated on the day the employee is restored to a civilian position, or in the case of annuitants, on the date of separation from the military. This policy was established to protect the individual from the liability of health benefits premiums while health care is available from the military and FEHB coverage is not needed.

However, we have found that this policy may create a hardship for families when the self and family coverage of the employee or annuitant is terminated, and the individual's dependents do not accompany him or her to the military duty station. Under the existing policy, dependents of the employee or annuitants who enters on active duty in the military would be without FEHB coverage for the entire period of active duty military service. Even though the dependents would be *eligible* for benefits under the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS), they might not find it convenient from the standpoint of distance to use the CHAMPUS facilities or providers, or they might be reluctant to interrupt longstanding patient/provider relationships in their home locale. Therefore, in some circumstances, they would feel forced to pay out-of-pocket for their health care expenses due to their involuntary loss of FEHB coverage. Our proposed regulations would permit an employee to continue his or her FEHB coverage while in leave without pay for active duty military service for up to 12 months, unless he/she elects to have the enrollment terminated as of the day before entering active duty. Of course, those who continue enrollment would be responsible for paying the employee share of the premium, just like any other employee in nonpay status. A similar choice would be permitted for an annuitant in the same situation, provided the annuity does not terminate. For an annuitant, however, a continued enrollment would not terminate after 12 months, if the annuity continues while he or she is on active duty.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they primarily affect Federal employees, annuitants and former spouses.

List of Subjects in 5 CFR Part 890

Administrative practice and procedure, Government employees, Health insurance.

U.S. Office of Personnel Management.

Constance Horner,
Director.

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

Accordingly, OPM proposes to amend 5 CFR Part 890 as follows:

1. The authority citation for Part 890 continues to read as follows:

Authority: 5 U.S.C. 8913; Sec. 890.102 also issued under 5 U.S.C. 1104.

2. In § 890.304, paragraphs (a)(5) and (b)(2)(iii) are amended by adding the text set forth below to the end of the respective paragraphs:

§ 890.304 Termination of enrollment.

(a) * * *

(5) * * *, provided the employee elects, in writing, to have the enrollment so terminated.

* * * * *

(b) * * *

(2) * * *

(iii) * * *, provided the annuitant elects, in writing, to terminate the enrollment.

* * * * *

BILLING CODE 6325-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88-NM-10-AD]

Airworthiness Directives; Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to certain Boeing Model 737 series airplanes, which would require modification to the aft lavatories to reduce the risk of fire. This notice proposes to require installation of a shroud behind the towel and cup dispensers in the aft lavatories to prevent accumulation of combustible materials behind the aircraft sidewall. Accumulation of combustible materials in this inaccessible location constitutes a fire hazard.

DATES: Comments must be received no later than May 9, 1988.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 88-NM-10-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information, when available, may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Jeff Gardlin, Airframe Branch, ANM-120S; telephone (206) 431-1932. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Airworthiness Rules Docket No. 88-NM-10-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

On certain Boeing Model 737 aft lavatories, the towel and cup dispensers are open on the back side, which allows materials to fall behind the airplane sidewall. Further, when the dispenser is empty, there is direct access between the airplane cabin and the area behind the sidewall. Since any material which might accumulate behind the sidewall would be undetectable to a person in the cabin, a considerable amount of material could build up before it is noticed. In addition, materials in this location are not easily removable even if they are discovered. Since the dispenser is for the express purpose of storing paper products, it is reasonable to expect some of these paper products to fall behind the sidewall in the current installation. The area behind the sidewall contains wiring and electrical connections and, thus, the presence of combustibles constitutes a fire hazard.

Since this condition is likely to exist or develop in other airplanes of this model, the FAA is proposing an AD that would require installation of a shroud on the aft lavatory towel and cup dispenser to prevent the accumulation of flammable material behind the sidewall. (This directive would not apply to modular lavatories installed on certain Model 737 airplanes.) Boeing has made a desing change to the production airplanes and is the process of developing a service bulletin with instructions to correct this problem. The FAA may consider referencing the service bulletin in the final rule as an approved method of compliance.

It is estimated that 550 airplanes of U.S. registry would be affected by this AD, that it would take approximately 8 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. The cost of parts would not exceed $100. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $231,000.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model 737 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 30

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 737 series airplanes, equipped with non-modular aft lavatories, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent accumulation of combustible materials behind the airplane sidewall, accomplish the following:

A. Within 3 months after the effective date of this amendment, and thereafter at intervals not to exceed 3 months, until the requirements of paragraph B., below, are accomplished, inspect the area behind the towel and cup dispenser in the aft lavatories and remove all foreign material.

B. Within 15 months after the effective date of this amendment, install a shroud behind the towel and cup dispenser in the aft lavatories, which encloses the dispenser back and prevents material from falling behind the sidewall, in a manner approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

Issued in Seattle, Washington, on March 2, 1988.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 88-NM-08-AD]

Airworthiness Directives; Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to revise an existing airworthiness directive (AD), applicable to certain Boeing Model 737 series airplanes, which currently requires visual inspection for cracking, and repair or replacement, as necessary, of the skin along the upper row of fasteners of certain fuselage lap joints. This action would require the accomplishment for certain eddy current inspections, which are currently optional procedures in the existing AD. This action is necessary to ensure that cracks in the skin are detected and repaired, in order to pervent rapid depressurization.

DATES: Comments must be received no later May 10, 1988.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 88-NM-08-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara J. Baillie, Airframe Branch, ANM-120S; telephone (206) 431-1927. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM-103), Attention: Airworthiness Rules Docket No. 88-NM-08-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

On October 2, 1987, FAA issued AD 87-21-08, Amendment 39-5752 (52 FR 38395; October 16, 1987), to require visual inspection for cracking, and repair or replacement, as necessary, of the skin along the upper row of fasteners of certain fuselage lap joints on Boeing Model 737 series airplanes. Failure to detect and repair cracks could lead to rapid depressurization.

AD 87-21-08 was issued without public notice, due to its emergency status. Accordingly, long term inspection requirements were not included in the AD since public notice must be provided for such action.

The FAA has determined that, in order to maintain an adequate level of safety, it is necessary now to revise the existing AD to add a requirement for eddy current inspections to be accomplished prior to the accumulation of 30,000 landings, or within 10,000 landings after the effective date of AD 87-21-08, whichever occurs later, and repeated thereafter at certain intervals.

It is estimated that 165 airplanes of U.S. registry would be affected by this AD, that it would take approximately 188 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $1,240,800.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model 737 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By revising AD 87-21-08, Amendment 39-5752 (52 FR 38395; October 16, 1987, paragraph B., to read as follows:

B. Prior to the accumulation of 30,000 landings, or within 10,000 landings after November 2, 1987, whichever occurs later, perform inspections for cracks and/or tearstrap delamination using one of the following three options in accordance with Boeing Alert Service Bulletin 737-53A1039, Revision 3, dated August 20, 1987, or later FAA-approved revisions. This constitutes terminating action for the repetitive inspections required by paragraph A., above.

1. Perform a high frequency eddy current inspection of the skin adjacent to the upper row of longitudinal lap splice fasteners at stringer 4, both left and right side of the fuselage, from stations 360 to 1016. Repeat thereafter at intervals not to exceed 20,000 landings. If no cracks are found, prior to the accumulation of 6,000 landings after the completion of the above eddy current inspection, and thereafter at intervals not to exceed 3,000 landings until the next eddy current inspection, perform a detailed visual inspection of these same areas.

2. Perform a high frequency eddy current inspection of the skin adjacent to the upper row of longitudinal lap splice fasteners at stringer 4, both left and right sides of the fuselage, from stations 360 to 1016. Repeat thereafter at intervals not to exceed 20,000 landings. In addition, perform a tearstrap inspection for delamination. If no cracks are found and tearstrap bond is intact, prior to the accumulation of 6,000 landings after the completion of the above inspections, and thereafter at intervals not to exceed 6,000 landings, perform a detailed visual inspection for skin cracks of the areas previously inspected by eddy current.

3. Perform a high frequency eddy current inspection of the skin adjacent to the upper row of longitudinal lap splice fasteners at stringer 4, both left and right side of fuselage, from stations 360 to 1016. In addition, perform a tearstrap inspection for delamination. Repeat the eddy current inspections at intervals not to exceed 10,000 landings, and the delamination inspections at intervals not to exceed 20,000 landings.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on March 3, 1988.

Wayne J. Barlow,

Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 6

Proposed Customs Regulations Amendment Designating Tamiami Airport, Miami, FL, for Private Aircraft Reporting

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: This document announces a proposal to amend the Customs Regulations by adding Tamiami Airport, Miami, Florida, to the list of designated airports at which private aircraft arriving in the U.S. from the southern portion of the Western Hemisphere via the U.S./Mexican border, or via the Atlantic, Pacific or Gulf of Mexico coasts, must land for Customs inspection. This proposal is made to help relieve congestion at the seven other designated airports in south Florida, a condition which makes it difficult to effectively conduct Customs private airport enforcement program. Public comments are invited on the proposal for consideration before a final decision is reached on this matter.

DATES: Comments must be received on or before May 9, 1988.

ADDRESSES: Comments (preferably in triplicate) should be submitted to and may be inspected at the Regulations and Disclosure Law Branch, Room 2324, Customs Service Headquarters, 1301 Constitution Avenue NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Glenn Ross, Office of Inspection and Control (202–566–5707).

SUPPLEMENTARY INFORMATION:

Background

As part of Customs efforts to combat the problem of drug smuggling by air, in 1975 the Customs Regulations were amended to add a new § 6.14 (19 CFR 6.14), that provides in part that private aircraft arriving in the U.S. via the U.S./Mexican border must provide a notice of intended arrival with Customs (T.D. 75–201; 40 FR 33203). The section further provides that these private aircraft must land at any one of the designated airports near the U.S./Mexican border. The purpose of this regulation was to provide Customs with increased enforcement efficiency by providing tight control over air traffic arriving from the direction of countries that are major sources of illegal drugs destined for the U.S.

In our diligence to fight the national epidemic of illegal drugs, Customs has amended § 6.14, Customs Regulations, several times since 1975. Amendments have included extending coverage to private aircraft arriving via the Pacific, Gulf of Mexico, or Atlantic coasts (T.D. 83–192; 48 FR 41381); expanding coverage by modifying the definition of private aircraft (T.D. 84–236; 49 FR 46885); extending the coverage to include some flights arriving from Puerto Rico and all flights arriving from the U.S. Virgin Islands, increasing from 15 minutes to one hour the minimum time required for notice to be given prior to penetrating U.S. air space, and requiring aircraft seeking exemption from landing requirements to be equipped with functioning transponders (T.D. 86–72; 51 FR 11004); and removing San Diego International Airport (Lindbergh Field) from the list of designated airports in § 6.14 because Lindbergh Field's distance from the U.S./Mexican border was permitting smugglers to operate in the area (T.D. 86–146; 51 FR 27836).

Customs is now proposing to amend § 6.14(g), which lists designated airports at which subject aircraft must land for Customs inspection, by adding Tamiami Airport, Miami, Florida, to that list.

This proposal is in response to the congested conditions at the other seven airports in southern Florida which are already designated for private aircraft reporting. Those other airports are: Fort Lauderdale Executive Airport and Fort Lauderdale-Hollywood International Airport, in Fort Lauderdale; St. Lucie County Airport, in Fort Pierce; Key West International Airport, in Key West; Miami International Airport and Opa-Locka Airport, in Miami; and Palm Beach International Airport, in West Palm Beach. By increasing the number of airports available at which arriving private aircraft may report, the burden on existing airports should be reduced, and overall enforcement should be enhanced. The proposed designation is a continuation of Customs recent efforts to improve our private aircraft enforcement program.

Comments

Before making a determination on this matter, consideration will be given to any written comments timely submitted. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. to 4:30 p.m. at the Regulations and Disclosure Law Branch, Room 2324, Customs Service Headquarters, 1301 Constitution Avenue NW., Washington, DC 20229.

Executive Order 12291

Because this proposal relates to the organization of Customs it is not a regulation or rule subject to E.O. 12291.

Regulatory Flexibility Act

It is certified that the provisions of the Regulatory Flexibility Act ("Act") relating to an initial and final regulatory

flexibility analysis (5 U.S.C. 603, 604), are not applicable to this proposal because it will not have a significant economic impact on a substantial number of small entities. Customs routinely makes adjustments to its field organization to accommodate the volume of Customs related activity throughout the country. Although the proposal may have a limited effect upon some small entities in the area affected, it is not expected to be significant because adjusting the Customs field organization in other areas has not had a significant economic impact upon a substantial number of small entities to the extent contemplated by the Act. Nor is it expected to impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Drafting Information

The principal author of this document was Peter T. Lynch, Regulations and Disclosure Law Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

List of Subjects in 19 CFR Part 6

Customs duties and inspection, Imports, Air carriers, Aircraft, Airports.

PART 6—AIR COMMERCE REGULATIONS

1. The authority citation for Part 6 would continue to read as follows:

Authority; 5 U.S.C. 301; 19 U.S.C. 66, 1202 (Gen. Hdnote. 11), 1624; 49 U.S.C. 1474, 1509.

§ 6.14 [Amended]

2. It is proposed to amend § 6.14(g) by inserting, in appropriate alphabetical order, "Miami, Fl." in the column headed "Location", and on the same line, "Tamiami Airport" in the column headed "Name".

William Meglen,

Acting Commissioner of Customs.

Approved: March 1, 1988.

Francis A. Keating, II,

Assistant Secretary of the Treasury.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

[Docket No. 88-003N]

National Advisory Committee on Microbiological Criteria for Foods; Meeting

Notice is hereby given that a meeting of the National Advisory Committee on Microbiological Criteria for Foods will be held on Tuesday and Wednesday, April 5 and 6, 1988, in Washington, DC, from 9:00 a.m. to 5:00 p.m., at the Holiday Inn, Columbia South, 550 C Street, SW., Washington, DC. The Committee provides advice and recommendations to the Secretaries of Agriculture and Health and Human Services concerning the development of microbiological criteria by which the safety and wholesomeness of food can be assessed, including criteria for microorganisms that indicate whether food has been processed using good manufacturing practices.

The Agenda for this meeting follows:

(1) Welcome and Introduction of Members
(2) Historical Background of "An Evaluation of the Role of Microbiological Criteria for Foods"
(3) Agency Prospectus for the Committee
(4) Epidemiological Considerations
(5) Refrigerated Ready-to-Eat Product (Pull By Dates)
(6) Committee Operating Procedures
(7) Working Group Assignments
(8) Working Group Comments to the Full Committee
(9) Future Activities

The members of the National Advisory Committee on Microbiological Criteria for Foods are:

Dr. Howard Bauman, Vice President, Science & Regulatory Affairs, Pillsbury Company, 311 Second Street, SE., Minneapolis, MN 55414
Dr. William L. Brown, President, ABC Research Corporation, 3437 24th Avenue, SW., Gainesville, FL 32607
Dr. Robert L. Buchanan, Agricultural Research Service, Eastern Regional Research Center, 600 E. Mermaid Lane, Philadelphia, PA 19118
Mr. Jerry Carosella, Deputy Director, Microbiology Division, Food Safety & Inspection Service, 14th & Independence Avenue, SW., Washington, DC 2050
Dr. Mitchell Cohen, Deputy Director, Division of Bacterial Diseases, Center for Infectious Diseases, 1600 Clifton Road, Atlanta, GA 30333
Dr. Don Corlett, Director, Microbiology and Information Resources, 205 N. Wiget Lane, Walnut Creek, CA 94598
Mr. Cleve Denny, Director, Research Services, National Food Processors Association, 1401 New York Avenue, NW., Washington, DC 20005
Dr. Michael Doyle, Associate Professor, Food Research Institute, University of Wisconsin, 1925 Willow Drive, Madison, WI 53706.
Dr. Damien Gabis, President, Silliker Laboratories, Inc., 1304 Halsted Street, Chicago Heights, IL 60411
Mr. Spencer Garrett, Director, National Seafood Inspection Laboratory, National Marine Fisheries, 3209 Frederick, Pascagoulla, MS 39568–1207
Dr. Phil Hudspeth, Vice President, Research and Quality Assurance, Holly Farms Poultry, 1203 School Street, Wilkesboro, NC 28697
Mr. Kenneth Iwamoto, Director, Research Development and Quality Assurance, FRIONOR—USA, New Bedford, MA 02741
Dr. James Jay, Professor, Department of Biological Sciences, Wayne State University, 328 Old Main, Detroit, MI 48201
Dr. John Kvenberg, Food and Drug Administration, 200 C Street, SW., Room 3832, HFF–232, Washington, DC 20204
Dr. Martha Rhodes, Assistant Commissioner, Florida Department of Agriculture and Consumer Services, The Capitol, Tallahassee, FL 32399–0610
Dr. Durwood B. Rowley, U.S. Army-Natick Research Development and Engineering Center, Attn: STRNC–YM, Kansas Street, Natick, MA 01760–5020
Dr. R. B. Sleeth, Vice President, Research and Technical Services, Armour Foods, 15101 North Scottsdale, Scottsdale, AZ 85254
Dr. Bruce Tompkin, Chief Microbiologist, Director of Basic Science, Swift and Company, 1919 Swift Drive, Oak Brook, IL 60522
Dr. Michael Wehr, Administrator, Laboratory Services Division, Oregon Department of Agriculture, 635 Capitol, NE., Salem, OR 98310–0110

The Committee and working group meetings are open to the public on a space available basis. Comments of interested persons may be filed with the Committee before or after the meeting, and should be addressed to Ms. Catherine M. DeRoever, Director, Executive Secretariat, U.S. Department of Agriculture, Food Safety and Inspection Service, Room 3175 South Building, 14th and Independence Avenue, SW., Washington, DC 20250. Background materials are available for inspection by contacting Ms. DeRoever on (202) 447–3002.

Done at Washington, DC on: March 4, 1988.

Kenneth A. Gillies,
Chairman.

BILLING CODE 3410-DM-M

Forest Service

Appalachian Integrated Pest Management Gypsy Moth Demonstration Project; Environmental Impact Statement

AGENCY: Forest Service, USDA.

ACTION: Notice of Intent to prepare an Environmental Impact Statement.

SUMMARY: The Forest Service will prepare an Environmental Impact Statement (EIS) on an Appalachian Integrated Pest Management (AIPM) Gypsy Moth Demonstration Project to manage gypsy moth populations. The project area will cover approximately 13 million acres in Virginia and West Virginia, including the George Washington, Jefferson, and Monongahela National Forests, and Shenandoah National Park, as well as State and private and other Federal lands. The agency invites written comments and suggestions on the scope of the analysis. In addition, the agency gives notice of the full environmental analysis and decision-making process that will occur on the proposal, so that interested and affected people are aware of how they may participate and contribute to the final decision.

ADDRESSES: Submit written comments and suggestions concerning the scope of the analysis and requests to be included on the EIS mailing list to David P. Smith, Environmental Impact Team Leader, Southern Region, 1720 Peachtree Road NW., Atlanta, Georgia 30367, Phone (404) 347–4338.

FOR FURTHER INFORMATION CONTACT: Questions concerning the project on National Forest lands should be directed to: Forest Supervisor, George Washington National Forest, P.O. Box 233, Harrison Plaza, Harrisonburg, VA 22801, Phone (703) 433–2491; Forest Supervisor, Monongahela National Forest, USDA Building., Sycamore Street., Box 1548, Elkins, WV 26241–1548, Phone (304) 636–1800; and Forest Supervisor, Jefferson National Forest, 210 Franklin Road, SW., Roanoke, VA 24001, Phone (703) 982–6270. Questions concerning the project on the Shenandoah National Park should be directed to the Park Superintendent, Shenandoah National Park, Route 4, Box 292, Luray, VA 22835–9051, Phone (703) 999–2243.

SUPPLEMENTARY INFORMATION: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, will prepare an Environmental Impact Statement on an Appalachian Integrated Pest Management (AIPM) Gypsy Moth Demonstration Project to manage the gypsy moth. This 5 year Project will be designed to demonstrate the effectiveness of new and existing technology in an integrated pest management approach to minimize the natural spread and adverse effect of the gypsy moth.

The project area will cover approximately 13 million acres in Virginia and West Virginia, including the Monongahela, Jefferson, and George Washington National Forests, Shenandoah National Park, as well as State and private and other Federal lands. This demonstration project is in addition to normal County, State, or State/Forest Service suppression activities and normal State/APHIS eradication activities that may occur outside the AIPM Project boundary.

The EIS will include sufficient analysis to disclose the environmental effects of non-intervention and intervention activities used to manage gypsy moth populations. Gypsy Moth Suppression and Eradication Projects: Final Environmental Impact Statement as Supplemented—1985 and Final Addendum to the Final Environmental Impact Statement as Supplemented—1985, will be incorporated by reference into this EIS. The effects of implementing all alternatives in environmentally sensitive areas such as designated wildernesses will be discussed.

Public involvement will be encouraged throughout the process. Interested groups, organizations, and individuals, as well as other Federal, State and local government agencies are invited to participate in determining the major issues and sub-issues addressed in the EIS. To accomplish this, the Forest Service will mail a scoping letter to the public explaining the proposed project and requesting identification of issues pertaining to the project that should be addressed in the EIS. Public participation is especially important during the scoping process. The scoping process includes:

1. Identifying potential issues.
2. Identifying issues to be analyzed in depth.
3. Eliminating insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Exploring additional alternatives.
5. Identifying potential environmental effects of the proposed action and alternatives.
6. Determining potential cooperating agencies and task assignments.

A mailing list of individuals and organizations who have expressed past interest in management of the National Forests in or near the Project area will be used. In addition, the Forest Service will issue a press release providing additional information on the EIS and scoping for anyone not on the mailing lists used. Written requests to be included on the mailing list can be sent to David P. Smith, Environmental Impact Team Leader, at the address listed above.

A reasonable range of alternatives will be formulated by an interdisciplinary EIS team. One alternative will be a no action alternative. Other alternatives will be developed using public input from scoping and various combinations of all or part of the integrated pest management techniques used to manage the gypsy moth.

The Draft Environmental Impact Statement (DEIS) is expected to be filed with the Environmental Protection Agency (EPA) and available for public review by October 1988. The comment period on the Draft Environmental Impact Statement will be 45 days from the date the Environmental Protection Agency's Notice of Availability appears in the **Federal Register**.

It is important that those interested in the Appalachian Integrated Pest Management Gypsy Moth Demonstration Project provide comments at that time. Comments on the DEIS should be as specific as possible and may address the adequacy of the statement, or the merits of the alternatives (see The Council of Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition, Federal court decisions have established that reviews of draft EIS's must structure their participation in the environmental review of that proposal, so that it is meaningful and alert the agency to the reviewer's position and contentions, *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 553 (1978) and that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final EIS. *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final.

After the comment period ends on the draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final EIS. The final EIS is scheduled to be completed by March 1989. In the EIS, the Forest Service is required to respond to the comments and responses received (40 CFR 1503.4). The responsible official will consider the comments, responses, and environmental consequences discussed in the draft EIS, and applicable laws, regulations and policies in making a decision regarding this project. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to appeal under 36 CFR 211.18. The responsible official is Thomas N. Schenarts, Area Director, Northeastern Area, State and Private Forestry.

Dated: March 3, 1988.

Thomas N. Schenarts,
Area Director.

BILLING CODE 3410-11-M

Intent to Prepare An Environmental Impact Statement; Humboldt National Forest, NV

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Department of Agriculture, Forest Service, will prepare an environmental impact statement for a proposal to analyze the cumulative impacts of several uses of a portion of the Mountain City Ranger District, Humboldt National Forest. The project area is the Independence Mountain Range approximately 50 miles north of Elko, Nevada. The area has experienced a succession of gold mining projects since 1980. In addition, it is grazed by livestock, is habitat for a threatened species, the Lahontan cutthroat trout, and provides important watersheds to downstream irrigation users.

The analysis will identify potential conflict areas between the various uses of the National Forest, develop thresholds of concern for the effect of various uses and activities on National Forest resources, and consider a range of alternatives to best manage and mitigate the various resources of the Humboldt National Forest. An alternative will be proposed which best meets resource needs and public issues.

Federal, State, and local agencies; and other individuals or organizations who may be interested in or affected by the decision will be invited to participate in the scoping process, which will be initiated March 21, 1988. All persons and organizations on the current Humboldt N.F. mailing list of those interested in NEPA projects will be notified and invited to participate in the scoping process. Public meetings will be scheduled and advertised if issues and concerns indicate a need for further comment on April 1, 1989, and the FEIS released on June 15, 1989.

DATE: March 1, 1988.

ADDRESS: Humboldt National Forest, 976 Mountain City Highway, Elko, NV 89801.

FOR FURTHER INFORMATION CONTACT: Jerry A. Davis, Forest Planner, Humboldt National Forest, 976 Mountain City Highway, Elko, NV 89801 Phone (801) 738–5171.

B.J. Graves,

Forest Supervisor.

[FR Doc. 88–5269 Filed 3–9–88; 8:45 am]

BILLING CODE 3416-11-M

South Fork Mountain Fire Timber Salvage and Resource Recovery; Shasta-Trinity National Forests, Trinity County, CA; Intent to Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service, will prepare an environmental impact statement for the salvage of fire damaged timber and resource recovery work within the former South Fork Mountain roadless area released for multiple-use purposes by the 1984 California Wilderness Act.

The environmental impact statement will be prepared in accordance with existing approved land and resource management plans.

A range of alternatives will be examined to deal with the significant issues developed during the scoping process. One alternative will be "no action". Other alternatives will consider various methods for timber harvest and access and resource recovery measures.

Federal, State, and local agencies, potential timber purchasers, and other individuals or organizations who may be interested or affected by the decision will be invited to participate in the scoping process between now and April 1, 1988. This process will include:

1. Identification of potential issues.

2. Identification of issues to be analyzed in depth.

3. Elimination of insignificant issues; those which have been covered by a previous environmental analysis; and those issues not within the scope of this decision.

Basic resource data collection has been occurring since December, 1987, and its analysis is expected to take about two months. The draft environmental impact statement is scheduled to be available for public review and comment in May, 1988. The final environmental impact statement should be completed by July, 1988.

Robert R. Tyrrel, Forest Supervisor, Shasta-Trinity National Forests, is the responsible official. Written comments and suggestions concerning the analysis should be sent to: Forest Supervisor Robert R. Tyrrel, Shasta-Trinity National Forests, Attn: South Fork Mtn. Timber Salvage EIS, 2400 Washington Avenue, Redding, California 96001, by April 1, 1988.

Questions about the proposed action and environmental impact statement should be directed to District Ranger David Wickwire, Hayfork Ranger District, P.O. Box 159, Hayfork, CA 96041. Telephone (916) 628–5227.

Dated: March 4, 1988.

Robert R. Tyrrel,

Forest Supervisor.

BILLING CODE 3410-11-M

Soil Conservation Service

City Creek Debris Basin, Warner Draw Watershed (Work Plan October 1968), Utah

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture gives notice that an environmental impact statement is not being prepared for the City Creek Debris Basin, Warner Draw Watershed (Work Plan October 1968), Washington County, Utah.

FOR FURTHER INFORMATION CONTACT: Francis T. Holt, State Conservationist, Soil Conservation Service, 125 South State Street, P.O. Box 11350, Salt Lake City, UT 84147, telephone 801 524–5050.

SUPPLEMENTARY INFORMATION: The environmental assessment of federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Francis T. Holt, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns the construction of an uninstalled debris basin planned for flood control in the 1968 work plan. The planned work of improvement includes the construction of one debris basin (flood water retarding) dam. The dam will be approximately 70 feet in elevation from its lowest point and have a top width of 28 feet. The embankment will contain approximately 115,500 cubic yards.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Francis T. Holt.

No administrative action on implementation of the proposal will be taken until April 11, 1988.

Date: March 2, 1988.

Norman W. Priest,

Deputy State Conservationist.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

International Trade Administration

[A–588–038]

Bicycle Speedometers From Japan; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On November 16, 1987, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on bicycle speedometers from Japan. The review covers seven manufacturers and/or exporters of this merchandise to the United States and the period November 1, 1985 through October 31, 1986.

We gave interested parties an opportunity to comment on the preliminary results. We received a comment from one respondent, Tsuyama Manufacturing Co., Ltd. Based on our analysis of the one comment received, we have changed the margins from those presented in the preliminary results. The final margins are now zero percent.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Joseph A. Fargo or John R. Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–5255/3601.

SUPPLEMENTARY INFORMATION:

Background

On November 16, 1987, the Department of Commerce ("the Department") published in the **Federal Register** (52 FR 43780) the preliminary results of its administrative review of the antidumping finding on bicycle speedometers from Japan (37 FR 24826, November 22, 1972). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS"). In view of this, we will be providing both the appropriate *Tariff Schedules of the United States Annotated* ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by the review are shipments of bicycle speedometers currently classifiable under TSUSA item numbers 711.9300, 711.9820, and 732.4200 and HS item numbers 9029.20, 9029.90, and 9029.10.80.

The review covers seven manufacturesr and/or exporters of Japanese bicycle speedometers to the United States and the period November 1, 1985 through October 31, 1986.

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. We received a written comment from one respondent, Tsuyama Manufacturing Co., Ltd.

Comment

Tsuyama contends that the Department erred in its foreign market value calculation by not considering rebates given to promote certain home market sales.

Department's Position

We agree and have allowed the rebates in our final calculations.

Final Results of the Review

As a result of the comment received, we have revised our preliminary results and we determine that no margins exist for the period November 1, 1985 through October 31, 1986.

Manufacturer/Exporter	Margin (percent)
Tsuyama Mfg. Co., Ltd	0
Tsuyama Mfg. Co., Ltd./Asia Machinery Trading Co	0
Tsuyama Mfg. Co., Ltd./Himino & Co	0
Tsuyama Mfg. Co., Ltd./H. Tano & Co., Ltd	0
Tsuyama Mfg. Co., Ltd./Kozaki Trading Co., Ltd	0
Tsuyama Mfg. Co., Ltd./Kuwahara Co., Ltd	0
Tsuyama Mfg. Co., Ltd./Yagami Corporation	0

As provided for in section 751(a)(1) of the Tariff Act, no cash deposit of estimated antidumping duties shall be required for these firms.

For any shipments from the remaining known manufacturers and/or exporters not covered in this review, the cash deposit will continue to be at the rate published in the final results of the last administrative review for each of those firms (49 FR 24428, June 13, 1984, 52 HR 1170, April 10, 1987, and 52 FR 42330, November 4, 1987). For any future entries of this merchandise from a new exporter not covered in this or prior administrative reviews, whose first shipments of Japanese bicycle speedometers occurred after October 31, 1986 and who is unrelated to any reviewed firm or any previously reviewed firm, no cash deposit shall be required. These deposit requirements are effective for all shipments of Japanese bicycle speedometers entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.53a.

Date: March 4, 1988.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

[FR Doc. 88–5303 Filed 3–9–88; 8:45 am]

BILLING CODE 3510-DS-M

[A–421–701]

Brass Sheet and Strip From The Netherlands; Postponement of Final Antidumping Duty Determination

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: This notice informs the public that we have received a request from the respondent in this investigation, Metallverken Nederland, B.V. (MN), to postpone the final determination to June 15, 1988, as permitted in section 735(a) (2) (A) of the Tariff Act of 1930, as amended (the Act), (19 U.S.C. 1673(a) (2) (A)).

Based on this request, we are postponing our final determination as to whether sales of brass sheet and strip from The Netherlands have occurred at less than fair value until not later than June 15, 1988. We are also postponing our public hearing from March 28, 1988, until May 4, 1988.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: John Brinkmann, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-3965.

SUPPLEMENTARY INFORMATION: On February 8, 1988, we published a preliminary determination of sales at less than fair value with respect to this merchandise (53 FR 3612). This notice stated that if the investigation proceeded normally, we would make our final determination by April 18, 1988.

On February 12, 1988, MN requested a postponement of the final determination until not later than June 15, 1988, pursuant to section 735(a) (2) (A) of the Act. This respondent accounts for a significant proportion of exports of the merchandise to the United States. If exporters who account for a significant proportion of exports of the merchandise under investigation request an extension after an affirmative preliminary determination, we are required, absent compelling reasons to the contrary, to grant the request. Accordingly, we are postponing the date of the final determination until not later than June 15, 1988.

Public Comment

In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 9:00 a.m. on May 4, 1988, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC, 20230

Individuals who wish to participate in the hearing must submit a request to the Acting Assistant Secretary for Import Administration, Room B-099, at the above address within 10 days of publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reasons for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Acting Assistant Secretary for Import Administration by April 27, 1988. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, not less than 30 days before the final determination or, if a hearing is held, within 7 days after the hearing transcript is available, at the above address in at least 10 copies.

The U.S. International Trade Commission is being advised of this postponement, in accordance with section 735(d) of the Act. This notice is published pursuant to section 735(d) of the Act.

Gilbert B. Kaplan,
Acting Assistant Secretary for Import Administration.

March 4, 1988.

[FR Doc. 88-5304 Filed 3-9-88; 8:45 am]

BILLING CODE 3510-DS-M

[A-583-003]

Fireplace Mesh Panels From Taiwan; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: In response to requests from one respondent and one importer, the Department of Commerce has conducted an administrative review of the antidumping duty order on fireplace mesh panels from Taiwan. The review covers one manufacturer and/or exporter of this merchandise to the United States and the period June 1, 1986 through May 31, 1987. The review indicates the existence of dumping margins during the period.

Where company-supplied information was inadequate, we used the best information available for assessment purposes. As a result of the review, the Department has preliminarily determined to assess dumping duties equal to the rate found as best information available.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Arthur N. DuBois or Phyllis Derrick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377-5289/2923.

SUPPLEMENTARY INFORMATION:

Background

On July 13, 1984, the Department of Commerce ("the Department") published in the **Federal Register** (49 FR 28592) the final results of the last administrative review of the antidumping duty order on fireplace mesh panels from Taiwan (47 FR 24616, June 7, 1982). One respondent and one importer requested, in accordance with § 353.53a(a) of the Commerce Regulations, that we conduct an administrative review for the period June 1, 1986 through May 31, 1987. We published a notice of initiation on July 17, 1987 (52 FR 27036). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Yeh Sheng did not provide an adequate response to our antidumping questionnaire. For this firm we used the best information available which was the highest rate in the last administrative review.

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS"). In view of this, we will be providing both the appropriate *Tariff Schedules of the United States Annotated* ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the TSUSA number(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th and Constitution Avenue NW. Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by this review are fireplace mesh panels. Such panels are defined as precut, flexible mesh panels, both finished and unfinished, which are constructed of interlocking spirals of steel wire and are of the kind used in the manufacture of safety screening for fireplaces. This product is currently classifiable under TSUSA numbers 642.7800 and 654.0045 and HS item numbers 7314.49.00 and 7323.99.00.

The review covers one exporter of this merchandise to the United States and the period from June 1, 1986 through May 31, 1987.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the margin for Yeh Sheng is 6.40 percent.

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 8 days of publication. Any hearing, if requested, will be held 35 days after the date of publication or the first workday thereafter. Pre-hearing briefs and/or written comments from interested parties may be submitted not later than 25 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 32 days after the date of publication. The Department will publish the final results of the administrative review, including the results of its analysis of any such comments for hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. The Department will issue appraisement instructions directly to the Customs Service.

For any shipments from the remaining known manufacturers and/or exporters not covered in this review, a cash deposit shall be required at the rates published in the last administrative review (49 FR 28592, July 13, 1984). For any future entries of this merchandise from a new exporter not covered in this or in prior administrative reviews, whose first shipment occurred after May 31, 1987, and who is unrelated to any reviewed firm or any other previously reviewed firm, a cash deposit of 6.4 percent shall be required. These deposit requirements are effective for all shipments of Taiwanese fireplace mesh panels entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1674(a)(1)) and § 353.53a of the Commerce Regulations (19 CFR 353.53a).

Date: March 2, 1988.

Gilbert B. Kaplan,
Acting Assistant Secretary for Import Administration.

[FR Doc. 88-5305 Filed 3-9-88; 8:45 am]

BILLING CODE 3510-DS-M

[A-427-009]

Industrial Nitrocellulose From France; Preliminary Results of Antidumping Duty Administrative Review and Tentative Determination To Revoke

AGENCY: International Trade Adminstration/Import Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review and Tentative Determination To Revoke.

SUMMARY: In response to a request by the petitioner and Societe Nationale des Poudres et Explosifs ("SNPE"), the Department of Commerce ("the Department") has conducted an administrative review of the antidumping duty order on industrial nitrocellulose from France. The review covers SNPE, the only known manufacturer and/or exporter of French industrial nitrocellulose to the United States, and the periods August 1, 1984 through July 31, 1985 and August 1, 1985 through July 31, 1986. The review indicates no dumping margins for the period August 1, 1984 through July 31, 1985 and *de minimis* dumping margins for the period August 1, 1985 through July 31, 1986.

As a result of the review, the Department has tentatively determined to revoke the antidumping duty order.

Interested parties are invited to comment on these preliminary results and tentative determination to revoke.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: J. David Dirstine or Phyllis Derrick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2923.

SUPPLEMENTARY INFORMATION:

Background

On December 1, 1986, the Department published in the **Federal Register** (51 FR 43227) the final results of its last administrative review of the antidumping duty order on industrial nitrocellulose from France (48 FR 36303, August 10, 1983). We began the first review under our old regulations. After the promulgation of our interim final regulations, SNPE requested in accordance with § 353.53a(a) of the Commerce Regulations that we conduct an administrative review. We published the notices of initiation on July 9, 1986 (51 FR 24883) and September 16, 1986 (51 FR 32817). As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS"). In view of this, we will be providing both the appropriate *Tariff Schedules of the United States Annotated* ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the TSUSA item numbers(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by the review are shipments of industrial nitrocellulose containing between 10.8 and 12.2 percent nitrogen. Industrial nitrocellulose is a dry, white, amorphous synthetic chemical produced by the action of nitric acid on cellulose. The product comes in several viscosities and is used to form films in lacquers, coatings, furniture finishes and printing inks. These imports are currently classifiable under TSUSA item 445.2500 and under HS item numbers 3012.20.00 and 3912.90.00.

The review covers SNPE, the only known manufacturer and/or exporter of French industrial nitrocellulose to the United States, and the period August 1 1984 through July 31, 1986.

United States Price

In calculating United States price the Department used purchase price, as defined in section 772 of the Tariff Act, since all sales were made to unrelated purchasers in the United States prior to importation. Purchase price was based on the c.i.f., packed price to unrelated purchasers in the United States. We made deductions, where applicable, for foreign inland freight, foreign inland insurance, ocean freight, marine insurance, and brokerage and handling. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used home market price as defined in section 773 of the Tariff Act since sufficient quantities of such or similar merchandise were sold in the home market to provide a basis of comparison. Home market price was based on the packed, delivered price to unrelated purchasers in the home market. We made adjustments, where applicable, for inland freight, inland insurance, brokerage and handling, rebates, discounts, quantity adjustments, and differences in the physical characteristics of the merchandise, credit, and packing. No other adjustments were claimed or allowed.

Preliminary Results of the Review and Tentative Determination to Revoke

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margins exist for Societe Nationale des Poudres et Explosifs:

Period	Margin (percent)
8/1/84 to 7/31/85	0
8/1/85 to 7/31/86	0.07

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 8 days of publication.

Any hearing, if requested, will be held 35 days after the date of publication, or the first workday thereafter. Pre-hearing briefs and/or written comments from interested parties may be submitted not later than 25 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in these comments, may be filed not later than 32 days after the date of publication.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions directly to the Customs Service. Further, as provided for by section 751(a)(1) of the Tariff Act, since the margin for SNPE is 0.07 percent and, therefore, *de minimis* for cash deposit purposes, the Department shall not require a cash deposit of estimated antidumping duties for SNPE. For any future entries of this merchandise from a new exporter not covered in this or prior administrative reviews, whose first shipments occurred after July 31, 1986 and who is unrelated to the reviewed firm, no cash deposit shall be required. These cash deposit requirements are effective for all shipments of French industrial nitrocellulose, entered or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

SNPE has requested revocation of the order and, as provided for in § 353.54(e) of the Commerce Regulations, has agreed in writing to an immediate suspension of liquidation and reinstatement of the order under circumstances specified in the written agreement. SNPE has had zero or *de minimis* antidumping duty margins for three years and is the only known manufacturer and/or exporter of French industrial nitrocellulose to the United States. Therefore, we tentatively determine to revoke the order on industrial nitrocellulose from France. If this revocation is made final, it will apply to all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

This administrative review, tentative determination to revoke, and notice are in accordance with sections 751(a)(1) and (c) of the Tariff Act (19 U.S.C 1675(a)(1), (c)) and sections 353.53a and 353.54 of the Commerce Regulations (19 CFR 353.53a, 353.54).

Date: March 4, 1988.

Gilbert B. Kaplan,

Acting Assistance Secretary for Import Administration.

Low-Fuming Brazing Copper Rod and Wire From New Zealand Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: In response to a request from one manufacturer/exporter, the Department of Commerce has conducted an administrative review of the antidumping duty order on low-fuming brazing copper rod and wire from New Zealand. The review covers one manufacturer/exporter of this merchandise to the U.S. and the period August 2, 1985 through November 30, 1986. The review indicates the existence of dumping margins for the firm during the period.

As a result of the review, the Department has preliminarily determined to assess antidumping duties equal to the calculated differences between United States price and foreign market value.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Michael J. Heaney or John Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-4195/3601.

SUPPLEMENTARY INFORMATION:

Background

On December 4, 1985, the Department of Commerce ("the Department") published in the **Federal Register** (50 FR 49740) an antidumping duty order on low-fuming brazing copper rod and wire from New Zealand. One manufacturer/exporter requested in accordance with § 353.53a(a) of the Commerce Regulations that we conduct an administrative review. We published a notice of initiation of the antidumping duty administrative review on January 20, 1987 (52 FR 2123). The Department has now conducted that administrative review in accordance with section 751 of the Tarif Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to the Harmonized System ("HS"). In view of this, we will be providing both the appropriate *Tariff Schedules of the United States Annotated* ("TSUSA") item number(s) and the HS item number(s) with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and

Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as TSUSA number(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th and Constitution Avenue, NW, Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

The products covered by this review are low-fuming brazing copper rod and wire (LFB), principally of copper and zinc alloy ("brass"), of varied dimensions in terms of diameter, whether cut-to-length or coiled, whether bare or flux-coated, currently classifiable under TSUSA numbers 612.6205, 612.7220, and 653.1500, and HS item numbers 7407.21.50, 7408.11.60, 7408.19.00, 7408.21.00, 7408.22.50, 7408.29.50, 8311.10.00, 8311.20.00, 8311.30.60, and 8311.90.00.

The review covers one manufacturer/exporter of low-fuming brazing copper rod and wire from New Zealand, McKechnie Metal Products, Ltd. ("McKechnie"), to the U.S. and the period August 2, 1985 through November 30, 1986.

United States Price

In calculating United States price the Department used purchase price, as defined in section 772 of the Tariff Act. Purchase price was based on the packed, c.i.f. price to unrelated purchasers in the United States. We made adjustments, where applicable, for brokerage fees, foreign inland freight, ocean freight, and marine insurance. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used home market price, as defined in section 773 of the Tariff Act, because sufficient quantities of such or similar merchandise were sold in the home market to provide a basis for comparison. Home market price was based upon the packed, free on railhead price to unrelated purchasers in the home market. Where applicable, we made adjustments for inland freight, rebates, quantity discounts, differences in credit expenses, and differences in packing. We denied McKechnie's claim for a level-of-trade adjustment because McKechnie was unable to show what additional expenses were incurred due to sales at a different level of trade. No other adjustments were claimed or allowed.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the following margin exists during the period:

Manufacturer/exporter	Time period	Margin (percent)
McKechnie	8/2/85–11/30/86	2.16

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 8 days of publication. Any hearing, if requested, will be held 35 days after the date of publication, or the first workday thereafter. Pre-hearing briefs and/or written comments from interested parties may be submitted not later than 25 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 32 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

Further, as provided for by § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the above margin shall be required for McKechnie.

For any future entries of this merchandise from a new exporter, not covered in this or prior reviews, whose first shipment occurred after November 30, 1986, and who is unrelated to McKechnie, a cash deposit of 2.61 percent shall be required. These deposit requirements are effective for all shipments of low-fuming brazing copper rod and wire from New Zealand entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.53a.

Dated: March 2, 1988.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

Synthetic Methionine From Japan; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Noticed of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: In response to a request by a respondent, the Department of Commerce has conducted an administrative review of the antidumping finding on synthetic methionine from Japan. The review covers one manufacturer/exporter and one third-country reseller of this merchandise to the United States and the period July 1, 1986 through June 30, 1987. The review indicates there are no known shipments of this merchandise by Nippon Soda/Mitsui and Central Soya (Canada) to the United States during the period of review, and there are no known unliquidated entries.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Dennis U. Askey or John R. Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377-2923/3601.

SUPPLEMENTARY INFORMATION:

Background

On October 29, 1987, the Department of Commerce ("the Department") published in the **Federal Register** (52 FR 38953) the final results of its last administrative review of the antidumping finding on synthetic methionine from Japan (38 FR 18382, July 10, 1973). One manufacturer/exporter and one third-country reseller requested in accordance with § 353.53a(a) of the Commerce Regulations that we conduct an administrative review. We published a notice of initiation of the review on July 7, 1987 (52 FR 25445). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS"). In view of this, we will be providing both the appropriate *Tariff Schedules of the United States Annotated* ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item numbers in all new petitions filed with the Department.

A reference copy of the proposed Harmonized System Schedule is available for consultation in the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th & Constitution Avenue NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by the review are shipments of synthetic methionine currently classifiable under TSUSA item 425.0430 and HS item number 2922.42.50.

The review covers one manufacturer/exporter and one third-country reseller of Japanese synthetic methionine to the United States and the period July 1, 1986 through June 30, 1987. There were no known shipments of this merchandise to the United States by Nippon Soda/Mitsui or Central Soya (Canada) during the period, and there are no known unliquidated entries.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the following margins exist for the period July 1, 1986 through June 30, 1987:

Manufacturer/exporter/third country reseller (country)	Margin (percent)
Nippon Soda/Mitsui	[1] 3.35
Nippon Soda/Mitsui/Central Soya (Canada)	[1] 79.0

[1] No shipments during the period; margins based on last period in which there were shipments.

Interested parties may request disclosure and/or an administrative protective order within 5 days of the date of publication of this notice and may request a hearing within 8 days of publication. Any hearing, if requested, will be held 35 days after the date of publication or the first workday thereafter. Pre-hearing briefs and/or written comments from interested parties may be submitted not later than 25 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 32 days after the date of publication.

As provided for by § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the above margins shall be required for all firms listed above. For any shipments from the remaining known manufacturers, exporters, or third-country resellers not covered by this review, the cash deposit will contiue to be at the rates published in the final results of the last administrative review for each of those firms (52 FR 38953, October 20, 1987, 52 FR 10600 April 2, 1987, and 48 FR 55153, December 9, 1983).

For any future entries of this merchandise from a new exporter not covered in this or prior administrative reviews, whose first shipments occurred after June 30, 1987 and who is unrelated to any reviewed firm or previously reviewed firm, a cash deposit of 3.35 percent shall be required. This is in accordance with our practice of not using the most recently reviewed rate as a basis for cash deposit for new shippers when we have based the recent rate on best information available.

These deposit requirements are effective for all shipments of Japanese synthetic methionine entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.53a.

Date: March 4, 1988.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Transportation.

Industrial Nitrocellulose From France; Preliminary Results of Countervailing Duty Administrative Review and Tentative Determination To Revoke Countervailing Duty Order

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of Preliminary Results of Countervailing Duty Administrative Review and Tentative Determination to Revoke Countervailing Duty Order.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on industrial nitrocellulose from France. We preliminarily determine the net subsidy to be 0.26 percent *ad valorem* for the period January 1, 1984 through December 31, 1984 and 0.10 percent *ad valorem* for the period January 1, 1985 through December 31, 1985, rates we consider *de minimis*. We also tentatively determine to revoke the countervailing duty order. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Lorenza Olivas or Bernard Carreau, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTAL INFORMATION:

Background

On January 9, 1987, the Department of Commmerce ("the Department") published in the **Federal Register** (52 FR 833) the final results of its last administrative review of the countervailing duty order on industrial nitrocellulose from France (48 FR 28521, June 22, 1983). On June 27, 1986, a foreign exporter, Societe Nationale des Poudres et Explosifs ("SNPE"), requested an administrative review of the order in accordance with 19 CFR 355.10. We published the initiation on July 17, 1986 (51 FR 25923). The Department has now conducted that administrative review, in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS"). In view of this, we will be providing both the appropriate Tariff Schedule of the United States Annotated ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item numbers as well as the TSUSA item numbers in all new petitions filed with the Department. A reference copy of the proposed HS schedule is available for

consultation in the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the import specialists at their local Customs office to consult the schedule.

Imports covered by the review are shipments of French industrial nitrocellulose containing between 10.8 percent and 12.2 percent nitrogen, not explosive grade nitrocellulose which contains over 12.2 percent nitrogen. Industrial nitrocellulose is a dry, white, amorphous, synthetic chemical produced by the action of nitric acid on cellulose. Industrial nitrocellulose comes in several viscosities and is used to form films in lacquers, coatings, furniture finishes and printing ink. Such merchandise is currently classifiable as, cellulosic plastic materials, other than cellulose acetate, under TSUSA item 445.2500. This product is currently classifiable under HS item 3912.2000. We invite comments from all interested parties on this HS classification.

The review covers the period January 1, 1984 through December 31, 1985, and nine programs: (1) A grant from the Ministry of Defense; (2) a grant from DATAR; (3) the assumption of labor costs for civil servants; (4) a government equity infusion; (5) research and development assistance; (6) financing from the Fonds de Development Economique et Social; (7) loans from Credit National; (8) financing from the Caisse des Depots et Consignations; and (9) loans from the Ministry of Research and Industry. SNPE is the only known French producer and exporter of this merchandise to the United States.

Analysis of Programs

(1) Grant from the Ministry of Defense

The Ministry of Defense provided a grant to SNPE in 1975 to modernize the company's Bergerac plant, where industrial nitrocellulose (among other products) is produced. Because this grant was limited to a specific industry, we preliminary determine that it constitutes a subsidy.

To calculate the benefit, we applied the grant methodology outlined in the Subsidies Appendix to the notice of *Cold-Rolled Carbon Steel Flat-Rolled Products From Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order* (40 FR 18006, April 26, 1984). We allocated the grant over 10 years, the average useful life of assets in the nitrocellulose industry, according to the Asset Guideline Classes of the Internal Revenue Service. We used as the discount rate the 1975 national average corporate bond rate in France (as reported in Morgan Guaranty Trust Company's *World Financial Markets*) because we have no information on SNPE's weighted cost of capital for that year. On this basis, we preliminary determine the benefit from this program to be 0.17 percent *ad valorem* for the period January 1, 1984 through December 31, 1984. For 1985, there is no benefit from this program because the stream of benefits from the 1975 grant ended in 1984.

(2) DATAR Grant

The Delegation a l'Amenagement du Territoire et a l'Action Regionale ("DATAR") coordinates the programs of various government agencies that provide incentives to establish or expand businesses in certain regions of France. SNPE received a grant from DATAR in 1979 to improve the production facilities and general infrastructure of the Bergerac plant. Because grants received from DATAR provide benefits to specific regions, we preliminarily determine that this program constitutes a subsidy.

Using the same methodology as described for the Ministry of Defense grant, we allocated the grant over 10 years and used as the discount rate the 1979 national average corporate bond rate in France. On this basis, we preliminarily determine the benefit from this program to be 0.03 percent *ad valorem* for the period January 1, 1984 through December 31, 1984 and 0.03 percent *ad valorem* for the period January 1, 1985 through December 31, 1985.

(3) Assumption of Labor Costs for Civil Servants

Some employees of SNPE retain government civil service status ("status employees") as a result of the company's change from a government agency to a government-owned private corporation in 1971. SNPE is responsible for paying the wages and benefits of all its employees. In general, SNPE's contribution for certain nonwage benefits, such as health insurance, pensions, and unemployment insurance, is lower for its status employees than for other employees. Because the French government assumes part of SNPE's contributions for status employees, we preliminarily determine that this program constitutes a subsidy.

To calculate the benefit, we took the average annual difference between SNPE's nonwage benefits for status employees and those for other employees and multiplied that amount by the number of status employees involved in industrial nitrocellulose production. We allocated the result over total sales of industrial nitrocellulose during the period of review. On this basis, we preliminarily determine the benefit from this program to be 0.06 percent *ad valorem* for the period January 1, 1984 through December 31, 1984 and 0.07 percent for the period January 1, 1985 through December 31, 1985.

(4) Government Equity Infusion in SNPE

In 1984, the Government of France increased its equity holdings in SNPE by a small amount. In the final determination (48 FR 11971, March 22, 1983) and the final results of our last administrative review in this case, we found that the creation of SNPE in 1971 and the government's equity infusion between 1972 and 1983 were consistent with commercial considerations. To determine whether the purchase of additional shares by the French government was made in accordance with commercial considerations, we examined SNPE's financial statements for 1983, the most recent information available at the time of the 1984 infusion.

As in previous years, SNPE had a positive cash flow and earned a profit in 1983. The company's profitability ratios (return on equity, return on sales), leverage ratios (equity as a percentage of debt, capitalization ratio), and liquidity ratios (current ratio, quick ratio, times interest earned) all remained healthy in 1983. Given SNPE's favorable financial data at the time of the French government's equity infusion, we preliminarily determine that the government's 1984 equity infusion in SNPE does not constitute a subsidy. Since the French government made no new equity investments in SNPE in 1985, we preliminarily determine that there were no benefits received from this program in 1985.

(5) Other Programs

We also examined the following programs and preliminarily determine that SNPE did not use them during the period of review:

(a) Research and development assistance;

(b) Financing from the Fonds de Developpement Economique et Social;

(c) Preferential loans from Credit National;

(d) Financing from the Caisse des Depots et Consignations; and,

(e) Loans from the Ministry of Research and Industry.

BEST COPY AVAILABLE

Preliminary Results of Review and Tentative Determination

As a result of our review, we preliminarily determine the net subsidy to be 0.28 percent *ad valorem* for the period January 1, 1984 through December 31, 1984, and 0.10 percent *ad valorem* for the period January 1, 1985 through December 31, 1985. The Department considers any rate less than 0.50 percent *ad valorem* to be *de minimis.*

The Department therefore intends to instruct the Customs Service to liquidate, without regard to countervailing duties, all entries of this merchandise exported on or after January 1, 1984 and on or before December 31, 1985.

Further, the Department intends to instruct the Customs Service to waive deposits of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

SNPE has requested that the Department revoke the countervailing duty order based on the absence of a net subsidy for at least two years, as provided in 19 CFR 355.42(b). Furthermore, in accordance with 19 CFR 355.42(e), SNPE has agreed in writing to an immediate suspension of liquidation and reinstatement of the order if circumstances develop which indicate that the merchandise thereafter imported into the United States is benefiting from a net subsidy on its manufacture, production, or exportation. We have found *de minimis* benefits for reviews covering the period March 1, 1983 through December 31, 1985. In addition, the benefits declined in each year during this period and, based on our grant methodology, would continue to decline if we conducted further administrative reviews. We therefore tentatively determine to revoke the countervailing duty order.

If the revocation is made final, it will apply to all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. The revocation will not become final until the completion of an administrative review establishing no net subsidy for the period January 1, 1986 through the date of publication of this notice.

Interested parties may submit written comments on these preliminary results and tentative determination to revoke within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 30 days from the date of publication, or the first workday afterwards. Any request for an administrative protective order must be made no later than five days after the date of publication. The Department will publish the final results of this administrative review, including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review, tentative determination to revoke, and notice are in accordance with sections 751(a)(1) and (c) of the Tariff Act (19 U.S.C. 1675(a)(1)) and (c) and §§ 355.10 and 355.42 of the Commerce Regulations (9 CFR 355.10 and 355.42).

Gilbert B. Kaplan,

Acting Assistant Secretary Import Administration.

Certain Refrigeration Compressors From the Republic of Singapore; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of Preliminary Results of Countervailing Duty Administrative Review.

SUMMARY: The Department of Commerce has conducted an administrative review of the agreement suspending the countervailing duty investigation on certain refrigeration compressors from the Republic of Singapore. The review covers the period January 1, 1985 through December 31, 1985 and three programs.

As a result of the review, the Department preliminarily determines that Matsushita Refrigeration Industries (Singapore) Pte. Ltd., Matsushita Electric Trading (Singapore) Pte. Ltd., and the Government of the Republic of Singapore, the signatories to the suspension agremeent, have complied with the terms of the agreement. The Department also preliminarily determines that the net bounty or grant to be offset by the export charge is 4.95 percent of the f.o.b. value of the merchandise. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Cynthia Sewell or Paul McGarr, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On November 7, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 51167) a notice of suspension of countervailing duty investigation regarding certain refrigeration compressors from the Republic of Singapore. On November 26, 1986, the petitioner, Tecumseh Products Company, Inc., requested in accordance with § 355.10 of the Commerce Regulations an administrative review of the suspension agreement. We publihsed the initiation of the administrative review on December 18, 1986 (51 FR 45364). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to the Harmonized System ("HS"). In view of this, we will be providing both the appropriate Tariff Schedules of the United States Annotated ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230. Additionally, all Customs offices have reference copies,and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by the review are shipments of Singaporean hermetic refrigeration compressors rated not over one-quarter horsepower. Such merchandise is currently classifiable under TSUSA item number 661.0900. These products are currently classifiable under HS item number 8414.30.00—0.

We invite comments from all interested parties on this HS classification.

The review covers one producer, Matsushita Refrigeration Industries (Singapore) Pte. Ltd. (MARIS), and its exporter, Matsushita Electric Trading (Singapore) Pte. Ltd (METOS). These two companies, along with the Government of the Republic of Singapore, are the signatories to the suspension agreement. The review covers the period January 1, 1985 through December 31, 1985, and three programs.

Tecumseh alleged that a significant increase in exports of compressors from Japan to the United States and a decrease in exports to the United States from Singapore may be the result of transshipment of Singapore-produced compressors through Japan, which is a violation of the suspension agreement.

At verification, we examined company and government figures for exports of the subject compressors as well as invoices and bills of lading for country of destination and shipping routes. We found that: (1) the value of exports from Singapore to the United States during the review period compared very closely to statistics for U.S. imports of the subject compressors from Singapore during the same period; (2) that METOS' few shipments of the subject compressors to Japan were to its parent company and that the total value of these shipments was far too small to account for the increase in the quantity of Japanese compressor exports to the United States; and (3) that exports from Singapore were often routed on ships that had stopovers in Japan but that these exports were included in the reported value of exports from Singapore that we verified. In short, we found no evidence to indicate that METOS was transshipping compressors to the United States through its parent in Japan.

Analysis of Programs

(1) The Economic Expansion Incentives Act—Part IV

Part IV of the Economic Expansion incentives Act allows a 90 percent tax exemption on a company's profits if the company is designated as an export enterprise. MARIS is so designated and used this tax exemption during the period of review.

MARIS exports only refrigeration compressors, all of them through METOS. To calculate the benefit, we divided MARIS' tax savings from the program by the f.o.b. value of METOS' total exports of MARIS' refrigeration compressors. On this basis, we preliminarily determine the benefit from this program to be 4.95 percent of the f.o.b. value of the merchandise.

(2) Financing through the Monetary Authority of Singapore

The suspension agreement prohibits MARIS and METOS from applying for and receiving any financing provided by the rediscount facility of the Monetary Authority of Singapore for shipments of the subject refrigeration compressors to the United States. During verificaton, we found that neither MARIS nor METOS received any financing through the Monetary Authority on the subject compressors exported to the United States during the review period. Therefore, we preliminarily determine that both companies have complied with this clause of the agreement.

(3) Technical Assistance Fee Payments

Tecumseh claims that the technical assistance fees paid by MARIS to its Japanese parent company, Matsushita Electric Industrial Co., continue to remain extremely high and excessively reduce MARIS' tax liability.

The Economic Development Board ("EDB") and the Inland Revenue Department review technical assistance fees to ensure that they are not excessive. We found at verification that the EDB not only approved the amount of royalty payments made by MARIS for technical assistance but also, after extensive review and revision of the technical assistance agreement, approved an increase in technical assistance fees. Therefore, we preliminarily determine that these payments are not excessive and do not confer a countervailable benefit on MARIS.

Preliminary Results of Review

As a result of our review, we preliminarily determine that the signatories have complied with the terms of the suspension agreement, including the payment of the provisional export charge of 5.86 percent for the period January 1, 1985 through July 25, 1985 and 4.92 percent for the period July 26, 1985 through December 31, 1985. We also preliminarily determine the net bounty or grant to be 4.95 percent of the f.o.b. value of the merchandise for the review period. The suspension agreement states that the Government of Singapore will offset completely with an export charge the net bounty or grant calculated by the Department.

Following the methodology outlined in section B.4 of the agreement, the Department preliminarily determines that, for the period January 1, 1985 through July 25, 1985, a negative adjustment may be made to the provisional export charge of 5.86 percent established in the notice of suspension of countervailing duty investigation and that, for the period July 26, 1985 through December 31, 1985, a positive adjustment must be made to the provisional export charge of 4.92 percent established in the notice of the final results of the first administrative review of suspension agreement (50 FR 30493, July 26, 1985). For the period January 1, 1985 through July 25, 1985, the Government of Singapore may refund the difference to the companies. For the period July 26, 1985 through December 31, 1985, the Government of Singapore shall collect, in accordance with section B.4.c. of the agreement, the difference plus interest, calculated in accordance with section 778(b) of the Tariff Act, within 30 days of notification by the Department.

The Department intends to notify the Government of Singapore that the provisional export charge on all exports to the United States with Outward Declarations filed on or after the date of publication of the final results of this administrative review shall be 4.95 percent of the f.o.b. value of the merchandise.

The agreement can remain in force only as long as shipments covered by it account for at least 85 percent of imports of the subject Singaporean refrigeration compressors into the United States. Our information indicates that the two companies accounted for 100 percent of imports into the United States of this merchandise during the review period.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days after the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday following. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751 of the Tariff Act (19 U.S.C. 1675(a)(1)(C)) and § 355.10 of the Commerce

Short-Supply Review on Certain Hot-Rolled Steel Sheet; Request for Comments

AGENCY: Import Administration/International Trade Administration, Commerce.

ACTION: Notice of request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short-supply determination under Article 8 of the U.S.-Australia, U.S.-EC and U.S.-Korea Arrangements Concerning Trade in Certain Steel Products, Article 7 of the U.S.-Venezuela Arrangement Concerning Trade in Certain Steel Products, Article 8 of the U.S.-Mexico Understanding Concerning Trade in Certain Steel Products, and Paragraph 8 of the U.S.-Japan Arrangement Concerning Trade in Certain Steel Products, with respect to certain hot-rolled steel sheet used in the production of pipe and tubing.

DATE: Comments must be submitted on or before March 21, 1988.

ADDRESS: Send all comments to Nicholas C. Tolerico, Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230, (202) 377-0159.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-Australia, U.S.-EC and U.S.-Korea Arrangements Concerning Trade in Certain Steel Products, Article 7 of the U.S.-Venezuela Arrangement Concerning Trade in Certain Steel Products, Article 8 of the U.S.-Mexico Understanding Concerning Trade in Certain Steel Products, and Paragraph 8 of the U.S.-Japan Arrangement Concerning Trade in Certain Steel Products provides that if the U.S. determines that because of abnormal supply or demand factors, the U.S. steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors), an additional tonnage shall be allowed for such product or products.

We have received a short-supply request for four types of hot-rolled steel sheet, 29.5 to 66.0 inches in width, 0.143 to 0.335 inch in thickness, with coil weights of 20,000–55,000 pounds. The products are:

(A) 0.28–0.34 percent carbon, 1.30–1.60 percent manganese, 0.10–0.25 percent silicon, a minimum of 0.025 percent aluminum, and a maximum of 0.008 percent sulphur and 0.028 percent phosphorus, for use in the manufacture of American Petroleum Institute (API) grade J–55 oil country tubular goods (OCTG).

(B) 0.35–0.39 percent carbon, 1.30–1.60 percent manganese, 0.10–0.25 percent silicon, a minimum of 0.025 percent aluminum, and a maximum of 0.008 percent sulphur and 0.028 percent phosphorus, for use in the manufacture of API grade K–55 OCTG.

(C) 0.35–0.39 percent carbon, 1.30–1.60 percent manganese, 0.10–0.25 percent silicon, a minimum of 0.025 percent aluminum, 0.15–0.25 percent molybdenum, and a maximum of 0.008 percent sulphur and 0.028 percent phosphorus, for use in the manufacture of API grade N–80 OCTG.

(D) 0.22–0.28 percent carbon, 0.90–1.15 percent manganese, 0.10–0.25 percent silicon, a minimum of 0.025 percent aluminum, and a maximum of 0.005 percent sulphur and 0.028 percent phosphorus, for use in the manufacture of : American Society of Testing Materials specification A–53 pipe, grades A and B; API 5L pipe, grades A, B, and X; and API grades N–80 and L–80 OCTG, or proprietary grade S–95 OCTG.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than (March 21, 1988). Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly identify the business proprietary portion of the submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Room B–099, Import Administration, U.S. Department of Commerce at the above address.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

Short-supply Review on Certain Wire Rod; Request for Comments

AGENCY: Import Administration/International Trade Administration, Commerce.

ACTION: Notice and Request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for short-supply determination under Article 8 of the U.S.-Trinidad and Tobago Arrangement Concerning Trade in Certain Steel Products, with respect to certain low carbon steel wire rod.

DATE: Comments must be submitted on or before March 21, 1988.

ADDRESS: Send all comments to Nicholas C. Tolerico, Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Adminsitration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230 (202) 377–0159.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-Trinidad and Tobago Arrangement Concerning Trade in Certain Steel Products provides that if the U.S. ". . . determines that because of abnormal supply or demand factors, the U.S. steel industry will be unable to meet demand in the USA for a particular product, (including substantial objective evidence such as allocation, extended delivery periods, or other relevant (factors) an additional tonnage shall be allowed for such product or products. . . ."

We have received a short-supply request for AISI grade 1008 wire rod 5.5mm in diameter, and AISI grade 1010 wire rod in diameters ranging from 5.5mm through 12mm.

Any party interested in commenting of this request should send written comments as soon as possible, and no later than March 21, 1988. Comments should focus on the economic factors

involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly so label the business proprietary portion of the submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Room B-099, Import Administration, U.S. Department of Commerce at the above address.

Short-Supply Review on Certain Semi-Finished Steel Billets; Request for Comments

AGENCY: Import Administration/International Trade Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short-supply determination under Article 8 of the U.S.-EC Arrangement Concerning Trade in Certain Steel Products, the U.S.-Brazil Arrangement Concerning Trade in Certain Steel Products, the U.S.-Finland Understanding Concerning Trade in Certain Steel Products, the U.S.-Australia Arrangement Concerning Trade in Certain Steel Products, and the U.S.-Trinidad Arrangement Concerning Trade in Certain Steel Products, with respect to certain semi-finished steel billets.

DATE: Comments must be submitted no later than March 21, 1988.

ADDRESS: Send all comments to Nicholas C. Tolerico, Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230, (202) 377–0159.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-EC, U.S.-Brazil, U.S.-Australia, and U.S.-Trinidad steel arrangements, and the U.S.-Finland Understanding, provides that if the U.S. determines that because of abnormal supply or demand factors, the United States steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors), an additional tonnage shall be allowed for such product or products.

We have received a short-supply request for ingot/bloom cast and continously cast carbon and alloy steel billets, including cold-heading and cold-finishing quality, high carbon quality, welding quality, and special quality billets. The requested billets are of a square cross section measuring 4 inches on each side, and in lengths of 30–34 feet and 39–41 feet.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than March 21, 1988. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Short-Supply Review of Certain Wide Tinplate; Request for Comments

AGENCY: Import Administration/International Trade Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short-supply determination under Article 8 of the U.S.-EC Arrangement Concerning Trade in Certain Steel Products with respect to certain wide tinplate, in coils, for use in the production of beverage and soup cans.

DATE: Comments must be submitted on or before March 21, 1988.

ADDRESS: Send all comments to Nicholas C. Tolerico, Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue, NW., Washington, DC 20230, telephone (202) 377–0159 or telefax (202) 377–1388.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-EC Arrangement Concerning Trade in Certain Steel Products provides that if the United States determines that, because of abnormal supply or demand factors, the U.S. steel industry will be unable to meet demand in the United States for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors), an additional tonnage shall be allowed for such product or products.

We have received a short-supply request for certain tinplate, in coils, in widths of 43 to 47 inches, thicknesses of 0.0099 to 0.01298 inch, with tin-coating weights of 0.20 to 0.35 pounds of tin per base box, temper designation T4–CA, and shot-blast finish, for use in the manufacture of beverage and soup cans.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than March 21, 1988. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. BILLING CODE 3510-DS-M

Export Trade Certificate of Review

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice of application.

SUMMARY: The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an Export Trade Certificate of Review. This notice summarizes the conduct for which certification is sought and requests comments relevant to whether the certificate should be issued.

FOR FURTHER INFORMATION CONTACT: John E. Stiner, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (Pub. L. 97-290) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A certificate of review protects its holder and the members identified in it from private treble damage actions and from civil and criminal liability under Federal and state antitrust laws for the export conduct specified in the certificate and carried out during its effective period in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the **Federal Register** identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination whether a certificate should be issued. An original and five (5) copies should be submitted not later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Room 5618, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 88-00002." A summary of the application follows.

Applicant: Olde South Traders, Inc., 101 N. Monroe Street, Suite 1000, Tallahassee, Florida 32301, Contact: James A. Edson, President. Telephone: (904) 496-2944.

Application number: 88-00002.

Date Deemed Submitted: February 26, 1988.

Members (in addition to applicant): Daniels Lumber, Inc.; Metcalf Lumber Company, Inc.; T.R. Miller Mill Company, Inc. (Controlling Entity: Longlead Limited); Nekoosa Packaging Corporation (Controlling Entity: Great Northern Nekoosa Corporation); Rex Lumber Company; and Varn Wood Products Company.

Summary of the Application

Export Trade

Products

Processed and semi-processed forest products ("forest products") including but not limited to semi-finished lumber, finished lumber, treated wood products, wood chips, shavings, and veneer.

Export Trade Facilitation Services (as they relate to the export of products)

Marketing, selling, brokering, shipping, handling, common marking and identification, consulting, international market research, advertising and sales promotion, insurance, product research and design, legal assistance, trade documentation, communication and processing of foreign orders, warehousing, foreign exchange, financing and taking title to goods.

Export Markets

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operation

Olde South Traders, Inc. (OSTI) seeks certification to:

(1) Enter into exclusive agreements with its Members to act as their exclusive Export Intermediary for forest products.

(2) Meet with its Members to negotiate and agree on the terms of their participation in each bid, invitation or request to bid, or other sales opportunity in any Export Market, including, but not limited to, the price at which a Member will sell its forest products and related services for export, and the quantity of products each Member will commit to the foreign sale or bid opportunity. During the course of such meetings, the following information may be exchanged:

a. Information that is already generally available to the trade or public.

b. Information that is specific to a particular Export Market, including, but not limited to, reports and forecasts of sales, prices, terms, customer needs, selling strategies and product specifications by geographical area, and by individual customers within the Export Market.

c. Information on expenses specific to exporting to a particular Export Market (such as ocean freight, inland freight to the terminal or port, terminal or port storage, wharfage and handling charges, insurance, agents' commissions, export sales documentations and service and export sales financing).

d. Information on U.S. and foreign legislation and regulations affecting sales to a particular Export Market.

e. Information on OSTI's activities in the Export Markets, including, but not limited to, customer complaints and quality problems, visits by customers located in Export Markets, and reports by foreign sales representatives.

f. Information on supply and demand for forest products in export trade including the quantities of particular products desired by export customers, the supply of such products, based on domestic supply and demand, available for export trade, anticipated export prices, quality standards, packaging standards and primary production schedules.

g. Information on specific prices and quantities involved in specific domestic transactions furnished by each Member individually, and on a confidential basis, to OSTI's manager who will use such information to compute averages and trends regarding domestic prices and quantities for disclosure to the Members in an aggregated form. The manager shall not disclose to any Member the specific information furnished by any other Member.

(3) Enter into exclusive agreements with other Export Intermediaries for the sale of forest products in the Export Markets, whereby:

a. The Export Intermediary agrees not to represent competitors of OSTI in the sale of forest products and related services in any Export Market.

b. The Export Intermediary agrees not to buy forest products and related services from OSTI's competitors.

(4) Enter into exclusive agreements with foreign customers of forest products and related services offered by OSTI whereby the customer agrees not to purchase the forest products and related services from OSTI's competitors.

(5) Discuss and agree with its Members on the export prices to be

charged by OSTI or its Members for the sale of forest products or related services direct to an Export Market or to a domestic or foreign exporter for ultimate sale in an Export Market.

(6) Limit membership in OSTI.

(7) Publish and distribute a list of the export prices to be charged by OSTI or its Members.

(8) Allocate orders for export sales, and divide profits from such sales, among its Members as provided in the membership agreement between OSTI and its Members.

(9) Purchase forest products from its Members and non-members for direct export to an Export Market or for sale to a domestic or foreign exporter for ultimate sale in an Export Market.

Date: March 3, 1988.

John E. Stiner,

Director, Office of Export Trading Company Affairs.

COMMISSION OF FINE ARTS

The 1988 National Capital Arts and Cultural Affairs Program; Grant Applications

Notice is hereby given that the administration of Pub. L. 99-190, as amended, authorizing the National Capital Arts and Cultural Affairs Program has been transferred from the National Endowment of Humanities to the Commission of Fine Arts. Accordingly all requests for information and applications for grants should be addressed to: Charles H. Atherton, Secretary, Commission of Fine Arts, 708 Jackson Place, NW., Washington, DC 20006, Phone: 202-566-1066.

Deadlines for receipt of submission of grants applications is 15 April 1988.

This program provides grants for general operating support of organizations whose primary purpose is performing, exhibiting, and/or presenting the arts. To be eligible for these grants, organizations must be located in the District of Columbia, must be not-for-profit, non-academic institutions of demonstrated national repute, and must have annual income, exclusive of federal funds, in excess of one million dollars for the current year and for the past three years.

Charles H. Atherton,

Secretary.

BILLING CODE 6330-01-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Limits for Certain Wool and Man-Made Fiber Textiles and Textile Products from the Socialist Republic of Romania

March 7, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 11, 1988. For further information contact Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 343-6497. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption, and withdrawal from warehouse for consumption, of wool and man-made fiber textiles and textile products, produced or manufactured in Romania and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988, in excess of the designated limits.

Background

Under the terms of section 204 of the Agricultural Act of 1956, as amended, the Bilateral Wool and Man-Made Fiber Textile Agreement, effected by exchange of notes dated November 7 and 16, 1984, between the Governments of the United States and the Socialist Republic of Romania has been translated to establish a specific limit for man-made fiber yarn in Category 604; a consultation level for wool and man-made fiber non-apparel products in Categories 410, 414, 464-469, 611-629, 665-670, as a group, (Group II), within the group individual levels for Categories 410, 465, 618, and 666; a specific limit for wool and man-made fiber apparel products in Categories 431-459, 630-659, as a group (Group III), within the group specific limits for Categories 433/434, 435, 443, 444, 635, 638/639, 643/644, (not knit), and 645/646; designated consultation levels for Categories 442, 448, 459, 633, 634, 640, 641, 643/644 (knit), 647, 648 and 659; and a minimum consultation level for Category 642, produced or manufactured in Romania and exported during the twelve-month period beginning on January 1, 1988 and extending through December 31, 1988.

Charges will be made to the limits established for the foregoing categories as the data become available.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 7, 1988.

Committee For the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Wool and Man-Made Fiber Textile Agreement of November 7 and 16, 1984, between the Governments of the United States and the Socialist Republic of Romania; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on March 11, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of wool and man-made fiber textiles and textile products in the following categories, produced or manufactured in Romania and exported during the twelve-month period beginning on January 1, 1988 and extending through December 31, 1988, in excess of the following restraint limits:

Category	12-mo. restraint limit
604	3,484,601 pounds.
Group II	
410, 414, 464-469, 611-629, 665-670, as a group.	12,000,000 square yards equivalent.
Sublevels within the Group II	
410	200,000 square yards.
465	1,550,000 square feet.
618	2,000,000 square yards.
666	256,410 pounds.

Category	12-mo. restraint limit
Group III	
431–459, 630–659, as a group.	44,961,880 square yards equivalent.
Sublevels within Group III	
433/434	6,674 dozen.
435	3,451 dozen.
442	6,500 dozen.
443	97,236 numbers.
444	50,028 numbers.
448	6,500 dozen.
459	75,000 pounds.
633	44,199 dozen.
634	53,687 dozen of which not more than 17,063 dozen shall be in non-knit coats in Category 634pt.[1] and not more than 36,604 dozen shall be in knit coats in Category 634pt.[2]
635	59,891 dozen.
638/639	329,492 dozen.
640	70,150 dozen.
641	44,850 dozen.
642	39,325 dozen.

643pt./644pt. (knit) [4]	24,996 numbers.
645/646	233,944 dozen.
647	80,737 dozen.
648	57,746 dozen.
659	224,359 pounds.

[1] In Category 634pt. (non-knit), only TSUSA numbers 376.5609, 376.5635, 381.3120, 381.3323, 381.3331, 381.3341, 381.6966, 381.8664, 381.9505, 381.9520, 381.9525, 381.9530, 381.9536, 381.9839, 381.9842, 381.9962, 384.2321, 384.9132 and 791.7471.

[2] In Category 643pt. (knit), only TSUSA numbers 381.2315, 381.2325, 381.2835, 381.2857, 381.3551, 381.3554, 381.6671, 381.6673, 381.8523, 381.8706, 381.8808, 381.8811, 381.9222, 381.9223, 381.9232, 384.1902, 384.1906, 384.1911, 384.8217 and 791.7460.

[3] In Category 643pt./644pt. (non-knit), only TSUSA numbers 381.3162, 381.3164, 381.3166, 381.3168, 381.3561, 381.6976, 381.8670, 381.9560, 381.9562, 381.9564, 381.9566, 381.9568, 381.9972, 384.2327, 384.2328, 384.2329, 384.2331, 384.2332, 384.2333, 384.2334, 384.2336, 384.2337, 384.2774, 384.2775, 384.2776, 384.2777, 384.2778, 384.2779, 384.2780, 384.2781, 384.2782, 384.5673, 384.5674, 384.5675, 384.5677, 384.5678, 384.5679, 384.5680, 384.5681, 384.5683, 384.7863, 384.7865, 384.7866, 384.7867, 384.7869, 384.7870, 384.7871, 384.7873, 384.7875, 384.9156, 384.9157, 384.9158, 384.9159, 384.9161, 384.9162, 384.9163, 384.9164, 384.9166 and 384.9674.

[4] In Category 634pt./644pt. (knit), all TSUSA numbers except those listed in footnote [3].

To the extent that trade which now falls in the foregoing categories is within a category limit for the period January 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during that period. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The levels set forth above are subject to adjustment in the future according to the provisions of the Bilateral Wool and Man-Made Fiber Textile Agreement of November 7 and 16, 1984 between the governments of the United States and the Socialist Republic of Romania which provide, in part, that: (1) specific limits may be increased for carryover and carryforward; (2) consultations may be held to adjust levels for categories not subject to specified limits; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate adjustment under the bilateral agreement, referred to above, will be made to you by letter.

The conversion factor for Categories 638/639 is 15.5 and for Categories 433/434 is 42.1 square yards equivalent per dozen.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 533(a)(1).

Sincerely,

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Establishment of an Import Limit for Sweaters of Silk Blend and Other Vegetable Fibers in Categories 845/846 Produced or Manufactured in Thailand

March 7, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the commissioner of Customs to be effective on March 11, 1988. For further information contact Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 343–6581. For information on embargoes and quota reopenings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to establish a restraint limit for sweaters of silk blend and other vegetable fibers in Categories 845/846 for the period January 29, 1988 through December 31, 1988.

Background

On February 17, 1988 a notice was published in the **Federal Register** (53 FR 4699) which announced that the Government of the United States had requested consultations with the Government of Thailand with respect to sweaters of silk blend and other vegetable fibers in Categories 845/846.

During consultations held February 17–19, 1988, between the Governments of the United States and Thailand, no solution was reached on a mutually satisfactory limit for these categories. Therefore, the United States Government has decided to control imports of Categories 845/846, exported during the prorated period which began on January 29, 1988 and extends through December 31, 1988, at a level of 199,106 dozen.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel categories with Tariff Schedules of the United States Annotated (See **Federal Register** notice 52 FR 47745, dated December 11, 1987).

The United States remains committed to finding a solution concerning these categories. Should such a solution be reached in further consultations with the Government of Thailand, further notice will be published in the **Federal Register.**

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 7, 1988.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury,
Washington, DC. 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Silk Apparel and Vegetable fiber Apparel Agreements of December 2 and 3, 1985 between the Governments of the United States and Thailand; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on March 11, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of silk blend and other vegetable fiber apparel in Categories 845/846, produced or manufactured in Thailand and exported during the prorated period which began on January 29, 1988 and extends through December 31, 1988, in excess of 199,106 dozen[1]

Textile products in Categories 845/846 which have been exported to the United States prior to January 29, 1988 shall not be subject to the limit established in this directive.

Textile products in Categories 845/846 which have been released from the custody

of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88–5264 Filed 3–9–88; 8:45 am]

BILLING CODE 3510-DR-M

---

[1] The limit has not been adjusted to account for any imports exported after January 28, 1988.

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Turkey

March 7, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 11, 1988. For further information contact Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 343–6582. For information on embargoes and quota reopenings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the current restraint limits for cotton and man-made fiber textile products in Categories 335, 340/640, 340–Y/640–Y (sublimit), 350 and 361, produced or manufactured in Turkey and exported to the United States.

Background

A CITA directive dated December 31, 1987 (53 FR 165) established import restraint limits for certain cotton and man-made fiber textile products, including Categories 335, 340/640, 340–Y/640–Y (sublimit), 350 and 361, produced or manufactured in Turkey and exported during the six-month period which began on January 1, 1988 and extends through June 30, 1988.

Under the terms of the Bilateral Cotton and Man-Made Fiber Textile Agreement of October 18, 1985, as amended, and at the request of the Government of Turkey, the limits for cotton and man-made fiber textile products in Categories 335, 340/640, 340–Y/640–Y (sublimit), 350 and 361 are being increased for carryover for the current six-month period which began on January 1, 1988 and extends through June 30, 1988.

In addition, the limit published in the directive of December 31, 1987 (53 FR 166) for Category 347 for the period July 1, 1987 through December 31, 1987 was incorrect. It should be 300,000 dozen.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 7, 1988.

Committee for the Implementation of Textile Agreements

Commissioner of Customs
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 31, 1987 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton and man-made fiber textile products, produced or manufactured in Turkey and exported during the six-month period which began on January 1, 1988 and extends through June 30, 1988.

Effective on March 11, 1988, the directive of December 31, 1987 is amended to include the following adjustments to the previously established restraint limits for cotton and man-made fiber textile products in Categories 335, 340/640, 340–Y/640–Y (sublimit), 350 and 361, as provided under the terms of the bilateral agreement of October 18, 1985, as amended[1]

Category	Adjusted 6-mo. limit [1]
335	47,298 dozen.
340/640	280,536 dozen of which not more than 142,740 dozen shall be in Categories 340–Y/640–Y.[2]
350	49,447 dozen.
361	245,708 numbers.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1987.

[2] In Categories 340–Y/640–Y, only TSUSA numbers 381.0522, 381.3132, 381.3142, 381.3152, 381.5500, 381.5610, 381.5625, 381.5637, 381.5660, 381.9535, 381.9547 and 381.9550.

Also effective on March 11, 1988, the December 31, 1987 directive concerning exports during the period July 1, 1987 through December 31, 1987 is amended to correct the restraint limit for Category 347 to 300,000 dozen.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1)

Sincerely,

Donald R. Foote

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88–5265 Filed 3–9–88; 8:45 am]

BILLING CODE 3510-DR-M

---

[1] The provisions of the bilateral agreement provide, in part, that: (1) specific limits may be increased by 7 percent swing durings an agreement period and (2) specific limits may be increased by carryover and carryforward up to 11 percent of which carryforward shall not constitute more than 6 percent of the applicable category limit.

Amendment to the Export Visa Requirements Concerning Textile and Apparel Products from Malaysia

March 7, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 11, 1988. For further information contact Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Background

Under the terms of the bilateral agreement of July 1 and 11, 1985, as amended and extended, between the Governments of the United States and Malaysia, agreement was reached to amend the visa requirements to reflect that, effective on March 11, 1988, shipments of textile and apparel prodcuts exported from Malaysia on and after March 11, 1988, which are imported for the personal use of the importer and not for resale, regardless of value, and properly marked commercial sample shipments valued at U.S. $250 or less, do not require a visa or exempt certification for entry and shall not be charged to the agreement levels.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 7, 1988.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of August 20, 1987, concerning export visa and exempt certification requirements for certain textile and apparel products, produced or manufactured in Malaysia.

Effective on March 11, 1988, entry of all textile and apparel products exported from Malaysia on or after March 11, 1988, which are imported for the personal use of the importer and not for resale, regardless of value, and all properly marked commercial sample shipments valued at U.S. $250 or less, do not require a visa or exempt certification for entry and shall not be charged to the agreement levels.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exeception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88-5266 Filed 3-9-88; 8:45 am]

BILLING CODE 3510-DR-M

Request for Public Comment on Bilateral Textile Consultations With the Government of the Federative Republic of Brazil Concerning Cotton and Man-Made Fiber Textile Products in Categories 342/642 and 607pt.

March 7, 1988.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on categories on which consultations have been requested call (202) 377-3740.

Background

The purpose of this notice is to announce that on December 30, 1987 and January 29, 1988, under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 7 and 29, 1985 between the Governments of the United States and the Federative Republic of Brazil, the Government of the United States requested consultations concerning imports of cotton and man-made fiber skirts in Categories 342/642 and man-made fiber staple yarn with cotton in Category 607pt., respectively, produced or manufactured in Brazil and exported to the United States. The agreement provides for consultations when the orderly development of trade between the two countries may be impeded by market disruption, or the threat thereof, due to imports.

According to the terms of the bilateral agreement, which expires on March 31, 1988, the United States Government reserves the right to establish limits of 38,640 dozen for the ninety-day consultation period which began on December 30, 1987 and extends through March 28, 1988 for Categories 342/642 and 802,252 pounds for the prorated consultation period which began on January 29, 1988 and extends through March 31, 1988 for Category 607pt.

Summary market statements concerning these categories follow this notice.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice, 52 FR 47745, dated December 11, 1987).

Anyone wishing to comment or provide data or information regarding the treatment of Categories 342/642 and 607pt., under the agreement with the Federative Republic of Brazil, or in any other aspect thereof, or to comment on domestic production or availability of apparel products included in the categories, is invited to submit such comments or information in ten copies to Mr. James H. Babb, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Brazil—Market Statement

Cotton and Man-Made Fiber Skirts (Category 342/642)

December 1987.

Summary and Conclusions

U.S. imports of cotton and man-made fiber skirts (Category 342/642) from Brazil were 143,494 dozen during year ending October 1987, more than two times the 65,263 dozen imported a year earlier. During the first ten months of 1987, imports of cotton and man-made fiber skirts (Category 342/642) from Brazil reached 140,710 dozen, two and a half times the 56,375 dozen imported during the same period of 1986, more than two times the total imported in calendar year 1986, and more than four times the 32,798 dozen shipped in calendar year 1985.

The level of imports of cotton and man-made fiber skirts from Brazil is causing a real risk of disruption to the U.S. market.

U.S. Production and Market Share

U.S. production of cotton and man-made fiber skirts has been on the decline, dropping from 9,101 thousand dozen in 1982 to a depressed 7,940 thousand dozen average during 1984 and 1985, a decline of 13 percent. Production in 1986 recovered slightly, reaching 8,126 thousand dozen, but remained below the 1983 level and was 11 percent below the 1982 level. U.S. production data for cotton and man-made fiber skirts is available only through the first half of 1987. If U.S. production in the second half of 1987 is the same as production in the first half of 1987, 1987 production of cotton and man-made fiber skirts will be equal to the 1983 level, but still 9 percent below the 1982 level. The domestic manufacturers' share of the market dropped 25 percentage points in just four years, falling from 83 percent in 1982 to 58 percent in 1986. The U.S. market share is expected to continue its decline into 1987, falling another 9 percentage points, to less than 50 percent. U.S. imports are expected to have a greater share of the U.S. market than domestic manufacturers in 1987.

U.S. Imports and Import Penetration

U.S. imports of cotton and man-made fiber skirts (Category 342/642) at 5,995 thousand dozen in 1986 were more than three times the amount imported in 1982. The sharp and substantial increase in imports continued into 1987. Cotton and man-made fiber skirt imports (Category 342/642) during the first ten months of 1987 were 7,094 thousand dozen, 39 percent above the 5,112 thousand dozen imported during the same period in 1986. The ratio of imports to domestic production nearly quadrupled, increasing from 20 percent in 1982 to 74 percent in 1986. The ratio is expected to increase above 100 percent in 1987.

Duty-Paid Value and U.S. Producers' Price

The majority of Brazil's cotton and man-made fiber skirt imports enter under the

following TSUSA numbers: 384.5251—women's cotton woven skirts, not of corduroy, denim or velveteen, not ornamented; 384.5120—women's cotton woven, denim skirts, not ornamented; 384.2552—women's and girls' man-made fiber woven skirts, ornamented; and 384.8660—women's man-made fiber knit skirts and culottes, not ornamented. These skirts entered the U.S. at landed duty-paid values below U.S. producers' prices for comparable skirts.

Brazil—Market Statement

Category 607 Part—Polyester Yarn Containing Cotton

January 1988

Summary and Conclusions

U.S. imports of polyester/cotton sales yarn—Category 607 part—from Brazil were 3.3 million pounds during the year ending October 1987, 61 percent above the 2.1 million pounds imported a year earlier. Brazil is the second largest supplier of these yarns, accounting for 17 percent of the total imports.

The sharp and substantial increase of low-valued fine count yarn imports from Brazil is severely disrupting the U.S. fine count polyester and cotton blended sales yarn market.

U.S. Production and Market Share

U.S. production of fine count blended yarns of polyester and cotton dropped from 107.7 million pounds in 1983 to 86.7 million in 1985, a 19 percent decline. Production in 1986 partially recovered from 1985, however the improvement was short-lived. During the first three quarters of 1987, production dropped 21 percent below the level in the comparable period of 1986.

The U.S. producers' share of the market for domestically produced and imported fine count blended sales yarns of polyester and cotton declined from 96 percent in 1983 to 78 percent in 1986. The U.S. producers' share continued its decline during the first ten months of 1987, dropping to 69 percent.

Imports and Import Penetration

U.S. imports of Category 607 part from all sources reached 17.3 million pounds during the first ten months of 1987, three times the 5.6 million imported a year earlier and double the amount imported during calender year 1986. This surge made a major contribution to the overall rise in imports of fine count blended yarns of polyester and cotton—Categories 300 part/301 part/ 607 part. Total imports of combined category parts reached a record level 32.3 million pounds during the first ten months of 1987, 33 percent above the comparable period in 1986. Category 607 part imports accounted for all of this increase.

The ratio of imports to domestic production of fine count blended yarns of polyester and cotton doubled in 1986, reaching 28.7 percent. The ratio increased another 70 percent, reaching 45.6 percent during the first ten months of 1987.

Duty-Paid Import Values and U.S. Producers' Price

Category 607 part imports from Brazil entered under TSUSA No. 310.6034, polyester yarns containing cotton, not textured. The duty-paid landed values of these imports are below U.S. producers' prices for comparable yarn.

Army Science Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: 31 March and 1 April 1988.

Times of Meeting: 0830-1630 Hours, each day.

Place: Fort Rucker, Alabama.

Agenda: The Army Science Board's Ad Hoc Subgroup on U.S. Army Aeromedical Research Laboratory; Fort Rucker, Alabama, will meet for follow-on briefings and discussions on the research being carried out by the Laboratory. This meeting is open to the public. Any person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-3039 or 695-7046.

BILLING CODE 3710-08-M

Corps of Engineers, Department of the Army

Withdrawal of Intention To Prepare a Draft Environmental Impact Statement; Trinity River Project

AGENCY: U.S. Army Corps of Engineers, DOD, Fort Worth District.

ACTION: Notice of Intent to withdraw a Notice of Intent to prepare a draft Environmental Impact Statement.

SUMMARY: 1. Notice of Intent to prepare a Supplemental Environmental Impact Statement on the Channel to Liberty feature of the Trinity River Project (Liberty, Texas) was published in the **Federal Register** on April 30, 1987. Studies conducted since that date have surfaced a number of uncertainties which must be resolved prior to continuing feasibility studies. Among those uncertainties are the status of potential flood control and navigation beneficiaries and Federal interest in a project that complies with current Federal guidelines for navigation. Because of these uncertainties, further studies have been deferred. The Channel to Liberty feature of the Trinity River Project has been reclassified from the "Active" to "Inactive" category of Civil Work projects; and a Supplemental Environmental Impact Statement will not be prepared at this time.

2. Reasonable Alternatives. The decision to defer further studies represents selection of the "No Action" alternative at this time. If at some future date the issues leading to this decision are resolved, studies may be resumed consistent with authorization and funding. In that event, and at the appropriate time, Notice of Intent to prepare an appropriate document under the National Environmental Policy Act would again be issued.

3. Scoping Process and Schedule. Since the Notice of Intent to prepare a Supplemental Environmental Impact Statement is being withdrawn, no further scoping will be conducted at this time. No public meetings are scheduled and there is no schedule for release of an EIS.

ADDRESS: For additional information, contact Mr. Paul Hathorn, Environmental Project Manager, Environmental Resources Branch, U.S. Army Corps of Engineers, Fort Worth District, P.O. Box 17300, Fort Worth, Texas 76102-0300. Telephone (817) 334-2095.

Dated: February 25, 1988.

John G. Rigby,

Lieutenant Colonel, Corps of Engineers, Acting District Engineer.

BILLING CODE 3710-FR-M

Defense Logistics Agency

Cooperative Agreements Revised Procedures

AGENCY: Defense Logistics Agency, DoD.

ACTION: Cooperative agreements; proposed revised procedures.

SUMMARY: This proposed revised procedure implements Chapter 142, Title 10, United States Code, as amended, which authorizes the Secretary of Defense, acting through the Director, Defense Logistics Agency (DLA), to enter into cost sharing Cooperative Agreements to support procurement technical assistance programs established by state and local governments and private non-profit organizations. Subpart III of this

OL
53
ISS
47
MR
10
988
MI

issuance establishes the administrative procedures proposed to be implemented by the DLA to enter into such agreements for this purpose.

DATES: Comments will be accepted until April 12, 1988. Proposed effective date: April 19, 1988.

FOR FURTHER INFORMATION CONTACT: Sim Mitchell, Program Officer, Office of Small and Disadvantaged, Business Utilization (DLA-UM), Defense Logistics Agency, Alexandria, VA 22304–6100, Telephone (202) 274–6471.

I. Background Information

The Department of Defense (DoD) has developed programs designed to expand the industrial base and increase competition for its requirements for goods and services, thereby reducing the cost of maintaining a strong national security. Its efforts to increase competition among the private sector have been supplemented by many state and local governments and other entities where their interest in improving the business climate and economic development in their communites is compatible with these DoD objectives. To assist in furthering this mutual interest, a Cooperative Agreement Program has been established by which the DoD can share the cost of supporting existing procurement technical assistance programs being conducted by state and local governments and private non-profit entities and encourage the establishment of similar programs in their communities.

The Fiscal Year (FY) 1985 DoD Authorization Act, Public Law 98–525, amended Title 10, United States Code, by adding a Chapter 142 which authorizes the Secretary of Defense, acting through the Director, Defense Logistics Agency (DLA), to enter into cooperative agreements with state and local governments, and other non-profit entities (hereinafter referred to as eligible entities as defined in Section 3 of this procedure) to establish and conduct procurement technical assistance programs during FY 85. The program continues under Title 10, United States Code, as amended.

The Congress has authorized a total of $7 million to support the program during FY 88. Of this total, $500,000 is available for Indian programs only and such programs will be executed centrally by HQ DLA. Accordingly, each of the nine Defense Contract Administration Regions (DCASRs) within DLA will be authorized to award approximately $700,000 of the remaining $6.5 million authorized for FY 88 as its share of program costs to applicants within the geographical area under its cognizance.

In cases where the area being or to be serviced by the eligible entity encompasses more than one DCASR's area of geographic cognizance, eligible entities are to submit their proposals to the one DCASR having cognizance over the preponderant part of the area being or to be serviced. Only one proposal will be accepted from a single eligible entity. The addresses and geographic areas under the cognizance of each of the DCASRs, together with the name of the Associate Director of Small Businnss who is designated the Procurement Technical Assistance Cooperative Agreement Program Manager, is at Encl 1.

Additional Limitations placed on these funds follow:

(a) DoD cost sharing shall not exceed 50% of the net cost of a single program, excluding any Federal funds and other income, except that the DoD share may be increased up to 75% for an existing program or new start that qualifies solely as a distressed area. In no event, shall the DoD share of the net program cost exceed $150,000.

(b) Eligible entities are not to subcontract more than 10% of their total program costs for private consulting services to support the program.

(c) These limitations may be modified by the Headquarters DLA Policy Council as necessary to comply with legislative or other requirements applicable to any restricted funds.

The DoD presently provides procurement and technical assistance to business firms through its network of Small Business Specialists lcoated in industrial centers around the country. The Associate Directors of Small Business located in these industrial centers at the DCASRs will be available to provide eligible entities such assistance as necessary to explain and interpret the solicitation requirements when issued, to provide general guidance in preparing proposals, and to provide training and other technical assistance to recipients of cooperative agreements.

Procurement technical assistance given to clients for marketing their goods and services to other Federal Agencies and/or state and local governments will not be considered when evaluating proposals. However, eligible entities are encouraged to consider supplementing their DoD program to include those marketing opportunities for business firms located in the area being or to be serviced.

The purpose of this proposed revised procedure is to make available to all eligible entities the prerequisite requirements and policies which govern the award of cooperative agreements by the DLA. This procedure is necessary to establish a procedure procedure which governs the award and administration of cooperative agreements.

Although this procedure will affect all eligible entities desiring to enter into a cooperative agreement with the DLA, the DLA has determined that this rule does not involve a substantial issue of fact or law, and that it is unlikely to have a substantial or major impact on the Nation's economy or large numbers of individuals or businesses. This determination is based on the fact that this proposed Cooperative Agreement Procedure implements policies already published by the Office of Management and Budget pursuant to Chapter 63, Title 31, United States Code, Using Procurement Contracts and Grant and Cooperative Agreements. In addition, DLA Cooperative Agreements will be entered into pursuant to the authorities and restrictions contained in the annual DoD Authorization and Appropriation Acts.

II. Other Information

The language contained in the current Cooperative Agreement Procedure limited the period of coverage to the FY 87 Program in that it addressed the FY 87 Authorization Act requirements in specific terms, including the exact dollar amounts of funding applicable to the Program. This proposed revision to the procedure will provide general guidance for cooperative agreements entered into by the DLA and will become a permanent document for the duration of the FY 88 programs.

The DLA has determined that the proposed procedure does not involve substantial issues of fact or law and the procedure is unlikely to have a substantial or major impact on the Nation's economy or large numbers of individuals or businesses. Therefore, public hearings were not conducted.

Since this is the DLA's permanent procedure covering cooperative agreements pursuant to 31 U.S.C. 6301 et seq., using Procurement Contracts and Grant and Cooperative Agreements, additional comments are invited on the procedures and are to be submitted to the Defense Logistics Agency, ATTN: DLA–UM, Cameron Station, Alexandria, VA 22304–6100. All comments received by 12 April 1988 will be evaluated to determine if any revisions should be made to Subpart III.

Issued in Alexandria, VA on 8 March 1988.

For the Defense Logistics Agency.

Ray W. Dellas,

Staff Director, Office of Small and Disadvantaged Business Utilization.

COOPERATIVE AGREEMENT REGULATION GENERAL PROGRAM

III. Proposed Revision to DLA Procedure—Cooperative Agreements

1. Scope

(a) This procedure implements Chapter 142 of Title 10, United States Code, as amended, and establishes requirements for the award and administration of Cost Sharing Cooperative Agreements entered into between the Defense Logistics Agency (DLA) and eligible entities. Under these agreements Department of Defense (DoD) financial assistance will be provided to recipients. Such assistance will cover the DoD share.of the cost of establishing new and/or maintaining existing Procurement Technical Assistance (PTA) Programs for furnishing PTA to business entities.

(b) A cooperative agreement is a binding legal instrument which reflects a relationship between the DLA and a cooperative agreement recipient for the purpose of transferring money, property, services or anything of value to the recipient for the accomplishment of the requirements described therein. The requirement shall be authorized by Federal statute and substantial involvement shall be anticipated between the DLA and the recipient during performance of the agreement.

(c) When proposals for cooperative agreements are obtained through the issuance of a DLA Solicitation for Cooperative Agreement Proposals, hereinafter referred to as a SCAP, the contents of this procedure shall be incorporated, in part or in whole, into the program solications for the purpose of establishing administrative provisions for the execution and administration of DLA Cooperative Agreements. Program solicitations may include additional administrative provisions when such provisions are required by program legislation or are not included in this procedure.

(d) The DoD share of an eligible entity's proposal and award recipient's net program cost (NPC) shall not exceed 50%, except in the case of a distressed area (as defined in paragraph 3(d) below) the DoD share may be increased to an amount not to exceed 75%. However, in no event is the DoD share of any single net program cost to exceed $150,000.

(e) In order to qualify for the DoD share of 75% of net program costs, an eligible entity is required to service clients exclusively in a distressed area. In the event an eligible entity plans to service both a distsressed and a non-distressed area, if may segregate its NPC between the distressed area and non-distressed area (as detailed in paragraph 8 of this procedure) when submitting its application for a Cooperative Agreement with maximums of 75% and 50% being requested respectively. Absent such segregation, and if any part of the geographic area being or to be serviced includes a non-distressed area, the applicant will be entitled to a maximum of 50% as the DoD share.

(f) During each fiscal year (FY) for which funding is authorized for the PTA program at least one cooperative agreement for either an existing program or a new start shall be awarded within the geographic cognizance of each of the nine Defense Contract Administration Services Regions (DCASRs) within the DLA. In cases where the area being or to be serviced by an eligible entity encompasses more than one DSCSR's area of geographic cognizance, the eligible entity should submit its applications to the one DCASR having cognizance over the majority of the area being or to be serviced. Only one application will be accepted from a single eligible entity.

2. Policy

(a) It is the DLA policy to encourage and maximize open and fair competition when awarding cooperative agreements for establishing or maintaining existing PTA programs. Cooperative agreements will be awarded on a competitive basis as a result of the issuance of the (SCAP). However, the DoD, through the DLA, reserves the right to make an award to an applicant whose application is competitive based on other factors detailed in paragraph 5(d) below that would enhance competition for DoD goods and services. For example, an award may be denied to reduce or eliminate overlapping or duplicate coverage in selected geographic areas or where the best interest of the government will not be served.

(b) SCAPs inviting the submission of proposals shall be given the widest practical dissemination to all known eligible entities and to those that request copies subsequent to its issuance. All eligible entities that have advised the DCASR of their interest in submitting a proposal under the SCAP will be invited to participate in a presolicitation conference to be held at a location to be designated by the DCASR approximately 30 calendar days prior to the SCAP closing date.

(c) Any solicitation issued in accordance with this procedure shall not be considered to be an offer made by the DoD and will not obligate the DLA to make any awards under this program. The DoD is also not responsible for any monies expended or expense incurred by applicants prior to the award of any cost sharing cooperative agreement.

(d) The award of a cooperative agreement under this program shall cover a twelve month performance period.

(e) The award of a cooperative agreement shall not in any way obligate the DoD to enter into a contract or give preference for the award of a contract to a concern or firm which becomes a client of the award recipient.

(f) To assist the DoD in achieving its socio-economic goals, applicants and cooperative agreement recipients are to give special emphasis to assisting small disadvantaged business firms in participating in DoD contracting opportunities by making a concerted effort to identify such firms and by providing marketing and technical assistance to such firms, particularly where such firms are referred to a recipient for assistance by any DoD component.

(g) The Federal Acquisition Regulation (FAR) contains numerous clauses and provisions which provide operational guidance and spell out the rights and obligations of parties in Federal Procurement transactions. Although the regulation is not applicable per se to cooperative agreements, some of the provisions contained in the Regulation may be suitable for inclusion in cooperative agreements. Therefore, the clauses and provisions contained therein may be made a part of all cooperative agreement solicitations and awards if not otherwise covered under Office of Management and Budget (OMB) Circulars A–102 (Uniform Administrative Requirements for Grants-In-Aid to State and Local Governments) and A–110 (Grants and Agreements with Institutions of Higher Education, Hospitals and other Non-profit Organizations). Where appropriate, the language of the clauses may be changed and will be modified to change "contract" to "cooperative agreement" and "contractor" to "participant" as necessary. Clauses and provisions specified as mandatory will not be subject to negotiations. Such clauses and provisions will only be used if the applicable FAR dollar threshold(s) are met. For example, if there is a $100,000 threshold for applying the clause, that particular clause will only be used in the cooperative agreement if the total program cost of the project (including both the proposer's and DoD's share of total program costs) exceeds that threshold. However, the addition of any clauses and provisions not identified in the solicitation or the modification of clauses and provisions which are not designated as being mandatory may be negotiated.

(h) Award recipients are not required to obtain or retain private consulting services for any extended period of time. Accordingly, any costs being proposed for such services are not to exceed 10% of the total program cost. Costs in excess of 10% included in the eligible entity's proposal will cause the proposal to be rejected.

(i) Reasonable quantities of government publications, such as "Selling to the Military" may be furnished to award recipients at no cost, subject to availability.

(j) For the purpose of executing cooperative agreements, the DCASR Associate Director of Small Business who has been delegated the authority to execute cooperative agreements shall not require appointment as a contracting officer.

(k) Beginning with FY 88, participation in the cooperative agreement program will be limited to 60 calendar months and/or five cooperative agreement awards with each containing a twelve month performance period. Each applicant will be required to identify in its proposal the number of months of program participation subsequent to FY 87.

(l) The DoD share of the net program cost shall be reduced by 20 percent for each year the recipient participates in the program. For the 60 month participation period, regardless of whether they are consecutive, the percent of DoD funds requested will be reduced as follows:

Year	Annual Reduction in Percent of DoD Share of Funding
1	0
2	20
3	40
4	60
5	80
6	100

(m) Each cooperative agreement recipients area of performance will be limited to the geographical area specified in its proposal.

(n) To the extent that the annual DoD Authorization and Appropriation Acts provided for restricting some part of the total funds authorized to accommodate special socio-economic requirements, any specific requirements related to the restricted funds which differ from the requirements of this regulation will be identified in the solicitation for cooperative agreement proposals.

3. Definitions

The following definitions apply for the purpose of this procedure.

(a) *Client*—A recognized business entity, including corporations, partnerships, or sole proprietorships organized for profit, which are small and other than small, that have the potential or are seeking to market their goods or services to the DoD.

(b) *Cooperative Agreement Offer/Application/Proposal*—An eligible being operated or being planned. The offer binds the eligible entity to perform the services described therein if selected for an award, and upon the proposal being incorporated into the cooperative agreement award document.

(c) *DoD Cooperative Agreement Program*—Provides assistance to state and local governments and other nonprofit entities in establishing or maintaining procurement technical assistance activities to help business firms market their goods and services to the DoD and other government activities.

(d) *Distressed Area*—The geographic area being or to be serviced by an eligible entity in providing procurement technical assistance to business firms physically located within that area that:

(1) Has a per capita income of 80% or less of that State's average, or

(2) Has an unemployment rate of at least 1% above the national average for the most recent 24-month period in which statistics are available from the U.S. Department of Labor in all of the geographic areas being or to be serviced. A distressed area cannot include any areas that do not meet this criteria.

(3) Is a "Reservation" which includes Indian reservations, public domain Indian allotments, former Indian reservations in Oklahoma, and land held by incorporated Native groups, regional corporations, and village corporations under the provisions of the Alaska Native Claims Settlement Act.

(e) *Eligible Entities*—include:

(1) *State Government*—a State of the United States, the District of Columbia, a territory or possession of the United States, an agency on instrumentality of a State, and a multi-state, regional, or interstate entity having governmental duties and powers.

(2) *Local Government*—a unit of government in a State, a local public authority, a special district, an intrastate district, a council of governments, a sponsor group representative organization, an interstate entity, or another instrumentality of a local government.

(3) *Private, Non-profit Organization*—any corporation, trust, foundation, or institution which is entitled to exemption under section 501(c)(3)–(6) of the Internal Revenue Code, or which is not organized for profit and no part of the net earnings of which inure to the benefit of any private shareholder or individual.

(f) *Eligible Entities, Special Programs*—Those organizations authorized by legislation to participate in programs set-aside for specifically designated groups. Such entities will be identified in the solicitation specifically issued therefore.

(g) *Direct Cost*—Any cost that can be identified specifically with a particular final cost objective. No final cost objective shall have allocated to it as a direct cost any costs, if other costs incurred for the same purpose in like circumstances have been included in any indirect cost pool to be allocated to that or any other final cost objective.

(h) *Existing Program*—Includes any PTA type program that has been established and operated by an eligible entity for at least 12 months prior to the closing date for submission of proposals to the DLA, as well as all prior recipients of cooperative agreements with the DLA, regardless of the length of time their PTA program has been in operation.

(i) *Indian*—A person who is a member of an Indian tribe.

(j) *Indian Economic Enterprise*—Any Indian-owned (as defined by the Secretary of the Interior) commercial, industrial, or business activity established or organized for the purpose of profit: provided, that such Indian ownership shall constitute not less than 51 per centum of the enterprise.

(k) *Indian Tribe*—Any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. section 1601 et seq.) which is recognized by the Federal Government as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

(l) *Indirect Cost*—Any cost not directly identified with a single, final cost objective, but identified with two or more final cost objectives or an intermediate cost objective. It is not subject to treatment as a direct cost.

(m) *In-kind Contributions*—Represent the value of noncash contributions provided by the eligible entity and non-

Federal parties. Only when authorized by Federal legislation may property or services purchased with Federal funds be considered as in-kind contributions. In-kind contributions may be in the form of charges for real property and nonexpendable personal property and the value of goods and services directly benefiting and specifically identifiable to the project or program.

(n) *New Starts*—Includes all eligible entities that have not had an established and operating PTA program for a full 12-month period prior to the closing date for submission of proposals under a SCAP. It also includes any eligible entities' program that otherwise meets the definition of an existing program, but whose proposal anticipates expanded geographical coverage or a significant increase in the scope of operations. With this exception, a recipient of any cooperative agreement with the DLA will not be eligible for consideration as a new start, regardless of how long its program has been in operation.

(o) *Net Program Cost*—Total program cost (including all authorized sources) less any program income and/or other federal funds not authorized to be shared.

(p) *Private Consultant Services*—Services offered by private profit seeking individuals, organizations or otherwise qualified business entities to provide marketing and technical assistance to cooperative agreement recipients or business firms seeking contracts with Federal, State and local government organizations.

(q) *Procurement Technical Assistance*—Program organized to generate employment in and improve the general economy of a locality by assisting business firms in obtaining defense and other government contracts. It's purpose is to provide detailed counseling assisistance, information and personal instructions to business firms in increasing their opportunities to sell their products or services to the Defense Department either directly as prime contractors or indirectly as subcontractors under DoD contracts, other government agencies and the private sector.

(r) *Reservation*—Includes Indian reservations, public domain Indian allotments, former Indian reservations in Oklahoma, and land held by incorporated Native groups, regional corporations, and village corporations under the provisions of the Alaska Native Claims Settlement Act (43 U.S.C. Section 1601 et seq.).

(s) *Solicitation for Cooperative Agreement Proposals (SCAP)*—A document issued by DLA containing provisions and evaluation criteria applicable to all applicants that apply for a PTA cooperative agreement.

(t) *Special Program*—A program by which funds are targeted by legislation for the purpose of sharing the cost of providing procurement technical assistance to specifically designated groups.

(u) *Total Program Cost*—Includes all funds from all sources to include in-kind contributions and all income received from all sources as a result of operating the program. Any federal funds proposed for use in establishing or conducting the program must have prior approval for such use.

4. Program Description

The objective of the PTA Program is to assist eligible entities in providing marketing and technical assistance to businesses, hereinafter referred to as clients, in selling their goods and services to the DoD, thus assisting the DoD in its acquisition goals and at the same time enhancing the business climate and economies of the communities being served. Specific program requirements to accomplish this objective will vary depending on locations, the types of industries and business firms within the community, the level of economic activity in the community, and many other factors. However, the SCAP will describe the following minimum features that a comprehensive PTA Program should generally include:

(a) *Personnel*—Professional personnel qualified to counsel and advise clients regarding DoD procurement policies and procedures. The areas of consideration should relate to marketing techniques and strategies, pricing policies and procedures, preaward procedures, postaward contract administration, quality assurance, production and manufacturing, financing, subcontracting requirements, bid preparation, and specialized acquisition requirements for such things as construction, research and development, and data processing.

(b) *Marketing Tools*—Should include, as a minimum, the Commerce Business Daily, Federal Acquisition Regulation, DoD FAR Supplement, commodity listings from DoD contracting activities, Federal and military specifications and standards and other Federal Government publications.

(c) *Networking*—Techniques for providing assistance throughout the area being or to be serviced by locating assistance offices in areas of industrial concentration, arrangements with other entities or organizations, establishing data links, and through other appropriate means.

(d) *Fees and Service Charges*—In the event the applicant presently charges or plans to charge clients a fee or service charge, details as to the basis for the amount of the fee to be charged must be described. Any fees earned under the program are to be included as part of the total program cost.

(e) *Performance Measurement*—Should include a means of periodically measuring program effectiveness in achieving the objective described above. Factors to consider in establishing time phased goals and techniques for measuring progress in its achievement should include the number and types of assistance rendered, such as marketing and accounting; the number of clients added to the DoD and other Federal Agency bidders mailing lists, the Minority Vendor Profile System of the Minority Business Development Agency, the Procurement Automated Source System (PASS) of the Small Business Administration and the value of prime and subcontract awards received by clients resulting from the program.

5. Procedures for processing SCAPs and Award of Cooperative Agreements

(a) The SCAP will be developed and prepared by the HQ DLA Cooperative Agreement Policy Council and will be issued by HQ DLA or through each DCASR. The Policy Council will be comprised of representatives from the HQ DLA Offices of General Counsel, Contracting, Comptroller, Congressional Affairs and Small Business. The Staff Director, Small and Disadvantaged Business Utilization shall serve as the Policy Council Chairman and final appeal authority for disagreement between the DCASR Associate Director of Small Business and the eligible entity and/or Cooperative Agreement recipient. The Council will be responsible for reviewing the results of the DCASR's evaluations and recommendations, for assuring that adequate funds are made available to the DCASR and for considering other factors in the selection process necessary to fully protect the interests of the government.

(b) For special programs, HQ DLA will appoint an evaluation panel which will perform the functions specified herein for the DCASR evaluation panel. The review and approval authority for special program award selections will be the HQ DLA Cooperative Agreement Policy Council.

(c) The evaluation of proposals submitted in repsonse to the SCAP and the selection of award recipients will be conducted as detailed below:

VOL 53
ISS 47
MR 10
1988
UMI

(1) Proposals will be evaluated by a specially constituted evaluation panel established at each DCASR. The panel will be comprised of representatives from the DCASR offices of small business, contract management, comptroller, and other offices deemed appropriate by the DCASR Commander. However, the DCASR Associate Director of Small Business, who has been delegated the authority to execute the cooperative agreements, shall not serve as a panel member. A member of the Office of Counsel will be appointed to the panel, but will serve in an advisory capacity only.

(2) Prior to making a comprehensive evaluation of a proposal, the evaluation panel will make an initial evaluation to determine if the proposal contains sufficient technical, cost, and other information, has been signed by a responsible official authorized to bind the eligible entity and generally meets all requirements of the SCAP. If the proposal does not meet those requirements, it will be rejected and a comprehensive evaluation will not be made. In such case, a prompt reply will be sent to the proposer indicating the reason for its proposal not being accepted. Revised proposals will not be accepted from applicants whose proposals are rejected after the initial evaluation unless the revised proposal is postmarked or is hand delivered prior to the closing date of the SCAP. Any proposal received which is unsigned or otherwise rejected will not be given additional review consideration and will be retained with other unsuccessful applications by the DCASR Associate Director of Small Business.

(3) The initial evaluation of an otherwise acceptable proposal will include a review to verify the accuracy of the classification of the proposal concerning the entity's stated program status as existing or a new start. In the event the evaluation panel considers the proposal status misclassified, it will review the matter with the applicant. If there is disagreement, the panel's determination of the application's classification will be final and not subject to further review.

(4) Proposals which pass the initial evaluation will be subjected to a comprehensive evaluation. The basic purpose of the comprehensive evaluation is to assess the relative merits of the proposals to determine which offer the greatest likelihood of achieving the stated program objectives, considering technical, quality, personnel qualifications, estimated cost, and other relevant factors. Each proposal will be evaluated by the panel in accordance with stated criteria and ranked in order of excellence to determine which will best further specific program goals. All findings and recipient selections will be documented, signed by panel members, and retained to provide an adequate record to support the panel's decisions. Upon completion of its review, the evaluation panel will submit the panel results and its recommendations to the Associate Director of Small Business.

(5) The Associate Director of Small Business will determine whether sufficient funds have been allocated to the DCASR to cover the DoD share of costs and will review the panel recommendations and results for completeness. Upon completion of the fund analysis and review of the panel results, the Associate Director of Small Business shall forward the panel results and recommendations and comemnts (if any) to the HQ DLA Policy Council for review.

(d) The HQ DLA Policy Council will review the DCASR evaluation panel's recommendations. The results of its review and its recommendations will be submitted to the DCASR Commander for approval. In developing its recommendations the Council may consider additional factors necessary to fully protect the interest of the Government. These factors may include, but are not limited to, economic downturns that effect national security in selected geographic areas; terminations of major DoD contracts; availability of funds; the potential for increasing competition for selected goods and services required by the DoD; the existence of other procurement technical assistance programs in the area; and compliance with any legislative requirement imposed on program funds.

(e) After approval by the DCASR Commander, the cooperative agreement will be executed by the DCASR Associate Director of Small Business.

6. Evaluation Criteria

(a) The evaluation factors for new starts and existing programs, with their relative importance, will be specified in the SCAP.

(b) The following evaluation factors (which may be subject to change) will be considered as the evaluation criteria for new starts:

(1) The types and qualifications of personnel assigned or to be assigned to the program.

(2) The quality of the PTA Program in existence or being planned for:

a. Developing new clients.

b. Assisting existing clients.

c. Any program established or to be established to identify and provide extraordinary assistance to small disadvantaged business firms.

(3) The number of clients in the geographic area being or to be serviced. This includes carrying out the DoD policy described in paragraph 2(f) above for which the socio-economic status of clients should be estimated.

(4) The amount and percentage of net program costs to be shared by DoD.

(5) The level of unemployment in the area being or to be serviced.

(c) The evaluation criteria for existing programs (which may be subject to change) will include all of the above factors, as well as the following:

(1) The eligible entity's development, performance and effectiveness in conducting its PTA Program, including achievements against established goals and any special achievements relative to small disadvantaged business firms.

(2) The amount of subcontracting to private consultants.

(d) As this program applies both to existing PTA Programs and to those being planned, certain of these evaluation factors will be evaluated based upon stated implementation policy for programs being planned. For example, the types and qualifications of personnel assigned will require applicants that do not presently have established but are planning programs to identify the standards to be used in selecting the personnel.

(e) The amount of subcontracting to private consultants is limited to no more than 10% of total program costs for both existing programs and new starts. In evaluating this factor for existing programs the smaller the amount of such subcontracting the greater the weight that will be given. However, in the case of new starts, equal weight will be given to all offers, subject only to the 10% limitation.

7. DoD Funding

(a) Any funds authorized for the PTA program will be allocated equitably among the nine DCASRs to cover the DoD share of the PTA program cost for existing programs and for new starts. The SCAP will identify the total amount of funds authorized for the related fiscal year.

(b) If there is an insufficient number of satisfactory proposals in a DCASR to allow effective use of the funds allocated, the Headquarters DLA Cooperative Agreement Policy Council will reallocate the funds among the DCASRs as appropriate.

8. Cost Sharing Criteria and Limitations

(a) Cost sharing is a generic term denoting any situation wherein the

Government does not fully fund the participant's total allowable costs required to accomplish the defined porject or effort. The term encompasses concepts such as cost participation, cost matching, cost limitations (direct or indirect), and participation in kind.

(b) The DoD share of net program costs shall not exceed 50%, except in a case where an eligible entity meets the criteria of a distressed area. When the prerequisite conditions to qualify as a distressed area are met, the DoD share may be increased to an amount not to exceed 75%.

(c) In no event shall the DoD share of net program costs exceed $150,000 for any single proposal.

(d) Cost contributions may be to either direct or indirect costs, provided such costs are otherwise allowable in accordance with the cost principles applicable to the award. Allowable costs which are absorbed by the eligible entity as its share of costs may not be charged directly or indirectly or may not have been charged in the past to the Federal Government under other contracts, agreements, or grants.

(e) The SCAP will require applicants to submit an annualized estimated budget, which may include cash contributions, in-kind contributions, any fees and service charges to be earned under the program, and any other Federal Agency funding (including grants, loans, and cooperative agreements) authorized to be used for this program. The type and value of any in-kind contribution will be limited to no more than 25% of the total annual budget. However, any fees, service charges or Federal funds provided under another Federal financial assistance award, including loans (but not including loan guarantee agreements since these do not provide for disbursement of Federal funds) are not acceptable for calulating cost contributions of the eligible entity. Although the fees, services charges and other authorized federal funds must be included in the annualized estimated budget, they cannot be included for cost sharing purposes. Inclusion of other Federal funds in the program is subject to the terms of the award instrument containing such funds or written advice being obtained from the awarding Agency(s) authorizing such use. Any method used by the eligible entity in providing the required funds which relies upon Federal funds must be disclosed and identified in the eligible entity's proposal.

(f) In submitting its budget, an eligible entity that services, or plans to service clients exclusively in areas that qualify as distressed areas may submit a single budget and request a maximum of 75% DoD share of net program costs (NPC), subject to 8(e) above. An entity that services or plan to service clients exclusively in non-distressed areas or in areas that include both distressed and non-distressed areas may submit a single budget and request a maximum of 50%. In those cases where the geographic area being or to be serviced includes both distressed areas and non-distressed areas, the budget may be divided based on a reasonable and logical distribution of TPC between these two discrete areas, and submitted as a single proposal. In such case, costs must also be divided between these two budget items as costs are incurred.

(g) Recipients of cooperative agreements will be required to maintain records adequate to reflect the nature and extent of their costs and to insure that the required cost participation is achieved.

(h) The SCAP will also provide that indirect costs are not to exceed 100% of direct costs.

(i) In the event the applicant charges or plans to charge a fee or service charge for PTA given to clients, or to receive any other income as a result of operating the PTA Program, the estimated amount of such reimbursement is to be clearly indentified in the proposed budget and shall be included as part of the total budgeted costs.

(j) The Federal cost principles as stated in the OMB Circulars listed below will be used as guidelines to determine allowable costs in performance of the program:

(1) OMB Circular No. A–21, Cost Principles for Educational Institutions.

(2) OMB Circular No. A–87 (FMC 74–4), Cost Principles Applicable to Grants and Contracts with State and Local Governments.

(3) OMB Circular No. A–122, Cost Principles for Non-profit Organizations.

9. Administration

(a) Cooperative Agreements will be assigned to the cognizant DCASR for payment and for postaward administration by the Associate Director of Small Business.

(b) The Asssociate Director of Small Business at the cognizant DCASR will be responsible for reviewing recipients performance at least twice during the effective period of each cooperative agreement, to include a review of budgeted versus actual expenditures, and other performance factors. The results of the periodic reviews will be furnished to the recipient and a copy will be provided to the Headquarters DLA Cooperative Agreement Policy Council no later than 30 calendar days after completion of each review.

(c) For eligible entities covered by OMB Circular No. A–102, Uniform Administrative Requirements for Grants-In-Aid to State and Local Governments, or OMB Circular No. A–110, Grants and Agreements with Institutions of Higher Education, Hospitals and other Non-profit Organizations, the administrative requirements specified in those circulars will apply.

BILLING CODE [illegible]

DEPARTMENT OF ENERGY

National Coal Council; Renewal

Pursuant to section 14(a)(2)(A) of the Federal Advisory Committee Act, and 41 CFR Part 101-6, Final Rule on Federal Advisory Committee Management, and following consultation with the Committee Management Secretariat of the General Services Administration, notice is hereby given that the National Coal Council has been renewed until December 31, 1989.

The renewal of the National Coal Council has been determined necessary and in the public interest in connection with the performance of duties imposed upon the Department of Energy by law. The Council will operate in accordance with the Federal Advisory Committee Act (5 U.S.C. App.), the Department of Energy Organization Act) Pub. L. 95-91), and the Final Rule.

Further information regarding this advisory committee may be obtained from Gloria Decker (202) 586-8990.

Issued in Washington, DC, on March 8, 1988.

Howard H. Raiken,

Advisory Committee Management Officer.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. TA88-3-34-000]

Florida Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

March 4, 1988.

Take notice that on February 29, 1988 Florida Gas Transmission Company

(FGT), P.O. Box 1188, Houston, Texas 77251-1188 tendered for filing the following tariff sheets to its FERC Gas Tariff.

FERC Gas Tariff, First Revised Volume No. 1

24th Revised Sheet No. 8

FERC Gas Tariff, Original Volume No. 2

46th Revised Sheet No. 128

FGT states that 24th Revised Sheet No. 8 and 46th Revised Sheet No. 128 contain revisions to FGT's Rate Schedules G and I and Rate Schedule T-3 to (i) adjust the Primary Adjustment to reflect a decrease in FGT's average cost of gas purchased for sale and company use; and (ii) to adjust the Balancing Adjustment to amortize over the six-month adjustment period beginning April 1, 1988 the balance in the current period Unrecovered Purchased Gas Cost Account as of December 31, 1987.

The proposed effective date of the above referenced tariff sheets is April 1, 1988.

FGT states that a copy of its filing has been served on all customers receiving gas under its FERC Gas Tariff, First Revised Volume No. 1, Original Volume No. 2, Original Volume No. 3, and interested State Commissions and is being posted.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 11, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP85-206-035]

Northern Natural Gas Co., Division of Enron Corp.; Proposed Changes in FERC Gas Tariff

March 4, 1988.

Take notice that on February 26, 1988, Northern Natural Gas Company, Division of Enron Corp. (Northern) tendered for filing proposed changes to its F.E.R.C. Gas Tariff.

Northern states that the purposes of this filing is to implement the terms of its Stipulation and Agreement (Settlement) filed in the above-proceeding.

Northern states that the compliance filing is composed of three major segments: 1) final settlement sales and transportation rates, 2) changes to implement new services and modifications to existing tariffs as ordered by the Commission, and 3) CD turnbacks/conversions along with a related D-1 rate adjustment.

Copies of the filing were served upon Northern's jurisdictional customers, state regulatory commissions and parties of record to the proceddings in the above docket.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington. DC 20426, in accordance with §§385.214 and 385.211 of the Commission's Regulations. All such motions or protests should be filed on or before March 11, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a Motion to Intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP88-65-000]

Pacific Interstate Offshore Co.; Change in Rate

March 4, 1988

Take notuce that on February 29, 1988, Pacific Interstate Offshore Company ("PIOC") tendered for filing a Cost and Revenue Study and Rate Redetermination for natural gas service rendered to its sole jurisdictional customer, Southern California Gas Company, pursuant to Rate Schedule G-10, FERC Gas Tariff Original Volume No. 1. To implement this notice of change, PIOC tendered for filing and acceptance Seventh Revised Tariff Sheet No. 4 superseding Sixth Revised Tariff Sheet No. 4.

PIOC states that based upon the test period cost of service, PIOC projects a decrease of 10.6% amounting to $382,176 in annual revenue rcquirements. PIOC states that the change is due to a decline in an imbedded cost of debt, a requested decrease in rate of return on equity and a change in gas deliverability due to a decline in reserves. PIOC does not propose any other change in its rates.

PIOC has requested that waiver be granted of all applicable rules and regulations of the Commission as may be necessary to implement the notice of change effective April 1, 1988.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211. All such motions or protests should be filed on or before March 11, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. TA88-2-38-000]

Ringwood Gathering Co.; Filing of Revised Tariff Sheets

March 4, 1988.

Take notice that on February 29, 1988, Ringwood Gathering Company tendered for filing Forty-Third Revised Sheet PGA-1 as part of its FERC Gas Tariff, Original Volume No. 1. Ringwood Gathering Company states that Forty-Third Revised Sheet PGA-1 with a proposed effective date of April 1, 1988, is being filed to revise its Base Tariff Rate to reflect a change in the system cost of purchased gas and the balance accumulated in its unrecovered purchased gas cost account.

Ringwood Gathering Company further states that the projected cost of purchased gas, as computed in said filing, is based on the applicable NGPA rates that will be paid during the effective period of this PGA. In certain instances, Ringwood has renegotiated the price to be paid for certain gas at costs below the maximum lawful NGPA rates. In these cases the renegotiated prices have been used.

Ringwood Gathering Company states that copies of this filing were served upon Williams Natural Gas Company, Oklahoma Natural Gas Company and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with sections 214 and 211 of the Commission's Rules of Practice, on or before March 11, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants a party to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5250 Filed 3-9-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA88-3-7-000]

Southern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 4, 1988.

Take notice that on February 29, 1988, Southern Natural Gas Company (Southern) tendered for filing a proposed change to its FERC Gas Tariff, Sixth Revised Volume No. 1 to become effective April 1, 1988. Such filing is pursuant to Section 17 (Purchased Gas Adjustment) of the General Terms and Conditions of Southern's FERC Gas Tariff. Southern states that the proposed change reflects a net decrease in Southern's commodity rates of 65.817¢ per Mcf, including a decrease in the Current Adjustment of 53.504¢ per Mcf, a decrease in the Surcharge Adjustment of 12.307¢ per Mcf based on a three-year amortization of Southern's deferred gas costs projected through March 31, 1988, and a decrease of .006¢ per Mcf in the DCC Surcharge Adjustment.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest on or before March 11, 1988 with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions or protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP88-17-004]

Southern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 4, 1988.

Take notice that on February 29, 1988, Southern Natural Gas Company (Southern) tendered for filing First Revised Sheet Nos. 4C, 4D, 4E, 4F, 4G and 4H to its FERC Gas Tariff, Sixth Revised Volume No. 1, with proposed effective dates of April 1, 1988. Southern states that the proposed tariff sheets reflects reduced transportation rates applicable on an interim basis to services performed by Southern pursuant to Section 311 of the NGPA pending final Commisson decision in Docket Nos. RP86-63-000, RP86-114-000 and RP88-17-000. The reduced rates track a reduction in Southern's underlying cost of service which is being made by Southern effective April 1, 1988, pursuant to a proposed Stipulation and Agreement in Docket Nos. RP86-63-000 and RP86-114-000. Southern has specifically requested authorization to implement the reduced rates in advance of Commission action on the Stipulation and Agreement.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions, all shippers on behalf of whom Southern is transporting gas under Section 311 of the NGPA and upon all parties to Docket Nos. RP86-63-000, RP86-114-000 and RP88-17-000.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, on or before March 11, 1988, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions or protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Casbell,

Acting Secretary.

[FR Doc. 88-5244 Filed 3-9-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. RP86-63-009 and RP86-114-004]

Southern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 4, 1988.

Take notice that on February 29, 1988, Southern Natural Gas Company (Southern) tendered for filing certain revised sheets to its FERC Gas Tariff with proposed effective dates of April 1, 1988. Southern states that the revised tariff sheets, which are being filed pursuant to a Stipulation and Agreement of the same date in Docket Nos. RP86-63-000 and RP86-114-000, reflect interim rate reductions of approximately $115 million annually in those proceedings pending the Commission's final decision in such proceedings. Southern has specifically requested authorization to implement the settlement rates in advance of the approval of the proposed Stipulation and Agreement by the Commission.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions, all shippers on behalf of whom Southern is transporting under Section 311 of the NGPA and upon all parties to Nos. RP86-63-000, RP86-114-000 and RP88-17-000.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest on or before March 11, 1988 with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions or protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. TA88-3-41-000]

Southwest Gas Corp., Change in Rates Pursuant to Purchased Gas Cost Adjustment Provision and Elimination of Incremental Pricing Provision

(March 4, 1988).

Take notice that Southwest Gas Corporation (Southwest) on February 29, 1988, tendered for filing Thirty-eighth Revised Sheet No. 10 pursuant to Section 9. Purchased Gas Adjustment Provision (PGA), of the General Terms and Conditions contained in its FERC Gas Tariff, Original Volume No. 1. The purpose of said filing is to reflect an increase in rates occasioned by an increase in rates from Northwest Pipeline Corporation (Northwest), Southwest's sole supplier of gas in northern Nevada, proposed to become effective April 1, 1988. Southwest has requested that its filing become effective April 1, 1988, concurrent with Northwest's proposed rate increase.

Southwest also tendered for filing, as a part of its PGA filing, the following tariff sheets to eliminate the incremental pricing provision from Southwest's tariff pursuant to FERC Order No. 478 issued July 27, 1987, in Docket No. RM79-21-000:

Sixth Revised Sheet No. 27
Fifth Revised Sheet No. 28
Third Revised Sheet No. 29
Fourth Revised Sheet No. 30
First Revised Sheet No. 30A
Second Revised Sheet No. 30B
Eighth Revised Sheet No. 31
Fifth Revised Sheet No. 32
Third Revised Sheet No. 33

Southwest states that a copy of this filing has been mailed to the Nevada Public Service Commission, the California Public Utilities Commission, Sierra Pacific Power Company and CP National Corporation.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protest should be filed on or before March 11, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5246 Filed 3-9-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP87-131-001 and CP87-132-001]

Tennessee Gas Pipeline Co.; Ocean State Power Project Availability of Draft Environmental Impact Statement and Announcement of a Public Meeting to Receive Comments

March 4, 1988.

Notice is hereby given that the staff of the Federal Energy Regulatory Commission (FERC), in cooperation with the State of Rhode Island Office of Intergovernmental Relations (OIR), has made available a draft environmental impact statement (DEIS) on the natural gas pipeline facilities proposed in the above-referenced dockets, and a related proposal to construct a 500 megawatt power plant in northwestern Rhode Island.

The DEIS was prepared under the direction of the FERC and OIR staffs to satisfy the requirements of the National Environmental Policy Act and the Rhode Island Energy Facility Siting Act. The staff has determined that approval of the proposed project, with appropriate mitigating measures including receipt of all necessary permits and approvals, would have limited adverse environmental impact. The DEIS evaluates alternatives to the proposals.

The proposed action involves construction and operation of a new natural gas-fired, combined-cycle power plant which would be located on a 40.6-acre parcel in the town of Burrillville, Rhode Island. The proposal includes construction of a 10-mile pipeline to transport process and cooling water to the plant from the Blackstone River, and a 7.5-mile pipeline to deliver No. 2 fuel oil to the site for emergency use when natural gas may not be available.

The natural gas pipeline facilities covered in the DEIS include a total of 25.5 miles of 30-inch diameter looping in 5 separate segments located adjacent to existing gas transmission pipelines in New York and Massachusetts and approximately 11 miles of new 20-inch-diameter pipeline in Massachusetts and Rhode Island. The DEIS includes analysis of an additional 7,700 horsepower of compression at 3 existing compressor stations in New York and Massachusetts and a new 4,500 horsepower compressor station in New York.

A public meeting will be held on April 14, 1988, at 7:30 p.m. in the Council Chambers, Woonsocket City Hall, 169 Main Street, Woonsocket, Rhode Island. The purpose of this meeting is to receive comments for the record on the staff's analysis. Anyone who would like to make an oral presentation at this meeting should promptly contact the project manager identified below to have their names placed on the speakers list. A second speakers list will be made available for sign-up at the public meeting. A transcript will be made of the meeting and oral comments.

Written comments are also welcome. All written comments on specific environmental issues should contain supporting documentation and rationale, and must be filed on or before April 25, 1988, reference Docket No. CP87-132-001, and should be addressed to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. A copy of the written comments should also be sent to the project manager identified below.

The DEIS has been mailed to Federal, state and local agencies, public interest groups, interested individuals, newspapers, libraries, and parties in this proceeding. A 45-day comment period is being provided for review and receipt of comments on the DEIS. Any person may file a motion to intervene on the basis of the staff's DEIS [18 CFR 380.10(a)(1)]. After these comments are reviewed, any new issues are investigated, and modifications are made to the DEIS, a final EIS (FEIS) will be published by the staff and distributed. The FEIS will contain the staff's responses to comments received on the DEIS.

The DEIS has been placed in the public files of the FERC and the OIR, and is available for public inspection in the FERC's Division of Public Information Room 1000, 825 North Capitol Street NE., Washington, DC 20426, and at the OIR, 275 Westminster Mall, Providence, Rhode Island 02903.

Additional copies of the DEIS, in limited quantities, are available from the FERC's Division of Public Information or from Mr. Lonnie Lister, Project Manager, Environmental Analysis Branch, Office of Pipeline and Producer Regulation, Room 7312, 825 North Capitol Street NE., Washington, DC 20426, telephone (202) 357-8874 or FTS 357-8874.

Lois D. Cashell,

Acting Secretary.

First Revised Sheet No. 90
First Revised Sheet No. 91
First Revised Sheet No. 92
First Revised Sheet Nos. 93–99
First Revised Sheet Nos. 115–136
First Revised Sheet Nos. 244–252

Williston Basin states that the revised sheets reflect receipt of authority in Docket Nos. CP86–430–000, *et al.* to abandon sales services to Colorado Interstate Gas Company and MIGC, Inc. under Rate Schedules X–5 and X–6, respectively. These revisions are to be effective May 2, 1986.

Williston Basin has also revised the tariff sheets filed in Docket No. RP87–115–000 as necessary to cancel Rate Schedule X–10 covering grandfathered transportation service for Wyoming Gas Company under section 311 of the Natural Gas Policy Act of 1978 pursuant to the Commission's Regulations at 18 CFR 284.105(a). This cancellation is to be effective October 9, 1987.

Williston Basin states that it has not reflected reinstatement of Rate Schedule I–1 in accordance with its understanding that abandonment authority has been granted in Docket No. CP88–1–000 pursuant to Commission action at its February 24, 1988 Agenda Session. Williston Basin requested any necessary waivers necessary for acceptance of the revised tariff sheets pending receipt of a final Commission Order in Docket No. CP88–1–000.

Williston Basin states that subsequent to the filing of the general rate case, on January 15, 1988, Williston Basin's tariff sheets implementing Annual Charge Adjustment Provisions were accepted as being in satisfactory compliance with the Office of Pipeline and Producer Regulation blanket order issued September 29, 1987 in Docket Nos. RP87–109, *et al.* and the Commission's December 10, 1987 order in Docket Nos. RP87–92–001 and RM87–3–000, *et al.* By order issued December 30, 1987, in Docket No. RP87–71–000, *et al.*, Williston Basin's tariffs implementing the Commission-approved revision to the Gas Research Institute funding unit were accepted for filing. The Company states that these changes have been incorporated into the revised gas tariff sheets.

Williston Basin states that the substitute tariff sheets reflect the changes in cost of gas accepted by Commission Orders dated February 3, 1988 in Docket No. TA87–4–49–004 and October 29, 1987 in Docket No. TA88–1–49–000, pursuant to Williston Basin's Purchased Gas Cost Adjustment Provision.

Pursuant to § 375.307(j) of the Commission's Regulations, Williston Basin requests waiver pursuant to section 4(d) of the Natural Gas Act and Commission's Regulations thereunder, so that the attached tariff sheets may become effective on May 2, 1986, as proposed herein.

Any person desiring to be heard or to make any protest with reference to said filing should, on or before March 11, 1988, file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of Rule 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell
Acting Secretary.

[FR Doc. 88–5247 Filed 3–9–88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP88–245–000, et al.]

Natural Gas Certificate Filings; Florida Gas Transmission Company et al.,

March 3, 1988.

Take notice that the following filings have been made with the Commission:

1. Florida Gas Transmission Company

[Docket Nos. CP88–245–000]

Take notice that on February 19, 1988, Florida Gas Transmission Company (FGT), P.O. Box 1188, Houston, Texas

77251–1188, filed in Docket No. CP88–245–000 an application pursuant to section 7(c) of the Natural Gas Act for authorization to transport gas for Exxon Company, U.S.A., a Division of Exxon Corporation (Exxon), all as more fully described in the application.

Specifically, FGT states that Exxon and FGT have entered into an Interruptible Transportation Agreement dated December 4, 1987, which provides for the receipt of gas by FGT for the account of Exxon of up to 50,000 MMBtu per day, and for the redelivery of equivalent volumes for Exxon's account, less Exxon's pro rata share of any gas vented or lost for any reason from that portion of FGT's facilities being utilized for Exxon at the time of such loss, and less Exxon's pro rata share of the total compressor fuel utilized by FGT in rendering all transportation services. FGT states that the gas will be received at the following existing points of interconnection between FGT and other entities:

(1) Existing point of interconnection between FGT and United Gas Pipe Line Company (United) in St. Helena Parish, Louisiana.

(2) Existing point of interconnection between FGT and United in St. Landry Parish, Louisiana.

(3) Existing point of interconnection between FGT and Southern Natural Gas Company in Washington Parish, Louisiana.

(4) Existing point of interconnection between FGT and the facilities of the Matagorda Offshore Pipeline System in Refugio County, Texas.

(5) Existing point of interconnection between FGT and Exxon's plant in Pearl River County, Mississippi.

(6) Existing point of interconnection between FGT and Prosper Energy Corporation's facilities in Pearl River County, Mississippi.

(7) Existing point of interconnection between FGT and the facilities of the Big Escambia Creek Plant operated by Exxon in Escambia County, Alabama.

(8) Existing point of interconnection between FGT and the facilities of the Jay Gas Processing Plant operated by Exxon in Santa Rosa County, Florida.

FGT proposes to deliver the gas to or for the account of Exxon, less Exxon's pro rata share of compressor fuel and vented and lost gas, at the following locations:

(1) Existing point of interconnection between FGT and Five Flags Pipeline Company in Santa Rosa County, Florida.

(2) Existing point of interconnection between FGT and Columbia Gulf Transmission Company in St. Landry Parish Florida.

Inasmuch as all the above-described points of receipt and delivery are in existence, FGT states that it is not requesting authorization to construct any new facilities.

FGT proposes to charge Exxon the Maximum Rate applicable to this service. The Maximum Rate currently consists of a Facility Charge of 7.3 cents per MMBtu delivered and a Service Charge of 3.9 cents per MMBtu per 100 miles of forward haul. These charges are in addition to FGT's currently effective Gas Research Institute surcharge of 1.47 cents per MMBtu and FGT's ACA surcharge of 0.21 cent per MMBtu which became effective on October 1, 1987.

FGT states that the term of the transportation agreement is for a primary term of fifteen years from the date of initial deliveries under the contract, and from year to year thereafter.

FGT states that Exxon requires this transportation service in order to sell gas to markets served directly or indirectly by Five Flags Pipeline Company and Columbia Gulf Transmission Company.

FGT states that since the transportation service is fully interruptible and is contingent upon the availability of capacity sufficient to provide the service without detriment or disadvantage to FGT's existing customers, the transportation service proposed herein cannot have an adverse impact on FGT's existing customers.

Comment date: March 24, 1988, in accordance with Standard Paragraph F at the end of this notice.

2. Mountain Fuel Resources, Inc.

[Docket No. CP88–239–000]

Take notice that on February 18, 1988, Mountain Fuel Resources, Inc. (MFR) 79 South State Street, Salt Lake City, Utah, 84111, filed in Docket No. CP88–239–000 an application pursuant to Section 7(c) of the Natural Gas Act (NGA) for authorization to construct and operate approximately 77 miles of 20-inch pipeline and appurtenant facilities to connect MFR's Storage Main Line No. 58 (S.M.L. No. 58), located on its northern transmission system, with its southern transmission system near MFR's Fidler Compressor Station (Fidler Station), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

MFR requests authority to construct and operate the proposed 77-mile, 20-inch diameter pipeline, which would extend from an interconnection with MFR's S.M.L. No. 58 in Daggett County, Utah, to MFR's Fidler Station located in Uintah County, Utah, in order to connect its northern and southern transmission systems. MFR estimates that the cost to construct and oprate its proposed north/south pipeline is $18,962,000.

It is explained that historically, MFR has depended upon Northwest Pipeline Corporation (Northwest) to (1) transport gas from an interconnection with MFR's southern system at the Red Wash exchange point in Uintah County, Utah to its northern system and (2) deliver purchased gas to the southern system at Red Wash. MFR asserts that the proposed pipeline would eliminate the dependence on and the cost of third-party transportation, thus improving MFR's ability to (1) dependably meet the contractual commitments to its producer-suppliers as well as to its sales and transportation customers in a manner that will maximize quality of service and minimize costs, (2) reliably respond to both gas supply shortfalls and excess deliverability conditions on its southern system, (3) improve systemwide operational flexibility and control in order to withstand dramatic changes in the mix of sales and transportation gas being moved throughout its system and, therefore, more successfully balance systemwide receipts and deliveries, and (4) accommodate requests for transportation service under MFR's open-access program which was conditionally authorized in Docket No. RP86–87–000, pursuant to Section 311 of the Natural Gas Policy Act of 1978.

Comment date: March 24, 1988, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs:

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by

Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public covenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5300 Filed 3-9-88; 8:45 am]

BILLING CODE 4717-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Information Collection Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of Information Collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

Title of Information Collection: Procedures for Monitoring Bank Protection Act Compliance.

Background: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a request for the review and approval of the information collection system identified above.

Address: Written comments regarding the submission should be addressed to Robert Fishman, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 and to John R. Keiper, Assistant Executive Secretary, Federal Deposit Insurance Corporation, Washington, DC 20429.

Comments: Comments on this collection of information should be submitted on or before April 11, 1988.

For Further Information Contact: Requests for a copy of the submission should be sent to John R. Keiper, Assistant Executive Secretary, Federal Deposit Insurance Corporation, Washington, DC 20429, telephone (202) 898-3810.

Summary: The FDIC is requesting OMB approval to continue the collection of information proposed on insured nonmember banks as a result of subpart A to regulation 12 CFR 326. *Minimum Security Devices and Procedures for Insured Nonmember Banks.* The information collected by and retained at banks is used by FDIC bank examiners to assure that banks comply with 12 CFR Part 326, which implements the provisions of the Bank Protection Act of 1968, and to review bank security programs. The collection of information currently does not have an OMB control number assigned to it as required by the Paperwork Reduction Act.

The aggregate annual paperwork burden on insured nonmember banks as a result of subpart A to 12 CFR Part 326 is 4,350 hours.

Dated: March 4, 1988.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6718-02-M

FEDERAL HOME LOAN BANK BOARD

[No. 88-149]

Power of Receiver and Conduct of Receiverships; Repurchase Agreements

Date: March 7, 1988.

AGENCY: Federal Home Loan Bank Board.

ACTION: Notice.

SUMMARY: The Federal Home Loan Bank Board ("Board") is supplementing Board Resolution No. 84-572 to clarify its position concerning the protections afforded to those dealing with insured savings and loan associations in "repos" of government and mortgage backed securities. With particular reference to American Savings and Loan Association, Stockton, California ("American") which has engaged in a substantial volume of such "repo" transactions, the Board wishes to make it clear that the protections given to securities dealers and others in the "repo" market by amendments to the Bankruptcy Code would also be afforded to securities dealers and others engaged in repo transactions with American.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Lawrence W. Hayes, Deputy General Counsel for FSLIC, (202) 377-6428; JoAnne Morris, Attorney, (202) 377-7396; or Michael Phillips, Attorney, Office of General Counsel, (202) 377-6755; Federal Home Loan Bank Board, 1700 G Street NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION:

Whereas, the Federal Home Loan Bank Board ("Board") has considered the particular importance of Repos (as defined below) in providing liquidity and funding for American Savings and Loan Association, a California chartered institution ("American"), the accounts of which are insured by the Federal Savings and Loan Insurance Corporation ("FSLIC"), and the potential disruption to the markets in such Repos that could arise as a result of a receivership, conservatorship, or similar

proceeding with respect to American, which disruption could have additional negative effects on the cost of the funding and liquidity of Repo Assets (as defined below) for other FSLIC insured institutions and institutions chartered by the Board; and

Whereas, The Board as operating head of the FSLIC has decided, pursuant to its powers under Section 5(d)(11) of the Home Owners Loan Act of 1933, as amended, and Section 406(c)(3) of the National Housing Act, as amended, to adopt the following resolutions.

Now, Therefore, the Board resolves as follows

1. The Board commits that is shall use its powers under the National Housing Act to ensure that any receivership (and to the fullest extent permitted by law, any conservatorship or similar proceeding) with respect to American shall be conducted solely by the FSLIC (and not the California Commissioner of Savings and Loans) as receiver, conservator or similar official (the "Receiver") under federal law and regulations, Board Resolution No. 84-572, and these resolutions.

2. The Receiver will perform all of American's obligations under Repos outstanding at the time of its appointment according to their then existing terms and conditions (including payment and margin maintenance terms) and will perform all obligations under any New Repos (as defined below) in accordance with their terms and conditions.

3. The Board and the Receiver shall use their best efforts to cause the Federal Home Loan Mortgage Corporation and/or the Federal Home Loan Banks to make necessary purchases from, or loans, to, the Receiver, so as to enable the Receiver to perform the obligations assumed or incurred under Repos and New Repos to the extent necessary to maintain an orderly market in Repo Assets.

4. The Receiver shall have the power to renew, extend, to modify any Repo, and to enter into new Repos (collectively, "New Repos"), but may only exercise such power with the consent of the Repo counterparty.

5. In any termination of the receivership of American or disposition of American's liabilities under any Repo or.New Repo, the Board and the Receiver shall provide for the performance of obligations and the exercise of remedies under Repos and New Repos in a manner consistent with Board Resolution No. 84-572 and these resolutions.

6. Notwithstanding any other provision of law, regulation, or these resolutions, if the Receiver does not perform all such obligations in accordance with their terms, the counterparty to such Repos or New Repos shall have the absolute right to exercise all of its rights and remedies with respect to such Repos and New Repos (including liquidation of Repo Assets).

7. In the event of a Cross-Default (as defined below), a counterparty to a Repo or New Repo shall have the absolute right to accelerate the repurchase and other obligations thereunder (without notice to the Receiver) and exercise all of its rights and remedies with respect to such Repos and New Repos (including liquidation of Repo Assets to satisfy such accelerated obligations).

8. The failure or delay of a counterparty to exercise any of its rights or remedies upon a failure to perform or a Cross-Default shall not constitute a waiver of any rights or remedies in connection therewith.

9. In connection with a Repo or New Repo counterparty's exercise of remedies upon a failure to perform or a Cross-Default, neither the Board nor the Receiver shall object to or seek to oppose or stay such exercise or assert or seek to assert any adverse claims (including stop-transfer instructions) against the Repo Assets or any holder or transferee thereof in connection therewith.

10. The Receiver may enforce its claim to any excess received by a counterparty upon the exercise of such remedies over the stated repurchase price (including interest to the date of liquidation of the Repo Assets) and reasonable expenses of liquidation; provided, however, that nothing herein shall be construed to limit any set-off rights that such counterparty shall have against any such excess.

11. Notwithstanding any provision of law or regulation, neither the Board nor the Receiver shall seek to avoid or recover any payment or transfer of Repo Assets or funds made in connection with any Repo or New Repo or the liquidation thereof as a preferential transfer or fraudulent conveyance (other than any fraudulent conveyance made by American, voluntarily or involuntarily, with actual intent to hinder, delay or defraud its creditors; provided, however, any transferee of such a transfer that takes for value and in good faith has a lien on or may retain any interests transferred, and shall not be subject to a fraudulent conveyance claim in respect of such transfer, in each case to the extent that such transferee gave value to American in exchange for such transfer; and provided, further, that in no event shall the Board or the Receiver make any such fraudulent conveyance claim against any Repo Assets).

12. Nothing herein shall limit the power of the Board or the Receiver to make a claim against a counterparty (but not Repo Assets) based on such counterparty's fraud or failure to liquidate a Repo or a New Repo in a commercially reasonable manner. In light of the substantial volume of American's Repos, the Board and the FSLIC hereby confirm that liquidation of Repo Assets over a period, not in excess of 90 days from the date of termination of a Repo or New Repo, would constitute a liquidation of a Repo or New Repo in a commercially reasonable time, and that the counterparty shall be entitled (but in the case of a Repo only from the proceeds of liquidation of Repo Assets or by way of set-off) to interest, at the contract rate, accruing during such period; provided, however, that a liquidation of Repo Assets at any point during such period or after a longer period of time shall not in and of itself constitute a commercially unreasonable time.

13. In connection with any Repos or New Repos, the Board and the FSLIC, in its corporate capacity, each irrevocably waives compliance by counterparties to Repos or New Repos with the FSLIC right of notice and purchase (12 CFR 563.8-2) and the contractual language required thereby, if applicable to any Repo Assets.

14. Nothing herein shall limit the exercise by a counterparty to a Repo or New Repo of its rights and remedies thereunder in reliance on the Board's Resolution No. 84-572, which Resolution shall continue in full force and effect; provided, however, that paragraphs 2, 3, 5, 6, 7, 8, 9, 11, and 13, the proviso to paragraph 10, and the second sentence of paragraph 12 of these resolutions shall not apply to a termination of a Repo prior to the stated repurchase or maturity date therefor based solely on the appointment of the Receiver for American.

15. In recognition of the reliance counterparties to Repos and New Repos place and will place on Resolution No. 84-572 and these resolutions in continuing to renew and enter into Repos with American, the Board intends itself, the FSLIC, in its corporate capacity, and the Receiver to be bound by Resolution No. 84-572 and these resolutions, and will not amend or rescind them without appropriate public notice of at least 45 days, and any such amendment or rescission shall operate only prospectively.

"Cross-Default" means, as to any counterparty to a Repo or New Repo, (a) the failure by American or the Receiver to make any payment of funds or delivery of additional Repo Assets to any other Repo or New Repo counterparty when due, (b) the failure by American or the Receiver to make any payment of funds or delivery of securities under any "securities contract" or "commodities contract" (each as defined in the federal Bankruptcy Code), or interest rate exchange agreement, when due, or (c) such counterparty is unable to finance or sell under repo, on reasonable terms and conditions, any Repo Assets (whether due to market insecurity, a breach by the Board of its commitments hereunder, or otherwise).

"Repo Assets" means assets that are "liquid assets" under 12 CFR 523.10 or assets that would be so "liquid" but for their remaining term to maturity, "mortgage-related securities" (as defined in section 3(a)(41) of the Securities Exchange Act of 1934), whole loan mortgages, and interests therein.

"Repo" means an agreement, whether documented as a purchase and sale transaction or a secured loan transaction, by American (or the Receiver, in the case of New Repos) pursuant to which American or the Receiver transfers Repo Assets to a counterparty that is a registered broker-dealer (including a registered government securities broker-dealer) or an affiliate thereof, the Federal Home Loan Mortgage Corporation, or (to the extent that Repo Assets are securities that are direct obligations of or that are fully guaranteed as to principal and interest by the United States or any agency thereof, the Federal Home Loan Mortgage Corporation, or the Federal National Mortgage Association) a Federal Home Loan Bank, against the transfer of funds with a simultaneous agreement by the counterparty to retransfer such Repo Assets to American or the Receiver on a date certain or on demand against the transfer of funds.

Resolved further, that these resolutions shall be effective immediately upon their adoption by the Board.

Resolved further, that the Secretary to the Board shall forward this resolution for publication in the **Federal Register**.

By the Federal Home Loan Bank Board.

John F. Ghizzoni,

Assistant Secretary.

[FR Doc. 5358 Filed 3-9-88; 8:45 am]

BILLING CODE 6720-01-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202-007540-049.

Title: United States Atlantic and Gulf/Southeastern Caribbean Conference.

Parties:

Puerto Rico Maritime Shipping Authority
Sea-Land Service, Inc.
Shipping Corporation of Trinidad and Tobago Ltd.

Synopsis: The proposed amendment would permit the parties to establish and publish rates on excepted commodities. It would prohibit independent action ("IA") with respect to rates on excepted commodities and would provide for IA with respect to the level of compensation paid to an ocean freight forwarder who is also a customs broker. It would also permit the parties to enter into service contracts on excepted commodities on a group basis only (individual service contracts are prohibited), and would restate the agreement.

Agreement No.: 232-010885-001.

Title: The EAC Lines Transpacific Service, Ltd., Mitsui O.S.K. Lines, Ltd. and Kawasaki Kisen Kaisha Space Charter and Sailing Agreement in the Far East-U.S. Pacific Coast Trades.

Parties:

The EAC Lines Transpacific Service, Ltd.
Mitsui O.S.K. Lines, Ltd.
Kawasaki Kisen Kaisha, Ltd.

Synopsis: The proposed amendment would permit any party to withdraw from the agreement with immediate effectiveness by giving appropriate written notice.

Agreement No.: 217-011176.

Title: Ozean-Linie GmbH/n.v. CMB s.a. dba Deppe Line Space Charter Agreement

Parties:

Ozean Linie GmbH ("Ozean")
n.v. CMB s.a. ("CMB")

Synopsis: The proposed agreement would permit Ozean to charter space to CMB in the trade between ports in Northern Europe and U.S. Gulf and Florida ports and San Juan, Puerto Rico.

Agreement No.: 217-011177.

Title: Euro-Gulf International, Inc./Ozean Linie GmbH Space Charter Agreement.

Parties:

Euro-Gulf International, Inc.
Ozean Linie GmbH

Synopsis: The proposed agreement would permit the parties to charter space from one another in the trade between U.S. Gulf and Florida ports and Northern European ports.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: March 7, 1988.

BILLING CODE 6730-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Meeting of Tuberculosis Elimination Advisory Committee

ACTION: Notice of Meeting.

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App. 2), the Centers for Disease Control (CDC) announces the following committee meeting.

Name: Advisory Committee for Elimination of Tuberculosis (ACET)

Time and Date: 8:00 a.m.–4:30 p.m.—April 7, 1988, 8:00 a.m.–12:30 p.m.—April 8, 1988.

Place: The Emory Room, Stafford-Emory Inn, 1644 Clifton Road, NE., Atlanta, Georgia 30329.

Status: Open.

Purpose: This Committee advises and makes recommendations to the Secretary, Department of Health and Human Services, the Assistant Secretary for Health, and the Director, CDC, regarding feasible goals for eliminating tuberculosis. Specifically, the Committee makes recommendations regarding policies, strategies, objectives, and priorities, addresses the development of new technologies and their subsequent application, and reviews progress toward elimination.

Matters to be Discussed: The Committee will finalize the Strategic Plan for Elimination of Tuberculosis in the United States. The committee will also review the statement on TB Control in Correctional Institutions and the statement on Tuberculosis and HIV Infection. Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Dixie E. Snider, Jr., M.D., Director, Division of Tuberculosis Control, and Executive Secretary, ACET, Center for Prevention Services, CDC, 1600 Clifton Road, NE., Mailstop E-10, Atlanta, Georgia 30333, Telephones: FTS: 236-2501; Commercial: 404/639-2501.

Dated: March 4, 1988.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 87N-0270]

Studies for Developing Procedures to Evaluate the Safety of Bound Drug Residues; Availability of Grants (Cooperative Agreements); Request for Applications

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA), Center for Veterinary Medicine (CVM), is announcing the availability of approximately $300,000 for Fiscal Year 1988 for cooperative agreements to support studies for developing procedures to evaluate the safety of drug residues that are bound to tissues of food-producing animals. This notice amends a prior request for applications that was published in the **Federal Register** of October 21, 1987 (52 FR 39281), to allow additional time for submission of applications. All interested parties are advised to consult the notice of October 21, 1987, for additional information on the proposed research program.

DATES: Applications must be received by 5 p.m., May 31, 1988. The earliest date for award is September 30, 1988.

ADDRESSES: Applications should be submitted to: Robert L. Robins, State Contracts and Assistance Agreements Branch (HFA-520), Food and Drug Administration, Park Bldg., Rm. 3-20, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6170. Note: Applications hand carried or commercially delivered should be addressed to the Park Bldg., Rm. 3-20, 12420 Parklawn Dr., Rockville, MD 20857. The outside of the mailing package and the top of the application face page should be labeled "Response to RFA-FDA-CVM-88-2."

FOR FURTHER INFORMATION CONTACT: *For further information regarding requests for application (RFA) forms or the administrative and financial management aspects of this notice contact:* Barbara Moy, State Contracts and Assistance Agreement Branch (HFA-520), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6170.

For further information regarding the programmatic aspects of this notice contact: David B. Batson, Center for Veterinary Medicine (HFV-500), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6510.

SUPPLEMENTARY INFORMATION: FDA's authority to fund research projects is set out in section 301 of the Public Health Service Act (42 U.S.C. 241). Cooperative agreements are authorized under Pub. L. 95-224. FDA's research program is described in the catalog of Federal Domestic Assistance No. 13.103.

The purpose of the cooperative agreements is to provide financial assistance to support research on new models, procedures, or combinations of models and procedures that can contribute to a general approach to evaluating the safety of bound drug residues. FDA anticipates making up to three awards. Support for this program may be for a period of up to 3 years.

Dated: March 4, 1988.

Ronald G. Chesemore,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

Health Care Financing Administration

Statement of Organization, Functions, and Delegations of Authority

Part F. of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services, Health Care Financing Administration (HCFA), **Federal Register**, Vol. 46, No. 223, pp. 56911-56934, dated Thursday, November 19, 1981) is amended to reflect a reorganziation of the Provider Reimbursement Review Board.

The specific changes to Part F. are described below:

- Section F.20.A. Provider Reimbursement Review Board (FA-1) is amended to reflect the establishment of an organizational substructure within the Board. The functions and responsibilities remain the same. The section now reads as follows:

A. Provider Reimbursement Review Board (FA-1).

The Provider Reimbursement Review Board (Board), after determining that it has jurisdiction, conducts hearings to resolve disputes on cost reimbursement and prospective payment submitted by Medicare providers under section 1878 of the Social Securtiy Act. Upon the completion of these hearings, the Board renders impartial decisions on these appeals. This is the initial step in the judicial review process.

1. Hearings and Decisions Staff (FA-11).

The Hearings and Decisions Staff is responsible for facilitating and supporting hearings and for preparing the final Provider Reimbursement Review Board decisions after the conclusion of hearings.

2. Jurisdiction and Case Management Staff is responsible for determining if the Provider Reimbursement Review Board (Board) has jurisdiction for appeals filed under section 1878 of the Social Security Act. Upon determining that the Board has jurisdiction, this Staff will be responsible for the management of the case until it is ready for hearing or the case is withdrawn or dismissed prior to hearing.

William L. Roper,

Administrator.

Date: February 22, 1988.

BILLING CODE 4120-01-M

Health Resources and Services Administration

National Advisory Council on Nurse Training; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of May 1988:

Name: National Advisory Council on Nurse Training.

Date and Time: May 10–11, 1988, 9:00 a.m.

Place: The Potomac Room, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Open on May 10, 9:00 a.m.–12:30 p.m.

Closed for remainder of meeting.

Purpose: The Council advises the Secretary and Administrator, Health Resources and Services Administration, concerning general regulations and policy matters arrising in the administration of the Nurse Education Amendments of 1985 (Pub. L. 99–92). The Council also performs final review of grants applications for Federal Assistance, and makes recommendations to the Administrator, HRSA.

Agenda: The open portion of the meeting with announcements; considerations of minutes of previous meeting; report by the Director, Bureau of Health Professions, the Director, Division of Nursing and staff reports. The meeting will be closed to the public on May 10, at 12:30 p.m. for the remainder of the meeting for the review of grant applications for Advance Nurse Education applications, Nurse Practitioner/Nurse Midwifery applications, and Special Project Grants applications. The closing is in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S.C. Code, and the Determination by the Administrator, Health Resources and Services Administration, pursuant to Public Law 92–463.

Anyone requiring information regarding the subject Council should contact Dr. Mary S. Hill, Executive Secretary, National Advisory Council on Nurse Training, Room 5C–14, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301)443–8193.

Agenda Items are subject to change as priorities dictate.

Date: March 4, 1988.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160-15-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ID–943–08–4220–11; I–18106]

Partial Termination of Recreation and Public Purpose Classification; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Classification Termination.

SUMMARY: This order partially terminates a Bureau of Land Management classification affecting 5 acres of public land near Bliss, Idaho. After termination of the classification, the underlying lands will immediately become available for disposal through a pending public sale action.

EFFECTIVE DATE: March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Nancy Bloyer, Idaho State Office, 3380 Americana Terrace, Boise Idaho 83706, 208–334–1471.

By virtue of the authority vested in the Secretary of the Interior by the Recreation and Public Purposes Act of June 14, 1926, as amended; 43 U.S.C. 869; 869–4; it is ordered as follows:

1. Pursuant to the regulations in 43 CFR 2091.7–1(b)(1) and the authority delegated to me by BLM Manual Section 1203 (48 F.R. 85), the classification decision of February 25, 1982, which classified 200 acres of public land as suitable for recreation and public purposes under the Act of June 14, 1926, as amended; 43 U.S.C. 869; 869–4, under serial number I–18106, is hereby revoked insofar as it affects the following-described lands:

Boise Meridian, Idaho

T. 6 S., R. 12 E.,
  Sec. 1, N½NE¼NE¼SW¼.

The area described contains 5.00 acres in Gooding County.

2. Upon termination of the classification, the underlying lands will immediately become available for disposal through a pending public sale action under section 203 of the Federal Land Policy and Management Act of 1976.

Dated: March 1, 1988.

Martin J. Zimmer,

Acting State Director.

Montana; Miles District Advisory Council; Meeting

AGENCY: Bureau of Land Management, Miles City District Office, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given in accordance with Pub. L. 92–463 that a meeting of the Miles City District Advisory Council will be held Thursday, April 14, 1988, at 8 a.m. in the conference room at the Miles City District Office, Garryowen Road, West of Miles City, Montana. The agenda is as follows:

1. Approve minutes of last meeting
2. Election of Chairperson and Vice Chairperson for 1988
3. Long term goals and objectives for Miles City District—DAC input
4. Selected program updates
5. New Business
6. Opportunity for public comment
7. Adjourn

The meeting is open to the public. The public may make oral statements before the Advisory Council or file written

statements for the Council's consideration. Depending upon the number of persons wishing to make an oral statement, a per person time limit may be established. Summary minutes of the meeting will be maintained in the Bureau of Land Management District Office and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

FOR FURTHER INFORMATION CONTACT: District Manager, Miles City District, Bureau of Land Management, P.O. Box 940, Miles City, Montana 59301.

Date: March 4, 1988.

BILLING CODE 4310-DN-M

Susanville District Grazing Advisory Board; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given that the Susanville District Grazing Advisory Board, created under the Secretary of the Interior's discretionary authority on May 14, 1986, will meet on April 21, 1988.

The meeting will begin at 10:00 a.m. at the Surprise Resource Area Office, of the Bureau of Land Management, 602 Cressler Street, Cedarville, California.

The agenda on April 21, will include a discussion and recommendation on the use of 8100 funds, for fiscal year 1989, a report on the progress of range improvement work for fiscal year 1988, an update on the Wild Horse and Burro Program, an update on the Buffalo Hills Deer Winter Range TRT, an update on the Alturas Integrated Resource Management Plan, an update on the High Rock situation, and a discussion of other items as appropriate.

The meeting is open to the public. Interested persons may make oral statements to the board between 3:00 p.m. and 4:30 p.m. on April 21, 1988, or file a written statement for the board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 705 Hall Street, Susanville, California, 96130, by April 15, 1988. Depending on the number of persons wishing to make oral statements, a per person time limit may be established.

Summary minutes of the board meeting will be maintained in the District Office, and will be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Robert J. Sherve,

Acting District Manager.

BILLING CODE 4310-40-M

[WY–010–08–4333–12]

Limited Motor Vehicle Use Designation; Washakie Resource Area, WY

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Change in off-road vehicle designation WY–010–8105.

SUMMARY: On January 1, 1982, the "Pits Motorcycle Use Area" east of Worland, Wyoming, was formally designated and motor vehicle use at the area was limited to motorcycles and snowmobiles. The Wyoming BLM ORV designation identified for the area is WY–010–8105. It has since been determined that it is necessary to discourage public use of the area because of the increasing concentrations of hydrogen sulfide gas (H_2S) nearby. As secondary oil recovery methods (water flooding) have become more prevalent near "The Pits", hydrogen sulfide gas accumulations have been increasing. In addition, flowlines carrying H_2S gas are present near the site. Inhalation of this gas could be fatal and is especially hazardous to uninformed casual users. As part of the process to reduce public contact with this hazard, the special designation on the "Pits Motorcycle Use Area" is rescinded and the area is redesignated "limited to existing roads and trails", as of the date of this notice. All motorized vehicle use on public lands administered by the Bureau of Land Management in "The Pits Motorcycle Use Area" is restricted to existing roads and trails. Information on the availability of other public lands suitable for motorcycle use is available by contacting the Bureau of Land Management, Worland District Office.

DATE: This designation becomes effective upon publication in the Federal Register and will remain in effect until rescinded or modified by the authorized officer. An environmental assessment describing the impact of this designation is available for inspection at the Worland District Office.

ADDRESSES: Bureau of Land Management, 101 South 23rd Street, Worland, Wyoming.

FOR FURTHER INFORMATION CONTACT: Darrell C. Barnes, District Manager, Bureau of Land Management, P.O. Box 119, Worland, Wyoming 82401, (307) 347–9871

SUPPLEMENTARY INFORMATION: The limited use designation applies to the following public lands:

Sixth Principal Meridian, Wyoming

Washakie County

Generally, public rangelands located approximately 5 miles east of Worland, Wyoming, along the old alignment of U.S. Highway 16, known locally as the Pits, totalling about 125 acres.

Specifically the following:

T. 47 N., R. 92 W.,
  Sec. 25: Portions of N½SE¼NW¼NW¼, W½SE¼NE¼NW¼, S½SW¼NE¼NW¼, SE¼NW¼, SW¼NW¼, S½NW¼NW¼.
  Sec. 26: Portions of SE¼NE¼NE¼, E½SE¼NE¼, E½W½SE¼NE¼.

The limited use designation applies to all motorized vehicles, including but not limited to: automobiles, trucks, four-wheel drive or low-pressure-tire vehicles, tracked or amphibious machines, ground-effect or air-cushion vehicles, recreation campers, motorcycles, snowmobiles and any other means of transportation deriving motive power from any source other than muscle. Under the limitation, exeptions are made for (1) any fire, military, emergency or law enforcement vehicle when used for emergency purposes, or any combat or combat support vehicle when used for national defense purposes, (2) any vehicle whose use is expressly authorized by the Bureau of Land Management under permit, lease, license, or contract, and (3) any government vehicle on official business.

A map showing the new limited use area, and additional information about the designation are available for review at the Bureau of Land Management, Worland District Office.

Darrell C. Barnes,

District Manager.

BILLING CODE 4310-22-M

[OR–943–08–4220–11; GP–08–065; OR–26358]

Conveyance of Public Land; Order Providing for Opening of Land; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action informs the public of the conveyance of 653.24 acres of public land out of Federal ownership. This action will also open 640 acres of reconveyed land to surface entry, mining and mineral leasing.

EFFECTIVE DATE: April 18, 1988.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM Oregon State Office, P.O. Box 2965, Portland, Oregon 97208, 503–231–6905.

SUPPLEMENTARY INFORMATION: 1. Notice is hereby given that in an exchange of lands made pursuant to section 206 of the Act of October 21, 1976, 90 Stat. 2756, 43 U.S.C. 1716, a patent has been issued transferring 653.24 acres of land in Lake County, Oregon, from Federal to private ownership.

2. In the exchange, the following described land has been reconveyed to the United States:

Willamette Meridian

T. 28 S., R. 24 E.,
  sec. 22, SE¼NW¼, NE¼SW¼, and S½SW¼;
  sec. 27, S½NE¼, NW¼, N½SW¼, and SE¼.

The area described contains 640 acres in Harney County.

3. At 8:30 a.m., on April 18, 1988, the land described in paragraph 2 will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 8:30 a.m., on April 18, 1988, will be considered as simultaneously filed at that time. Those received thereafter will be considered in the order of filing.

4. At 8:30 a.m., on April 18, 1988, the land described in paragraph 2 will be open to location and entry under the United States mining laws. Appropriation of land under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Sec. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

5. At 8:30 a.m., on April 18, 1988, the land described in paragraph 2 will be open to applications and offers under the mineral leasing laws.

B. LaVelle Black,
Chief, Branch of Lands and Minerals Operations.

Dated: March 3, 1988.

BILLING CODE 4310–33–M

[AZ–020–08–4212–13; A–23221]

Realty Action; Exchange of Public Lands, Maricopa County, AZ

The following described federal lands are being considered for disposal by exchange pursuant to Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Gila and Salt River Meridian, Arizona

T. 6 N., R. 2 W.,
  Sec. 25, Lots 4, 6, 8 and 10;
  Sec. 26, Lot 2.
  Comprising 97.44 acres.

Final determination on disposal will await completion of an environmental analysis.

In accordance with the regulations of 43 CFR 2201.1(b), publication of this Notice will segregate the affected public lands from appropriation under the public land laws, including the mining laws, subject to valid existing rights, but not the mineral leasing laws or from exchange pursuant to Federal Land Policy and Management Act of 1976.

The segregation of the above-described lands shall terminate upon issuance of a document conveying such lands or upon publication in the **Federal Register** of a notice of termination of the segregation; or the expiration of two years from the date of publication, whichever occurs first.

For a period of forty-five (45) days, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Date: March 3, 1988.

Henri R. Bisson,
District Manager.

[CA–010–08–4212–13; CA 20755]

Realty Action; Termination of Proposed Exchange of Public Lands in Nevada County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action; Termination of Proposed Exchange of Public Lands (CA 20755).

SUMMARY: This Notice is to advise the public that the proposed exchange of public lands (CA 20755) is terminated. The lands proposed for exchange are described as follows:

Mount Diablo Meridian, CA

T. 17N., R. 9E.,
  Sec. 20, S½SW¼, SW¼SE¼;
  Sec. 29, Lots 3, 4, 5, 6 and 7, NW¼NE¼, S½NE¼, N½NW¼, SE¼NW¼.
  Containing 487.99 acres, more or less.

SUPPLEMENTARY INFORMATION: The publication of a Notice of Realty Action in the **Federal Register** on April 16, 1987, Vol. 52, No. 73 pages 12469–12470, proposed the exchange of public lands in Nevada County, California. The Notice segregated the public lands from settlement, location and entry under the public land laws, including the mining laws, but not the mineral leasing laws. The proposed exchange has been terminated and the segregation of the land no longer serves a purpose.

At 10:00 A.M., April 11, 1988, the land will be open to operation of the public land laws generally, subject to valid existing rights, the provision of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10:00 A.M. on April 11, 1988 shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

At 10:00 A.M., April 11, 1988, the land will be open to mineral location under the United States mining laws. The land has been and continues to be open to application and offers under the mineral leasing laws.

Realty Action; Termination of Proposed Exchange of Public Lands in Nevada County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action; Termination of Proposed Exchange of Public Lands (CA 20180).

SUMMARY: This Notice is to advise the public that the proposed exchange of

public lands (CA 20180) is terminated. The lands proposed for exchange are described as follows:

Mount Diablo Meridian, CA

T. 6S., R. 5E.,
  Sec. 7, Lots 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16 and 18, E1/2SE¼.
  Containing 498.05 acres, more or less.

SUPPLEMENTARY INFORMATION: The publication of a Notice of Realty Action in the **Federal Register** on July 15, 1987, Vol. 52, No. 135, page 26574, proposed the exchange of public lands in Stanislaus and Santa Clara Counties, California. The Notice segregated the public lands from settlement, location and entry under the public land laws and the mining laws. The proposed exchange has been terminated and the segregation of the land no longer serves a purpose. Upon publication of this Notice the segregation imposed by this proposed exchange (CA 20180) will be terminated. The land is currently segregated by another exchange (CA 20645) and the status of the land, insofar as its availability for appropriation under the general land laws, will not be changed.

BILLING CODE 4310–40–M

[CO–010–08–4212–13: C–44263]

Exchange of Lands in Jackson County, CO

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: Pursuant to sectien 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716), the Bureau of Land Management, Kremmling Resource Area has identified the following described lands in Jackson County as suitable for disposal by exchange.

Disposal Parcel:

6th Principal Meridian, Jackson County, Colorado

T. 8N., R. 80W.
  Sec. 6, Lot 3;
  Sec. 7, Lots 2, 3, NE¼NW¼.
T. 8N., R. 81W.,
  Sec. 2, SE¼SE¼;
  Sec. 12, SE¼NE¼, NE¼SE¼.
T. 9N., R. 80W.,
  Sec. 28, SW¼SW¼;
  Sec. 31, S½SE¼;
  Sec. 32, W½W½NE¼, SW¼NW¼, SW¼SW¼.
  Containing 511.42 acres more or less.

In exchange for these lands, the United States will acquire the following described lands in Jackson County from David W. Farrand, owner of Double "R" Ranch.

Offered Land:

6th Principal Meridian, Jackson County, Colorado

T. 8N., R.80W.,
  Sec. 2, Lots 1–4, S½N½, S½.
  Containing 638.72 acres of non-federal lands, more or less.

FOR FURTHER INFORMATION AND PUBLIC COMMENT: Additional information concerning this exchange, including the planning documents and environmental assessment, is available for review in the Kremmling Resources Area Office at 1116 Park Avenue, Kremmling, Colorado.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Craig District Office, Bureau of Land Management, 455 Emerson Street, Craig Colorado 81625. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

SUPPLEMENTARY INFORMATION: The purpose of this exchange is to facilitate improved resource management and to dispose of scattered, difficult to manage public land parcels while consolidating ownership of other public lands.

The values of lands to be exchanged are approximately equal: full equalization of value will be achieved through acreage adjustment, or by cash payment in an amount not to exceed 25 percent of the value of the land being transferred out of federal ownership.

The exchange will be subject to:

1. A reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States in accordance with 43 U.S.C. 945.

2. All mineral resources and related rights shall be reserved to the United States together with the right to prospect for, mine and remove the minerals. A more detailed description of this reservation, which will be incorporated in the patent document, is available for review at this BLM office.

3. All valid existing rights and reservations of record including the following: Powerline and telephone rights-of-way C–9596, C–8482, C–12349, C–22720. Access road rights-of-way C–36379 and C–45787. Oil and Gas leases C–38030, C–31050, C–31051 and C–42941.

4. A reservation for Jackson County roads numbered 12W and 18 pursuant to section 8 of the Act of July 26, 1866, 14 Stat. 253 and Rev. Stat. 2477, codified at 43 U.S.C. 932 (1970 and 1979).

5. Grazing Permits 1727, 1736 and 1777—unless waived.

Publication of this notice in the **Federal Register** segregates the public lands from operation of the public land laws and the mining law, except for mineral leasing. The segregated effect will end upon issuance of patent or two years from the date of publication, whichever occurs first.

William Pulford,
District Manager.

  Sec. 2, All.

Containing 9,555.01 acres, more or less.

DATES: Comments must be submitted on or before April 30, 1988.

ADDRESSES: Comments should be sent to Bureau of Land Management, Las Cruces District Office, 1800 Marquess, Las Cruces, New Mexico 88005.

FOR FURTHER INFORMATION CONTACT: Marvin M. James at the address above or at 505–525–8228, (FTS 571–8350).

SUPPLEMENTARY INFORMATION: The land to be transferred will be subject to:

1. Reservations to the United States for ditches and canals, constructed by the authority of the United States. Act of August 30, 1890 (26 Stat. 391; 43 U.S.C. 945).

2. The New Mexico State Land Office shall honor the present grazing use and improvements authorized by BLM on the selected land until the grazing permits expire, then the State Land Office will negotiate with the BLM permittee utilizing their rules and regulations for determining rental rates, term and type of lease, and authorization of improvements.

3. The BLM shall honor the present grazing use and improvements authorized by the State Land Office on the offered land until the grazing leases expire, then the BLM will allocate the grazing use and authorize the improvements under 43 CFR 4100.

The purpose of this exchange is to implement the following decisions in the Southern Rio Grande Plan Amendment (1986): (1) To consolidate and reunite the Federal surface and subsurface estates in and adjacent to the BLM's Wilderness Study Areas, Organ Mountains Recreation Lands, and areas that have high riparian wildlife habitat and cultural values; and (2) consolidate and reunite the State's surface and subsurface estates. Publication of this Notice will segregate the public land from all appropriations under the public land laws, including the mining laws but not mineral leasing laws. This segregation will terminate upon the issuance of a patent or 2 years from the date of publication of this Notice in the **Federal Register** or upon publication of a Notice of Termination.

Any adverse comments will be evaluated by the State Director who may vacate or modify this realty action and issue a final determination. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Robert R. Calkins,

Associate District Manager.

March 1, 1988.

BILLING CODE 4310-FB-M

[OR-120-08-4212-13: GP 8-060 or 41529]

Exchange of Public Lands in Douglas County, Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action.

SUMMARY: The following described public domain lands located in Douglas County, Oregon, have been examined and through the development of land use planning decisions based on public input and resource considerations, regulation, and Bureau policies, it has been determined that this public land is suitable for disposal by exchange under the authority of Section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716):

Willamette Meridian, Oregon

Township 21 South, Range 09 West,
  Lots 1, 2, 8, 16 Section 2
  Lots 21, 22, 23, 24, 25, 26, 27 Section 4
  NE¼NW¼ Section 10

Containing 387.12 acres.

If additional acreage is needed to equalize exchange values the following lands will be included:

Township 21 South, Range 11 West,
  SE¼NW¼ Section 30, containing 40 acres
Township 23 South, Range 08 West,
  NW¼SW¼ Section 22, containing 40 acres

All mineral rights will be transferred with the surface estate. The patent, if issued, will be subject to a reservation of right-of-way thereon for ditches and canals constructed by the authority of the United States under the Act of August 30, 1890 (43 U.S.C. 945), and a reservation of existing roads constructed by the United States (OR 6956, OR 13336 and OR 2918)

In exchange for these lands the United States will acquire the following described lands from International Paper Company:

Willamette Meridian, Oregon

Township 19 South, Range 09 West,
  Lots 5, 6, 7, 8, 10, 11, 12 Section 24, containing 280.82 acres
Township 21 South, Range 07 West,
  Lots 1, 2, NW¼NE¼, NE¼NW¼ Section 30, containing 147.75 acres

The purpose of this exchange is to facilitate the resource management programs of the Bureau of Land Management and to improve the timber management program of the Company. The Company intends to manage the acquired federal lands with its existing timber lands for timber production. The Company lands that will be exchanged will be managed by the Bureau under the principles of multiple use management along with the surrounding public lands.

The exchange is consistent with the Bureau of Land Management land use plans and the public interest will be well served by making the exchange.

The lands described above will be exchanged in conjunction with a larger exchange between the U.S. Department of Agriculture, Forest Service and International Paper Company. The fair market value of the lands involved in the combined exchange is being determined by an appraisal. Full equalization of values will be achieved by payment to the United States of funds in an amount not to exceed 25 percent of the total value of the combined public lands to be transferred out of Federal ownership, or acreages will be adjusted accordingly.

Publication of this notice in the **Federal Register** segregates the public lands, described above, from appropriation under the public land laws, including the mining laws, but not from exchange pursuant to Section 206 of the Federal Land Policy and Management Act of 1976. The segregative effective of this Notice will terminate upon issuance of patent or in two years, whichever occurs first.

ADDRESSES: Detailed information concerning the exchange, including the environmental analysis, is available for review at the Bureau of Land Management's Coos Bay District Office, 333 South 4th Street, Coos Bay, OR 97420.

DATE: For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the Coos Bay District Manager at the above address (Reference exchange number OR 41529). Objections will be evaluated by the Oregon State Director of the Bureau of Land Management who may sustain, vacate or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Thom Green, Coos Bay District Office (503) 269–5880.

Dated: February 22, 1988.

Melvin E. Chase,

District Manager.

Proposed Withdrawal and Opportunity for Public Meeting; Colorado

March 2, 1988.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, proposes to withdraw 30 acres of public land near Granby, Colorado, to protect an administrative site. This notice closes the land to operation of the public land laws including location and entry under the mining laws for 2 years. The land will remain open to mineral leasing. The withdrawal is requested for 20 years.

DATE: Comments and requests for meeting should be received on or before June 8, 1988.

ADDRESS: Comments and meeting requests should be sent to the Colorado State Director, BLM, 2850 Youngfield Street, Lakewood, Colorado 80215.

FOR FURTHER INFORMATION CONTACT: Doris E. Chelius, 303–236–1768.

SUPPLEMENTARY INFORMATION: The Department of Agriculture filed application on February 22, 1988, to withdraw the following described public land from settlement, sale, location or entry under the public land laws, including the mining laws, subject to valid existing rights, pursuant to the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714:

Sixth Principal Meridian

T. 1 N., R. 76 W.,
  Sec. 8, NW¼NW¼NW¼ and E½NW¼NW¼.

The area described aggregates 30 acres in Grand County.

The purpose of the proposed withdrawal is for protection of a planned administrative site to support management of National Forest System land in the nearby Arapaho National Forest.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with this proposal may present their views in writing to the Colorado State Director.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with this proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on this proposed action must submit a written request to the Colorado State Director within 90 days of the date of publication of this notice. If the authorized officer determines that a meeting should be held, the meeting will be scheduled and conducted in accordance with Bureau of Land Management Manual, section 2351.16B.

This application will be processed in accordance with the regulations set forth in 43 CFR Part 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the land will be segregated from operation of the public land laws as specified above unless the application is denied or cancelled or the withdrawal is approved prior to that date.

The temporary segregation of this land in connection with the application shall not affect the administrative jurisdiction over the land and will not authorize any use of the land by the Department of Agriculture.

Richard D. Tate,

Acting Chief, Branch of Adjudication.

[FR Doc. 88–5278 Filed 3–9–88; 8:45 am]

BILLING CODE 4310–JB–M

[CO-940-80-4220-11; C-2486]

Continuation of Withdrawal; Colorado

March 1, 1988.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Forest Service, U.S. Department of Agriculture, proposes that the order which withdrew National Forest System lands for an indefinite period of time for various recreation areas and campgrounds be modified and definite time periods established. This notice proposes that the withdrawal order be modified and the 69.6 acres of recreation areas and campgrounds be continued for 20 years and the 2,720 acres in the Mount Werner Sports Area be continued for 50 years. The lands will remain closed to surface entry and mining, but not to mineral leasing.

DATE: Comments should be received on or before June 8, 1988.

ADDRESS: Comments should be addressed to State Director, BLM Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215.

FOR FURTHER INFORMATION CONTACT: Doris Chelius, BLM Colorado State Office, (303) 236–1768.

1. The Forest Service, U.S. Department of Agriculture, proposes that the existing withdrawal made by Public Land Order No. 5107, as amended, for an indefinite period of time, be modified to expire in 20 years pursuant to Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, insofar as it affects the following described lands:

Sixth Principal Meridian

Routt National Forest

Hidden Lakes Campground
T. 6 N., R. 82 W.,
  Sec. 9, S½SW¼SE¼NW¼ and N½NW¼NE¼SW¼.
Hahn's Peak Reservoir Recreation Area Addition
T. 10 N., R. 82 W.,
  Sec. 11, S½NE¼NW¼SE¼ and N½SE¼NW¼SE¼.
Freeman Reservoir Recreation Area
T. 9 N., R. 89 W.,
  Sec. 6, lot 18, and north 5 chains of lot 21.

The areas described aggregate approximately 69.6 acres in Jackson, Moffat, and Routt Counties.

2. The Forest Service, U.S. Department of Agriculture, proposes that the existing withdrawal made by Public Land Order No. 5107, as amended, for an indefinite period of time, be modified to expire in 50 years pursuant to Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, insofar as it affects the following described lands:

Mount Werner Winter Sports Area

T. 6 N., R. 83 W.,
  unsurveyed—in approximately secs. 29 and 32, beginning at the northeast section corner of sec. 36, T. 6 N., R. 84 W., thence east 10 chains, north 40 chains, east 20 chains, north 20 chains, east 20 chains, north 30 chains, west 30 chains, north 30 chains, west 20 chains at which point is the east ¼ corner of sec. 24, T. 6 N., R. 84 W., thence south 120 chains along the range line to the point of beginning.
T. 6 N., R. 84 W.,
  Sec. 23, 24, and 25;
  Sec. 26, N½N½, SE¼NE¼, N½SW¼NE¼, N½SE¼NW¼, and NE¼NE¼SE¼;
  Sec. 36, NE¼, NE¼NW¼, N½NW¼NW¼, and N½SE¼NW¼.

The area described aggregates approximately 2,720 acres in Routt County.

The purpose of this withdrawal is for the administration and protection of various recreation areas and campgrounds. No change is proposed in the purpose or segregative effect of the withdrawal. The land will continue to be withdrawn from surface entry and mining, but not from mineral leasing.

For a period of 90 days from the date of puiblication of this notice, all persons who wish to submit comments in connection with this proposed action may present their views in writing to this office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be modified and continued and, if so, for how long. Notice of the final determination will be published in the **Federal Register**. The existing withdrawal will continue until such determination is made.

James D. Crisp,

Chief, Branch of Adjudication.

BILLING CODE 4310–JB–M

Minerals Management Service

Development Operations Coordination Document; Marathon Oil Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Marathon Oil Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 1449, Blocks 57 (portion), 79 (portion), and 80 (portion), Lease OCS-G 1874, Blocks 79 (portion) and 80 (portion), and Lease OCS-G 1989, Block 80, West Delta Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Venice, Louisiana.

DATE: The subject DOCD was deemed submitted on March 4, 1988.

ADDRESS: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert, Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2867.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to Sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Date: March 4, 1988.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

Research Advisory Committee; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the A.I.D. Research Advisory Committee meeting on March 31–April 1, 1988 at the Department of State, 2201 C Street NW., Washington, DC, Room 1107. The Committee will discuss A.I.D.'s future linkages and relationships in science and technology with advanced developing countries that no longer receive development assistance from the United States.

The meeting will begin at 9:00 a.m. on both days and adjourn at 5:30 p.m. on March 31 and 1:00 p.m. on April 1. The meeting is open to the public. Any interested persons may attend, may file written statements with the Committee before or after the meeting, or may present oral statements in accordance with procedures established by the Committee and to the extent the time available for the meeting permits. Dr. Curtis R. Jackson, Director, Office of Research and University Relations, Bureau for Science and Tehnology, is designated as the A.I.D. representative at the meeting. It is suggested that those desiring more specific information contact Dr. Jackson, 1601 N. Kent Street, Arlington, Virginia 22209 or call area code (703) 235–8929.

Curtis R. Jackson,

A.I.D. Representative, Research Advisory Committee.

Dated: February 29, 1988.

INTERSTATE COMMERCE COMMISSION

Forms Under Review by Office of Management and Budget

The following proposal for collection of information under the provisions of the Paperwork Reduction Act (44) U.S.C. Chapter 35) is being submitted to the Office of Management and Budget for review and approval. Copies of the forms and supporting documents may be obtained from the Agency Clearance Officer, Ray Houser (202) 275–6723. Comments regarding this information colection should be addressed to Ray Houser, Interstate Commerce Commission, Room 1325, 12th and Constitution Ave., NW., Washington, DC 20423 and to Gary Waxman, Office of Management and Budget, Room 3228 NEOB, Washington, DC 20503, (202) 395–7340.

Type of Clearance: Extension
Bureau/Office: Office of Compliance & Consumer Assistance
Title of Form: Request for Revocation of Authority Granted
OMB Form No.: 3120–0104
Agency Form No.: OCCA–46
Frequency; On Occasion
Respondents: Transportation entities voluntarily applying for revocation of their operating rights.
No. of Respondents: 550
Total Burdens Hrs.: 275
Brief Description of the need and proposed use: The Purpose of the form is to allow regulated transportation

entities to apply voluntarily for revocation of their operating rights, or any part thereof. It is needed to support a recommendation to revoke such authority.

Noreta R. McGee,

Secretary.

Motor, Water, Broker, and Freight Forwarder Proceedings; Public Inquiries; Correction

AGENCY: Interstate Commerce Commission.

ACTION: Notice of contacts for public inquiries on the status of motor, water, broker, and freight forwarder proceedings: Correction of Telephone Number.

SUMMARY: A new Case Tracking Unit has been established within the Office of Proceedings' Motor Section. This Unit will handle all telephone inquiries concerning the status of Motor Section proceedings pending before the Commission, including those inquiries previously handled by the Section's paralegal support units ("Teams"). Notice of this change appeared in the Federal Register at 53 FR 7056 (March 4, 1988).

Inadvertently, the wrong telephone numbers were published. Effective immediately, all inquiries concerning pending licensing, finance, complaint, petition, and miscellaneous procedural and appellate matters involving motor or water carriers, property brokers, and household goods freight forwarders should be directed to the Case Tracking Unit at (202) 275-7022 or 275-7023. Assistance for the hearing impaired will continue to be available through TDD services (202) 275-1721.

EFFECTIVE DATE: March 4, 1988.

FOR FURTHER INFORMATION CONTACT: Richard B. Felder, (202) 275-7691, or Suzanne Higgins O'Malley, (202) 275-7292. [TDD for hearing impaired: (202) 275-1721].

BILLING CODE 7035-01-M

[Finance Docket No. 31236]

Chicago South Shore and South Bend Railroad; Trackage Rights; Illinois Central Gulf Railroad Co.; Exemption

The Illinois Central Gulf Railroad Company has agreed to grant overhead trackage rights to the Chicago South Shore and South Bend Railroad between South Joliet, IL (milepost (AO)39.0) and Kensington Station in Chicago, IL (near milepost 14), a distance of approximately 53 miles, for freight traffic only. The trackage rights became effective on February 26, 1988.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction.

As a condition to use of this exemption, any employees affected by the trackage rights will be protected pursuant to *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Dated: February 29, 1988.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to the Clean Water Act; Charleston Properties, et al.

In accordance with Departmental Policy, 28 CFR 50.7, notice is hereby given that a consent decree in *Charleston Properties and WSJ Properties* v. *United States of America* and *United States of America* v. *Charleston Properties and WSJ Properties*, No. C-87-20502 WAI (N.D. Cal.), and *United States of America* v. *Juana Salado*, No. C-87-20503 (N.D. Cal.), was lodged with the United States District Court for the Northern District of California, San Jose Division, on March 5, 1988.

The proposed consent decree concerns alleged violations of the Clean Water Act, 33 U.S.C. 1311, as well as the Rivers and Harbors Act, 33 U.S.C. 403, as a result of the discharge of fill material onto portions of property located in Mountain View, California, which are alleged to constitute "waters of the United States." The consent decree requires Charleston Properties and/or WSJ Properties to pay $65,000 to an entity selected by the United States, which entity shall spend the funds for wetlands acquisition, creation, restoration, and/or enhancement. The consent decree allows Charleston Properties and/or WSJ Properties to proceed to complete the development that was halted by a cease-and-desist order issued by the Corps of Engineers on October 9, 1985.

The Department of Justice will receive until March 18, 1988, written comments relating to the consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Attention: Letitia Grishaw, 450 Mission Street, Suite 408, San Francisco, California 94105 and should refer to *Charleston Properties v. United States, DJ Reference No. 90-5-1-6-413.*

The consent decree may be examined at the Clerk's Office, United States District Court, 4050 U.S. Courthouse, 280 S. First Street, San Jose, CA 95113.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 88-5227 Filed 3-9-88; 8:45 am]

BILLING CODE 4410-01-M

Consent Decree in Action to Enjoin Discharge of Water Pollutants; Salem, NJ

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a consent decree in *United States v. City of Salem*, Civil Action No. 87-1601, was lodged with the United States District Court for the District of New Jersey on February 29, 1988. The consent decree establishes a compliance schedule for the New Jersey wastewater treatment plant owned and operated by the City of Salem to bring the plant into compliance with the Clean Water Act, 33 U.S.C. 1251 *et seq.*, and the applicable regulations relating to the discharge of pollutants and requires payment of a civil penalty of $10,000. The Decree also establishes a sewer ban until termination of the Decree.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530 and should refer to *United States v. City of Salem*, D.J. Ref. No. 90-5-1-1-2759.

The consent decree may be examined at the office of the United States Attorney, District of New Jersey, 502 Federal Building, 970 Broad Street, Newark, NJ 07102; at the Region II office of the Environmental Protection Agency, 27 Federal Plaza, New York, New York 10278; and the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.30 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Consent Decree; Stanley Plating Co., Inc.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on March 1, 1988, a proposed Consent Decree in *United States* v. *Stanley Plating Company, Inc.*, Civil Action Number H-88-343 AHN, was lodged with the United States District Court for the District of Connecticut. The Complaint filed by the United States alleged violations of the Resource Conservation and Recovery Act of 1976, as amended. Defendant Stanley Plating Company owns and operates an electroplating facility in Forestville, Connecticut which generated and disposed of hazardous wastes. Defendant violated the Resource Conservation and Recovery Act and the regulations passed thereunder by, *inter alia*, operating without a final permit to treat, store or dispose of hazardous wastes, failing to close its land disposal units in accordance with an appropriate closure plan, failing to establish a financial mechanism to assure proper closure, and failing to demonstrate financial responsibility for sudden and non-sudden accidental occurrences resulting in environmental impairment.

The Consent Decree provides that the defendant shall pay a civil penalty of $230,000.00 and be subject to continuing obligations with respect to compliance with various hazardous waste regulations.

The Department of Justice will receive for a period of thirty (30) days from the date of publication of this notice comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Stanley Plating Company, Inc.*, D.J. No. 90-7-1-331.

The proposed Consent Decree may be examined at the Office of the United States Attorney, Room 250, Federal Building, 450 Main Street, Hartford, Connecticut 06103, at the Region I office of the Environmental Protection Agency, Office of Regional Counsel, John F. Kennedy Federal Building, Boston, Massachusetts 02203, and at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please refer to *United States* v. *Stanley Plating Company, Inc.*, D.J. No. 90-7-1-331, and include a check for $2.00 (10 cents per page reproduction charge) payable to the United States Treasury.

Thomas E. Hookano,

Deputy Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

[AAG/A Order No. 9-88]

Privacy Act of 1974; Modified System of Records

Pursuant to the Privacy Act of 1974, 5 U.S.C. 552a, notice is given that the Department of Justice, United States Parole Commission, proposes to modify its system of records entitled "Inmate and Supervision Files, Justice/PRC-003" which was last published on December 11, 1987 (52 FR 47283) by adding new routine uses identified as "(m)," "(n)," "(o)," "(p)," and "(q)."

Title 5 U.S.C. 552a(e) (4) and (11) provide that the public be given a 30-day period in which to comment on new routine uses. You may submit any comments in writing to J. Michael Clark, Assistant Director, Facilities and Administrative Services Staff, Justice Management Division, Department of Justice, Room 6402, 601, D Street NW., Washington, DC 20530. All comments must be received by April 11, 1988.

The modified system description is reprinted below.

Dated: February 25, 1988.

Harry H. Flickinger,

Assistant Attorney General for Administration.

JUSTICE/PRC 003

SYSTEM NAME:

Inmate and Supervision Files.

SYSTEM LOCATION:

Records are maintained at each of the U.S. Parole Commission's (USPC) Regional Offices for inmates incarcerated in and persons under supervision in each region. Records are housed temporarily at the Commission's Headquarters Office located at 5550 Friendship Blvd., Chevy Chase, Md. 20815 when used by the National Appeals Board or other Headquarters personnel. A duplicate records of certain data elements from files is maintained on microfiche for Headquarters use. Prior to the first parole hearing, the inmate's file is maintained at the *institution* at which he is incarcerated. Certain records on parolees and mandatory releases are maintained at probation offices. All requests for records should be made to the appropriate regional office at the following addresses: U.S. Parole Commission, Customs House Seventh Floor, Second and Chestnut Streets, Philadelphia, Pa. 19106. U.S. Parole Commission, 1718 Peachtree St. NW. Suite 250, Atlanta, GA 30309. U.S. Parole Commission, Air World Center, Suite 220, 10920 Ambassador Drive, Kansas City, Mo. 64153. U.S. Parole Commission, *525 Griffin St.*, Suite 820, Dallas, Tex. 75202, U.S. Parole Commission, *1301 Shoreway Road, 4th Floor, Belmont, CA 94002.*

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former inmates under the custody of the Attorney General. Former inmates include those presently under supervision as parolees or mandatory releasees.

CATEGORIES OF RECORDS IN THE SYSTEM:

1. Compulation of sentence and supportive documentation.
2. Correspondence concerning pending charges, and wanted status, including warrants.
3. Requests from other Federal and non-Federal law enforcement agencies for notification prior to release.
4. Records of the allowance forfeiture, withholding and restoration of good time.
5. Information concerning present offense, prior criminal background sentence, and parole from the U.S. Attorneys, the Federal Courts, and Federal prosecuting agencies.
6. Identification data.
7. Order of designation of institution or original commitment.
8. Records and reports of work and housing assignments.
9. Program selection assignments and performance adjustments/progress reports.
10. Conduct records.
11. Social background.
12. Educational data.
13. Physical and mental health data.
14. Parole Commission applications, appeal documentation, orders actions, examiner's summaries, transcripts or

tapes of hearings, guideline evaluation documents, parole or mandatory release certificates, statements or third parties for or against parole, special reports on youthful offenders and adults required by statute and related documents.

15. Correspondence regarding release planning, adjustment and violations.

16. Transfer orders.

17. Mail and visit records.

18. Personal property records.

19. Safety reports and rules.

20. Release processing forms and certificates.

21. Interviews requests forms from inmates.

22. General correspondence.

23. Copies of inmate court petitions and other court documents.

24. Report of probation officers. Commission correspondence with former inmates and others, and Commission order and memoranda dealing with supervision and conditions of parole or mandatory release.

25. If an alleged parole violation exists, correspondence requesting a revocation warrant, warrant application, warrant, instructions as to service, detainers and related documents.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

18 U.S.C. 4201–4218; 5005–5041, 28 CFR Part 0, Subpart V, and 28 CFR Part 2.

PURPOSE(S):

The system constitutes the agency's records upon which it bases all its decisions with respect to every stage of parole consideration from initial hearing to termination of parole supervision. For example, it is used by USPC hearing examiners to perform a *prehearing* review and to conduct the inmate's initial parole hearing. After that hearing, it is maintained in the appropriate regional office where it provides the principal information source for all decisions leading to parole or denial of parole, and all decisions following release to supervision. It is used at USPC headquarters when appeals come before the National Appeals Board or when needed by legal counsel and others on the headquarters staff. It is used by employees at all levels, including USPC members, to provide information for decisionmaking in every area of USPC responsibility. Files of released inmates are used to make statistical studies of subjects related to parole and revocation. Finally, the file is maintained to provide the rationale of USPC actions when an agency determination is questioned by members of the public or challenged in judicial proceedings.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

(a) The system may be used as a source for disclosure of information which is solely a matter of public record and which is traditionally released by the agency to further public understanding of its criminal justice system, including but not limited to offense, sentence data, and prospective release date.

(b) The system may be used to provide an informational source for responding to inquiries from Federal inmates, their families, representatives, and Congressional offices.

(c) Record from the system of records may be routinely disclosed to U.S. Probation Officers for the performance of their offical duties.

(d) In the event that the USPC is informed of a violation or suspected violation of law whether civil, criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule or order issued pursuant thereto, the relevant records may be disclosed to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order, issued pursuant thereto.

(e) Records from this system may be disclosed to a Federal, State or local agency or court if that agency or court requests information for an official purpose to which the documents appear to be relevant.

(f) A record from this system may be disclosed to a person or to persons who may be exposed to harm through contact contact with a particular parolee or mandatory releasee (or to persons in a position to prevent or minimize such harm), if it is deemed to be necessary to give notice that such danger exists.

(g) Lists of names of parolees and mandatory releasees entering a jurisdiction and related information may be disclosed to law enforcement agencies upon request as may be required for the protection of the public for the enforcement of parole conditions.

(h) Disclosure of USPC notices of action may be made (1) by the Office of Public Affairs of the U.S. Department of Justice to the public generally, and (2) by USPC to specific crime victims and witnesses (as those terms are used in the Victim and Witness Protection Act of 1982), fróm the files of prisoners whose applications for parole have been decided by USPC. The purpose of such disclosure is to further understanding of the criminal justice system by the public and by crime victims and witnesses.

(i) Incidental disclosure of file material may be made during the course of a parole or parole revocation hearing to victims and witnesses of crime and other legitimately interested persons authorized by USPC to attend such hearing, so as to further their understanding of the case to permit their intelligent comment with respect to USPC's decision.

(j) Records which are arguably relevant to litigation in which the Parole Commission has an interest, or to the litigation defense of its present or former employees (if the Department of Justice has agreed to provide representation) may be disclosed from a current or former inmates's or parolee's file by disseminating in proceeding before a court or tribunal at any time deemed appropriate by the Government's attorney.

(k) A record from this system of records may be disclosed to a current *or* former criminal justice official who is a defendant in a lawsuit brought by, or which involves, an individual who is the subject of a file maintained in this system of records, provided that such litigation arises from allegations of misconduct on the part of the defendant while a criminal justice official, and that the records are arguably relevant to the matter in litigation. Such records may be disclosed to the defendant to facilitate the preparation of his or her defense.

(l) Records from this system may be disclosed to any person performing any service for the USPC pursuant to authority exercised by the Chairman under 18 U.S.C. 4204(b) (1) through (8), and for the purposes contemplated by that statute.

(m) A record relating to the identification and location of Human Immunodeficiency Virus (HIV)-positive parolees (those who test positive for the Acquired Immune Deficiency Syndrome virus) may be disseminated to State or local health departments where permitted by State law.

(n) Where the Commission or supervising probation office believes that a specific person is or has been exposed to a medically recognized risk from an HIV-positive parolee and has not been advised of such risk, a record relating to the identification of that parolee may be released to the parolee's physician or State or local health authorities for the purpose of determining if the physician or health authorities are willing to provide a warning to the third-party at risk and, if willing, for the purpose of providing such a warning.

(o) A record relating to the identification of an HIV-positive parolee may be made to a third party where it is believed that such third party is or has been exposed to medically recognized type of risk from an HIV-positive parolee and has not been advised of such risk. Such disclosures under this routine use would be made only where the parolee's physician or State or local health authorities are unable or unwilling to make such a warning to the third party; such disclosures will be made discreeting and as a confidential communication.

(p) To the extent not prohibited by State law, a record relating to the identification and location of an HIV-positive parolee may be disseminated to those medical facilities, State or local health departments, community organizations or similar groups capable of providing medical help or counseling to HIV-positive parolees.

(q) A record relating to the identification of an HIV-positive parolee may be released to the United States Marshal when the Commission issues a parole violator warrant for the arrest of an HIV-positive parolee.

(r) Information permitted to be released to the news media and the public pursuant to 28 CFR 50.2 may be made available unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

(s) Information nor otherwise required to be released pursuant to 5 U.S.C. 552 may be made available to a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record.

(t) A record may be disclosed to the National Archives and Records Administration and the General Services Administration in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM: STORAGE:

Manual requests records are stored in locked safes. Automated requests records are stored on disks.

RETRIEVABILITY:

Requests reports are filed and retrieved under the names of those persons and individuals identified under the caption "Categories of individuals covered by the system." These records are retrieved by Department personnel to perform their duties, e.g., when subsequent requests are made by the public for copies of their previous requests and responses thereto, or when the requester submits a supplemental request to information clarifying a previous request.

SAFEGUARDS:

Access to requests records is limited to Department of Justice personnel who have need for the records to perform their duties. Request files (manual records) are stored in locked safes. All records are stored in an office which is occupied during the day and locked at night.

RETENTION AND DISPOSAL:

Records are held at the regional office until termination of sentence then transferred to the Washington National Records Center. Records are destroyed ten years after the case becomes inactive.

SYSTEM MANAGER(S) AND ADDRESS:

FOIA Officer, United States Parole Commission, 5550 Friendship Blvd., Chevy Chase, Md. 20815.

NOTIFICATION PROCEDURE:

Address inquiries to Regional Commissioner at appropriate location. For general inquiries, address system Manager. The Attorney General has exempted this system from compliance with the provisions of Subsection (d) under the provisions of Subsection (j).

RECORD SOURCE CATEGORIES:

1. Individual inmate: 2. Federal law enforcement agencies and personnel: 3. State and Federal probation services; 4. Non-Federal law enforcement agencies; 5. Educational institutions; 6. Hospital or medical sources; 7. Relatives, friends and other interested individuals or groups in the community; 8. former or future employers; 9. Evaluations, observations, reports and findings of institution supervisors, counselors, boards and committees, Parole Commission examiners, Parole Commission Members; 10. Federal court records; 11. U.S. Bureau of Prisons personnel and records.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

The Attorney General has exempted this system from subsections (c) (3) and (4), (d)(e) (2) and (3), (e)(4) (G) and (H), (e)(8) and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j)(2). Rules have been promulgated in accordance with the requirements of U.S.C. 553 (b), (c) and (e) and have been published in the **Federal Register.**

[FR Doc. 88–5223 Filed 3–9–88; 8:45 am]

BILLING CODE 4410-01-M

LEGAL SERVICES CORPORATION

Funding Availability for Law School Civil Clinical Programs

AGENCY: Legal Services Corporation.

ACTION: Announcement of funding.

SUMMARY: The Legal Services Corporation announces that grant funds are available for improving the quality of law school civil clinical programs. The Corporation will distribute approximately twenty-two (22) one-time, non-recurring grants to geographically dispersed laws schools of varying sizes. Each grant will be for a term up to 12 months. Applicants may request funding of up to $50,000 per grant. All grants will be awarded pursuant to authority conferred by section 1006(a)(1)(B) and section (a)(3) of the Legal Services Corporation Act of 1974, as amended. Grantees are required to guarantee that a substantial portion of the funds required shall come from non-federal sources and that federally funded assets and projects will not be included in inkind services.

Proposals for the grants will be solicited from all law schools which are currently accredited by the American Bar Association, or accredited for purposes of bar admission by the state bar association of the state in which the law school is located. Proposals may be submitted by either a single law school or a consortium of law schools. Law schools serving (or enrolling) primarily minorities are encouraged to apply. Each applicant must submit appropriate documentation of eligibility.

Copies of the solicitation package are available from the LSC Office of Field Services.

DATE: All grant proposals must either be postmarked or received by the Office of Field Services on or before April 18, 1988. Grant awards will be announced by May 1988.

FOR FURTHER INFORMATION CONTACT: Charles T. Moses, Legal Services Corporaiton, Office of Field Services, Program Development and substantive Support Division, 400 Virginia Avenue, SW., Washington, DC 20024–2751, (202) 863–1837.

SUPPLEMENTARY INFORMATION: In 1984, LSC initiated a nationwide research project by providing fourteen (14) law school clinics with one-time, non-recurring grants. In return for these funds, the clinics employed clinical legal education as a means of rendering legal assistance to eligible clients. In 1985, this effort was supplemented as a result of a special Congressional appropriation that enabled LSC to fund twenty (20) law school clinics. In 1986, fifteen (15) law school clinics joined in the effort, and in 1987 twenty-six (26) law school clinics participated. To date, LSC has granted a total of seven-five (75) law school clinic grants.

Congress has recognized this necessary support of clinical education. Consequently, the Corporation is pleased to announce the fifth year of its cooperative effort with the law school clinics by continuing its annual grant competition.

In 1987, LSC completed a formal assessment of the research project and found that law school clinics offer a unique opportunity for augmenting the services provided by existing legal services programs. Competent, efficient services can be provided by involving supervised law students in the direct delivery of legal services to low-income clients. Furthermore, the students' clinical experience acquaints them with the unique needs of LSC's eligible clients in an environment that is intended to increase further reduced fee or *pro bono* involvement. Consequently, the law school clinic project meets the immediate needs of indigent person and also promotes the expansion of future delivery of legal services to eligible clients by lawyers in public service and private practice.

This grant program is designed to provide monetary assistance for expansion or development of law school clinical programs which address the civil legal needs of poor persons. This expansion could include increasing the number of supervising attorneys and participating students, developing new areas of clinical coverage, providing legal services to LSC-eligible clients who are not otherwise receiving legal assistance, developing projects which provide services to underserved segments of the population (e.g., Native American, handicapped, homebound, isolated, and rural residents) or filling in the gaps in existing services and resources.

A variety of methods could be used to provide these services including but not limited to: (1) An independent, university-sponsored clinic; (2) a joint clinic in which existing faculty provide legal instruction while LSC field attorneys provide the necessary clinical supervision; (3) a law school clinic concentrating on a previously underserved, specific client population (e.g., Native American); (4) a law school clinic concentrating totally on one field of law (e.g., Social Security Disability, SSI); and (5) a joint model in which an attorney becomes responsible for both the law education and the clinical supervision of law students.

Selection Criteria

All proposals submitted to LSC/OFS will be reviewed to insure that each is responsive to the minimum requirments set forth in this solicitation. Final section of grantees will be made by the President of LSC in consultation with the Director of the Office of Field Services (OFS), following submission of nonbinding recommendations from an advisory committee comprised of outside private experts and LSC staff. The following criteria, which have been grouped into four basic categories, will be used to assess each proposal:

1. Effective Management/Ability to Meet Project Needs (25–35%)

(a) The provision of a clear description of clinic educational and service delivery activities intended to increase legal services to the local LSC client-eligible population, and an effective plan for management of the clinic.

(b) The provision of a budget which is adequate to support clinic educational and service delivery activities, and which cites costs that are reasonable in relation to the duration and objectives of the proposed clinic.

2. Quality Supervision and Training (20–30%)

(a) Evidence that the clinic director and key clinic staff have the necessary qualifications and experience to effectively administer the proposed clinic and will be able to allocate an adequate amount of time and resources to the clinic. This is especially so with regard to the provision of appropriate levels of student supervision by faculty members, clinic staff attorneys, LSC attorneys or private *pro bono* practitioners.

(b) Evidence that the proposed clinic provides for the high quality education and training of students in the necessary areas of the law and is equipped to deliver high quality legal services in a cost effective manner.

3. Community Cooperation (15–25%)

(a) The extent to which a cooperative effort is shown between a local legal services provider and the corresponding area's law school clinics. Letters or other evidence of support by this provider for the proposed clinic may be attached where appropriate. Law school clinic proposals which are coordinated with and supported by the local legal services provider(s) are encouraged.

In addition, it is highly recommended that the law school clinic applicants explain how proposed activities and services complement the local legal services providers' service priorities.

(b) Support and participation from the private bar which result in increased attorney participation is also encouraged by LSC and should be specifically encouraged by each applicant.

4. University Commitment (15–25%)

(a) The degree to which the institution's regular budget is currently allocated to its clinical education program, and to its clinical activities. Evidence that such budgetary support levels will be *maintained* during and beyond the term of the grant. The viability of the civil clinic beyond the term of the grant must be specifically addressed.

(b) Demonstration that the applicant plans to make an adequate in-kind contribution. In order to maximize service delivery, indirect administrative costs will not be allowed to be deducted from LSC grant funds. **Note:** Federally funded assets and projects cannot be counted as in-kind contribution.

To ensure nationwide participation and geographic distribution, OFS has created seven administrative regions to be used strictly for the purposes of this project. The boundaries of these regions were drawn based upon the need for geographic dispersion combined with the desire that each region contain a generally proportionate number of states as well as eligible law schools. Depending upon the availability of qualified applicants, at least one grantee will be selected in each of the seven regions.

The seven LSC/OFS Law School Civil Clinical Program regions containing all areas in which LSC provides legal services are listed below:

Region #1:

Connecticut
Maine
Massachusetts
New Hampshire
New Jersey
New York
Rhode Island
Vermont

Region #2:

Delaware
District of Columbia
Kentucky
Maryland
Puerto Rico
U.S. Virgin Islands
Virginia
West Virginia

Region #3:

Alabama
Arkansas
Florida
Georgia
Louisiana
Mississippi
North Carolina
South Carolina
Tennessee

Region #4:

Illinois
Indiana
Michigan
Ohio
Pennsylvania

Region #5:

Colorado
Kansas
Missouri
New Mexico
Oklahoma
Texas

Region #6:

Alaska
Idaho
Iowa
Minnesota
Montana
Nebraska
North Dakota
Oregon
South Dakota
Washington
Wisconsin
Wyoming

Region #7:

Arizona
California
Guam
Hawaii
Micronesia
Ufah

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (88–23)]

NASA Advisory Council (NAC), Space Station Science and Applications Advisory Subcommittee (SSSAAS); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Station Science and Applications Advisory Subcommittee.

DATE AND TIME: March 21, 1988, 9 a.m. to 5 p.m., and March 22, 1988, 9 a.m. to 4 p.m.

ADDRESS: Greenbelt Hilton Hotel, Salon D, 6400 Ivy Lane, Greenbelt, MD 20770.

FOR FURTHER INFORMATION CONTACT: Mr. A. V. Diaz, Code E, National Aeronautics and Space Administration, Washington, DC 20546 (202/453–1430).

SUPPLEMENTARY INFORMATION: The Space Station Science and Applications Advisory Subcommittee reports to the Space and Earth Science Advisory Committee (SESAC), Space Applications Advisory Committee (SAAC) and Life Sciences Advisory Committee (LSAC) and consults with and advises the NASA Office of Space Science and Applications (OSSA) on the new capabilities to be made available by the Space Station program and how these may be most effectively utilized. It also advises the NASA Office of Space Station (OSS) on how the Space Station program may most effectively support potential science and applications users. The Subcommittee will meet to discuss the OSSA strategic planning, Space Station Utilization planning and the Subcommittee's future activities. The group is chaired by Dr. Franklin Lemkey and is composed of 15 members. The meeting will be open to the public up to the seating capacity of the room (approximately 40 people including members of the Subcommittee). It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

Type of Meeting: Open.

Agenda

March 21, 1988
9 a.m.—Welcome, Introduction and Committee Procedures.
9:30 a.m.—Space Station Program Status.
10:30 a.m.—Office of Space Science and Applications (OSSA) Strategic Plan and Space Station Utilization.
12:30 p.m.—OSSA Integrated Requirements and Candidate Payload List for the Phase I Station.
2 p.m.—OSSA Announcements of Opportunity and Payload Selection Plans.
2:30 p.m.—OSSA Space Station Utilization Studies Status.
3:30 p.m.—Space Station Science Operations Management Concept and Science Utilization Plan.
5 p.m.—Adjourn.

March 22, 1988
9 a.m.—Small Attached Payload Working Group Status.
10 a.m.—"Quick is Beautiful" Study.
11 a.m.—Task Force on Scientific Uses of the Space Station and Overview of the International Forum on Scientific Uses of the Space Station.
1 p.m.—Development of Subcommittee Action Plan for the Year.
4 p.m.—Adjourn.

Ann Bradley,
Advisory Committee Management Officer, National Aeronautics and Space Administration.
March 1, 1988.
[FR Doc. 88–5210 Filed 3–9–88; 8:45 am]

[Notice (88–24)]

NASA Advisory Council (NAC), Aeronautics Advisory Committee (AAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Ad Hoc Review Team on Aeronautics Technology Competitiveness.

DATE AND TIME: March 23, 1988, 8:30 a.m. to 4 p.m.

ADDRESS: McDonnell Douglas Corporation, Crystal Gateway, Suite 800, 1225 Jefferson Davis Highway Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Mr. John S. Burks, Office of Aeronautics and Space Technology, National Aeronautics and Space Administration, Washington, DC 20546, 202/453–2807.

SUPPLEMENTARY INFORMATION: The NAC Aeronautics Advisory Committee (AAC) was established to provide overall guidance to the Office of Aeronautics and Space Technology (OAST) on aeronautics research and technology activities Special ad hoc review teams are formed to address specific topics. The Ad Hoc Review Team on Aeronautics Technology Competitiveness, chaired by Mr. Louis F. Harrington, is comprised of ten numbers. The meeting will be open to the public up to the seating capacity of the room (approximately 10 persons including the team members and other participants).

Type of Meeting: Open.

[Notice (88-25)]

NASA Advisory Council (NAC), Aeronautics Advisory Committee (AAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Ad Hoc Review Team on Acoustic Wind Tunnel Requirements.

DATE AND TIME: March 30, 1988, 8:30 a.m. to 4:30 p.m.; and March 31, 1988, 8:30 a.m. to 3 p.m.

ADDRESS: National Aeronautics and Space Administration, Langley Research Center, Building 1219, Room 225, Hampton, VA 23665.

FOR FURTHER INFORMATION CONTACT: Dr. Randolph A. Graves, Office of Aeronautics and Space Technology, National Aeronautics and Space Administration, Washington, DC 20546, 202/453-2828.

SUPPLEMENTARY INFORMATION: The NAC Aeronautics Advisory Committee (AAC) was established to provide overall guidance to the Office of Aeronautics and Space Technology (OAST) on aeronautics research and technology activities. Special ad hoc review teams are formed to address specific topics. The Ad Hoc Review Team on Acoustic Wind Tunnel Requirements, chaired by Mr. Dean Borgman, is comprised of eight members. The meeting will be open to the public up to the seating capacity of the room (approximately 25 persons including the team members and other participants).

Type of Meeting: Open.

Agenda

March 30, 1988

8:30 a.m.—Briefings and Discussion on Requirements and Capabilities.

4:30 p.m.—Adjourn.

March 31, 1988

8:30 a.m.—Drafting of Report Recommendations for NASA Wind Tunnel Usage and Modification.

3 p.m.—Adjourn.

Ann Bradley,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

President's Committee on the Arts and the Humanities; Meeting

Thursday, March 31, 1988 at nine o'clock in the morning has been designated by the President's Committee on the Arts and the Humanities for Plenary Meeting XVII. This meeting has been scheduled in the Indian Treaty Room, Old Executive Office Building, adjacent to the White House, Pennsylvania Avenue, NW at 17th Street, in Washington, DC. This is a regularly scheduled meeting at which committee activities will be reviewed and progress reported. Because of security, reservations must be made by calling 202-682-5409 or writing the President's Committee and must be received not later than March 28 with appropriate security information (full name, social security number and date of birth).

The Committee, charged with exploring ways to increase private support for the arts and the humanities, has generated private funds to augment its operational costs and support projects and programs which have been initiated by the President's Committee.

Agenda items on March 31 will include:

Briefings by the Chairmen of the National Endowment for the Arts and the National Endowment for the Humanities on the highlights of their activities.

Reaching Rural Audiences
  Joan Kent Dillon

Fund for New American Plays
  Roger Stevens
  Dr. Carol Rocamora, Artistic and Producing Director, Philadelphia Festival Theatre for New Plays

500 Years of American Clothing
  Bill Blass

Liberal Arts and the Corporate Workplace Survey Summary
  Dr. Frank Stanton
  Dr. Michael Useem, Associate Dean, College of Liberal Arts Boston University

The Practical Value of Humanistic Study
  Dr. Franklin Murphy, Retired Chairman, Times Mirror Company, Chancellor Emeritus, U.C.L.A. Dr. Murphy is currently Chairman of the National Gallery of Art and the Samuel Kress Foundation. He began his distinguished career as a physician and became chancellor of the University of Kansas.

Yvonne M. Sabine,

Acting Director, Council and Panel Operations, National Endowment for the Arts.

March 4, 1988.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-341]

Detroit Edison Co.; Wolverine Power Supply Cooperative, Inc.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-43, issued to the Detroit Edison Company and Wolvering Power Supply Cooperative, Inc. (the licensees), for operation of Fermi-2 located in Monroe County, Michigan.

In accordance with the licensees' application for amendment dated November 30, 1987, the amendment would revise Technical Specification 3/4.3.7.5, Table 3.3.7.5-1, Accident Monitoring Instrumentation, to require that a minimum of two (2) channels, instead of one (1) channel, be operable for the Standby Gas Treatment System (SGTS) Radiation Monitors (i.e., requiring one channel per flow path to be operable) to ensure that appropriate compensatory actions are taken to preclude conditions which have the potential for allowing unmonitored release of noble gases. In addition, the proposed amendment would revise: (1) The associated Action Statement 81 in Table 3.3.7.5-1 for the SGTS Radiation Monitors and Containment High Range Radiation Monitor to extend the time period before the licensees are required to submit a Special Report to the Commission (pursuant to Section 6.9.2 of the Technical Specifications) as recommended in NRC Generic Letter 83-36; and (2) make appropriate changes in

the Technical Specification Bases for Accident Monitoring Instrumentation as a result of the change.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 11, 1988, the licensees may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filled in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW, Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-800-325-6000 (in Missouri 1-800-342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Martin J. Virgilio: (Petitioner's name and telephone number); (date petition was mailed); (plant name); and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to John Flynn, Esq., Detroit Edison Company, 2000 Second Avenue, Detroit, Michigan 48226, attorney for Detroit Edison Company.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated November 30, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Monroe County Library System, 3700 S. Custer Road, Monroe, Michigan 48161.

Dated at Rockville, Maryland, this 4th day of March, 1988.

For the Nuclear Regulatory Commission.

Theodore R. Quay,

Project Management, Project Directorate III-1, Division of Reactor Projects–III, IV, V & Special Projects.

BILLING CODE 7590-01-M

[Docket No. 50-369, License No. NPF-9 and EA 87-163]

Duke Power Co. McGuire Nuclear Station Unit 1; Order Imposing Civil Monetary Penalty

I

Duke Power Company (licensee) is the holder of Operating License No. NPF-9 issued by the Nuclear Regulatory Commission (NRC/Commission) on July 8, 1981. The license authorizes the licensee to operate McGuire Nuclear Station, Unit 1 in accordance with the conditions specified therein.

II

A special inspection of the licensee's activities was conducted on August 3-7, 1987. The results of that inspection indicated that the licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalty was served upon the licensee by letter dated October 28, 1987. The Notice states the nature of the violations, the provisions of the NRC's requirements that the licensee had violated, and the amount of the civil penalty proposed for the violations. The licensee responded to the Notice of Violation and Proposed Imposition of Civil Penalty by letter dated November 25, 1987 admitting the violations, but disputing the proposed escalation of the base civil penalty.

III

After consideration of the licensee's response and the statement of fact, explanation, and argument for mitigation contained therein, the Deputy Executive Director for Regional Operations has determined as set forth in the Appendix to this Order that the escalation of the penalty proposed for the violations designated in the Notice of Violation and Proposed Imposition of Civil Penalty should be imposed.

IV

In view of the foregoing and pursuant to Section 234 of the Atomic Energy Act

VOL 53
ISS 47
MR 10
988
UMI

of 1954, as amended (Act), 42 U.S.C. 2282, and 10 CFR 2.205, it is hereby order that: The licensee pay a civil penalty in the amount of One Hundred Thousand Dollars ($100,000) within 30 days of the date of this order, by check, draft, or money order, payable to the Treasurer of the United States and mailed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555.

The licensee may request a hearing within 30 days of the date of this Order. A request for a hearing should be clearly marked as a "Request for an Enforcement Hearing" and shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Regional Administrator, Region II, and a copy to the NRC Resident Inspector, McGuire Nuclear Station.

If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the licensee fails to request a hearing within 30 days of the date of this Order, the provisions of this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the licensee requests a hearing as provided above, the issue to be considered at such hearing shall be whether the portion of the proposed penalty above the base civil penalty should be imposed, in whole or in part.

For the Nuclear Regulatory Commission.

James M. Taylor,

Deputy Executive Director for Regional Operations.

Dated at Bethesda, Maryland this 3rd day of March 1988.

Appendix—Evaluations and Conclusions

On October 28, 1987, a Notice of Violation and Proposed Imposition of Civil Penalty (Notice) was issued for violations identified during a routine NRC inspection. Duke Power Company responded to the Notice of November 25, 1987. In its response, the licensee admitted that the subject violations occurred and did not contest the base civil penalty or the proposed Severity Level of the violations; however, the licensee did contest escalation of the base civil penalty. The NRC's evaluations and conclusions regarding the licensee's arguments are as follows:

A. General Arguments

Summary of Licensee's Response

The licensee contends that the NRC escalated the base civil penalty because of past poor performance and inadequate corrective action related to independent verification and failure to follow procedures in the area of plant operations. The licensee believes that reasons given by the NRC for escalation are either inconsistent with the factors set forth in the Enforcement Policy or are otherwise improper.

NRC Evaluation of Licensee's Response

The NRC letter of October 28, 1987, included the following statement: The base civil penalty amount was increased by 100 percent because of: (1) Past poor performance in the area of concern as documented generally by Systematic Assessment of Licensee Performance (SALP) in the operations area and specifically by the similar occurrences discussed earlier [see page 2 of the October 28, 1987 letter paragraphs 2 and 3 regarding IVP], (2) the corrective actions taken on July 29, 1987, were not only inadequate and non-conservative, in that it was assumed the problem was in the control panel indicators and not in the diesel generator itself, but untimely in that it was not recognized promptly that the indicator light was out. Specifically, multiple shift turnovers occurred during the time the diesel generator was inoperable yet, none of the licensed operators involved recognized the significance of the multiple indicators of the problem available to them.

The NRC staff's evaluation of the licensee's arguments concerning the details associated with the above summary statement will be addressed in specific below.

B. Arguments Regarding Past Performance

1. Effectiveness of Previous Corrective Action

a. Independent Verification Program (IVP)

Licensee Assertion: The licensee cites a number of efforts to improve their IVP subsequent to a March 1983 incident at Oconee in an effort to demonstrate how these previous corrective actions have been successful in minimizing future problems. In the licensee's view, this justifies removal of the escalation for prior poor performance.

NRC Evaluation. Five changes were made to the McGuire IVP prior to 1984. No subsequent changes are relied upon in the licensee's argument prior to the current incident. The licensee then cites statistics to show a declining trend in the number of related incidents over four years from three per year to one per year.

The reason for escalation was poor performance. The NRC staff made no contention that there had been no progress in improving the IVP. Using the licensee's statistics, we note that all eight problems cited by the licensee in the IVP have occurred since full implementation of the five changes to the program. No subsequent changes were made to the IVP over a four year period preceding the current incident even though additional violations have occurred. Thus, it cannot be found that earlier changes in the IVP constituted adequate corrective action insofar as the subject violations are concerned. Therefore, escalation based on continued poor performance in IVP is appropriate.

b. Personnel Failure to Follow Procedures

Licensee Assertion. The licensee cites corrective actions and a decreasing number of Reportable Events which are argued to be indicative of a declining number of personnel errors. It is the licensee's view that such trends support removal of escalation for prior poor performance.

NRC Evaluation. It is the staff's position that the licensee's statistical trends alone are not sufficient to weigh against escalation. First, the relationship between the corrective actions cited by the licensee and the trends is not readily apparent given the dates of implementation of the corrective actions and the intervening unfavorable SALP findings. Second, statistics indicating an overall declining trend in personnel errors do not provide assurance that progress has been made in a specific area such as IVP or that recurring problems are being prevented. Finally, the occurrence of a significant problem such as the inoperability of DG–1A, which involved a number of procedural as well as cognitive personnel errors, calls into question the effectiveness of past corrective actions regardless of statistical trends. This incident underscores the need to make the determination of whether escalation is appropriate on a qualitative as well as quantitative basis.

2. Overall Performance (prior SALP reports)

Licensee Assertion. The licensee contends that recent events weigh against the NRC's reliance upon the SALPs for the purpose of escalation, specifically the recently awarded category 2 SALP rating in Operations.

NRC Evaluation. The licensee relies heavily on the most recent SALP as evidence of improvement. The licensee assumes that the most recent category 2 SALP rating should be considered as the primary indication of previous performance for escalated enforcement.

There are several points that must be noted in this regard: (a) previous performance, for purposes of escalated enforcement, includes more than consideration of numerical SALP ratings or the fact that the previous SALP rating shows improvement, (b) despite the recent improvement in the SALP rating, the licensee's past performance in specific areas has not been good, (c) a SALP rating of 2 does not necessarily mean that a penalty may not be escalated.

3. Prior Enforcement History

Licensee Assertion. The licensee asserts that the two events discussed should not be used as a basis for escalating a civil penalty for prior enforcement history because one of the events was not cited in a Notice of Violation and bcause the events occurred more than two years ago (January 3 and October 22, 1985).

NRC Evaluation. The NRC is not required by the Enforcement Policy to limit in its consideration of the basis for escalation for "Past Performance" (10 CFR Part 2, Appendix C, Section V.c.3) to the licensee's prior enforcement history. (See also "Prior Notice of Similar Events" *id* V.c.4.) Information in inspection reports, whether or not used to support a violation, is relevant for past performance and provides notice for the need for corrective action. Accordingly, the NRC's reference, in the October 28, 1987 letter, to the two events, which were noted as similar to the incident for which the instant notice was issued, was appropriate. It is further noted that the emphasis of the NRC's reference to the two events was that the corrective action for those events was not successful in preventing the current incident.

The NRC typically reviews events over an approximate two year period in evaluating past performance. In this case the Notice of Violation was issued on October 28, 1987, the inspection took place on August 3–7 1987; and the violations occurred between July 26 and 30, 1987. Therefore, consideration of the two events that occurred in 1985 is appropriate especially given the distinct similarities that exist between the recent incident and those events.

C. Arguments Regarding Corrective Actions

Licensee Assertion. The licensee contends that there are two separate reasons for objecting to the NRC's assetion that improper corrective action should serve as the basis for escalating the base civil penalty. The licensee's reasons for objecting are listed below:

1. Such use constitutes improper double counting (i.e., improper corrective action cannot serve as basis for both the violation and the escalation), and
2. Conflict with the Enforcement Policy (i.e., the licensee asserts that the policy prohibits considering actions taken before discovery of the problem as "corrective.")

NRC Evaluation. The violation for failure to take corrective actions (Violation C of the Notice of Violation) was cited because of the operator's failure to recognize the significance of the multiple indications of the problem available to him. Further, when the problem was identified, it was improperly diagnosed as a faulty switch. The basis for escalation rests on the fact that multiple shift turnovers occurred, with the diesel generator 1A (DG-1A) in fact inoperable for approximately 90 hours. Each turnover provided an opportunity to identify and correct the violation. The Enforcement Policy (10 CFR 2, Appendix C) allows for escalation based on duration of the violation. Paragraph B.V.5(3) of the Policy states that whether or not a licensee is aware or should have been aware of a violation that continues for more than a day, the civil penalty imposed for the violation may be increased to reflect the added significance resulting from the duration of the violation. The reference to corrective action in the October 28, 1987 cover letter's discussion of escalation was not intended to address the factor of inadequate corrective action but rather the duration caused by inadequate action on July 29,1987.

In summary, the violation (Violation C of the Notice of Violation) is based on the failure of the operator to recognize the significance of the multiple indications of DG-1A inoperability, as well as the improper diagnosis of the problem, while the escalation is based on the duration of the event. It is not impermissible to issue a citation for failure to take corrective action and at the same time escalate a penalty based on the significance of that failure.

D. NRC Conclusion

The purpose of this penalty is remedial. It is designed to emphasize (1) the need to maintain lasting corrective action and (2) that performance of the type underlying this civil penalty action cannot be accepted. The staff recognizes efforts Duke is making to improve its performance. But for those actions the penalty might have been higher.

An adequate basis for reduction of the 100 percent escalation of the base civil penalty has not been presented by the licensee. Consequently, the proposed civil penalty in the amount of One Hundred Thousand Dollars ($100,000) should be imposed.

BILLING CODE 7590-01-M

[Docket No. 030-01391, License No. 12-01087-07 and EA 88-42]

Edward Hines, Jr. Medical Center; Order to Show Cause Why License Should Not be Modified, Effective Immediately

I

Edward Hines, Jr. Medical Center (Veterans Administration), Hines, Illinois, (licensee/VA Hines) is the holder of specific byproduct material license of broad scope No. 12–01087–07 (the license) issued by the Nuclear Regulatory Commission (Commission/NRC) pursuant to 10 CFR Parts 30, 33 and 35. The license authorizes the licensee to use: (1) Byproduct material listed in Groups I through VI of Schedule A, 10 CFR 35.100 (under the new revised 10 CFR Part 35 this material is identified in Subparts D, E, F, and G) for diagnostic and therapeutic procedures; (2) any byproduct material between Atomic Nos. 1 and 83, inclusive, and (3) xeron–133 for blood flow and pulmonary function studies. The license was originally issued on October 15, 1958, was most recently renewed on September 24, 1985, and expires on September 30, 1990.

II

From December 16, 1986 through January 22, 1987, and February 10 through November 4, 1987, NRC inspections and investigations were conducted at VA Hines. As a result of those inspections and investigations, it appears that the following occurred:

A. On August 14, 1986, Region III received an anonymous allegation that three diagnostic misadministrations occurred at VA Hines during the week of August 4–8, 1986, and those misadministrations were not reported to the NRC as required by 10 CFR 35.43.[1] It was further alleged that Dr. Maynard L. Freeman, Assistant Chief, Nuclear Medicine Service, VA Hines, was notified of the three misadministrations by the Acting Chief Technologist for that week (the Assistant Chief Technologist), but took no action to ensure that those events were reported. The NRC subsequently verified that these misadministrations did occur. On August 24, 1987, an order to show cause why license should not be modified, effective immediately was issued which, among other actions, removed Dr. Freeman's authority to use or supervise the use of licensed materials at VA Hines due to his involvement in those events. A hearing is pending on the removal of Dr. Freeman.

B. On October 29, 1986, the Director, VA Hines, ordered an investigation into the three alleged unreported misadministrations. Regarding the first alleged misadministration, the V.A. Investigatory Board concluded on December 1, 1986, that the event did not involve a misadministration. That conclusion was based, in part, on statements of Mr. Niemiro, the nuclear medicine technologist involved in the alleged misadministration. Regarding the first alleged misadministration, Mr. Niemiro informed the Board that Dr. Freeman gave him verbal instructions to perform a brain scan instead of a bone scan as indicated on the written order for that patient. Mr. Niemiro further advised the Board that the properly administered the brain scan as directed and nothing unusual, including a misadministration, occurred during the test.

C. From December 16, 1986, through January 22, 1987, NRC Region III conducted an inspection into the circumstances surrounding the three alleged unreported misadministrations. Regarding the first alleged misadministration, the NRC inspectors concluded that a misadministration could not be substantiated due to conflicting statements provided by the involved individuals. Mr. Niemiro stated to the NRC inspectors that: (1) Dr. Freeman verbally instructed him to perform a brain scan on the patient; (2) he performed a brain scan on the patient; and (3) he did not give two injections of any type of materials to the patient.

D. From February 10 through November 4, 1987, the NRC Office of Investigations conducted an investigation into the circumstances surrounding the three alleged unreported misadministrations. Regarding the first misadministration, the NRC investigation concluded that, on August 4, 1986, Mr. Niemiro was directly involved in the injection of a patient who was scheduled for a bone scan but received a brain scanning agent. Without further consultation with an authorized user, Mr. Niemiro subsequently injected the patient with a bone scanning agent.

E. Mr. Niemiro testified under oath that he injected a brain scanning agent by mistake and, when he realized that a mistake had been made, he panicked and injected a bone scanning agent to cover up the mistake. In addition, Mr. Niemiro testified that he had never been instructed by Dr. Freeman to perform a brain scan rather than a bone scan. The brain scanning material dose calibration ticket is missing, and Mr. Niemiro testified that he may have discarded that dose calibration ticket because he knew that a mistake had been made and he did not want the ticket in the file. Further, Mr. Niemiro testified that he falsely stated to the V.A. Investigatory Board and to NRC inspectors that he remembered Dr. Freeman telling him to inject a brain scanning agent because Dr. Freeman stated to the Chief of the Nuclear Medicine Department in Mr. Niemiro's presence that he had given such an instruction, and Mr. Niemiro feared contradicting Dr. Freeman. Thus, regarding the first misadministration, it appears that Mr. Niemiro, the involved nuclear medicine technologist: (1) in an effort to mask the prior injection of an NRC licensed nuclear scanning agent, injected a second NRC licensed nuclear scanning agent without consulting an authorized user contrary to VA Hines License Conditions Nos. 12A and 20; (2) discarded records reflecting injection of one of the scanning agents; and (3) falsely represented the facts surrounding the misadministration to the NRC inspectors and a VA Hines Investigatory Board.

III

Although the actions that are described in Section II occurred some time ago, upon further review, the actions of Mr. Niemiro demonstrate there is no longer reasonable assurance that without additional oversight he can be relied on to comply with Commission requirements concerning the use of licensed materials and to be candid with the Commission.

Licensees must adhere strictly to radiation safety requirements so that the medical use of NRC-licensed material does not create a radiation hazard to workers and members of the public. The proper and competent performance of licensee employees is essential to ensuring the safe conduct of licensed activities. The NRC in its investigation and inspection process must be able to obtain complete and accurate information from licensee employees in order to carry out NRC's statutory mission.

Therefore, the public health, safety, and interest require that License No. 12-01087-07 be modified to prohibit the involvement of Mr. Niemiro in licensed activities without further control. Furthermore, I have determined pursuant to 10 CFR 2.201(c) that no prior notice is required and pursuant to 10 CFR 2.202(f) that the public health, safety and interest require that this Order should be immediately effective.

IV

Accordingly, pursuant to Sections 81, 161b, 161i, 161o, 182, and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR Parts 30 and 35, it is hereby ordered, effective immediately that:

License No. 12-01087-07 is modified by adding the following conditions:

A. Mr. Mark Niemiro may only engage in activities involving the administration of NRC licensed material to humans so long as, prior to the administration, another nuclear medicine technologist or authorized user verifies in writing:

1. That the patient is the individual for whom the dosage is prescribed;
2. That it is the prescribed pharmaceutical; and
3. That the dosage of the pharmaceutical is properly measured and complies with the prescription within hospital measurement error limits.

The documentation of the verification shall include the date of each item that was verified and the signature of the person making the verification. If the verification is not contained on the standard hospital forms associated with the administration, the documentation of the verifications shall be retained as long as this requirement remains in effect.

B. VA Hines shall provide a written report to the NRC Regional Administrator, Region III, certifying that the verifications have been performed and describing Mr. Niemiro's performance as it involves administration of radiopharmaceuticals and other radiological safety activities. The first report is to be provided within 30 days of the date of this Order and bimonthly thereafter.

---

[1] The Commission's regulations have since been revised. The requirements for reporting misadministrations are presently set forth in 10 CFR 35.33.

C. Following the submission of the sixth report required by condition B, above, the licensee may request in writing, including reasons therefore, removal of conditions A and B above.

D. The Regional Administrator, Region III, may relax or terminate the above conditions in writing for good cause.

V

The licensee or Mr. Niemiro may show cause why this Order should not have been issued and should be vacated by filing a written answer under oath or affirmation within 30 days of the date of this Order which sets forth the matters of fact and law on which the licensee or Mr. Niemiro relies. The licensee or Mr. Niemiro may answer as provided in 10 CFR 2.202(d) by consenting to this Order. If the licensee fails to answer within the specified time or consents to this Order, this Order shall be final unless Mr. Niemiro shows cause why the Order should not have been issued or requests a hearing.

VI

The licensee, Mr. Niemiro, or any other person adversely affected by this Order may request a hearing within 30 days after issuance of this Order. Any answer to this Order or any request for hearing shall be submitted to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies shall also be sent to the Assistant General Counsel for Enforcement at the same address and to the Regional Administrator, U.S. Nuclear Regulatory Commission, Region III, 799 Roosevelt Road, Glen Ellyn, Illinois 60137. If a person other than the licensee or Mr. Niemiro requests a hearing, that person shall set forth with particularity the manner in which the petitioner's interest is adversely affected by the Order and should address the criteria set forth in 10 CFR 2.714(d). Upon the failure of the licensee, Mr. Niemiro or any other person adversely affected by this Order to answer or request a hearing within the specified time, this Order shall be final without further proceedings. An answer to this order or a request for hearing shall not stay the immediate effectiveness of this order.

If a hearing is requested, the Commission will issue an order designating the time and place of any hearing. If a hearing is held, the issue to be considered at the hearing shall be whether this Order should be sustained.

Dated at Bethesda, Maryland, this 25th day of February 1988.

For the Nuclear Regulatory Commission.

James M. Taylor,

Deputy Executive Director for Regional Operations.

[FR Doc. 88-5257 Filed 3-9-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-224]

University of California, Berkeley; Proposed Issuance of Orders Authorizing Disposition of Component Parts and Terminating Facility License

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of Orders to authorize the University of California, Berkeley (the licensee) to dispose of the component parts of the research reactor in their possession, in accordance with the licensee's application dated January 8, 1988 and terminating the Facility Operating License No. R-101.

The first of these Orders would be issued following the Commission's review and approval of the licensee's detailed plan for decontamination of the facility and disposal of the radioactive components, or some alternate disposition plan for the facility. This Order would authorize implementation of the approved plan. Following completion of the authorized activities and verification by the Commission that acceptable radioactive contamination levels have been achieved, the Commission would issue a second Order terminating the facility license and any further NRC jurisdiction over the facility. Prior to issuance of each Order, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

By April 11, 1988, the licensee may file a request for a hearing with respect to issuance of the subject Orders and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in CFR Part 2. If a request for hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate Order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any Order which may be entered on the petitioners' interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding but such an amended petition must satisfty the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the action under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the Order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Section, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Lester S. Rubenstein: (petitioner's name and telephone number); (date petition was mailed); University of California, Berkeley; and publication date and page number of the **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel-White Flint, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee, Mr. Milton Gordon, Office of the General Counsel, University of California, 590 University Hall, Berkeley, California 94720.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the atomic safety and licensing board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) amd 2.714(d)

For further details with respect to this action, see the licensee's application dated January 8, 1988, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW, Washington, DC.

Dated at Rockville, Maryland this 4th day of March, 1988.

For the Nuclear Regulatory Commission.

Lester S. Rubenstein,

Director, Standardization and Non-Power Reactor Project Directorate, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88-5255 Filed 3-9-88; 8:45 am]

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Midwest Stock Exchange; Application for Unlisted Trading Privileges in Over-the-Counter Issues and To Withdraw Unlisted Trading Privileges in Over-the-Counter Issues

March 4, 1988

The Midwest Stock Exchange, Inc. ("MSE") on March 1, 198[illegible] submitted an application for unlisted trading privileges ("UTP") pursuant to section 12(f)(1)(C) of the Securities Exchange Act of 1934 ("Act") in the following over-the-counter ("OTC") securities, *i.e.*, securities not registered under section 12(b) of the Act:

File No.	Symbol	Issuer
7-3108	COMS	3 Com Corp. Common No Par Value.
7-3109	LINB	Lin Broadcasting Corp. Common $2.00 Par Value.
7-3110	NIKE	NIKE Inc. Class B Common No Par Value.
7-3111	PGULF	Pegasus Gold, Inc. Common No Par Value.
7-3112	STRA	Stratus Computer Common $0.01 Par Value.
7-3113	WYSE	Wyse Technology Common No Par Value.

The MSE also applied to withdraw UTP pursuant to Section 12(f)(4) of the Act on the following OTC issues:

File No.	Symbol	Issuer
7-3114	AGREA	American Greetings Corp. Class A Common $1.00 Par Value.
7-3115	CAVN	CVN Cos. Common No Par Value.
7-3116	GVGT	Convergent Technologies Common No Par Value.
7-3117	GENE	Genentech, Inc. Common $0.02 Par Value.
7-3118	LMED	Lymphomed, Inc. Common $0.01 Par Value.
7-3119	MAXI	Maxicare Health Plans, Inc. Common No Par Value.

With the exception of Genentech, the MSE applied to withdraw UTP on these securities because of low transaction volume. The MSE applied to withdraw UTP in Genentech, Inc. because Genentech has applied to be listed on an exchange and thus the MSE no longer can trade the security on an OTC/UTP basis.

Comments

Interested persons are invited to submit on or before March 25, 1988, written comments, data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street, Washington, DC 20549. Commentators are requested to address whether they believe the requested withdrawal of UTP would be consistent with Section 12(f)(1)(C). In considering an application for extension of UTP in OTC securities under section 12(f)(1)(C), the Commission is required to consider, among other matters, the public trading, the activity in such security, the character of such trading, the impact of such extension on the existing markets for such securities, and the desirability of removing impediments to and the progress that has been made toward the development of a national market system. The Commission may not grant such application if any rule of the national securities exchange making an application under 12(f)(1)(C) would unreasonably impair the ability of any dealer to solicit or effect transactions in such security for his own account, or would unreasonably restrict competition among dealers in such security or between under such dealers acting in the capacity of market makers who are specialists and such dealers who are not specialists.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 35-24593]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

March 3, 1988.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by March 28, 1988 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as

amended, may be granted and/or permitted to become effective.

Mississippi Power Company (70-7204)

Mississippi Power Company ("Mississippi"), 2992 West Beach, Gulfport, Mississippi 39501, an electric utility subsidiary of The Southern Company, a registered holding company, has filed with the Commission a post-effective amendment to its declaration pursuant to sections 6(a), 7 and 12(c) of the Act and Rules 42 and 50 thereunder.

By order dated May 21, 1986 (HCAR No. 24100) ("May 21st Order), Mississippi was authorized, through March 31, 1988, to issue and sell up to $35 million of the $75 million of first mortgage bonds ("Bonds") it had requested. Jurisdiction was reserved with regard to the issuance and sale through March 31, 1988 of the remaining $40 million of Bonds and of $10 million of new preferred stock ("Preferred Stock") pending completion of the record. By order dated April 10, 1987 (HCAR No. 23470), Mississippi was further authorized to issue and sell up to an additional $10 million of Preferred Stock through March 31, 1988, for a total of up to $20 million of Preferred Stock. Jurisdiction was released over the issuance and sale of the initial $10 million of Preferred Stock. Jurisdiction continued to be reserved over the issuance and sale of the remaining $40 million of Bonds.

Mississippi has issued and sold $35 million of Bonds as authorized by the May 21st Order. Mississippi now seeks authority to issue and sell the remaining $40 million of Bonds and the $20 million of New Preferred Stock through March 31, 1989.

Alabama Power Company (70-7205)

Alabama Power Company ("Alabama"), 600 North 18th Street, Birmingham, Alabama 35291, an electric utility subsidiary of The Southern Company, a registered holding company, has filed a post-effective amendment to its application-declaration with this Commission pursuant to sections 6(b), 9(a) and 10 of the Act and Rules 50 and 50(a)(5) thereunder.

By orders dated May 7, 1987, October 20, 1987, October 23, 1987, November 2, 1987 and February 5, 1988 (HCAR Nos. 24088, 24479, 24483, 24487 and 24574, respectively), jurisdiction had been reserved, in pertinent part, through March 31, 1988, over: (1) The financing of pollution control facilities in an amount of up to $125 million; (2) the issuance and sale of $325 million of first mortgage bonds ("Bonds") by competitive bidding; (3) the issuance and sale of $10 million of Class A Preferred Stock ("Preferred Stock") by competitive bidding; and (4) the terms, conditions, fees and expenses associated with the issuance and sale of $50 million of Preferred Stock under an exception from competitive bidding.

Alabama now seeks authorization, through March 31, 1989, to: (1) Finance its pollution control facilities in an amount of up to $125 million; (2) issue and sell $325 million of Bonds by competitive bidding; (3) issue and sell $10 million of Preferred Stock by competitive bidding; and (4) issue and sell $50 million of Preferred Stock under an exception from competitive bidding, each as previously authorized by the Commission (HCAR Nos. 24088, 24479, 24483, 24487 and 24574).

Georgia Power Company (70-7504)

Georgia Power Company ("Georgia"), 333 Piedmont Avenue, NE., Atlanta, Georgia 30308, an electric utility subsidiary of The Southern Company, a registered holding company, has filed an application-declaration pursuant to sections 6, 6(b), 7, 9(a), and 10 of the Act and Rules 50 and 50(a)(5) thereunder.

Georgia proposes on or before December 31, 1989, to issue and sell first mortgage bonds, preferred stock, pollution control revenue bonds and effect borrowings in the form of term loans, in an aggregate amount of up to $1,050,000,000 in any combination of issuance but with sub-limits imposed on each security. The sub-limits are as follows: $600 million of first mortgage bonds, $175 million of preferred stock, $150 million of pollution control revenue bonds and $125 million of term loans. However, it is also proposed that, in the event that Georgia decides to exceed any of the sub-limits, the Commission reserve jurisdiction to review issuances of each security in excess of such sub-limit. In no event will the total amount exceed $1,050,000,000. It is further proposed that the Commission reserve jurisdiction over any issuance and sale of preferred stock until such time as Georgia has the required coverage ratio pursuant to its charter. Georgia also proposes to issue and sell from time to time, on or prior to December 31, 1989, short-term notes to banks and commercial paper to dealers in an aggregate principal amount at any one time outstanding of up $1 billion. Georgia proposes to enter into interest rate swap agreements having terms of up to seven years covering an underlying principal amount of debt not to exceed $1 billion.

Georgia requests an exception from the dividend limitation provisions of the Commission's 1956 Statement of Policy Regarding First Mortgage Bonds so that its new first mortgage bond issues, including any first mortgage bonds issued as collateral for pollution control obligations, would be subject to the common stock dividend restrictions of Georgia's June 1, 1984 Supplemental Indenture. Georgia proposes to use March 31, 1984, rather than the respective dates of issuance of the series of new bonds, as the starting date for accumulation of earned surplus, and to use $302 million as the annual dividend allowance.

If pollution control revenue bonds ("Revenue Bonds") are issued, Georgia will enter into a Loan Agreement with the Development Authority ("Authority") of each county where Georgia has pollution control facilities, relating to each issue of the Revenue Bonds. In order to obtain a favorable rating on the Revenue Bonds, Georgia may issue and sell collateral bonds, cause an irrevocable Letter of Credit of a bank to be delivered to the Trustee, convey to the Authority a subordinated security interest in property of Georgia, cause an insurance company to issue a policy of insurance guaranteeing the payment when due of principal of and interest on such series of the Revenue Bonds, or guarantee the payment of the principal of, premium, if any, and interest on the Revenue Bonds.

The short-term borrowings would have a maximum maturity of 270 days, be renewable at maturity and may be converted to term loans at any time at Georgia's option. Under each agreement, Georgia is obligated to pay a commitment fee based upon the unused portion of the bank's commitment. The commitment fees vary from bank to bank from ¼ to 7/16 of 1 percent per annum based on the unused portion. Assuming no usage, the annual commitment fees payable by Georgia would aggregate $5,884,400. In addition, in connection with a facility, Georgia has agreed to pay fees to the agent banks aggregating ¼ and ⅛ of 1 percent, respectively, of the amount of such facility during the first and second years. The current effective annual interest rates on individual borrowings would range from 7.64 to 9.188 percent for short-term borrowings, and from 7.604 to 9.25 percent for term-loan borrowings.

For the first mortgage bonds and preferred stock, Georgia will comply with the competitive bidding requirements of Rule 50 of the Act, as modified by the Commission's Statement of Policy dated September 2, 1982 (HCAR No. 22623). Georgia may amend this application to seek an exception from the competitive bidding requirements under Rule 50 so that it may offer the Bonds and Stock through a negotiated public offering or private placement. Georgia has asked for an exception from the competitive bidding requirements of Rule 50 pursuant to Rule 50(a)(5) for the pollution control revenue bonds, collateral bonds, the guarantee, commercial paper, and the interest rate swaps.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Washington County, OR

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Washinton County, Oregon.

FOR FURTHER INFORMATION CONTACT: Elton Chang, Environmental Coordinator and Safety Programs Engineer, Federal Highway Administration, Equitable Center, Suite 100, 530 Center NE, Salem, Oregon 97301. Telephone: (503) 399-5749.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Oregon Department of Transportation, and the Washington County Department of Land Use and Transportation will prepare an environmental impact statement (EIS) on a proposal to improve Tualatin/Sherwood-Edy Road in Washington County, Oregon. The proposed improvement would involve the reconstruction of the existing Tualatin/Sherwood-Edy Roads between the towns of Sherwood and Tualatin for a distance of about 4 miles.

Improvements to the roads are considered necessary to provide for the existing and projected traffic demand. Also, included in this proposal is the improvement of the Six Corners Intersection on Highway 99W. Alternatives under consideration include (1) taking no action; (2) using alternative travel modes; and (3) widening the existing two-lane highway to three or five lanes while also improving both vertical and horizontal curvatures.

Information describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies, and to provide organizations and citizens who have previously expressed or are known to have interest in this proposal. A series of public meetings have been held in Tualatin and Sherwood between February and November 1987. In addition, a public hearing will be held. Public notices of the time and place of the meetings and the hearing will also be publicized. The Draft EIS will be available for public and agency review and comment prior to the public hearing. The initial Technical Advisory Committee meeting on December 16, 1986, served as the scoping meeting for the project.

To ensure that the full range of issues related to this proposed action is addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

Comments or questions concerning this proposed action and EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The provisions of Executive Order 12372, "Intergovernmental Review of Federal Programs" apply to this program.)

Issued on March 1, 1988.

Elton H. Chang,

Environment Coordinator/Safety Program Engineer, Oregon Division, Salem, Oregon.

[FR Doc. 88-5272 Filed 3-9-88; 8:45 am]

BILLING CODE 4910-22-M

Research and Special Programs Administration

Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT.

ACTION: List of applicants for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Transportation has received the applications described herein. Each mode of transportation for which a particular exemption is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft.

DATES: Comment period closes April 12, 1988.

ADDRESS COMMENTS TO: Dockets Branch, Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION: Copies of the applications are available for inspection in the Dockets Branch, Room 8426, Nassif Building, 400 7th Street SW. Washington, DC.

NEW EXEMPTIONS

Application	Applicant	Regulation(s) affected	Nature of exemption thereof
9926-N	Implementos Agricolas, LaLa, N.A., Kerpen, West Germany.	49 CFR 173.302(a)(1), 173.304(a)(1), 173.304(a)(2), 175.3, 178.65-2, 178.65-5.	To manufacture, mark and sell non-DOT specification cylinders comparable to DOT specification 39 for shipment of those nonflammable gases presently authorized for shipment in DOT specification 39 cylinders. (Modes 1, 2, 3, 4, 5.)
9933-N	Mobay Corporation, Pittsburgh, PA	49 CFR 173.245	To authorize shipment of Dimethyldicarbonate, described as Corrosive liquid, poisonous, n.o.s., classed as Corrosive material, in a non-DOT specification packaging consisting of a 25 liter, plastic coated, glass bottle enclosed in a polystyrene overpack. (Mode 1.)
9934-N	Aldrich Chemical Company, Inc., Milwaukee, WI.	49 CFR 173.274	To authorize shipment of Fluorosulfonic (or Fluosulfonic) acid, classed as corrosive material, in a non-DOT specification composite packaging. (Modes 1, 4.)
9935-N	Atlas Powder Company, Dallas, TX	49 CFR 173.66(e), 178.209	To authorize shipment of detonators, classed as Class A or Class C explosive, in non-DOT Specification fiberboard boxes made of 275 pound test board and meeting the test requirements for DOT specification 12H fiberboard boxes. (Modes 1, 2, 3, 4.)
9936-N	Siepe GmbH, Durango, Mexico	49 CFR 173.154, 173.191, 173.217, 173.245b, 178.16.	To authorize the manufacture, mark and sell of non-DOT 30 gallon capacity open head polyethylene container comparable to DOT-35 for shipment of phosphorous pentachloride, classed as corrosive material and other corrosive materials and oxidizers presently authorized in DOT-35 containers. (Modes 1, 2, 3.)
9937-N	Van Leer Verpackungen GmbH, Koln, West Germany.	49 CFR 173, 178.224	To authorize the manufacture, marking and sale of non-DOT specification fiber drums that generally comply with DOT specification 21C fiber drums with the exception of wall thickness, for shipment of materials authorized for shipment in DOT-21C drums. (Modes 1, 2, 3.)
9938-N	Explosive Technology, Fairfield, CA	49 CFR 173.65(a)(4)	To authorize shipment of materials classed as Class A explosive, Type 8, in a package that exceeds the weight limit prescribed by 49 CFR. (Mode 1.)
9939-N	National Aeronautics and Space Administration, Washington, DC.	49 CFR 172.101, table column (6)(b), 173.92.	To authorize shipment of a rocket motor, class B explosive, in a specially designed packaging not to exceed 1,500 pounds as a completed package. (Modes 1, 4.)

NEW EXEMPTIONS—Continued

This notice of receipt of applications for new exemptions is published in accordance with Section 107 of the Hazardous Materials Transportations Act (49 CFR U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on March 7, 1988.

J. Suzanne Hodgepeth,

Chief, Exemptions Branch, Office of Hazardous Materials Transportation.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange commission will hold the following meeting during the week of March 14, 1988:

A closed meeting will be held on Thursday, March 17, 1988, at 2:30 p.m.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Fleischman, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Thursday, March 17, 1988, at 2:30 p.m., will be:

Institution of injunctive actions.

Institution of administrative proceedings of an enforcement nature.

Settlement of administrative proceedings of an enforcement nature.

Settlement of injunctive actions.

Formal orders of investigation.

Opinion.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Brad Belt at (202) 272–2467.

Jonathan G. Katz,

Secretary.

March 9, 1988.

Department of Health and Human Services

Family Support Administration

45 CFR Parts 16 and 402

State Legalization Impact Assistance Grants; Final Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Family Support Administration

45 CFR Parts 16 and 402

State Legalization Impact Assistance Grants (SLIAG)

AGENCY: Family Support Administration, HHS.

ACTION: Final rule.

SUMMARY: This rule implements section 204 of Pub. L. 99–603, the Immigration Reform and Control Act (IRCA) of 1986 (the Act). Section 204 of the Act establishes State Legalization Impact Assistance Grants (SLIAG) which are available to States. These grants may be used for reimbursement of or payments for the costs incurred by State and local governments in providing public assistance, public health assistance, and educational services to eligible legalized aliens as defined in the Act and this regulation.

DATE: The rule is effective March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Norman L. Thompson, Director, State Legalization Assistance Division, Office of Refugee Resettlement, Family Support Administration, 330 Independence Avenue, SW., Room 5627, Washington, DC 20201 Telephone: 202–245-0562.

SUPPLEMENTARY INFORMATION: Section 204 of the Immigration Reform and Control Act of 1986 (Pub. L. 99–603), enacted on November 6, 1986, establishes State Legalization Impact Assistance Grants (SLIAG) for States for fiscal year 1988 and for each of the three succeeding fiscal years. The purpose of SLIAG is to alleviate the financial impact on State and local governments that may result from the adjustment of immigration status under the Act of certain groups of aliens residing in the States, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam.

The legislative history of the Act indicates that Congress intended SLIAG funds to be used only for those additional State costs resulting from the passage of the Act, not for every cost related to meeting the needs of this eligible alien population. The legislative history also indicates that Congress did not expect the SLIAG appropriation to reimburse 100 percent of these additional costs.

Within the Department of Health and Human Services (HHS), SLIAG will be administered by the Office of Refugee Resettlement (ORR) in the Family Support Administration (FSA). FSA has established a new State Legalization Assistance Division within the Office of Refugee Resettlement to administer SLIAG. Similar to some of the other grant programs administered by FSA, SLIAG will be administered directly from the FSA central office in Washington, DC. The State Legalization Assistance Division may be reached at the address and phone number listed above.

The Department published a notice of proposed rulemaking on August 13, 1987. We received more than 80 comments on the proposed rule. The commenters suggested a number of changes to the proposed rule which we have incorporated into this final rule. The major changes made in the rule concern the allocation of funds among the States (Subpart D), the provision of educational services (Subparts A, B and C), State applications (Subpart E), and reporting requirements (Subpart F). The provisions of the final rule and our responses to the comments on the proposed rule are discussed below.

Subpart A—Introduction

Section 402.1—General

Section 201 of the Act, which adds new section 245A to the Immigration and Nationality Act (INA), creates a program of legalization under which the status of certain aliens who have resided unlawfully in the United States since prior to January 1, 1982, may be adjusted to that of lawful temporary resident, and eventually to that of lawful permanent resident. New INA section 245A(h) provides that for five years from the date of adjustment to lawful temporary resident status, an alien is barred from participation in: (1) Need-based Federal programs of financial assistance to be identified by the Attorney General by regulation, including Aid to Families with Dependent Children (AFDC); (2) Medicaid (with exceptions noted below); and, (3) Food Stamps. Aged, blind or disabled individuals and certain Cuban-Haitian entrants are excepted from the bar to eligibility (although these individuals must still meet the eligibility requirements of the various programs to which they might apply). Also, the law affords limited Medicaid benefits to otherwise eligible aliens needing emergency services or services for pregnant women and full Medicaid benefits to children under 18. Finally, section 201 of the Act specifies certain programs, including Supplemental Security Income (SSI), which the Attorney General may not designate as "programs of financial assistance," i.e., programs from which aliens legalized under this section are not barred by virtue of their adjustment of status under sections 245A or 210A of the INA.

Section 302 of the Act adds new section 210 to the INA to provide for granting lawful temporary resident status, and eventually lawful permanent resident status, to certain aliens who performed seasonal agricultural work in the United States during a specified period of time ("Special Agricultural Workers," or "SAWs"). Aliens lawfully admitted for temporary residence under this section are to be regarded as aliens lawfully admitted for permanent residence for purposes of laws other than immigration, and therefore will be eligible to participate in many Federal programs. They are, however, barred from receiving AFDC for five years from the date they are granted temporary resident status. Those barred from AFDC by this section, but who would otherwise have been eligible, will be provided access to the Medicaid program within the same limits as apply to lawful temporary residents under section 245A of the INA.

Section 303 of the Act adds new section 210A to the INA to provide for the admission as lawful temporary residents of additional aliens to the United States to meet a shortage of agricultural workers, beginning in fiscal year 1990 ("Replenishment Agricultural Workers," or "RAWs"). Aliens granted lawful temporary resident status under this section generally will be barred from participation in need-based Federal assistance programs, other than Food Stamps, for five years from the date they obtain temporary resident status, except that the bar does not apply to aliens who are aged, blind, or disabled, and the same exceptions which permit access to Medicaid under section 245A(h) of the INA are applicable to this group of aliens. Notwithstanding the aforementioned bar to program participation, aliens lawfully admitted for temporary residence under this section are to be regarded as aliens lawfully admitted for permanent residence for purposes of laws other than immigration.

The Department issued interim final regulations regarding aliens, eligibility for Aid to Families with Dependent Children and the adult assistance programs for the aged, blind and disabled in Guam, Puerto Rico, and the Virgin Islands on December 24, 1987 (52 FR 48687). The Department will issue in the near future regulations incorporating the changes made by the Act in aliens, eligibility for Medicaid.

Comment (Public Charge)

Several commenters asked for clarification of the "public charge" provision in the INA as it relates to the allowability of expenditures under SLIAG. Other commenters requested that we define or clarify what is meant by public charge.

Response

In order to adjust status, an alien must be "admissible as an immigrant" under the INA. An alien who is likely to become a "public charge" may be inadmissible as an immigrant, and therefore denied status adjustment under the Act. INS regulations at 8 CFR 245a.2(k)(4) (52 FR 16212, May 1, 1987) provide that the receipt of "public cash assistance" is a factor INS may take into account in determining, on a prospective basis, whether an individual is likely to become a "public charge." Authority to define "public charge" and to make determinations of an alien's admissibility rest, by law, with the Attorney General. Therefore, we have declined to define the term in either the proposed or final regulation for SLIAG.

Several commenters believed that the public charge provisions in the INA and IRCA bar eligible legalized aliens from State-funded assistance programs. Section 245A(h)(1) of the INA allows States to bar eligible legalized aliens from State-funded assistance programs. However, the public charge provisions in INA and IRCA are not a bar to receipt of assistance. Our regulation allows for reimbursement of allowable SLIAG-related costs. It does not override State decisions as to whether to provide assistance to eligible legalized aliens or the Attorney General's prerogative to determine whether an alien is admissible as an immigrant. If a State elects to provide assistance and an alien receives allowable benefits or services, costs associated with providing those benefits or services are allowable as SLIAG-related costs independent of INS' determination of whether receipt of that assistance renders the alien likely to become a public charge.

Program Authorized. Section 204 of the Act appropriates funds for each of fiscal years 1988 through 1991 for State Legalization Impact Assistance Grants to provide funds to State and local governments for part of the costs of programs of public assistance, programs of public health assistance, and educational services provided to "eligible legalized aliens." The term "eligible legalized alien," as defined in sections 204(j) and 303(c) of the Act, means an alien who has been granted lawful temporary resident status under section 245A, 210, or 210A of the INA, but only until the end of the five-year period beginning on the effective date of such adjustment. (See "Definitions," below.)

Federal Offset. The amount of SLIAG funds available to States in each year is, generally stated, $1 billion minus an amount termed the "offset." The offset is defined in section 204(a) of the Act as the total of estimated Federal expenditures for programs of financial assistance, for Food Stamps, and for Medicaid for which aliens legalized under new section 245A of the INA are eligible because of an exception to the general provisions at 245A(h) making them ineligible for such benefits. Federal expenditures under the SSI program and under the other programs listed at section 245A(h)(4) are not included in the offset. In addition, the Department interprets section 210A(d) of the INA to provide that Federal expenditures for programs of financial assistance and Medicaid to eligible aliens legalized under section 210A of the INA, pertaining to RAWs, are also to be included in the offset. However, expenditures for Federal programs providing assistance and services to SAWs are not included in the offset amount.

For fiscal year 1988, the amount of the offset is set at $70 million by the Act. The Act requires that Federal costs in excess of this amount for fiscal year 1988 must be recovered by adding them to the estimated offset amount applicable to fiscal year 1989. Before allotment to the States, the appropriation is further reduced by amounts reserved for the Federal costs of administering section 204. The Department currently estimates that approximately $928.5 million will be available for grants to States in FY 1988 and $643 million in FY 1989.

Comments

Several commenters requested that we include in the final rule the definitions and procedures that the Federal government will use to compute the offset and to subject those regulations to notice and comment.

Response

The Act is clear as to the costs that must be offset against the $1 billion authorized by the Act. The Act also requires that our estimates of the offset be included in the budget submitted to the Congress by the President. Thus, our offset estimates will be available for public review. We therefore believe it is unnecessary to regulate the process of deriving these estimates.

At this time, it is the Department's intention to include in the Federal offset only the program costs associated with providing assistance to eligible legalized aliens under the Medicaid and Food Stamp programs. These programs comprise the bulk of the costs associated with providing assistance to eligible legalized aliens. We have determined that, at the present time, it is not administratively feasible to develop estimates of the costs of providing services to eligible legalized aliens (principally ELAs who are aged, blind, or disabled) in the 43 programs which the Attorney General has proposed be designated as "programs of financial assistance" and thereby unavailable to aliens who legalize under section 245A or 210A of the INA.

Although Cuban/Haitian entrants who adjust status under section 245A of the INA are exempted from the general bar to the receipt of AFDC, we anticipate that few costs which may be included in the offset will be incurred with respect to this group. We expect that Cuban/Haitian entrants who adjust status will do so under section 202 of the Act, which allows for direct adjustment to permanent resident status. Costs associated with providing assistance to aliens who adjust under section 202 of the Act are not included in the offset. (Likewise, State and local costs associated with providing assistance to this category of aliens are not reimbursable under SLIAG.)

Section 402.2—Definitions

We received a number of comments concerning the definitions included in the proposed rule. In general, these comments requested that we broaden the definition of public assistance and educational services and clarify that certain specific activities meet the proposed definitions. We have adopted these suggestions whenever consistent with the Act and Departmental policy. (These changes and the comments that prompted them may be found in Subpart B, Use of Funds, of this Preamble.)

Educational Services

In addition to other changes, we have modified the definition of educational services to clarify that SLIAG funds may be used for the full range of services allowed by the Emergency Immigrant Education Act (20 U.S.C. 4101, et seq.) and to provide services to adult eligible legalized aliens that are authorized under the Adult Education Act (20 U.S.C. 1201, et seq.). (See comments under Subpart B, Use of Funds.) Because the terms "local educational agency," "state educational agency " and "public" and "non-public" schools now are used in this regulation, we have incorporated by reference the definitions of these terms as promulgated by the U.S. Department of Education in 34 CFR Part 77, or, if applicable, for the term "state educational agency," in 34 CFR Part 425.

Eligible Legalized Alien

We have not changed the definition of eligible legalized alien in the final rule. The definition closely tracks the statutory definition in section 204(j) of the Act.

Comment (Cuban/Haitian entrants and pre-'72's). One commenter asked whether SLIAG funds can be used for costs associated with Cuban/Haitian entrants or aliens who obtain legal status by virtue of the change in the registry date in section 249 of the INA (section 203 of the Act).

Response. Costs associated with providing public assistance, public health assistance, or educational services to Cuban/Haitian entrants who adjust status under section 245A or 210 of the INA are reimbursable under SLIAG. However, we anticipate that most Cuban/Haitian entrants will choose to adjust status under section 202 of the Act, which provides for direct adjustment to permanent resident status. Costs associated with aliens who adjust under section 202 are *not* reimbursable under SLIAG. Likewise, costs associated with aliens who adjust status under section 249 of the INA which changes the registry date to January 1, 1972 are *not* reimbursable under SLIAG.

In addition, the U.S.-born children of aliens who adjust status under sections 245A, 210, or 210A of the INA are U.S. citizens, *not* eligible legalized aliens. Costs associated with providing services to these citizen children are not reimbursable under SLIAG.

Public Assistance Definition. We have amended the definition of public assistance to include services for which a State or local government charges fees based upon the financial circumstances of the participant. For clarity, we have included the description of other assistance within the definition of public assistance. (See discussion of comments under Subpart B.)

Recipient Definition. After analyzing the comments, we realized that there was some misunderstanding as to the meaning of the word "recipient" as used in the regulation. The final rule clarifies that "recipient" has the same meaning as it does in 45 CFR Part 74, that is, grantees and subgrantees.

SLIAG-Related Cost Definition. In response to comments on other sections of the proposed regulation, we have made several clarifications to the definition of SLIAG-related costs. First, we have made clear that SLIAG-related costs means the expenditure of funds to provide allowable services or benefits to eligible legalized aliens under programs of public assistance, public health assistance, and educational services. Second, SLIAG-related costs for public assistance, public health assistance, educational services, and SLIAG administrative costs are limited to the actual amount expended for an allowable purpose. The final rule further clarifies that SLIAG-related costs for education are subject to limits under the Emergency Immigrant Education Act, as incorporated by the Act and specified in section 402.11 of this regulation. (These provisions specify the maximum amount of SLIAG funds that may be paid for educational services. A fuller explanation of these provisions is provided in the preamble fo Subpart B.)

This clarification ensures that SLIAG-related costs reported by States are comparable and meet the requirements of the Act for the allocation of funds. Section 204(b)(1)(C) provides for the allocation of funds based, in part, on "the amount of expenditures the State is likely to incur . . . *for which reimbursement or payment may be made* under [SLIAG]" (emphasis added). The Act does not place a dollar limit on reimbursement for public assistance and public health assistance. However, payments for educational services are limited by the Act's incorporation of the definitions and provisions of the Emergency Immigrant Education Act, as specified in section 402.11 of this regulation. If we did not include the limitation on SLIAG-related costs for educational services, States conceivably could include in their SLIAG-related cost estimates costs above the limits for which payment could allowably be made under the Act. This would result in the allocation of funds based on costs for which SLIAG funds could not be used and would be contrary to the language of the Act. (See also the preamble to Subpart D.)

Third, the final rule clarifies that SLIAG-related costs must be net of reimbursement or payment from other Federal programs and net of program income, as defined in 45 CFR 74.42, e.g., fees, tuition, or other charges paid by eligible legalized aliens receiving a service. Program income is to be treated using the deductive alternative provided for in 45 CFR 74.42.

Subpart B—Use of Funds

Allowable Use of Funds

General

The Act allows States to use SLIAG funds to reimburse the costs of providing public assistance and public health assistance and to make payments to State educational agencies for educational services provided to eligible legalized aliens, i.e., aliens who *have been granted* legal status under section 245A, 210, or 210A of the INA ("legalization program").

In addition, section 204(c) of the Act allows States to use SLIAG funds to reimburse State or local government costs of public health assistance provided to aliens who are *applying* in a timely manner for adjustment of status under section 245A of the INA. For this purpose, an alien is considered to be applying for adjustment to lawful temporary resident status if he/she has filed an application and paid the application fee at an INS facility or a qualified designated entity pursuant to 8 CFR 245a.2 (e) and (f) (FR 16211, May 1, 1987) with respect to filing and 8 CFR 245a.2(i) (FR 16212, May 1, 1987) with respect to the medical examination. The medical examination (form I–693) must be presented to INS at the time of the interview, and shall be incorporated into the applicant's record. This interpretation is in keeping with the House Energy and Commerce Committee report, which states that such reimbursement can be made for the cost of services to those who "have filed . . . bona fide applications for legalization and are awaiting a determination." (H.Rpt. 99–682)

In the proposed rule, we stated that SLIAG funds may *not* be used to reimburse the costs of public health assistance provided to those applying for adjustment under section 210 (SAWs) or 210A (RAWs).

Comment (Applicant Issue)

Many commenters suggested that we reimburse State and local costs incurred in providing public health assistance to those applying for adjustment under section 210 or 210A of the INA, as well as those applying for adjustment under section 245A. Several commenters contended that Congress did not intend to exclude costs associated with providing public health assistance to those applying for status adjustment under sections 210 and 210A of the INA. Others commented that the INA as amended by IRCA does not call for disparate treatment in other areas of public health; therefore, they conclude

that it is not intended in this case. Several commenters indicated that differentiating applicants under section 245A from applicants under other sections would be difficult.

Response

The Act specifically limits the reimbursement of public health costs associated with applicants for status adjustment to those applying for adjustment under section 245A. We have no legal basis for extending reimbursement of public health assistance costs to those applying under sections of the INA other than the one enumerated in IRCA.

In practice, there will be little difference in the treatment of public health costs for those applying for adjustment under section 210 of the INA and those applying for adjustment under section 245A. The effective date of legal status will be the date that the alien filed his or her application with INS and paid the required fee. Public health costs incurred by State and local governments would be reimbursable from such date. Only public health costs for services delivered to an individual adjusting under section 210 or 210A whose application was denied would be non-reimbursable.

We do not believe that States will have difficulty in identifying applicants under section 245A. When an alien files a nonfrivolous application with the INS, he/she is given a form I–688A (Temporary Work Authorization). This card indicates the section of the Act under which the alien is seeking to adjust status. We have clarified in the preamble to this regulation that "applying in a timely manner" means that the alien has filed an application with INS or with a qualified designated entity, provided the alien has consented to having the designated entity forward the application to INS. This was unclear in the preamble to the proposed rule.

Comment (Educational Services to Applicants)

Several commenters advocated allowing payment for educational services provided to those applying for adjustment of status because they feared that delays in access to service of up to several months while ELAs wait for applications to be approved will create administrative burdens and ultimately will mean some ELAs are not served. Two commenters raised the possibility that reimbursement could be claimed only for those applicants whose status eventually is adjusted.

Response

The Act is explicit in allowing educational services for eligible legalized aliens, who by definition are individuals who *have been granted* status adjustment. However, once status has been adjusted, the effective date for that adjustment is the date of application with INS. If a State provides educational services to applicants in anticipation of their applications being approved by INS, the costs of such services would be allowable, retroactive to the date of status adjustment, provided that the alien's application is in fact approved by INS and that the costs are consistent with the Act, this regulation, and the State's application for funds under this Part. Costs associated with individuals whose applications are disapproved by INS may *not* be paid with SLIAG funds, and only services provided after October 1, 1987 may be covered with SLIAG funds.

Comment (Outreach)

Another commenter advocated allowing SLIAG funds to be used for State outreach costs including costs incurred in consulting with INS officials, QDE representatives and community groups, and costs associated with notices and posters publicizing IRCA.

Response

Outreach costs associated with the legalization process itself cannot be considered to be allowable costs under SLIAG. (See the discussion of the first comment under "Uses of SLIAG Funds, below.) To the extent that outreach efforts are an integral and normal part of an allowable SLIAG activity, e.g., public health assistance, such costs would be allowable under SLIAG, provided that such activities otherwise meet the definitions in this part and are allocable to SLIAG.

Uses of SLIAG Funds

The Act specifies the types of assistance for which SLIAG funds may be used: Public assistance, public health assistance, and educational services. Section 402.1 of the regulation defines these uses. As noted in the preamble section covering that section, we have made several changes to the definitions.

Comments (use of SLIAG Funds for Other Purposes)

Several commenters specified other activities for which they would like use of SLIAG funds to be allowed. These included helping aliens apply for status adjustment (e.g., pay their application fees), providing assistance to entities which assist aliens in applying for status adjustment under the Act (qualified designated entities), and paying costs associated with a discrimination complaint program.

Response

We see no basis in the Act which would permit such uses. The Act restricts the use of SLIAG funds to providing public assistance, public health assistance, and educational services, as defined by the Act and this regulation, to eligible legalized aliens.

Providing "assistance" to an alien applying for status adjustment or to qualified designated entities to assist aliens in applying for status adjustment generally would not fall under any of the three permissible uses of SLIAG funds. Further, with the exception of educational services, SLIAG funds may be used only for programs or activities which are generally available to the citizens of a State. The use of funds to assist aliens applying under the Act would be inconsistent with this condition.

Additionally, with the exception of public health assistance, SLIAG funds can be used to provide reimbursement or payments for services or assistance only to aliens who *have received* adjusted status under the Act. (Reimbursement for assistance or services may be made retroactive to the date the alien was granted legal status by INS.) By definition, assistance provided to aliens applying for status adjustment (except for public health assistance) is not an allowable use of SLIAG funds. Similarly, there is no provision in the Act which allows reimbursement for costs associated with discrimination complaints.

Public Assistance

Section 204(j) of the Act provides that the term "programs of public assistance" means programs within a State which: Provide cash, medical, or other assistance (as defined by the Secretary) designed to meet the basic subsistence or health needs of individuals; are generally available to needy individuals; and receive funding from units of State or local government. In our notice of proposed rulemaking, we clarified the definition of public assistance by requiring that individuals applying for such assistance meet specified income and resource requirements to be eligible. Based on comments we received, we have modified this provision in the final rule. The definition in the final rule includes services for which a State or local government charges fees based upon the financial circumstances of the ELA receiving such services.

In determining whether expenses are allowable under SLIAG, States should review the specific program in question to determine that it meets all the requirements of the Act and this regulation, including a requirement that applicants under the program meet specified income and resource requirements, or that payment for services be based on an income or resources. Reimbursement is limited to SLIAG-related costs as defined in this regulation. Several commenters appeared to be under the impression that our regulation would affect the eligibility of eligible legalized aliens for assistance under State or local programs. This regulation does not affect eligibility. It specifies those programs for which we believe the Act provides for Federal reimbursement of costs of public assistance and public health assistance or payments for educational services. We also note that the legislative history is quite clear that Congress did not intend SLIAG to provide reimbursement for all State and local government costs.

Comment (Definition of Public Assistance)

We received several comments suggesting that the proposed definition of public assistance was too restrictive in that it required programs to have a means test, i.e., income and resource requirements, as a condition of eligibility in order for costs to be reimbursed with SLIAG funds. Arguing that the proposed definition would not allow States the leeway necessary to serve the eligible legalized alien population, most commenters recommended that the means test be dropped.

Several other commenters requested that we clarify and specify what we mean by "other assistance." Still others contended that our definition of "other assistance" was too narrow and recommended that we include employment training, housing assistance, and maternity services, as well as protective services, adoption services, foster care, and other social service activities.

Response

We believe that the scope of what is allowed under public assistance, as clarified, is consistent with the Act.

First, the legislative history closely associates programs of public assistance (section 204(j) of the Act) and the programs included in section 245A(h)(1)(A) of the INA. The programs named in section 245A(h)(1) of the INA—AFDC, Food Stamps, and Medicaid—require a means test as a condition of eligibility. The Act generally bars most eligible legalized aliens from these Federal programs. On the other hand, section 204 of the Act provides for reimbursement of State and local costs associated with providing public assistance under State and local programs to eligible legalized aliens. In fact, the Conference Report (H.Rpt. 99–1000) addresses the two provisions in the same paragraph, when it states: "The funds were authorized to be used for state programs of public assistance, programs of public health assistance, and local education agency services. All legalized aliens were disqualified for five years from all federal programs of public assistance, except for SSI and Medicaid in certain circumstances." (See also H.Rpt. 99–682, p. 77.)

We note that Congress is well acquainted with the term "social services." For example, under the Refugee Act of 1980, 8 U.S.C. 1522 (Pub. L. 96–212), cash and medical assistance is distinct from social services. Similarly, if Congress had intended that SLIAG funds be used for social services, it clearly knew how to make its intent known. We see no indication in the legislative history that Congress intended SLIAG funds to be used to reimburse the costs of social services. We note that eligible legalized aliens are not barred from most Federal social service programs, e.g., those listed in section 245A(h)(4) of the INA.

Second, the definition is consistent with the definitions of public assistance found in social science literature. The *Encyclopedia of Social Work* (under the section on public assistance and supplemental security income) defines public assistance as "those income maintenance programs administered by welfare departments, based on need and the imposition of a means test rather than on right" (National Association of Social Workers (NASW), 1976). The *Dictionary of Social Work*, (NASW, 1987), defines public assistance as "a government's provision of minimum financial aid to persons who have no other means of supporting themselves."

Third, the definition provides leeway to States by encompassing types of public assistance other than cash or medical assistance. "Other assistance" is not a fourth category of allowable costs; rather, it is a subset of public assistance. It includes (1) assistance, other than cash or medical, which meets the definition of "public assistance" and provides for the basic subsistence needs (e.g., food, clothing, or shelter) of needy individuals; or (2) activities which are required as a condition of participation in a cash or medical assistance program, such as employment services or job training. Generally, we believe that State and local costs incurred under programs providing housing assistance directly to eligible legalized aliens are allowable under the definition of public assistance. However, programs providing assistance or subsidies to landlords or other providers of housing would generally not be considered public assistance unless (1) the benefits of the assistance/subsidy were directly traced to an eligible legalized alien, and (2) the benefits were provided under a program which otherwise met the criteria for a program of public assistance.

We have included in the definition of public assistance those employment services that are required as a condition of participation in a public assistance program. We believe this is appropriate because such services are an inextricable cost of the public assistance program. It is on this basis that we concluded that they should be allowed under the category of public assistance. On the other hand, employment services that are not required as a condition of participation in a public assistance program do not provide for subsistence needs and therefore cannot be considered to be public assistance. Consequently, we are unable to find any statutory basis on which to allow reimbursement for employment services per se.

State and local costs incurred in providing maternity care to eligible legalized aliens would be allowable as long as the program meets the requirements listed in the Act and this regulation for a program of public assistance or public health assistance.

Comment (Fee for Service)

A number of commenters asked that county or state run hospitals and clinics which utilize sliding scale payment programs be eligible to receive reimbursement under the provisions of SLIAG.

Response

As long as such programs or services meet either the definition of public health assistance or public assistance, expenditures by State or local governments would be reimbursable. We have modified the definition of public assistance to include programs which use a sliding scale payment based on income and otherwise meet the criteria for public assistance. We believe that receipt of services at reduced fees determined on an individual basis for each eligible legalized alien based on his/her income and resources is sufficient indication

that the service is provided to "needy individuals," as specified in the Act.

Public Health Assistance

Section 204(j) of the Act provides that the term "programs of public health assistance" means programs which receive funding from units of State or local government, are generally available to needy individuals residing within the State, and provide public health services. An illustrative list of public health services is provided in section 204(j)(3) of the Act—immunizations, testing and treatment for tuberculosis and sexually transmitted diseases, and family planning services. This list is incorporated in the definition of public health assistance in § 402.2.

Given the specificity in the Act, we do not believe further regulatory clarification is necessary. Consequently, we have not changed the portion of the regulation governing public health assistance, which closely parallels the Act.

Comment (Define Scope of Public Health Services)

Several commenters requested that we define the scope of services that are allowable under the public health assistance category. Comments included questions about supportive services such as social services, translation services, transportation, health monitoring, etc. Some commenters requested that a specific list of allowable services be provided. Others wanted to assure that drug and alcohol programs and mental health programs are included.

Response

We have chosen not to be specific in naming programs that are allowable under the public health provisions of the Act. Those programs which meet the definition of public health assistance in section 204(j)(3) of the Act and Subpart A of the regulation are allowable. To the extent that mental health and drug and alcohol programs are part of the State's public health program, we believe that they would be allowable. However, public health services provided solely to eligible legalized aliens, i.e., services that are not generally available, would not be allowable.

Comment (AIDS Confidentiality)

We received several comments concerning the issue of confidentiality in the testing for AIDS. Many indicated that local programs do not currently request name identification in testing the general population. Some commenters expressed concern that mandatory testing requirements would conflict with state regulations requiring strict handling and disclosure of positive test results.

We also received comments which expressed concern that State systems would incur substantial costs which would not be reimbursable under SLIAG. Believing that many aliens would go to testing sites prior to application for status adjustment to assure that they are not HIV-positive, several commenters noted that this would increase demand on these public clinics and requested that funds be made available for increasing the capacity of these clinics. Noting the possibly devastating consequences of a positive test and highly developed State systems for dealing with HIV-positive clients, many commenters feared that the influx of aliens being tested would tax these systems and deteriorate the quality of services being provided, absent additional funding.

Response

Beginning December 1, 1987, screening for AIDS antibodies is a mandatory part of the medical examination required by INS for legalization. The imposition of this requirement is outside the scope of this regulation. (See amended requirements for the medical examination of aliens, 52 FR 32540, August 28, 1987.)

While we are sympathetic to the concern expressed by commenters, the Act, as noted above, specifies the categories of activities and services for which SLIAG funds can be used. We note that the Federal (non-SLIAG) funds available for screening and counseling will more than double this year relative to last year.

The Act provides that the medical examination required of aliens seeking to adjust status under the legalization program will be at the alien's expense, which INS and the Department have interpreted by regulation to mean at no cost to the Federal government. Therefore, this regulation provides that any State or local costs associated with the medical examination required for legalization are not reimbursable under SLIAG. Because States will not be claiming costs incurred as part of the medical examination, there is no requirement under the Act or this regulation to identify ELA status. We therefore conclude that there is no confidentiality problem associated with the mandatory screening of legalization applicants that need be addressed by this regulation. The regulation provides States with flexibility in establishing SLIAG-related costs associated with follow-up and treatment associated with AIDS provided to eligible legalized aliens.

The cost of AIDS testing for eligible legalized aliens (or aliens applying for adjustment of status under section 245A of the INA) outside the context of the medical examination is reimbursable provided that the program under which testing is conducted meets the definition of public assistance or public health assistance.

Comment (Medical Examination Providers)

A number of comments suggested that we name community and migrant health centers and county and public hospitals as certified providers of the INS-required medical examination. Other comments suggested that these same centers be allowed to receive cost reimbursement from SLIAG.

Response

It is not within our jurisdiction or authority to designate civil surgeons or to certify health care facilities for the purpose of the INS examination. This authority rests with the INS.

To the extent that services provided by these centers fall within the scope of public assistance or public health assistance, as defined in the Act and this regulation, reimbursement of State and local government expenditures is allowed for costs associated with providing such assistance to eligible legalized aliens.

Comment (Limitation on Funds Used for Abortion)

We received some comments concerning the exclusion of reimbursement for abortion. Some commenters requested our basis of authority for imposition of such a restriction. Others stated that they found no basis for the exclusion in the Act.

Response

We have retained this restriction in the regulation. Evidencing its intent to limit Federal funding of abortions, Congress imposed this restriction on overall HHS appropriations, including the funding bill for FY 1988 (section 1(h) of Public Law 100–202).

Although the Hyde Amendment is not applicable by its terms to SLIAG funds, this rule conforms to rules governing other programs administered by HHS and carries out Congress' intent to limit Federal funding of abortions.

Educational Services. Section 204(c) of the Act provides that States may use SLIAG funds to make payments to State educational agencies for the purpose of assisting local educational agencies in

BEST COPY AVAILABLE

providing educational services for eligible legalized aliens. The Act provides that the definitions and provisions of the Emergency Immigrant Education Act of 1984 (EIEA) (20 U.S.C. 4101), with several modifications to encompass assistance to adults, apply to States' use of SLIAG funds for educational services.

In response to the many comments received concerning the provision of educational services to eligible legalized aliens with SLIAG funds, we have made a number of changes and clarifications to the proposed rule. We believe that these changes better implement Congressional intent to use existing administrative mechanisms and to establish a limit on the amount of SLIAG funds that may be paid for educational services.

The final rule clarifies that the EIEA applies to the provision of all educational services receiving SLIAG funds, including services to adults.

Our regulation allows SLIAG funds to be used for the following activities with respect to students enrolled in elementary or secondary school:

—supplementary educational services, including: English language instruction, bilingual services, and special materials and supplies necessary to enable eligible legalized aliens to achieve a satisfactory level of performance in school;
—additional basic instructional services and attendant costs directly attributable to the presence of eligible legalized aliens in the school district, including classroom supplies, overhead costs, costs of construction, acquisition or rental of space, and transportation costs.
—essential in-service training for personnel who will be providing supplementary educational services or additional basic instructional services.

(This list of activities is taken directly from section 607 of the EIEA (20 U.S.C. 4101 et seq.) and U.S. Department of Education regulations implementing the EIEA (34 CFR 581.50).)

After review of the comments received in response to the proposed rule, we concluded that the intent of the incorporation of EIEA into SLIAG was, among other things, to provide funds to offset part of the costs of providing to adults the same types of services available to children under EIEA. It was also clearly the intent of Congress to avoid establishing new administrative mechanisms under SLIAG. The Adult Education Act, as amended in 1984 (20 U.S.C. 1201 et seq.), provides for educational services for adults comparable to those provided for children under EIEA.

Accordingly, for adults not enrolled in elementary or secondary school, the regulation permits the use of SLIAG funds for activities authorized under the Adult Education Act (20 U.S.C. 1201 et seq.) as in effect on November 6, 1986. These activities include the following:

—instruction in basic skills to enable adults to function effectively in society (including the ability to speak, read and write the English language);
—instruction leading to the equivalent of a certificate of graduation from a school providing secondary education;
—instruction for adults with limited English proficiency;
—instruction in citizenship skills; and
—ancillary services.

Vocational education services are not authorized under the Adult Education Act and may not be paid for with SLIAG funds.

The regulation also incorporates the provision of the Act that allows SLIAG funds to be used to provide the English language and citizenship skills instruction necessary for an ELA who is required to meet the conditions imposed by section 245A(b)(1)(D)(i) of the INA for adjustment to permanent resident status.

Section 204(c)(1)(C) of the Act specifies that payments for educational services are to be made "to State educational agencies for the purpose of assisting local educational agencies . . . in providing educational services for eligible legalized aliens." Further, EIEA provides for the allocation of funds from the State educational agency (SEA) to local education agencies (LEAs). We believe that Congress clearly intended to apply this administrative mechanism to State and local governments' use of SLIAG funds for educational purposes. The report on the bill by the House Education and Labor Committee cites Congressional intent to use EIEA to provide "an already existing administrative structure for the provision of this assistance" (H.Rpt. 99–682, p. 17).

Additionally, section 204(c)(3)(C) permits State educational agencies to provide educational services for adults, as defined in this regulation, through local educational agencies and public and private non-profit organizations, including community-based organizations of demonstrated effectiveness. We have adopted the same administrative mechanism for payments to provide educational services to adults as is used in the EIEA to provide for payments for educational services for students enrolled in elementary and secondary school.

The following is a summary of major comments and our responses to them:

Comment (Applicability of EIEA Provisions)

One commenter contended that the provisions of EIEA should apply only to educational services delivered within the elementary and secondary school system; these provisions, including the $500-per-person cap limit (see § 402.11), should not apply to educational services delivered outside that system. Another commenter requested that the Department study the definitions and provisions of EIEA to determine their adequacy for SLIAG.

Response

Based on the specific nature of the exceptions made to EIEA by the Act, the Department concludes that it is appropriate and consistent with the intent of Congress to apply all definitions and provisions of the EIEA pertaining to States' use of funds for educational services to other expenditures for educational services which the State claims as SLIAG-related costs, including services provided for adults. The Act replaces the phrase "immigrant children" in the EIEA with " 'eligible legalized aliens' (including such aliens who are over 16 years of age). . .," thereby encompassing adults. Also, section 204(c)(3)(B) of the Act makes a specific exception for adults in applying the threshold for payment under section 606(b) of the EIEA. The Act requires the application of the EIEA provisions when the State uses SLIAG funds "for the purpose described in paragraph (1)(C). . . ." This paragraph provides for the provision of educational services to eligible legalized aliens generally, not just to eligible legalized aliens enrolled in elementary or secondary school.

We therefore concluded that the clear intent of the Act is to apply to adults as well as children the provisions and definitions of the EIEA.

Comment (Need for Language Instruction)

Several commenters objected to the assertion in the proposed rule that, "Many aliens will speak English when they enter the country or will have acquired English when they enter the country or will have acquired English language skills during the time they were here." The commenters generally expressed concern that the Department is overestimating the level of English language ability among ELAs and underestimating the need for English language training. One commenter also said that even those ELAs who know English are likely to need history and government classes in order to qualify for permanent residency.

Response

The statement in question appears in the preamble in a general discussion of factors which may affect the need for SLIAG funding for educational services. The limitations the rule places on use of SLIAG funding for this purpose are based entirely on the Act, not on any projections of need made by the Department.

Comment (SAWs)

A number of commenters expressed concern over preamble language that indicated special agricultural workers (SAWs) would have less need for English language instruction, since they do not have to meet English proficiency requirements to qualify for permanent resident status. (Those granted status adjustment under section 245A and 210A do have to meet these requirements.) All of the commenters who addressed this section of the proposed rule advocated giving SAWs equal access to English language training. Some also mentioned specifically history and government instruction designed to help ELAs meet the citizenship skills requirement. Most of the comments focused on the need for English language training to obtain better employment and assure self-sufficiency. Some commenters contended that the need for English language instruction actually is greater for SAWs than for those granted adjustment of status under section 245A. Other commenters pointed out that SAWs will have to meet English language proficiency and citizenship skill requirements to obtain citizenship and, therefore, should be allowed access to that training now. One contended that all ELAs must be afforded access to educational services needed to meet the requirements of permanent resident status and naturalization and that these services must be sufficient to enable them to progress toward citizenship.

Response

The fact that SAWs are not required to meet the conditions in section 245A(b)(1)(B)(i) of the INA does not mean that they are ineligible for English language training or citizenship skills training paid for with SLIAG funds. The final regulation allows States to use SLIAG funds for any services authorized under the Adult Education Act, which includes English language instruction and citizenship skills training to all ELAs not enrolled in elementary or secondary school.

Comment (Providers of Educational Services)

Several commenters sought more specificity concerning acceptable providers of educational services or to assure the involvement of specific groups in the planning process. One commenter requested that the Department specify public libraries and academic institutions as allowed providers for educational services. Two commenters asked that qualified designated entities (QDEs) be specified as allowed service providers. One commenter requested that on-site, work-related English-as-a-second-language classes provided by agricultural organizations be allowed. Still another advocated limiting funds for educational services to "recognized courses of study" and requiring involvement of professional language instructors in developing curricula and providing English language instruction.

Response

By incorporating the provisions of the EIEA, the Act allows local educational agencies to receive payment for services provided to ELAs enrolled in both public and non-public schools, subject to the same limitations included in the EIEA. Additionally, the Act allows State educational agencies to provide educational services for adults through "local education agencies and other public and private non-profit organizations, including community-based organizations of demonstrated effectiveness." The Act also specifies categories of educational services for which payment can be made under SLIAG, and the final rule provides further definition of those services. Within these parameters, the Department believes that it is appropriate for States to decide which educational services should be provided and which agencies or organizations should be utilized in providing them. Further, it seems clear that by specifying a broad range of allowed service providers Congress intended to allow States a considerable amount of leeway in making determinations about appropriate service providers. We do not believe it is appropriate to specify other criteria in regulation.

Comment (Educational Materials)

One commenter asked that educational materials be specified as allowable educational services expenses under SLIAG.

Response

The cost of educational materials may be allowable to the extent that they are necessary to provide educational services to eligible legalized aliens. The EIEA, which is incorporated into SLIAG, authorizes "special materials and supplies" for supplementary education services. Further, EIEA regulations specify "classroom supplies" as an allowable item under the cost of "basic instruction." Under the Adult Education Act, States may provide instructional materials.

Comment (Literacy Training)

Another commenter sought to include literacy as well as spoken English as an English language skill allowable under SLIAG as an educational service. The commenter contended that being able to read and write basic English is essential to fulfill basic citizenship responsibilities.

Response

We agree that English language skills include literacy. This interpretation is supported by the legislative history. The House Education and Labor Committee Report (H.Rpt. 99–682) refers to "English language instruction and other literacy programs." Literacy training is authorized under the Adult Education Act and is therefore an activity for which payment may be made with SLIAG funds, subject to the restrictions noted in § 402.11 of this regulation.

Comment (Level of Language Proficiency)

A number of commenters asked the Department to establish or clarify the level of English language ability required for ELAs granted status adjustment under section 245A to attain permanent resident status. One commenter suggested that the required level of proficiency should be set at a relatively low level, with funding to be available for more extensive training. Some commenters also asked about standards for knowledge of history and government to meet the citizenship skills requirement. Three advocated that States be allowed to approve courses through which an ELA "satisfactorily pursuing a course of study" could meet the language and citizenship skills requirements, and one asked why approval by the Attorney General is required for courses of study.

Response

The English language and citizenship skills requirements for permanent resident status under section 245A are entirely within the purview of the

Immigration and Naturalization Service. The Department has no authority to set standards or approve service providers. We have, however, forwarded comments relevant to these issues to the INS for its consideration.

Additionally, we note that INS regulations at 8 CFR 245a.3(b)(5) do specify that a course of study satisfies the requirement "if (i) it is sponsored or conducted by an established public or private institution of learning recognized as such by a qualified State certifying agency or by an institution of learning approved to issue Forms I–20 . . . or by a qualified designated entity within the meaning of section 245A(c)(2) of the Act, and (ii) the course materials for such instructions include textbooks published under the authority of section 346 of the Act."

SLIAG funding is not limited to courses approved by the Attorney General, and such approval does not affect chances for permanent residency *if* the individual ELA meets the INS standard for English language proficiency and citizenship skills. However, for individuals who plan to meet these requirements by being enrolled, and making satisfactory progress, in a course, States should be aware that only enrollment in a course approved by the Attorney General will suffice. For further information, States are encouraged to contact their local INS office.

We do not believe that it is necessary for us to set further standards for English proficiency for defining the allowable use of SLIAG funds. The provisions of the Act (including incorporation of the EIEA) sufficiently define Congressional intent in this area. As noted in the section of this preamble relating to § 402.11, "Limitations on Use of SLIAG Funds," the Act already imposes practical limits on the provision of educational services to eligible legalized aliens.

Comment (Basic Instruction)

Several commenters objected to the statement, included in the preamble of the proposed rule, that SLIAG funds are not available for the costs of basic instruction other than the costs of teaching the English-language and citizenship skills required for adjustment to permanent resident status. The commenters refer to another statement in the preamble that lists "additional basic instructional services and attendant costs . . ." as an allowable expense. A related comment asks that the scope of allowable costs be expanded to allow training for a more-than-minimal level of English proficiency and adequate literacy skills. Additionally, many of the comments concerning the adequacy of the $500 limit refer to levels of English proficiency needed for employment. (See discussion of $500 limit under "Limitations on Use of SLIAG Funds," below.) One commenter specifically asked that employment training be allowed as an educational expense.

Response

The scope of services for which SLIAG funds may be paid is limited to those provided for in the Act and this Part. However, in response to the comments, we have clarified that services to eligible legalized aliens enrolled in elementary and secondary school include basic instructional services. This is specifically provided for in the EIEA. We have also included in the definition of educational services for adults those activities authorized under the Adult Education Act, including basic instructional services.

The Adult Education Act does not cover employment training, nor does the final rule allow such activities to be funded under SLIAG as an educational service. We believe employment training falls outside the scope of activities that can be inferred from EIEA or from the exceptions to the provisions of EIEA that are included in the Act. We found no evidence in the legislative history of the Act evidencing any intent on the part of Congress to allow SLIAG funds to be used for employment or vocational training.

Comment (Recipient of Funds)

One commenter asked that no State or Federal public school agency or agencies be given the responsibility for overseeing or receiving funds for educational services. Another commenter asked whether it was possible to circumvent the State's department of education and give educational service funds to other groups.

Response

Section 204(c)(1)(C) of the Act authorizes the State "to make payments to State educational agencies for the purpose of assisting local educational agencies . . . in providing educational services to eligible legalized aliens." The Act further provides that "the State educational agency may provide such services through local educational agencies and other public and private non-profit organizations. . . ." We interpret this to mean that all payments for educational services must go through the State educational agency. However, we have defined "State educational agency" to include, when applicable, the State agency responsible for administering adult education programs under the Adult Education Act. State law and budget procedures would determine who has decision-making power over the use of such funds.

Comment (Application Explanation of Education Allocation)

One commenter sought to have the Department specify English language and citizenship skills training as "an additional State cost resulting from the passage of the Act" and require States to explain in their applications how their proposed use of SLIAG funds shows cognizance of this need. Another commenter asked that States be required to consult with non-profit agencies already providing ESL and citizenship courses.

Response

We do not agree that the cost of providing English language and citizenship skills training is necessarily a cost resulting from the passage of IRCA. We understand from our consultation with State and local education officials that, in many States, English language and basic education services historically have been provided to undocumented aliens. Thus, these costs in all likelihood will be at least in part on-going costs. This regulation does not require a State to report in its application how it plans to spend SLIAG funds. (The estimates to be provided in the application are SLIAG-related costs, not the anticipated level of SLIAG reimbursement or payment.) However, the Act does establish minimum funding for education through the requirement that at least 10 percent of SLIAG funds be spent on each of the three program categories—public assistance, public health assistance, and educational services—if sufficient need exists in these areas. Beyond this requirement, States have discretion as to how funds are allotted among the three categories of allowable uses. We believe it is inappropriate to add further procedural requirements.

Comment (Curriculum Development)

One commenter asked that curriculum development be added to the regulation as a reimbursable educational service.

Response

The EIEA, which is incorporated into SLIAG, allows expenditure for "basic instructional costs" attributable to the student's presence in the area of jurisdiction of the local educational agency. The Adult Education Act permits funding for curriculum

development. Therefore, we agree with the commenter that curriculum development allocable to eligible legalized aliens receiving educational services under SLIAG may be an allowable cost. However, the cost of curriculum development must be apportioned to ELA and non-ELA students and is subject to the requirements in § 402.12.

Comment (Tutoring and Independent Study)

One commenter advocated allowing payment for tutorial educational programs or independent study in addition to formal courses of instruction.

Response

The EIEA, as incorporated into SLIAG, allows expenditures for supplementary services and basic instruction attributable to the student's presence in the school district. These activities could include tutorial or independent study courses offered by the LEA. Additionally, the final rule establishes as allowable educational activities for adults all activities and courses allowed under the Adult Education Act. Therefore, to the extent that tutorial and independent study courses for adults are allowed under that authority, payment for those services could be made under SLIAG.

State Matching Funds

The regulation provides that States may use SLIAG funds for the non-Federal share of Federal matching programs requiring a State and/or local match. We received no comments on this provision.

Limitations on Use of SLIAG Funds

Section 204(f) of the Act provides that payment under SLIAG shall not be made for costs to the extent those costs are otherwise reimbursed or paid for under other Federal programs. We have incorporated that provision in § 402.11 of this regulation as well as in the definition of SLIAG-related costs in § 402.2. We believe that the intent of this provision is to prohibit States from using SLIAG funds for costs associated with public assistance, public health assistance, or educational services to the extent such costs are already being reimbursed or paid with Federal funds.

Implementing section 204(c)(2)(C) of the Act, we have included a prohibition on reimbursement of more than 100 percent of SLIAG-related costs for public assistance, public health assistance, and educational services. The statute does not specify this prohibition for educational services, but we believe that the Department's rules on administration of grants at 45 CFR Part 74 would not permit reimbursement of more than 100 percent of allowable costs of any type. Further, we believe that the legislative history makes clear that Congress did not intend to set up an entitlement of $500 for each ELA, but rather intended to provide for actual costs up to the $500 limit.

We also have prohibited the use of SLIAG funds for reimbursing costs associated with the medical examinations required of aliens who apply for adjustment to lawful temporary resident status. Section 245(d)(2)(C) of the INA states that an applicant must undergo a medical examination ". . . at the alien's expense." Legislative history indicates clear Congressional intent that the fee for the medical examination be paid by the applicant: "This medical exam offers an ideal opportunity, at no cost to the Federal government, to achieve some basic health objectives" (H.Rpt. 99–682). In this regard, we are interpreting this provision consistent with INS regulations published at 8 CFR 245a.2(i) (52 FR 16212, May 1, 1987), which state that the medical exam must be ". . . at no expense to the government."

Comment (Testing vs. Treatment)

We received a number of comments requesting clarification on the line of demarcation between testing as part of the examination required for status adjustment (which is not allowable) and follow-up treatment (which is allowable).

Commenters suggested that the skin test in TB screening is part of testing, but the X-ray required subsequent to a positive skin test should be considered part of treatment. Other commenters questioned whether the cost of laboratory work required after blood or body fluids are drawn during the examination could be considered allowable under SLIAG. With regard to AIDS screening, several commenters asked us to clarify the terms testing, treatment, and follow-up. Commenters requested clarification as to when testing stops and follow-up begins in the monitoring and treatment of sexually transmitted diseases.

Response

The Centers for Disease Control (CDC) has determined that an X-ray following a positive skin test is diagnostic and is considered part of the examination, rather than treatment. In its *Guidelines for Medical Examinations of Aliens in the U.S.*—June 1985 (Feb. 1987), guidelines are provided for the physical examination for aliens seeking legalization. The option is provided for diagnostic testing for tuberculosis utilizing either radiograph (X-ray) or skin test. When *any* reaction to the skin test is noted, the individual must receive an X-ray. Only individuals with "no reaction to the tuberculin skin test can be cleared without a chest X-ray examination."

Likewise, laboratory expenses incurred in running tests required to determine the presence or absence of a disease or condition are part of the cost of the examination. If the examination is being undergone for purposes of adjustment of status under the Act, the costs of that examination are not allowable under SLIAG.

In general, the line between testing for the presence of a disease or condition stops when the disease or condition is confirmed or ruled out. Steps taken to ameliorate or eliminate the disease or condition are considered treatment.

Educational Services

The Act, particularly as it incorporates the provisions of EIEA, establishes a number of limitations on spending for educational services. The procedures and structure adopted for State administration of education funds by incorporating the EIEA into the Act serves both to allocate SLIAG funds among LEAs and other providers of educational services to adults and to limit the amount of SLIAG funds that may be used for educational services. Under SLIAG, SEAs may allocate to LEAs and other providers of educational services in any fiscal year an amount not to exceed $500 multiplied by the number of ELAs meeting the conditions noted below. (For LEAs which receive funding under EIEA, the amount that may be paid is subject to further restrictions, as noted below.)

The EIEA provides payment on behalf of "immigrant children" born outside the United States who have been enrolled in school for less than three full academic years. The Act instructs us that any reference to the term "immigrant children" shall be deemed a reference to "eligible legalized alien." Therefore, the rule provides that, in calculating the amount that may be provided to LEAs, States may count only ELAs who have been enrolled in elementary and secondary school or other educational services, as defined in this regulation, in the United States for less than three complete academic years.

Furthermore, an LEA may receive SLIAG funds in a fiscal year for costs associated with ELAs enrolled in elementary or secondary school only if at least 500 such eligible legalized aliens are enrolled in the school district or if such ELAs represent at least 3 percent of enrollment for that fiscal year. This provision derives directly from section 606(b)(2) of the EIEA. The Act specifically provides that this threshold does not apply to adults. Therefore, the regulation provides that all ELAs over the age of 16 not enrolled in elementary or secondary school in that school district but who are receiving educational services may be counted in determining the amount of SLIAG funds that may be paid to a local educational agency or other provider of educational services for adults, as described in section 204(c)(3)(C) of the Act, i.e., public or private non-profit organizations, including community-based organizations of demonstrated effectiveness.

SEAs may distribute money to LEAs or directly to public or private non-profit agencies, including community-based organizations of demonstrated effectiveness, for the purpose of providing educational services to adults. (LEAs also may provide services through such groups.) The SEA may allocate annually to each LEA or other organization providing educational services to adult eligible legalized aliens an amount of SLIAG funds not to exceed $500 multiplied by the number of ELAs being served by that LEA or other organization, or the actual unreimbursed non-Federal cost of providing the educational services to ELAs, whichever is less. LEAs or other organizations may count only those ELAs to whom they provide services.

In counting the number of ELA children and adults, States and LEAs should remember that only individuals whose immigration status has been adjusted under sections 245A, 210 or 210A of the INA are countable. In particular, U.S.-born children of ELAs are citizens, not ELAs, and may not be counted for purposes of computing SLIAG allocations to LEAs.

Section 606(b)(3) of EIEA requires the Department of Education to reduce the amount of a State's EIEA grant for a fiscal year by amounts made available under other Federal programs for the same fiscal year for the same purpose. However, EIEA provides one exception to this general rule. If "the amount available for expenditure" in a State's grant under another Federal grant program, e.g., SLIAG, takes into account the amount of a State's EIEA grant, no reduction will be made by the Department of Education in the EIEA grant.

Because States, rather than the Federal government, control the timing of payments for educational services under SLIAG, we concluded that it would be unduly burdensome for States to have their EIEA grants reduced based on their payment of SLIAG funds to local educational agencies. Further, the reduction in EIEA funding would have made State and local planning difficult. Consequently, in considering the amount of SLIAG funds that may be paid to a local educational agency on behalf of eligible legalized aliens enrolled in elementary and secondary school, the State must consider the amount of the EIEA grant to such agency that is attributable to eligible legalized aliens in the school district.

Comment ($500 Cap)

A number of commenters expressed concern that the $500 per ELA limit on the payment of SLIAG funds for educational services was too low. Several commenters provided calculations to demonstrate that the cost of providing English language instruction will be considerably higher than the $500 maximum. Many of these comments included the recommendation that the $500 cap not be applied. One commenter recommended that the $500 cap be applied only to services provided within the elementary and secondary school system, not to those provided to adults. Still another simply stated that more funding is needed for education.

However, one commenter stated that the $500 cap probably would suffice.

Response

Section 204(c)(3) of the Act incorporates "the definitions and provisions" of EIEA. The legislative history clearly indicates that Congress specifically intended the $500-per-person allocation amount in EIEA to apply as a cap on the use of SLIAG funds for educational services for both children and adults. The House Education and Labor Committee Report states, "The effect of this provision [incorporating EIEA into SLIAG] is to place a $500 cap on the Federal contribution for each eligible child or adult" (House Report 99–682). Concluding that the $500 limit was clearly the intent of Congress, we have included that limit in the final regulation.

Comment (Application of $500 Cap)

Several commenters recommended applying the $500-per-person limit on expenditures for education services as an aggregate figure for all persons receiving these services, rather than as a limit for each individual's services. This would allow States the flexibility to use SLIAG funds to meet different levels of need. Other commenters suggested that the limit on educational expenses be determined by multiplying the $500-per-person limit by the total number of ELAs, whether or not they receive services. Another commenter recommended applying the $500 cap on an individual basis, but separately for each kind of service, e.g., $500 for English language instruction, $500 for history and government instruction, etc. Still another commenter recommended a spending limit for educational services based on a cumulative aggregate enrollment multiplied by $500 so that "unused" allowable funds could be carried over to the next year. Finally, two commenters sought clarification on whether the $500 limit is annual, and one asked how a year will be defined for purposes of applying the cap.

Response

After examining the comments and the provisions of the EIEA that are incorporated into SLIAG, we have concluded that the $500 amount serves both as an allocation-mechanism and a limitation on Federal expenditures. The State educational agency may, generally speaking, allocate to an LEA or other organization providing services an amount up to $500 multiplied by the number of countable ELAs enrolled in allowable educational services or the actual, unreimbursed non-Federal cost of providing such services, whichever is less. Within this allocation, LEA's or other providers of educational services may vary the amount of SLIAG funds applied to individual eligible legalized aliens, provided that the aggregate payment to that LEA or other provider does not exceed the amount described in the regulation.

The Department agrees that the $500 limit is an annual one. However, as noted in response to other comments, SLIAG payments must be associated with those ELAs, both children and adults, who have attended U.S. schools for less than three full academic years.

We have not adopted the suggestion that States be allowed to determine the amount of SLIAG funds that may be paid for educational services by multiplying $500 by the total number of eligible legalized aliens residing in the State, regardless of whether those aliens were receiving educational services. The EIEA provides funds on behalf of "immigrant children" *enrolled* in school. We believe that the same provision would apply to adults.

We have not adopted the recommendation that we allow a separate ceiling for various types of educational services. To do so would defeat the clear intent of Congress to impose a ceiling of $500 on SLIAG payments for each eligible legalized alien receiving services.

Comment (Subtracting Other Federal Funds Under EIEA)

Several comments related to the provision in section 606(b)(3) of the EIEA, incorporated into the Act, that requires funds from other Federal programs for the same purpose and relating to immigration status to be deducted from the $500-per-person spending ceiling. One commenter advocated not counting Adult Education Act funding in the calculation of maximum SLIAG funding amounts for educational services, if a State already is spending all of its Adult Education Act funds on individuals who are not ELAs. Another commenter simply advocated not reducing the level of available funding through such an offset. Still another objected to offsetting any expenditures from other programs because no other program is "for the same purpose" as SLIAG, but requested that any programs that are to be offset be published in the **Federal Register** for comment before the list becomes final. Finally, one commenter contended that Congress intended to offset only assistance provided because of immigration status.

Response

As noted above, irrespective of whether the offset provision of EIEA is incorporated into SLIAG, funds from SLIAG and EIEA must "offset" each other by virtue of the EIEA provisions regarding EIEA funds. If States were not required to consider EIEA funds in determining their SLIAG allocations for educational services, the Department of Education would have to reduce their EIEA allocations to compensate for SLIAG payments. As discussed above, we believe that requiring States to consider EIEA payments in determining SLIAG allocations is administratively the simplest approach to carrying out the "offset" requirement of the EIEA.

For example, had we not required that the EIEA grant be taken into account, a State that provided $500 per eligible legalized alien in SLIAG funds to a local educational agency would have lost that portion of its EIEA grant that was based on the enrollment of ELA children for whom SLIAG payments were made (about $75 per child). Under this regulation, the maximum SLIAG payment to the local educational agency for an ELA enrolled in elementary or secondary school would be roughly $425 (the $500 statutory maximum minus the amount of EIEA funds the LEA receives because of the enrollment of an ELA child who also is counted as an "immigrant child" in the EIEA program). In either case, the amount of Federal funds available to the local educational agency for the purposes of EIEA is the same—$500.

The amount of EIEA funds to be subtracted from an LEA's allocation of SLIAG funds to determine the maximum SLIAG payment would be determined by multiplying the number of ELAs enrolled in elementary and secondary school who also are covered under EIEA by the EIEA allocation for non-refugee children. We will supply the EIEA allocations per non-refugee child to States based on information supplied by the U.S. Department of Education.

Because Department of Education funds under EIEA are distributed based only on students in elementary and secondary school, no offset would be required against spending for adult educational services. However, the SLIAG prohibition against claiming reimbursement for costs already reimbursed under another Federal program does apply.

Comment (3 Year Limitation)

A number of commenters recommended that the provision of the EIEA that limits assistance to those children who have attended school for less than three full academic years not apply to SLIAG. Several commenters maintained that this restriction, in effect, will prohibit assistance to almost all children above the second or third grade because they will have been in this country for more than three years. Several commenters contended that Congress intended for all ELA children to be eligible for assistance. One commenter maintained that Congress did not intend for the three-year limit to apply to SLIAG. However, another commenter pointed out that we were being inconsistent in applying the three-year limitation to children and not to adults, and advocated that we establish a consistent standard. Some commenters contend that the provision establishes onerous reporting and tracking requirements. On the other hand, one commenter advocated specifying in the regulation that the three-year limit on school attendance does apply to ELAs receiving educational services.

Response

Section 204(c)(3) of the INA applies the *definitions* and provisions of the EIEA to payments made for educational services. The Act instructs us to substitute the term " 'eligible legalized aliens' (including such aliens who are over 16 years of age)" for the term "immigrant children." We concluded that the most appropriate reading of this provision is to retain the applicability of the remainder of the definition of the term "immigrant children," viz., that they be born outside the United States and have been enrolled in school in the U.S. for less than three full academic years. This reading is consistent with the Act's reference to the "definitions" of the EIEA. This reading also provides consistent treatment in the provision of Federal funds to State educational agencies with respect to aliens. Finally, this reading facilitates the clear Congressional intent that the administrative mechanism of the EIEA be used for SLIAG funds used for educational services. If we were to adopt a different time period for the counting of eligible legalized aliens, it would be more difficult for States to use the EIEA mechanism, which is geared to immigrant children's first three years in school.

It is important to alleviate the apparent confusion on the part of some commenters between the questions of whether an ELA is eligible for services and whether those services can be funded through SLIAG. Nothing in the Act or this regulation restricts access by ELAs to any educational service for which they otherwise qualify. At issue only is the extent for which SLIAG funds can be used to make payments to LEAs or other service providers.

Congress provides time-limited transitional assistance to LEAs with respect to immigrants in the school district through several programs. For example both the EIEA itself and the refugee education assistance programs provide assistance for the first several years alien children covered by these programs are enrolled in U.S. schools. In addition to limiting the duration of time for which payment can be made with respect to an alien child, neither EIEA nor the refugee education programs were designed to cover the entire cost of providing education to immigrant children. We see no indication in the legislative history that Congress intended to provide considerably more extensive assistance to State and local governments with respect to eligible legalized aliens than for other aliens. Thus, we have provided by regulation that, for purposes of calculating the maximum SLIAG payment to an LEA or other service provider, only eligible legalized aliens who have been enrolled in school in the United States for less than three full academic years may be counted. (This is the same time limit as is applied by EIEA.)

One commenter pointed out that it is inconsistent to apply the limitation to

47
MR
10
988
MI

children and not to adults. We agree, and have applied the three-year limitation to adults as well as to children. We believe this interpretation is inescapable when viewed in the context of the Act's application of EIEA's provisions to adults and children. Further, we note that Congress clearly intended to use the existing EIEA structure to avoid the need to establish new administrative mechanisms. Adopting a different time frame for ELAs than for "immigrant children" would thwart that intent.

The three-year period refers to enrollment in a course of instruction. Thus, the final rule addresses the concerns raised by a number of commenters who pointed out that even ELAs who have been in the U.S. for five or more years may not speak English. These ELAs can be served unless they already have accessed instructional programs in the United States for a period equal to three complete academic years. Any previous enrollment by an ELA in an instructional program in the United States must be counted against the three-year maximum to establish the amount of time the student is eligible for educational services under SLIAG.

Use of SLIAG Funds for Costs Incurred Prior to October 1, 1987

Section 204(a)(1) of the Act appropriates funds for SLIAG for fiscal year 1988 and for each of the three succeeding fiscal years. We interpret the Act as providing funds to meet costs incurred by State and local governments beginning in FY 1988, notwithstanding the fact that the INS began taking applications for legalization in FY 1987. However, we believe that two exceptions to the general rule that SLIAG funds may be used only for costs incurred in FY 1988 and succeeding fiscal years are warranted.

First, the regulation permits States to use SLIAG funds to reimburse costs closely associated with the implementation of the SLIAG program, e.g., administrative start-up costs, incurred between November 6, 1986 and September 30, 1987. We believe that it was Congress, intent that State procedures and fund accounting mechanisms be in place early in FY 1988. We expect that some States incurred planning and administrative costs in FY 1987.

Second, the regulation allows States to use SLIAG funds to reimburse otherwise allowable costs incurred in fiscal year 1987 (but after November 6, 1986) for providing public health assistance (1) to individuals whose status has been adjusted under section 245A or 210 of the INA and (2) to individuals applying to become eligible legalized aliens under section 245A, but not under section 210, of the INA. Section 204(c) of the Act extends reimbursement of public health costs to aliens applying for status adjustment under section 245A of the INA. Recognizing that aliens would be applying for status adjustment beginning on May 5, 1987, we believe the Act contemplates the reimbursement of State and local costs associated with providing public health assistance to those applying, and to those whose status is subsequently adjusted, under section 245A. Since the Act limits the extension of public health assistance to those who are adjusting under section 245A, we do not believe costs associated with those applying under section 210 are permissible uses of SLIAG funds.

Comment (Start-Up Costs)

One commenter sought clarification as to whether planning and administrative costs incurred by departments of public welfare, public health, and education before October 1, 1987, are allowable. Another sought assurance that local school districts will be reimbursed for developmental and administrative start-up costs, and that such reimbursement would be allowed retroactively for expenses incurred in FY 1987.

Response

We interpret the Act to allow administrative costs closely associated with the implementation of SLIAG, i.e. administrative start-up costs, incurred after November 6, 1987. This would include administrative costs incurred not only by the agency administering and dispensing SLIAG funds but also by agencies and local governments involved in providing SLIAG-related services.

The regulation permits reimbursement for allowable SLIAG administrative costs incurred subsequent to November 6, 1986, the date of enactment. However, reimbursement for *program* administrative costs incurred prior to October 1, 1987 are limited to those incurred for public health services. Program administrative costs for public assistance and educational services incurred before that date are not allowable because, by definition, no program services subject to SLIAG payment or reimbursement could have been made prior to October 1, 1987 for those activities.

We do not believe it is appropriate for us to interject ourselves into State decisions concerning distribution of resources among allowable activities by mandating that certain expenses be reimbursed, e.g., developmental and administrative start-up costs of local school districts.

Comment

A number of comments were received regarding the allowability of reimbursement for administrative expenses incurred in FY 1987 from FY 1988 funds. A number of commenters supported the Department's decision to allow such costs to be reimbursed. One commenter requested clarification as to whether reimbursement would be allowed for planning and administrative costs by State departments of health, welfare, and education, or whether these reimbursements were allowed only for planning and administration by the State agency. One commenter requested that funds be available for developing tracking systems to identify eligible aliens within public assistance programs prior to October 1, 1987.

Response

Planning and administrative costs which are incurred by States prior to October 1, 1987 for the implementation of SLIAG are allowable under the regulation. This includes SLIAG administrative costs incurred by State and local program agencies, e.g., departments of health, education, and welfare. The costs of developing tracking systems in FY 1987 to identify ELAs receiving assistance generally would qualify as SLIAG administrative costs.

Subpart C—Administration of Grants

General Provisions

The final regulation applies the HHS regulations governing the administration of grants, 45 CFR Part 74, to SLIAG funds. These regulations apply to all grant awards issued by the Department, except those statutorily designated as block grants. We received no comments on this provision.

On March 11, 1988, twenty-four Federal agencies will publish a Presidentially-directed, government-wide "common rule," which will supersede and replace agency regulations such as 45 CFR Part 74, which implements OMB Circular A–102. HHS' adoption of the "common rule" will cause all references to Part 74 to change to 45 CFR Part 92, and necessitate a subsequent amendment to this regulation, conforming any redundant or inconsistent grants administration provisions in Subpart C to the new government-wide "common rule."

Fiscal Control

States must have fund accounting procedures in place which allow SLIAG funds to be traced from drawdown to allowable expenditures under this Part. We are not requiring that a State or recipient trace SLIAG funds from drawdown to an expenditure to or on behalf of individual, identifiable eligible legalized aliens. Rather, we are requiring that States trace SLIAG funds from drawdown to disbursement to a program or activity in which allowable SLIAG-related costs in a fiscal year at least equal the amount of SLIAG funds provided to the program or activity in that fiscal year.

Additionally, regulations at 45 CFR Part 74 require that costs charged to a program be reasonable, allowable, and allocable. For example, the cost of a Spanish-English translator would have to be prorated over the entire Spanish-speaking clientele of a public health office. These costs could not be charged solely to SLIAG. Costs charged to SLIAG also would have to meet the other criteria of "SLIAG-related costs."

We developed the fiscal control procedures after extensive consultation with State officials and representatives from other levels of government. These individuals raised concerns about (1) the establishment of onerous reporting and tracking requirements, a problem that Congress clearly sought to avoid, and, (2) in some public health situations, the difficulty of tracking expenditures to a specific individual and the possible deterrent effect such tracking might have on those seeking services.

The regulation allows for cost determinations based on statistically valid sampling procedures to address these concerns. States may use any of the fiscal control procedures described in Subpart C of the regulation to track costs. States may, but need not, use the same procedure for each recipient of SLIAG funds or for each program or activity that receives SLIAG funds. We recognize appropriate methods for tracking costs may differ among recipients, programs and activities. For example, the appropriate method for fiscal control chosen by the State may be affected by such factors as whether a particular recipient serves a large alien population, current established methods of accounting, etc. For costs associated with public assistance, States are permitted to demonstrate the amount of their SLIAG-related costs: (1) By determining the amount of funds actually provided to specifically identifiable eligible legalized aliens (as is currently done for refugees under the cash and medical assistance portion of the Refugee Resettlement Program), or (2) by determining the amount associated with eligible legalized alien participation through the use of a statistically valid sample of an assistance program's caseload. We have not included the use of population ratios (see next paragraph) for determining SLIAG-related costs for public assistance programs. We believe that the public charge provision of the INA and the deterrent effect of that provision on ELAs' participation in such programs, makes use of such a methodology for public assistance programs inherently suspect.

For costs associated with public health assistance, States are permitted to demonstrate the amount of their allowable SLIAG-related costs (1) by using either of the above two methods or (2) by multiplying the ratio of the number of eligible legalized aliens in a service population to the total service population by the costs associated with public health activities that are reimbursable under SLIAG. For example, if 5 percent of the State's population were eligible legalized aliens, we would accept that 5 percent of the costs of public health assistance were associated with eligible legalized aliens.

States may also demonstrate SLIAG-related costs by using other reliable methods of estimation, subject to Federal review. We recommend that States consult with the Department before implementing an alternative method.

The proposed rule did not prescribe detailed methods for calculating SLIAG-related costs for educational services. The preamble to the proposed rule indicated that States must be able to demonstrate that educational services provided are predominantly associated with eligible legalized aliens. In response to comments received on the proposed rule, we have made several modifications in the final rule to provide greater guidance regarding the establishment of SLIAG-related costs for education.

The final regulation requires that States be able to demonstrate that the amount of SLIAG funds paid to local educational agencies and other providers of educational services for adults in a fiscal year does not exceed the limits described in § 402.11(e) of this regulation and that the services provided to eligible legalized aliens were allowable under the Act and this regulation.

Comment (Actual Costs)

Several commenters advocated two changes in fiscal control procedures to ensure that counties receive reimbursement adequate to cover actual expenses. First, commenters recommended that public assistance and public health cost determinations be based only on actual expenditure data or on the actual number of ELAs multiplied by the average cost per ELA. Statistical sampling of caseload would not be permitted.

Second, the commenters sought to add a requirement that States must reimburse counties based on actual data if the counties maintain such records. Some commenters advocated requiring States to track actual costs, rather than estimating costs based on statistical samples or, for public health, population ratios. Yet, another commenter supported having the option to use actual or statistically derived cost figures.

Response

Consistent with the proposed rule, the final rule requires States to determine the allowability of expenditures for each recipient of SLIAG funds. States may use any of the fiscal control procedures described in Subpart C of the regulation to determine costs.

As discussed above, we allow determination of SLIAG-related costs based on statistically valid sampling to address concerns raised during consultation with State officials and representatives from other levels of government.

Certainly, States have the option to establish actual costs by associating costs with specific, identified eligible legalized aliens. We expect that most State and local governments will select this option for the programs in which it is feasible and appropriate. We would expect States to use the best available data to determine SLIAG-related costs. However, because the State is the grantee in the SLIAG program and is responsible for administration of the grant funds, we have sought to avoid interjecting the Department into State decisions regarding how to administer SLIAG. Consequently, we have not revised the final rule to accommodate these suggestions.

Comment (Allowable Costs)

One commenter advocated establishing specific parameters and definitions for allowable costs.

Response

The final rule does provide specific guidance on establishing SLIAG-related costs. We have attempted to provide such guidance in a way that provides States with flexibility and that doesn't add restrictions unintended by

Congress. We also have tried to answer in this preamble specific questions raised by States and by others. States that have specific questions concerning allowable costs should consult us.

Comment (Cost Calculation)

Several commenters advocated various methods for calculating costs under SLIAG. One of the commenters, who advocated allowing reimbursement for programs of public assistance which do not require applicants to meet specified income or resource requirements, recommended an alternative method of cost calculation for these programs involving "a valid statistical ratio based on demographic data." Contending that eligible legalized aliens will need more health services than other groups, one commenter suggested that States be allowed to calculate public health costs by doubling the ratio of eligible legalized aliens to State population.

Response

The final rule includes procedures which will determine SLIAG-related costs in a manner acceptable to us without requiring States to institute burdensome tracking and reporting procedures. The proposed rule outlined three methods of calculating public health assistance costs, involving varying degrees of specificity in tracking procedures. A State may use any of these methods which it believes most accurately reflect its actual costs or may develop an alternative method.

The rule allows States to use alternative methods for cost calculation *if* the alternative method provides a valid measure of SLIAG-related costs. These alternative methods are subject to Federal review. Although we are not requiring prior Federal approval before use of an alternative method, we suggest that States consult with us before employing such a method.

Comment (Subgroup Calculation)

Another commenter recommended allowing public health costs to be calculated for population subgroups, such as children of a specific age group. SLIAG-related costs would be calculated using the population ratio method based on the cost and usage for that age group. For example, costs associated with child immunizations would be apportioned on the basis of the ratio of eligible legalized alien children to all children in a State, county, or city. Other commenters advocated allowing States to use different cost accounting methodologies for different kinds of public health services. For example, actual costs could be calculated for diagnosis and treatments and a population ratio could be employed for activities more directed to the general public.

Response

We agree and have amended the regulation to include the term "service population." To calculate SLIAG-related costs related to public health, a State may use the ratio of ELAs in a "service population" to the total number of individuals in the service population. The service population will vary according to the area served by a program or activity and the nature of the program or activity. Examples of service populations include the State, a county, the number of school-age children in a county, the number of individuals over the age of 65 in a city, etc.

Comment (Education Costs)

One commenter requested that we define minimum expectations for fiscal control and accounting involving educational services. Another commenter made three suggestions related to a fiscal procedure for educational services. First, States should be required to use fiscal and accounting procedures for elementary and secondary education similar to those required under EIEA. Second, funding from other Federal programs, which is offset against the spending limitations for educational services, should be identified. Third, allowable expenditures for English language and citizenship skills instruction should be determined by calculating actual expenditures or by multiplying the actual number of ELAs receiving such instruction by the average cost for the ELA student population.

Response

We agree and have incorporated these comments in the final rule. Section 402.11(e) specifies the maximum amount of SLIAG funds that may be paid to—local educational agencies and to other providers of educational services to adults. Subpart C of the final rule requires States to be able to establish that the amounts of SLIAG funds paid to these organizations did not exceed the amounts specified in § 402.11(e) and were used for purposes allowable under the Act and this Part. Funds used under this Part are subject to 45 CFR Part 74, which is substantially similar to Department of Education grant administration regulations (34 CFR Part 74).

Comment (Offset Disallowance)

One commenter requested that we clearly indicate that a State may offset a disallowance against allowable, unreimbursed SLIAG-related costs.

Response

As a general rule, this procedure is permissible, provided that it is consistent with 45 CFR Part 74, the Act, this regulation, the terms and conditions of the grant, and the State's accounting practices.

SLIAG and Program Administrative Costs

The sections of the final rule governing SLIAG and program administrative costs are substantially the same as the proposed rule, except for minor wording changes made for clarity.

The regulation provides that States may use SLIAG funds for costs associated with administering SLIAG funds ("SLIAG administrative costs") and for administrative costs in programs of public assistance, public health assistance, and educational services associated with providing those services to eligible legalized aliens, irrespective of the availability of SLIAG funds ("program administrative costs"). SLIAG administrative costs include: Planning (including consulting with local public officials); preparing the application; auditing SLIAG funds; and allocating, tracking, monitoring, and reporting funds among programs and jurisdictions.

We have not specified a methodology for States to determine SLIAG administrative costs. Believing that SLIAG administration is generally a separate activity, we have allowed States to determine such costs using normal cost allocation and accounting procedures, subject to 45 CFR Part 74.

Neither the Act nor this regulation imposes a limit on administrative costs for public assistance or public health assistance. However, by incorporating the definitions and provisions of the EIEA, we believe the Act imposes the EIEA's 1.5 percent limit on administrative costs chargeable to SLIAG by State educational agencies for SLIAG administrative costs. In response to comments asking for guidance on the application of EIEA provisions to SLIAG funds, we have made this limitation explicit in the final rule.

We expect that State and local governments will not need to establish substantial new bureaucratic mechanisms to administer SLIAG funds, which is a temporary funding source. We intend to assess carefully State and local SLIAG administrative costs as part of our program reviews.

In addition to SLIAG administrative costs, State and local governments may use SLIAG funds for administrative costs associated with those programs and activities which receive SLIAG funds under the State's approved application. In calculating the amount of administrative costs for a particular program or activity, we will accept the use of the percentage of participation by eligible legalized aliens in the program (or the percentage of program costs incurred on behalf of eligible legalized aliens) multiplied by the program's total administrative cost (less any amount related to general SLIAG administrative costs, above). For example, if 10 percent of a program's benefits were associated with eligible legalized aliens, the State may claim 10 percent of the program's administrative costs (less general SLIAG administrative costs) under SLIAG.

Desiring to maximize State flexibility, we have provided that States may use alternative methods of determining program administrative costs chargeable to SLIAG. However, we will carefully assess as part of our program reviews any administrative costs determined by an alternative method.

Comment (Limit on Administrative Costs)

Two commenters advocated limiting administrative costs, one to 10 percent, the other to 20 percent.

Response

The Act clearly intends reimbursement of administrative costs and does not set a limit on such use, except for State educational agencies. We have not imposed by regulation a limit on administrative cost.

Comment (Federal Administrative Cost Carryover)

One commenter asked whether the Federal government would be able to carry over its own administrative costs to future years.

Response

Federal costs for administering SLIAG may not be carried over to future years. However, the Act *requires* the offset, i.e., Federal *program* expenses, to be based on an estimate of costs that is included in the President's budget. To the extent the estimate is above or below actual costs, the Act requires that the next year's offset level be adjusted. The offset includes only Federal benefit expenditures for Medicaid, Food Stamps, and programs of financial assistance. It does not include Federal administrative costs for those programs.

Repayment

Section 204(e)(2)(B) of the Act requires that each State repay to the United States any amounts found not to have been expended in accordance with the provisions of section 204. Expenditures not subject to SLIAG reimbursement include such things as: expenditures on behalf of individuals who do not meet the criteria for an eligible legalized alien or whose status has been terminated by the INS; administrative costs which do not meet the applicable requirements governing the State or local program; and any expenditure which is not in accordance with the provisions of section 204 of the Act, this regulation, or the State's approved application.

The allowability of SLIAG expenditures is subject to the determination of the ultimate allowability of expenditures under the program in question.

Comment (Tolerance for Error)

One commenter advocated establishing an error tolerance level, but did not indicate how or to what figure it would be applied.

A comparison was made with error tolerance rates for "entitlement" programs.

Response

We do not see the need or a legal basis for an error tolerance level. Any funds found to have been expended in a manner contrary to the Act, these and other relevant regulations, a State's approved application, or the terms and conditions of the grant award are subject to repayment to the Federal government.

Comment (Revoked Legal Resident Status)

A number of commenters sought clarification that repayment is not required for services given to an ELA if that status is later revoked.

Response

SLIAG funds may be used for allowable services provided to an ELA so long as that ELA status is in effect, but not longer than five years from the date the ELA initially was granted lawful temporary resident status. If ELA status is revoked, reimbursement is allowed for services provided before revocation, but not for those services provided after the ELA's legal status is terminated or changed to a status outside the statutory definition of "eligible legalized alien."

We recognize the difficulty of tracking ELA status and will work with States to develop satisfactory means for fulfilling this need. We assume that States will be prudent in checking ELA status. For example, if a State is seeking reimbursement on the basis of an alien's I–688A (Employment Authorization) card, it is prudent to verify that lawful temporary resident status was granted before reimbursement is claimed for services provided beyond the expiration date on the card. (In this instance, if the alien never received legal temporary resident status, no costs associated with providing benefits or services to that alien would be allowable, except for the costs of public health services if the alien had applied under section 245A of the INA.) Likewise, if an ELA is in lawful temporary resident status, a service provider would be prudent to check to see if permanent resident status was granted before seeking reimbursement for services provided after the expiration date on the I–688 (Temporary Resident Card).

Comment (Identifying ELAs)

One commenter expressed concern that providers of services covered by SLIAG must be able to tell who meets the definition of an ELA.

Response

The I–688 Temporary Resident Card identifies an individual as a lawful temporary resident under section 245A or 210 and shows the effective date of the status.

We are working with INS to ensure that the section of the INA under which an alien has adjusted status and the date of adjustment to temporary resident status are shown on the I–551 (Resident Alien Card) provided to the alien when he/she adjusts to permanent resident status.

In addition, States will be able to access INS records through the Systematic Alien Verification for Entitlement (SAVE) program. This program provides for telephonic and other means of accessing certain INS records by authorized users. States interested in using SAVE for this purpose should contact the INS District Director in their areas.

Appeals

All appeals will be handled by the Department's Grant Appeals Board and will be governed by the rules set forth at 45 CFR Part 16. We received no comments on this section.

Time Period for Obligation and Expenditure of Grant Funds

The final regulation provides that funds allotted to a State for a particular fiscal year and remaining unobligated by the State at the close of the fiscal year shall remain available to the State in subsequent years subject to two conditions. First, a State must inform the

Secretary as part of the report required under Subpart F that it is carrying funds forward for obligation in a subsequent fiscal year. Second, the Act provides that SLIAG funds may not be used after September 30, 1994. We interpret this to mean that the State must obligate SLIAG funds by this date.

The regulation provides that *States* must liquidate obligations within 12 months of the end of the fiscal year in which the obligation is made. This represents a change from the proposed rule, which required *recipients* to liquidate obligations within that time period. However, we recognize that situations may exist where this is not possible (e.g., obligated funds are the subject of litigation and may not be expended). In such a case, the State should notify the Department of the circumstances involved and request that the time period for liquidation be extended.

Comment (12 Month Liquidation Rule)

Several commenters recommended rescinding the requirement that obligations must be liquidated within 12 months of the end of the fiscal year in which the obligation is made. One commenter asked that the time period be extended if the requirement cannot be rescinded altogether. Some commenters suggested that a 12-month liquidation requirement would limit their ability to enter multi-year contracts (presumably for education).

Response

We have not adopted the suggestion to extend the time period to expend funds. We believe that one year after the close of the fiscal year *in which the funds are obligated* by the State allows sufficient time for the expenditure of funds. For public assistance and public health assistance, SLIAG funds are provided to *reimburse* State and local funds. Thus, we do not believe a 12-month liquidation requirement should pose a problem for these activities. In the event that a State cannot liquidate an obligation within the prescribed time, we have allowed for an extension upon request by the State. The elimination of the requirement, which was contained in the proposed rule, that *recipients* liquidate obligations within 12 months of the fiscal year should serve to alleviate some of the concerns raised by the commenters.

Comment (Rollover)

A number of commenters asked that States be allowed to roll over funds from year to year without reducing the next year's allocation or forfeiting funds to be reallocated to other States. One commenter asked specifically for a three-year period, at least for the first year's grant, in which to expend funds. Advocating a uniform procedure among States, another commenter suggested that the procedure be a relatively simple part of the application.

Response

As noted above, the regulation allows States to carry unobligated funds forward to subsequent fiscal years. There is no "procedure" involved in carrying funds forward for obligation in subsequent fiscal years, except for the report required by § 402.51.

The amount of SLIAG funds actually expended in a given fiscal year does *not* affect future years' allocations. Only a State's SLIAG-related costs, not its expenditure of SLIAG funds, are a factor in determining a State's allocation. (See Subpart D, State Allocations, and the preamble to that Subpart.)

Comment (Retroactive Reimbursement)

One commenter suggested that States be allowed to use funds allocated in one fiscal year to reimburse expenses incurred in a prior fiscal year.

Response

Section 204(a) of the Act appropriates SLIAG funds *"for FY 1988 and each of the three succeeding fiscal years"* (emphasis added). Section 204(b)(4) provides that "any amount paid to a State *for any of the following fiscal years* and remaining unobligated at the end of such years shall remain available to such State for the purposes for which it was made *in subsequent fiscal years . . .*" (emphasis added).

Relying on the fact that SLIAG funds are appropriated *for* a fiscal year, the regulation provides that SLIAG funds shall be used by States for costs incurred in that fiscal year, except as provided in § 402.12 of the regulation. Consequently, States may use SLIAG funds for SLIAG-related costs incurred during and subsequent to the fiscal year in which funds were made available, but not to reimburse costs incurred in a *prior fiscal year.* (The Act explicitly allows States to carry SLIAG funds over for use in succeeding fiscal years, through September 30, 1994.)

Subpart D—State Allocations

In response to the comments received on the proposed rule, we have made a number of changes to the method by which we will allocate funds. We have also made changes elsewhere in the regulation to allow us to implement the changes to the allocation method. We did not change the formula weights. In summary, we have:

(1) Adopted the alternative allocation methodology described in the preamble to the proposed rule with several modifications in response to comments received. We will allocate funds twice in FY 1988, as described in the proposed rule, once in each of FYs 1989 and 1990 and twice in FY 1991. Each time we allocate funds, we will allocate on the basis of the total amount of funds that have been made available for grants to States to date, the best data available on the number of ELAs in each State, and cumulative SLIAG-related costs based on the most recent actual and projected cost data; and

(2) Modified the application requirements to include updated cost estimates for the current fiscal year, as well as projected costs for the year for which application is being made.

(Following are descriptions of how we have addressed the specific comments received regarding the allocation and allotment of SLIAG funds.)

Basis of Awards

The regulation provides that grants will be made based on the apportionment of funds from the Office of Management and Budget and that the grant award made by us is the State's authority to draw and expend SLIAG funds.

Comment (Annual Awards)

Two commenters advocated annual, rather than quarterly, grant awards, asserting that quarterly awards create unnecessary complications in planning and contracting for services. One asked that States be given annual award estimates, if annual awards are not possible.

Response

Annual determination of allocations with quarterly award of funds is the general approach taken by the Department for its formula and block grants. With the exception of FY 1988, States will be notified of the total amount of their allocations at the beginning of the fiscal year. For FY 1988, initial allocations will be made at the beginning of the year based on one-half of the funds available for grants to States. Appendix A shows the amount of SLIAG funds which States with approved applications will receive for this initial FY 1988 allocation. Final FY 1988 allocations will be determined in the fourth quarter of FY 1988 using updated counts of eligible legalized aliens and information provided by States on SLIAG-related costs. We will notify States as soon as possible of their full-year FY 1988 allocations.

Allocation Formula

We received many comments regarding the allocation formula recommending disparate changes in the weight given to the various factors and suggesting other ways to measure cost. Most of the suggested approaches involved changing the relative weights given in the formula to ELA population and SLIAG-related costs. This is not surprising, since persuasive arguments can be made for using either ELA population or SLIAG-related costs as the primary determinant in the allocation formula. Realizing the advantages and the disadvantages of relying on either measure, we proposed a formula that gave equal weight to both. After carefully considering all the public comments on the NPRM, we continue to believe that this balance provides the most equitable approach to allocating SLIAG funds among States.

We share the concerns expressed by a number of commenters regarding the difficulty of obtaining accurate estimates of SLIAG-related costs that are comparable across States. However, we believe that changes in the application and reporting requirements, discussed elsewhere in this preamble, will improve the accuracy and comparability of SLIAG-related cost data. Also, the alternative allocation methodology we have adopted in the final rule will correct for any discrepancies between projected and actual SLIAG-related costs. A discussion of specific comments received regarding the allocation formula follows.

Comment (Factors/Weights)

We received numerous comments which addressed the factors and weights used in the formula for determining State allocations. A number of commenters expressed concern that the weight given to SLIAG-related costs in the proposed formula would result in States "being drawn into a spending competition" and would disproportionately alter the distribution of funds in favor of states with high-cost discretionary service programs.

A number of commenters suggested that the weight given to SLIAG-related costs be reduced and that the weight given to States. shares of the ELA population be correspondingly increased.

Several commenters asserted that States with decentralized delivery systems would be disadvantaged in developing accurate cost estimates relative to States that operated service programs at the State level.

One commenter argued that service costs to undocumented aliens cannot be documented and therefore should not be used as a factor in distributing funds.

One commenter supported the weighting of the ELA and SLIAG-related cost factors as proposed.

Response

We share commenters' concerns about the difficulty States will have in developing accurate and comparable measures of SLIAG-related costs. We also agree that the discretionary nature of some cost components might result in some States being unfairly disadvantaged by a formula that gives excessive weight to costs that are subject to State action. That is why we have retained ELA population as a major factor in the formula. However, we continue to believe that the primary purpose of SLIAG is to offset part of State and local government costs resulting from the Act. Congress could have based the allocation of SLIAG funds exclusively on either costs or States' ELA populations. Instead, Congress specified that both factors be considered, clearly indicating that it sought a balance. We therefore have retained the allocation formula contained in the proposed rule, giving equal weight to the numbers of ELAs and to SLIAG-related costs. (See the response to other comments for additional discussion of our reasoning in retaining the proposed allocation formula.)

We have made changes elsewhere in the regulation to help us better ensure the validity and comparability of States' cost estimates. For example, we have clarified the definition of SLIAG-related costs and have clarified the allowability of various benefits and services so as to provide a more specific basis for States' development of cost estimates. We have also required that the cost estimates provided in States' applications and the actual cost data supplied in the report required by Subpart F be accompanied by information sufficient to enable us to evaluate whether the costs are allowable and determined using reasonable methodologies.

Comment (Cost-Based Formula)

One commenter suggested an alternative method for making adjustments that would provide funding to each State based on the same relative share of costs. This formula would use only the cost factor to allocate funds. Total actual expenditures would be compared to previous allotments, and adjustments would then be made to provide a proportionate share of the difference between prior actual costs and prior allotments in the allocation. The commenter noted that the alternative methodology discussed in the proposal "appears to accomplish a similar objective" and "closely approximates the results that would be obtained using our suggested approach."

Response

We agree that ongoing adjustment of a State's allocation based on updated estimates of its SLIAG-related costs and its actual SLIAG-related costs is preferable to the adjustment method in the proposed rule and have adopted a modified version of the alternative methodology which accomplishes this objective. We have not revised the factor weights to eliminate all factors except cost, as the commenter suggests, because, had Congress desired a strict proportionate allocation based on cost, it would have prescribed that rather than providing a range of factors that must be taken into account by the Secretary. (See our response to other comments in this Subpart.)

Comment (Education Costs)

A number of commenters supported the weights proposed in the NPRM but suggested that we not include education costs as part of States' SLIAG-related costs.

Several commenters suggested that we reduce the weight given to SLIAG-related costs and increase the weight given to States' share of the ELA population to recognize education costs.

Citing the legislative history of the Act, one commenter noted that the allocation formula in SLIAG derived from the Senate version of the immigration reform legislation, which did not include education costs. (Education costs were added by the House.)

Doubting that an accurate measure of education costs can be developed, one commenter expressed concern that States would increase discretionary education spending in order to receive higher SLIAG allocations.

One commenter suggested not including education costs in calculating State allocations after FY 1988.

Response

We see no basis in the Act to exclude allowable SLIAG-related education costs from the allocation formula. However, in response to the numerous comments concerning education, we have made several changes to the section of the regulation relating to educational services. These changes better define those costs that are allowable under SLIAG and that may be counted as SLIAG-related costs.

Comment (Inclusion of General Assistance Costs)

One commenter objected to the inclusion of general assistance costs in the allocation formula. The commenter asserted that the Act prohibits aliens who receive cash payments under general assistance from obtaining citizenship. Consequently, assistance which is "denied in the general provisions of the new Immigration (sic) law should not be awarded indirectly through other promulgated regulations."

Response

We see no basis in the Act for excluding the costs of general assistance to ELAs, provided such assistance meets the requirements of the Act and these regulations. Although States may elect to exclude ELAs from assistance programs, including general assistance, if States do provide such assistance, such expenditures would normally be allowable SLIAG-related costs. Aliens are not barred by IRCA or the INA from receiving general assistance.

Comment (Weight Given to ELA/State Population Ratio)

Several commenters recommended increasing the weight given to the ratio of ELAs to States' population. (The proposed formula gives this factor a weight of 1 percent.) Several commenters recommended increasing the weight given to this factor to 10 percent. One commenter cited studies which link the concentration of undocumented aliens with costs. Two commenters recommended reconsidering the weight given to this factor after reviewing the costs data submitted pursuant to section 402.52 of the proposed rule.

Response

We agree that costs incurred by a State will increase as the number of ELAs increases. This is reflected in the allocation formula by including each State's share of the total number of eligible legalized aliens in the U.S. as well as the SLIAG-related costs.

We also acknowledge the possibility that per capita costs may be higher in States where ELAs make up a higher percentage of the State's population than in other States, although none of the studies cited by the commenters supports this conclusion. But even if this were to be the case, the allocation formula accounts for this directly by including SLIAG-related costs. If a State has higher costs per ELA (due to a high concentration of ELAs in the State or because it has higher costs generally), that State will get a higher allocation per ELA.

We see no evidence in the Act or its legislative history indicating an intent to offset a significantly higher percentage of a States' SLIAG-related costs simply because ELAs represent a higher percentage of that State's population than in other States.

Comment (ELA Data)

We received a number of comments regarding data on the number of ELAs which we will use in the allocation formula. A number of commenters objected to the use of Census-based estimates. Several commenters recommended that we use actual counts of aliens who have applied for legalization under sections 245A and 210 of the INA. Some commenters suggested using projections of applicants to account for the longer application period available to special agricultural workers.

Response

As we indicated in the preamble to the proposed rule, our intent was, and is, to use actual data from the INS legalization program in determining State allocations. The initial FY 1988 State allocations shown in Appendix A of this rule reflect aliens who have applied for legalization through January 8, 1988. We will update this information each time we calculate State allocations.

We have decided not to allocate funds based on projections of the number of aliens that will receive assistance. We prefer instead to allocate based on actual data current as of the time we make allocations. The alternative allocation methodology we have adopted will correct for any discrepancies between the data we use for allocation at any given time and the number of eligible legalized aliens that ultimately gain legal status.

Comment (Secondary Migration)

One commenter recommended that, for fiscal years 1990 and 1991, the Department adjust INS data to account for secondary migration.

Response

We agree in principle. We will explore ways in which to account for secondary migration. We note that aliens who legalize under section 245A of the INA will have to apply to INS for lawful permanent resident status. We will explore with INS whether the data from that application process, which would reflect secondary migration, will be available for use in allocating SLIAG funds.

Comment (Federal Estimates of SLIAG-Related Costs)

We received several comments on the Federal estimates of SLIAG-related costs which we proposed to use in calculating FY 1988 allocations. One commenter agreed with the use of Federal estimates and our rationale for doing so. Another commenter requested that we include more description of how the Federal estimates of SLIAG-related costs are derived. Several commenters recommended using more recent data, in some cases citing increased costs since the 1984–85 Census of Governments data were collected. None of these commenters provided suggestions as to what other data sources we should use. Several commenters objected to the use of the Census data because it includes extraneous costs unrelated to the costs of service and varies widely by State and because the Census data misses some SLIAG-related costs.

Response

The rule provides for the use of Federal estimates of relative SLIAG-related costs in computing initial FY 1988 SLIAG allocations. The following is an explanation of how these estimates are computed:

The basic data source is the 1984–85 Census of Governments ("Government Finances in 1984–85," U.S. Department of Commerce, Bureau of the Census, Publication Number GF85 No. 5, Table 22, "Expenditure of State and Local Governments by Function and States: 1984–85"). The basic methodology involves adjusting the State-level expenditure data from this source for certain expenditures that would not be relevant to or reimbursable under SLIAG and then computing per capita expenditures. These per capita expenditures are then multiplied by the number of eligible legalized aliens in the State.

For public health, we used the column titled "Health" on page 28. The major categories included in this measure—public health administration, categorical health programs, and treatment and immunization clinics—are likely to be claimed as SLIAG-related costs by States.

For public assistance, we took the "Total" column for public welfare expenditures on page 27 and made several adjustments. First, we subtracted the column entitled "Categorical Assistance Programs," which is primarily AFDC. Because virtually all eligible legalized aliens are barred from AFDC, this cost is not relevant to SLIAG. We also subtracted the Federal share of Medicaid program and administrative expenditures, using data from the HHS Health Care Financing Administration for FY 1985.

Population data for States (used for computing per capita expenditures) were taken from the *State and Metropolitan Area Data Book* for 1986. (U.S. Department of Commerce, Bureau of the Census, *State and Metropolitan Area Data Book—1986*, Table C, Column 5, page 504.) Data for the territories were taken from Census Current Population Reports. (U.S. Department of Commerce, Bureau of the Census, *Current Population Reports*, "Population Estimates and Projections," Series P–25, No. 997, November, 1986, Table 2.)

The Census of Governments did not include information on Puerto Rico and the territories. We used a variety of sources for this information, including unpublished Census data and data from national organizations.

Uncertainty regarding the level of SLIAG-related costs at this point in time prompted us to propose using Federal estimates for initial FY 1988 allocations. However, the allocation process that we have developed provides for States' submitting information in July, 1988, when much of this uncertainty will have been resolved. We will use that information for the final allocation of FY 1988 funds. In addition, the allocation methodology adopted in the final rule involves a continuous adjustment of State allocations based on more recent data (i.e., updated estimates and actual cost reports) throughout SLIAG's four-year life. This methodology will adjust for any initial over- or under-allocation of funds resulting from use of the Federal estimates of relative SLIAG-related costs.

Comment (Adjustment)

One commenter objected to the way in which we proposed to account for the difference between actual SLIAG-related costs and previous years' State allotments. The commenter believed that our proposed method was inconsistent with Congressional intent because it failed to adjust for cases where allotments in previous years exceeded costs and failed to adjust for differences between actual costs and allotments in all fiscal years.

Response

We agree that the proposed method did not adjust for differences between allotments for FY 1990 and FY 1991 and SLIAG-related costs in those years. In response to this and other comments, we have made several changes in the allocation methodology.

First, the alternative allocation methodology, which we have adopted for the final rule, makes a direct correction for any over- or under-allocation of funds by computing allocations based on cumulative funding and cumulative SLIAG-related costs.

Second, we are requiring updated cost estimates for the current fiscal year to be submitted at the time of application. While these estimates may not be "actual" cost data (States may base these estimates on partial-year actual costs), we expect that they will be more accurate than cost estimates submitted with States, applications prior to the beginning of the fiscal year. As actual costs, as reported pursuant to section 402.51, become available, they will be factored into the allocation formula.

Finally, we have provided for a reserve of 25 percent of FY 1991 funds to be allocated in the second half of that fiscal year. The purpose of this reserve is to make final adjustments to State allocations based on the actual cost data for FY 1990 provided by States pursuant to Subpart F of this regulation.

Comment (Base Level Allocation)

One commenter recommended that the initial allocation of funds provide for a minimum allocation (0.25 percent of the funds available) for each State to recognize that States will incur a fixed level of administrative and start-up costs regardless of their ELA populations. The funding for this minimum allocation would come out of the 50 percent of the funds we had proposed be allocated on the basis of each State's share of SLIAG-related costs. After the initial FY 1988 allocation, allocations would be based on the formula, with no minimum grant amount.

Response

We have not adopted the recommendation. The amount suggested equals more than $1 million, which far exceeds that estimated annual allocation for a number of States. In addition, implementing this recommendation would encourage the development of elaborate administrative structures, which we seek to avoid.

Determination of Allocations

Comment (Alternative Allocation, Additional Report, 2 Awards)

Three commenters preferred the alternative allocation methodology to the one proposed, believing the alternative method would result in more accurate allocation. One commenter expressed concern about the additional reporting burden involved with the alternative allocation methodology and suggested that we study ways to get the necessary information without additional burden. Another commenter noted that allocating funds more than once a year would be problematic for State planning.

Response

In response to these comments, we have adopted a variation of the alternative allocation methodology discussed in the preamble to the proposed rule. We agree that this approach will result in a more accurate allocation of funds.

We will allocate funds only once a year in fiscal years 1989 and 1990. (We have concluded that allocating funds twice in FY 1988, as we proposed, is warranted by the uncertainty surrounding both the distribution of ELAs by State and the SLIAG-related costs States will incur. We believe that holding back 25 percent of FY 1991 funding for allocation after we receive States' actual cost reports for FY 1990—due December 31, 1990—will ensure a more equitable allocation of SLIAG funds.) By reducing the number of times we allocate funds from what was described for the alternative allocation methodology in the preamble to the proposed rule, we will mitigate the problems associated with allocating more than once in a fiscal year.

While we have not been able to eliminate additional reporting burden, the methodology we have adopted should minimize that additional burden. The allocation methodology we have adopted will not require the submission of additional reports. (The proposed rule provided for the submission of additional reports on a voluntary basis.) Although we are requiring the submission of additional information as part of States' applications, we expect that States will have developed the necessary updated cost data on the current fiscal year in order to prepare cost estimates for the year for which they are making application.

Providing that information to us as part of their applications should impose little additional burden on States, but should significantly improve the accuracy and equity of SLIAG allocations. For final allocations in FY 1991 (using the reserved 25 percent), we will rely on final FY 1990 cost reports.

In the preamble to the proposed rule, we also noted that the version of the alternative allocation methodology described therein would require more Federal administrative effort and oversight than was warranted. Many of the comments to the proposed rule

OL
53
ISS
47
MR
10
988
MI

reflected concern that the allocation of funds be fair and based upon reasonable and comparable data on SLIAG-related costs. We have concluded that the additional expenditure of Federal effort to provide for evaluation of more detailed reporting of SLIAG-related costs (see Subpart E) is necessary to achieve an equitable allocation of funds and is therefore warranted.

Comment (Obligation vs Expenditure)

One commenter requested clarification regarding how obligated funds will be treated for purposes of making the adjustment for the difference between actual costs and allotments.

Response

Although we have adopted the alternative allocation methodology, which obviates the need for a separate adjustment for the difference between actual costs and allotments, this question is still relevant. We have clarified the definition of SLIAG-related costs in § 402.2 of the final rule. SLIAG-related costs are incurred when funds—SLIAG or State/local—are *expended.*

Determination of State Allotments

A State's allotment generally is the difference between the amount determined by the allocation formula in § 402.31(b) (2) through (6) of this regulation and the cumulative amount previously allotted to the State. For example, if the amount of a State's allocation determined by the formula is $700,000 and the cumulative amount previously allotted to the State is $500,000, then the amount of the State's allotment for the current period is the difference, $200,000.

In the event that a State's allocation determined under the cited paragraphs is less that the amount previously allotted to the State, (e.g., the allocation is $700,000 and the cumulative amount previously allotted is $800,000), that State's allotment for the current period will be zero. (In this case, the State would have received more funds than indicated by the allocation formula. It would receive no additional funds until its allocation in a later fiscal year exceeded the amount previously allotted to the State.) In such an event, the total amount of the remaining States' allotments, calculated according to the previous paragraph, would exceed the funds available for grants to States. Consequently, the allotments of the remaining States would be calculated by multiplying the amount the State otherwise would have received (the difference between the amount determined by the allocation formula in § 402.31(b) (2) through (6) of this regulation and the cumulative amount previously allotted to the State) by the ratio of the funds available for grants to States to the sum of the differences between the amounts determined under paragraphs 402.31(b) (2) through (6) and the amounts previously awarded to those States.

Comment (FY 1988)

One commenter expressed confusion regarding the explanation of how final FY 1988 allotments would be computed.

Response

We have rewritten the section of the regulation that describes how allotments will be determined. We believe the revised language is clear.

Allotment of Excess Funds

The regulation provides for the allotment of excess funds. Excess funds would be available if a State failed to qualify for an allotment in a fiscal year or indicated in its application that it did not intend to use its allotment in the year for which application was made or in the succeeding fiscal year.

Comment (Reallotment)

One commenter requested clarification that the allotment of excess funds applies only to those amounts explicitly identified in the State's application as funds which the State does not intend to use in the current or subsequent fiscal year.

One commenter suggested that excess funds should be applied to cover costs from prior fiscal years which were not reimbursed.

One commenter requested clarification on the process for allotting excess funds. Specific questions included: How would States know of excess funds; how would a State apply for excess funds; what information should be included in the State's application; and, how would receipt of funds affect the State's allocation request in the subsequent fiscal year?

Response

We would make funds available for reallotment under § 402.33 only if a State's application explicitly indicated that it did not intend to use its allotment in the year for which application was being made or the succeeding fiscal year, or if a State failed to qualify for an allotment. The allocation of excess funds is essentially automatic and would occur at the beginning of a fiscal year. No additional application is necessary in order for a State to receive funds made available under this section. Receipt of funds made available under § 402.33 will not affect a State's subsequent year's allocation. The amount of SLIAG funds which a State receives, obligates, or expends in a fiscal year, including funds received by operation of § 402.33, does not affect its allocation for subsequent fiscal years. The allocation of funds is based solely on the number of ELAs and SLIAG-related costs.

Subpart E—State Applications

General

The Act requires that a State submit an annual application, which must be approved by the Secretary, in order for the State to be allotted SLIAG funds. A State's application consists of the information required by the Act and this regulation.

If a State fails to qualify for an allotment in a fiscal year, no SLIAG-related costs for that fiscal year will be counted in determining its allocation in subsequent fiscal years for which it makes application.

Application Content

The final rule provides that State applications must contain the following information:

Statement of Assurances

Section 204(d) of the Act requires that States submit, as part of their applications for SLIAG funds, a certification to three assurances. A State must certify that: (1) Funds allotted to the State under SLIAG will only be used to carry out the purposes described in section 204(c)(1) of the Act; (2) the State will provide a fair method (as determined by the State) for the allocation of funds among State and local agencies taking into account the number of eligible legalized aliens and the costs which the State and each locality (which we interpret to mean local government) are likely to incur in providing public assistance, public health assistance, and educational services to eligible legalized aliens; and (3) fiscal control and fund accounting procedures will be established that are adequate to meet the requirements of subsections (e) and (f) of section 204 of the Act, relating to reports and audits, and to limitations on payments, respectively.

In addition to the three statutory assurances, we proposed to add an additional assurance, namely, that the State will comply with the anti-discrimination provisions set forth in section 204(h) of the Act. We received no comments on this proposal and have incorporated this requirement into the final rule.

Certification by the Chief Executive Officer

Because the assurances required by the Act will normally involve a number of State agencies and jurisdictions, we require that the certification required by the Act must be made by a State's chief executive officer or an individual authorized to do so by the chief executive officer. Such authorization must specifically include power to make all the required assurances; a delegation of authority simply to administer the program is not sufficient to enable the designee to certify to the assurances. In this regard, we have followed the procedures adopted for the HHS-administered block grant programs.

Estimated Number of Eligible Legalized Aliens

As required by section 204(d)(2)(A) of the Act, States must submit, as part of their annual applications for SLIAG funds, "the number of eligible legalized aliens residing in the State." Recognizing that such data is not readily available to States, we have provided in § 402.41(b) that States may adopt the estimate provided by the Department of the number of eligible legalized aliens in the State. The Department will make such estimates available to States periodically. They will be based on data from the Immigration and Naturalization Service.

While we have left open the option for a State to develop and submit its own estimates of the number of eligible legalized aliens, along with supporting documentation, we expect that most States will elect to use the estimates we provide. We suggest that any questions concerning the data developed by the INS be directed to them and that States work with us and the INS to correct any problems States may see with these estimates.

SLIAG-Related Costs

Closely tracking section 204(d)(2)(B) of the Act, § 402.41(c) requires that States' applications contain detailed information on the SLIAG-related costs which State and local governments are likely to incur in providing public assistance, public health assistance, and educational services to eligible legalized aliens and in administering SLIAG in the fiscal year for which application is being made. These estimates may include only costs that meet the definition of SLIAG-related costs contained in § 402.2 of this regulation.

Section 402.41(c) now also requires States to include in their applications updated estimates of SLIAG-related costs for the fiscal year in which the application is submitted, as well as estimates of the SLIAG-related costs the State is likely to incur in the fiscal year for which application is being made. For example, States' applications for FY 1990 (due by July 15, 1989) would include estimates of both FY 1990 SLIAG-related costs and updated estimates of FY 1989 SLIAG-related costs. We have adopted this change in order to implement the alternative allocation methodology discussed under Subpart D, with a minimum of additional reporting burden on States. Based on consultations with State and local government officials, we understand that most States will be collecting this type of information for their own use in preparing their applications. Reporting such information to us should involve minimal burden and will significantly enhance our ability to fairly and accurately allocate funds.

Applications must contain estimates of SLIAG-related costs for each program or activity in which such costs have been or will be incurred. These costs must be identified as public assistance, public health assistance, educational services, or SLIAG administrative costs. (Program-specific administrative costs should be included under the appropriate program or activity.) We are not requiring any specific breakdown by agency or local government. States' estimates of SLIAG-related costs for FY 1988 should include SLIAG-related costs incurred in FY 1987 pursuant to § 402.12 of this regulation.

The regulation specifies that the estimates must be supported by descriptions of the programs and activities for which costs have been or will be incurred in sufficient level of detail to permit us to evaluate whether the costs are consistent with statutory and regulatory provisions. The estimates of SLIAG-related costs for each program or activity must also be supported by descriptions of the methodologies and assumptions employed to derive the cost estimates, e.g., number of eligible legalized aliens, participation rates, and unit costs or other measure of costs (along with a description of the method used to derive cost factors).

We encourage the State's chief executive officer or other appropriate State officials to consult with appropriate local public officials or their representatives concerning the data which the Act requires the State to submit as part of its application, namely the estimated number of eligible legalized aliens and estimated SLIAG-related costs incurred by State and local governments. The Act provides that the method of allocating funds among State and local agencies must be "fair" in accordance with these data and other factors. Although we are not requiring such consultation as a condition of our approval of a State's application, we believe local government input into the development of these data is essential.

Criteria for and Administrative Methods of Disbursing Funds

Section 204 of the Act requires that applications for SLIAG funds contain criteria for and administrative methods of disbursing funds.

Single Point of Contact

For administrative efficiency, we have required that a State designate a single point of contact (SPOC) between the State and Federal government. This SPOC may, but need not be, the administering agency. The SPOC is responsible for securing and submitting information required by the Act (e.g., the application including any necessary amendments, and the State's annual report).

The proposed regulation also provided that the State include in its application information on the SPOC and grantee agency, if different from the SPOC. We have noted in the final rule that this information need be included only if the information had not previously been given to the Department or if the information has changed.

We received several comments which addressed the proposed application content. We have described below the various comments and our responses to them.

Comment (Amend Number of ELAs)

One commenter recommended that we allow States to amend their applications to change the number of eligible legalized aliens, if warranted.

Response

The issue concerns whether a State may revise its estimate of eligible legalized aliens population after the application process has been completed. Nothing in the regulation precludes States from amending their SLIAG applications, including revising the estimated number of eligible legalized aliens in the State. However, for the purposes of the allocation formula, described in Subpart D, the Secretary will use INS data on the number of eligible legalized aliens in each State and will not update this information during a fiscal year (except for FY 1988 and FY 1991, as provided for in Subpart D).

We note that a State's estimate of eligible legalized aliens made at the beginning of a fiscal year does not establish a ceiling on the number of individuals that may receive assistance in a fiscal year.

Comment (Other Grantees)

One commenter suggested that, in the event a State does not apply or fails to qualify for funding, individual associations and nonprofit organizations be given the opportunity to apply.

Response

The Act is explicit. States are the recipients of State Legalization Impact Assistance Grants. Unlike some other HHS program statutes, the Act makes no provision for a "bypass" to other potential grantees in the event that a State fails to qualify for an allotment.

Comment (Required Consultation)

Several commenters suggested that the Department, by regulation, require States to consult with or give defined roles to various entities, including units of local government, the State legislature, and appropriate non-profit service providers, in the development of the State application for funding.

Response

Section 204(d) of the Act sets forth the State's obligations in applying for SLIAG funds. We believe that State consultation with local government officials in the development of data for the State application is essential. However, we believe that the extent of such consultation should be left to the discretion of the State and is not a matter appropriate to Federal regulation.

The Act, unlike some other HHS program statutes, does not explicitly define a role for the State legislature or other entities in the development of State applications. We decline to regulate normal governmental processes within the State.

Comment (SAW Data)

One commenter suggested that we require States to provide data in their applications and reports which break down the number of SAWs, and the types and cost of services provided to SAWs.

Response

The Act requires only that States submit information on eligible legalized aliens in their applications. Imposition of such a requirement would require State and local governments to track separately the various categories of eligible legalized aliens, adding to administrative burden and expense. Therefore, we have not imposed any additional Federal reporting requirements on States with respect to SAWs. We also note that the Act requires that, in order to be reimbursable under SLIAG, programs of public assistance and public health assistance be generally available to the citizens of a State. Thus, these services would have to be available to SAWs as well as to aliens who adjust under section 245A.

Comment (Local Costs)

Several commenters noted that, in response to section 204(d)(2)(b), applications should include information on costs each locality is likely to incur.

Response

We do not believe that the Act clearly requires that States show separately the costs each unit of government is likely to incur; nor is this information necessary for Federal administration of SLIAG. Therefore, we have declined to adopt this comment. However, the fact that we are not requiring cost data to be broken down by units of local government does not preclude a State from including such information in its application.

Comment (Certifying Agent)

One commenter recommended that we allow each State to determine its own certifying agent and process, as long as the State meets the requirements of the Act.

Response

While the Act does not specify who the certifying agency should be, it does require certification to assurances by the States in order to receive SLIAG funds. For the reasons noted in the introduction to this section, we believe it is appropriate to require that a State's chief executive officer or his/her designee certify to the assurances.

Comment (Local Right of Appeal)

One commenter suggested that we give municipalities the right to appeal the State's funding, if they can demonstrate that the allocation process within the State is unfair.

Response

There is nothing in the Act or regulations which prohibits a city or any unit of local government from addressing the allocation process within a State. Any such process would be an internal State administrative or judicial matter. Therefore, we have declined to regulate in this area.

Comment (Administrative Costs)

One commenter suggested that we specify whether program-specific administrative costs should be disaggregated from other administrative costs in the application.

Response

We have revised the final rule by requiring States to provide estimates of SLIAG administrative costs in their applications. Program-specific administrative costs should be included under the relevant category, i.e., public assistance, public health assistance, or educational services.

Application Format

Desiring to provide States with flexibility, the Secretary is not prescribing any particular format for the application. Each State should insure that its submission satisfies the requirements of the Act and this regulation.

Comment (Model Application)

Two commenters recommended that we send States a "model" application.

Response

Desiring to provide States with flexibility, we have not prescribed the format for SLIAG applications. However, we will work with interested States to develop a model State application. Use of this model application would be voluntary.

Application Deadline

Section 204(d) of the Act requires the Secretary to allot SLIAG funds to States with approved applications. A State's allotment is affected by the number of States with approved applications and by SLIAG-related costs. Consequently, prior to determining allocations, we need to know (1) the number of States with approved applications and (2) the SLIAG-related costs associated with those States applying for funds.

In response to public comments, we have changed the due date for FY 1988 applications from December 31, 1987, as originally proposed, to May 16, 1988. This change is appropriate because this regulation was not available to States prior to the beginning of FY 1988. In addition, as noted by several commenters, the Department does not need to know the actual number of States applying for assistance and their SLIAG-related costs until late in FY 1988. We have adjusted the due date accordingly to allow States additional time to prepare and submit applications.

Additionally, we have revised the application deadlines for FY 1989 through FY 1991. We believe that these deadlines allow States a reasonable amount of time to develop applications for funds and provide a reasonable amount of time for the Secretary to review applications and allocate funds at the beginning of the fiscal year to those States with approved applications. (This change was prompted in large part by comments concerning the time allowed a State to revise its application after HHS's disapproval, as discussed below.)

The final rule provides the following application deadlines.

Fiscal year	Deadline
FY 1988	May 16, 1988.
FY 1989	July 15, 1988.
FY 1990	July 15, 1989.
FY 1991	July 15, 1990.

If a State fails to submit an application by the application deadlines established in this regulation, it will not receive an allotment for that fiscal year.

It is the State's responsibility to ensure that its application is approvable by July 1, 1988 (for FY 1988) in order for the Department to issue final FY 1988 grant awards and by October 1 for subsequent fiscal years in order for the department to issue fiscal year grant awards. A State which submits its application on July 15 should assume it will have no more than 30 to 45 days to revise a deficient application. If a State anticipates that it would need more time, it should submit its application earlier.

Public comments received concerning the application deadline are discussed below.

Comment (Time Frame for Approval)

Several commenters expressed concern about the time frames and process involving approval and disapproval of applications. One commenter suggested that the Department send notices to States regarding approaching deadlines for State applications.

Response

Most of the concern revolves around the short time between the publication of the final regulations for SLIAG and the proposed application deadline for FY 1988 of December 31, 1987. In response to this concern, we have revised the final rule providing an application deadline of May 16, 1988 for FY 1988 SLIAG applications.

We have also revised the application deadlines for FY 1989 through FY 1991 as indicated above to allow States a reasonable amount of time to develop applications, to provide an opportunity for the Department to review them prior to the beginning of the fiscal year, and to provide significant time subsequent to Federal review for States to submit any information necessary in order to have their applications approved.

We do not think it is necessary to send State agencies notice of approaching deadlines, as suggested by one commenter.

Generally, States should allow 30 days for the Department's review of their application, depending on the complexity of the State's activities and the amount of information provided within the application.

Basis for Approval

The Department will review each State's application to ensure that it contains all of the required assurances and information and is consistent with the Act and this Part. We will evaluate the programs and activities included in the State's application to determine if costs associated with them would be allowable under the Act and this Part. We will also assess the reasonableness of the cost estimates provided in the State's application according to the criteria enumerated in this Part. The Department's approval of State applications will be predicated on that review.

Our evaluation of the reasonableness of States' SLIAG-related cost estimates will be based on the following criteria:

—Are the activities for which estimates are included in the application allowable under the Act and this Part?

—Are the rates of participation by eligible legalized aliens in the activities for which estimates of SLIAG-related costs are included in the application and other assumptions underlying the cost estimates based on reliable empirical data?

—To what extent are the estimates based on actual costs incurred? Are actual costs based on methodologies described in this Part or other methodologies likely to result in valid measures of SLIAG-related costs?

—Do current estimates appear to be consistent with past estimates, known actual costs pursuant to paragraph 402.41(c)(2), and current INS eligible legalized alien population data?

—Are revised estimates a result (all or in part) of changes in program activities?

We will work with States to correct any deficiencies or problems that we find with the programs or activities for which they claim SLIAG-related costs or with the methodology or assumptions used to provide data on SLIAG-related costs. If we are unable to resolve our concerns and conclude that the magnitude of the problem is sufficient that, if uncorrected, we would be unable to provide for an equitable allocation of funds based on the information provided in the State's application, we will deny that State's application.

Subsequent to its review, the Department will notify the State that the State's application is either approved or disapproved, together with the reasons for disapproval.

Approval of a State's FY 1988 application prior to the State's obligation of its own funds for allowable costs, to be subsequently reimbursed or paid for under SLIAG, is not mandated. A State may use SLIAG funds to reimburse itself for expenditures made in FY 1988 prior to approval of its application as long as such obligations are consistent with the State's subsequently approved application, the Act, this regulation, and the terms and conditions of the grant. (Applications for FY 1989 through FY 1991 must be approved prior to the beginning of the fiscal year. Therefore, the issue of reimbursement for costs incurred prior to our approval of a State's application is not relevant for those years.)

Public Availability

The Act contains no public participation or public hearing requirement related to public availability of a State's application or the manner in which it intends to expend SLIAG funds. We have not included such a requirement by regulation. However, believing public disclosure is appropriate, we encourage States to make their applications for SLIAG funds available for public inspection.

Comment (Public Participation)

One commenter suggested that public participation in the formulation of State plans should be mandatory.

Response

Since the Act does not specifically require public participation in the formulating of State plans, we have declined to make such a requirement by regulation. As noted, however, we do consider the availability of public inspection and comment on State applications to be both appropriate and important.

Amendments to Applications

As a result of other changes made in the application content and allocation procedures, we have added a paragraph (402.45) providing for amendments to applications. A State must amend its application when the State adds an activity or programs for which it intends to make payment or claim reimbursement in that fiscal year.

Subpart F—Recordkeeping and Reporting

Recordkeeping

The regulation provides that States must maintain records that are necessary to demonstrate that their expenditures of SLIAG funds meet the requirements of the Act and applicable Departmental regulations, to permit the State to prepare the annual report on its activities required by the Act and this Part, and to permit the State to comply with fund accounting requirements by tracking funds to allowable expenditures.

Comment

Comments received on recordkeeping focused on identifying eligible legalized aliens for purposes of documenting the allowability of expenditures. One commenter noted that if States were required to identify and track eligible legalized aliens who use the public health system, it would be a deterrent and might be discriminatory.

Response

States are responsible for ensuring that SLIAG funds are expended only for allowable purposes. Subpart C of the regulation establishes procedures to ensure that SLIAG funds are expended consistent with the requirements of the Act and this regulation.

In addition, each recipient must establish the allowability of costs. This will most likely require some accounting of eligible legalized aliens receiving benefits or services. Because SLIAG funds are appropriated for a specific purpose, we believe a connection between eligible legalized aliens and the use of SLIAG funds is unavoidable.

We share the commenter's concern that if the regulation requires States to identify and track eligible legalized aliens who use the public health system, then it may become a deterrent. Consequently, the final rule, as well as the proposed rule, contains a method for establishing SLIAG-related costs associated with public health which does not require identification of eligible legalized aliens. The use of this method is optional. (See Subpart C.)

Comment (Track Fiscal Years Separately)

Two commenters objected to the requirement that each year's appropriation be tracked separately.

Response

It is the State's responsibility to maintain adequate fiscal records to support the costs claimed under SLIAG. Since SLIAG funds may not be used for costs incurred in a prior fiscal year, we believe each State must track each year's appropriation separately to demonstrate that SLIAG funds were used for costs incurred in that fiscal year. The separate tracking of grant funds by fiscal year is standard in most HHS programs. We see no basis for an exception for SLIAG.

Reporting

Section 204(e)(1)(A) of the Act requires States to submit to the Secretary annual reports containing such information as will allow the Secretary: (1) To secure an accurate description of activities funded under SLIAG; (2) to secure a complete record of the purposes for which SLIAG funds were spent, including the recipients of such funds; and, (3) to determine the extent to which funds were expended consistent with the Act and this Part. In addition, section 204(e)(1)(B) of the Act requires the Secretary to report annually to Congress on activities funded under SLIAG and to provide copies of his report to the States.

The final regulation requires States to submit annual fiscal reports to the Department. These reports must report the status of SLIAG funds, including: (1) Identification of the amount obligated and the amount expended by the grantee agency; (2) the amount remaining unobligated which the State intends to carry forward to the succeeding fiscal year; and, (3) any amount unobligated which the State does not desire to carry forward States' fiscal reports must be submitted on SF–269.

We have deleted the requirement that States' fiscal reports contain status of funds (expenditure) information for recipients other than the administering agency. We concluded that this information was unnecessary for Federal administration of the program and its reporting would have been unduly burdensome for States.

We have eliminated the proposed requirement for a separate program report. We have amended the requirement for States' reporting of actual SLIAG-related costs under § 402.51(e) to include amounts of SLIAG grant funds obligated in each program or activity in which SLIAG-related costs were incurred. This approach provides us with the minimum information necessary to provide program oversight and to fulfill our requirement to report to Congress on the use of SLIAG funds and reduces considerably the amount of information that States are required to report to us.

We have amended the proposed rule to require that State reports on actual SLIAG-related costs pursuant to § 402.51(e) must contain the same information and level of detail as State applications.

We have added the requirement that the report must contain a description of the methodology used to determine actual costs, if the methodology is different from the description provided in the State,s application. We have also added a requirement that this report contain information on the State and Federal costs of providing assistance under Medicaid to eligible legalized aliens who adjusted status under section 245A or 210A (but not section 210), as explained below.

These reports must be submitted within 90 days from the end of the Federal fiscal year.

If a State fails to submit a final report or if the State,s final report does not contain data on actual SLIAG-related costs, we will not count any costs for that year in the calculation of future years' allocations.

Comments received on our proposed rules concerning reporting are addressed below:

Comment (Level of Detail for Required Information)

We are required by law to consult with the General Accounting Office, as well as States, on reporting requirements for SLIAG. The General Accounting Office recommended that we require States to report considerably more information than is included in the final rule.

Response

We believe that the information sought by the General Accounting Office can be obtained in other ways, including a survey which the INS has commissioned, voluntary reports from States with large numbers of ELAs, and program reviews.

Comment (Involvement of Non-Profit Agencies)

One commenter requested that State annual reports identify efforts made by the State to involve non-profit agencies in the provision of services under SLIAG.

Response

This information is not necessary either for Federal administration of SLIAG or for the report which the Secretary is required to submit to Congress. Therefore, we have not incorporated this suggestion into the final regulation.

Comment (Reporting on SAWs)

A few commenters urged that State reporting and voluntary cost estimates include the number of SAWs, and the types and services provided to them.

Response

We recognize that subgroups of eligible legalized aliens may place different demands on State and local government programs. However, information on these subgroups is neither required by the Act nor necessary for Federal administration. Therefore, we are not requiring by regulation the reporting of this information or information on other subgroups of the eligible legalized alien population (e.g., nationalities or ethnic groups).

Comment (90 days)

Several commenters suggested that the requirement that the annual report be submitted within 90 days after the close of the fiscal year is too stringent.

Response

We proposed a due date of 90 days after the end of the fiscal year because that is the standard requirement under 45 CFR Part 74, Administration of Grants, which governs SLIAG. However, in response to public comments, we have modified the final rule. As noted above, we have deleted from the State financial status report and report on activities information on recipients' status of funds. The requirement in the final regulation now corresponds to the fiscal information normally required of State grantees. Consequently, we see no need to extend the due date of this report beyond 90 days after the end of the fiscal year.

Comment (Data for Federal Offset)

Two commenters recommended requiring States to report information necessary to determine the Federal offset. One commenter suggested recomputing the Federal offset on a quarterly basis.

Response

We have changed the final rule to require States' actual SLIAG-related cost reports to show Federal and State/local costs associated with providing Medicaid assistance to aliens who have adjusted status under section 245A or 210A. We are not requiring the separate reporting of such data for aliens who have adjusted under section 210 (special agricultural workers). Costs associated with this latter group are not part of the offset.

We concluded that this is the most efficient method to obtain information on what we expect will be the largest single component of the Federal offset to SLIAG. We do not expect that this requirement will impose a significant burden on States. Based on consultations with State officials and public comment on the proposed rule, we believe that most States will be tracking Medicaid costs associated with eligible legalized aliens in order to claim SLIAG reimbursement for the State/local share of those costs.

We have concluded that requiring similar data on other programs included in the offset would be impractical. Most programs of financial assistance (as defined in section 245A(h)(1) of the Act and Department of Justice regulations) will involve very small amounts that could be included in the Federal offset. Further, these programs are funded primarily with Federal monies. Therefore, we do not expect that States will be tracking costs associated with eligible legalized aliens in these programs.

Recomputing the offset on a quarterly basis would involve more frequent reporting by States. We concluded that this would be unduly burdensome and have not adopted this suggestion.

Comment (Caseload Data)

One commenter recommended that the annual report include caseload data for public assistance and enrollment data for educational services, as well as information on the amount of funding each unit of government received, by program type.

Response

If a State chooses to include caseload and enrollment data in its annual report, we will incorporate such information in our report to Congress. However, because this information is not necessary for Federal program administration, in an effort to keep recordkeeping and reporting requirements to a minimum, we have not required submission of this information.

Comment (Data for Each Unit of Government)

Two commenters suggest that the annual report contain, in addition to the amount of actual SLIAG-related costs incurred for each unit of government, information on the amount of funding each unit of government received.

Response

The final regulation requires States to show the amount of SLIAG funds obligated to each program or activity in which SLIAG-related costs were incurred in the fiscal year. This corresponds to the level of detail required in States' applications. A further breakdown by units of government is not necessary for Federal administration or reporting purposes. We are therefore not requiring this information to be reported to us.

Comment (Information on Unobligated Balances)

One commenter requested clarification concerning the Department's use of information on amounts remaining unobligated at the end of the fiscal year, and recommended that States should not be penalized for exercising their option to carry over funds within the allowable expenditure time periods.

Response

There is no intent to penalize States for exercising their option to carry over funds. The Act provides that funds allotted by us to a State are available for use (which we interpret to mean obligation) by a State until September 30, 1994. Only those amounts remaining unobligated at the end of the fiscal year which the State specifically indicates in its fiscal report that it does not desire to carry over to the succeeding fiscal year will be deobligated.

Comment (Uniform Format)

One commenter suggested that there should be a uniform format for the reporting of costs.

Response

We require the use of SF–269 for reporting of status of funds information at the State level. This form is required in most HHS grant programs.

We will work with States to develop a model reporting format to promote the efficient and consistent reporting of data. Use of this model format would be optional.

We are also interested in working with States to develop compatible formats for the end-of-year reports and the cost data in State applications. We wish to avoid the need for States to resubmit information previously submitted to us. For example, if the State's application contained a description of activities, those descriptions need not be repeated in its end-of-year report. We recommend that States adopt a cross-referencing system to avoid the submission of duplicative information.

Comment (Provider Information)

One commenter expressed the belief that States should be able to provide a short narrative description of program service components, including an

BEST COPY AVAILABLE

estimate of the number of providers of specific services, to satisfy the report needs.

Response

We have deleted the requirement that States report to us the providers of services. Instead, States must report on programs and activities, as is required in State applications, which provide for a short narrative description.

As noted above, we intend to work with States to develop a voluntary model reporting format to further clarify the type of information to be reported.

FY 1988 Voluntary SLIAG-Related Cost Estimate Submissions

We have deleted the voluntary SLIAG-related cost report from the regulation. Such information is now required as part of States' applications under Subpart E.

Comment (Make Voluntary Report Mandatory)

One commenter recommended making the voluntary cost report mandatory, noting that only States who received too little funds would have an incentive to submit this report. States that had received a higher allocation than they should have would have no incentive to submit the report. Two other commenters recommended incorporating the "common sense data standards" included in the preamble to the proposed rule into the regulation. Still another notes that the cost reports required under the proposed rule do not provide sufficient detail to permit Federal evaluation of whether the costs are consistent with statutory and regulatory provisions. This commenter advocated requiring for each fiscal year the same level of detail as would have been contained in the voluntary cost estimates.

Response

As noted above, the final rule requires that States provide updated cost estimates for the current fiscal year as part of their applications. This accomplishes what the commenters suggested. In addition, it provides the data necessary to ensure accurate and equitable allocations of SLIAG funds.

Executive Order

E.O. 12291 requires that a regulatory impact analysis be prepared for major rules, defined in the Order as any rule that has an annual effect on the national economy of $100 million or more, or certain other specified effects. The Department concludes that the regulation implementing this grant program does not constitute a major rule within the meaning of the Executive Order because it does not have an effect on the economy of $100 million or more or otherwise meet the threshold criteria.

We have determined that executive order 12372 does not apply. Similarly, form 424 does not apply to these regulations.

Regulatory Flexibility Act of 1980

The Regulatory Flexibility Act (5 U.S.C. Ch. 6) requires the Federal government to anticipate and reduce the impact of rules and paperwork requirements on small businesses. For each rule with a "significant economic impact on a substantial number of small entities" an analysis must be prepared describing the rule's impact on small entities. Small entities are defined by the Act to include small businesses, small non-profit organizations, and small governmental entities.

The primary impact of these regulations is on States, which are not "small entities" within the meaning of the Act. Actual delivery of services will be performed primarily by State and local government agencies. Because this regulation provides States with great authority to prescribe management, organization, funding, and eligibility practices for service delivery, they do not directly impact small entities, either favorably or adversely. Instead, their impacts will depend on future State decisions.

We are not required to perform a regulatory impact analysis where the effect of the proposed regulation is speculative, and will be caused by decisions made independently of the Federal government. Therefore, the Secretary hereby certifies that a regulatory flexibility analysis is not required.

Effective Date

Because this regulation is necessary for States to apply for funds for Fiscal Year 1988 and to implement the SLIAG program, we are not using the customary 30-day effective date, but are making these rules effective upon publication.

Paperwork Reduction Act

Sections 402.41, 402.45, 402.50 and 402.51 of this final rule contain information collection requirements. The application requirement contained in this final rule is effective upon publication of the final rule, and has been approved under OMB No. 0970-0079. As required by the Paperwork Reduction Act of 1980, the Department will submit other information collection requirements to the Office of Management and Budget for its review. Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the agency official designated for this purpose whose name appears in this preamble, and to the Office of Information and Regulatory Affairs, OMB, Executive Office of the President, New Executive Office Building (Room 3002), Washington, DC 20503, ATTN: Desk Office for Family Support Administration. After OMB approval is obtained, we will publish the OMB Control number in the **Federal Register**.

List of Subjects

45 CFR Part 16

Administrative practice and procedure, Grant programs—health, Grant programs—social programs.

45 CFR Part 402

Administrative Cost, Allocation Formula, Aliens, Allotment, Education, Grant Programs, Immigration, Immigration Reform and Control Act, Public Assistance, Public Health Assistance, Reporting and Recordkeeping Requirements, State Legalization Impact Assistance Grants.

Administrator, Family Support Administration.

Approved: February 4, 1988.

Otis R. Bowen,

Secretary.

Title 45 of the CFR, Subtitle A and Chapter IV, are amended as follows:

1. Part 402 is added to 45 CFR Chapter IV to read:

PART 402—STATE LEGALIZATION IMPACT ASSISTANCE GRANTS

Subpart A—Introduction

402.1 General.
402.2 Definitions.

Subpart B—Use of Funds

402.10 Allowable use of funds.
402.11 Limitations on Use of SLIAG funds.
402.12 Use of SLIAG Funds for costs incurred prior to October 1, 1987.

Subpart C—Administration of Grants

402.20 General provisions.
402.21 Fiscal control.
402.22 SLIAG and program administrative costs.
402.23 Repayment.
402.24 Withholding.
402.25 Appeals.
402.26 Time period for obligation and expenditure of grant funds.

Subpart D—State Allocations

402.30 Basis of awards.
402.31 Determination of allocations.
402.32 Determination of state allotments.

402.33 Allotment of excess funds.

Subpart E—State Applications

402.40 General.
402.41 Application content.
402.42 Application format.
402.43 Application deadline.
402.44 Basis for approval.
402.45 Amendments to applications.

Subpart F—Recordkeeping and Reporting

402.50 Recordkeeping.
402.51 Reporting.

Authority: Sec. 204, Pub. L. 99-603.

Subpart A—Introduction

§ 402.1 General.

These regulations implement section 204 of Pub. L. 99-603, the Immigration Reform and Control Act of 1986 (IRCA), which establishes State Legalization Impact Assistance Grants (SLIAG) for States for fiscal year 1988 and for each of the three succeeding fiscal years. The purpose of SLIAG is to lessen the financial impact on State and local governments resulting from the adjustment of immigration status under the Act of certain groups of aliens residing in the States, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam. Funds appropriated by this section may be applied by States with approved applications to certain State and local government costs incurred in providing public assistance and public health assistance to eligible legalized aliens and for making payments to State educational agencies for the purpose of assisting local educational agencies in providing certain educational services to eligible legalized aliens.

§ 402.2 Definitions.

As used in this Part—

"The Act" means the Immigration Reform and Control Act of 1986, Pub. L. 99-603.

"Allocation" means an amount designated for a State for a fiscal year, as determined under § 402.31.

"Allotment" means the total amount awarded to a State for a fiscal year, as determined under § 402.32 or, if applicable, § 402.33.

"Department" means the U.S. Department of Health and Human Services.

"Educational Services" means:

(1) For eligible legalized aliens regardless of age enrolled in elementary or secondary school, services allowable under section 607 of the Emergency Immigrant Education Act, 20 U.S.C. 4101, et seq. (Pub. L. 98-511), as in effect on November 6, 1986.

(2) For adult eligible legalized aliens:

(i) Services authorized under the Adult Education Act, 20 U.S.C. 1201 et seq. (Pub. L. 89-750, as amended), as in effect November 6, 1986, and

(ii) English language and other programs designed to enable eligible legalized aliens to attain the citizenship skills required by section 245A(b)(1)(D)(i) of the INA.

"Eligible legalized alien" means an alien whose status has been adjusted to lawful temporary resident under section 245A, 210, or 210A of the Immigration and Nationality Act, beginning on the effective date of such adjustment as established by the Immigration and Naturalization Service, and continuing until the end of the five-year period beginning on the effective date of such adjustment, provided that during that time the alien remains in lawful temporary or permanent resident status granted under the Act.

"INA" means the Immigration and Nationality Act, 8 U.S.C. 1101, et seq.

"*Local educational agency*" means—

(a) A public board of education or other public authority legally constituted within a State for either administrative control of or direction of, or to perform service functions for, public elementary or secondary schools in—

(1) A city, county, township, school district, or other political subdivision of a State; or

(2) Such combination of school districts or counties a State recognizes as an administrative agency for its public elementary or secondary schools; or

(b) Any other public institution or agency that has administrative control and direction of a public elementary or secondary school.

"Local government" has the same meaning as in 45 CFR Part 74.

"*Nonpublic,*" as applied to an agency, organization, or institution, means that the agency, organization, or institution is nonprofit and is not under Federal or public supervision or control.

"*Public,*" as applied to an agency, organization, or institution, means that the agency, organization, or institution is under the administrative supervision or control of a government other than the Federal Government.

"Public assistance" means cash, medical, or other assistance provided to meet the basic subsistence needs or health needs of individuals

(1) That is generally available to needy individuals residing in a State and

(2) That is provided with funds from units of State or local government. As used in this definition, basic subsistence needs are minimal living requirements, including food, shelter and clothing. For purposes of this definition, assistance is considered to have been provided to needy individuals if specified income or resource requirements are used to determine eligibility or the amount of a fee or other charges to be paid for services. "Other assistance" means assistance and services, other than cash or medical assistance, that are directed at meeting basic subsistence needs, and that meet all of the criteria in this definition. "Other assistance" also means assistance and services in which participation is required as a condition of receipt of cash or medical assistance.

"Public health assistance" means health services (1) that are generally available to needy individuals residing in a State; (2) that receive funding from units of State or local government; and, (3) that are provided for the primary purpose of protecting the health of the general public, including, but not limited to, immunizations for immunizable diseases, testing and treatment for tuberculosis and sexually-transmitted diseases, and family planning services.

"Recipient" has the same meaning as in 45 CFR Part 74.

"Secretary" means the Secretary of the Department of Health and Human Services.

"SLIAG-related costs" means expenditures made to provide public assistance, public health assistance, or educational services, as defined in this Part, to eligible legalized aliens, as defined in this Part, regardless of whether those expenditures actually are reimbursed or paid for with funds allotted to the State under this Part. SLIAG-related costs for education are limited to the amount of payment that can be made under the Act for educational services, as described in § 402.11(e). SLIAG-related costs exclude: (1) expenditures by a State or local government for costs which are reimbursed or paid for by Federal programs other than SLIAG; and (2) program income (as defined in 45 CFR 74.42) received from or on behalf of eligible legalized aliens receiving services or benefits for which payment or reimbursement may be made under this Part.

"State" means the 50 States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands of the United States.

"*State educational agency*" means—

(1) The State board of education or other agency or officer primarily responsible for the supervision of public elementary and secondary schools in a State. In the absence of this officer or agency, it is an officer or agency designated by the Governor or State law; or

(2) The State board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools; or if there is a separate State agency or officer primarily responsible for supervision of adult education in public schools, then that agency or officer may be designated for the purpose of the Act by the Governor or by State law. If no agency or officer qualifies under the preceding sentence, the term means an appropriate agency or officer designated for the purpose of the Act by the Governor.

Subpart B—Use of Funds

§ 402.10 Allowable use of funds.

(a) Funds provided under this Part for a fiscal year may be used only with respect to allowable SLIAG-related costs incurred in that fiscal year or succeeding fiscal years in providing assistance with services to eligible legalized aliens subject to § 402.26(a). States may use funds for:

(1) Public assistance, public health assistance, and educational services provided to eligible legalized aliens;

(2) Public health assistance provided to an alien applying on a timely basis to become an eligible legalized alien under section 245A of the INA, but not to those applying under section 210 or 210A of the INA.

(3) SLIAG and program administrative costs, as described in § 402.22 (a) and (b).

(b) Unless specifically prohibited by a statute enacted subsequent to November 6, 1986, a State may use SLIAG funds to pay the non-Federal share of costs allowable under (a) of this section incurred in providing assistance or services to eligible legalized aliens under Federal programs that have a matching or cost-sharing requirement, subject to the provisions of § 402.11(f) of this Part.

(c) To the extent consistent with 45 CFR Part 74 and § 402.22 of this Part, funds provided under this Part may be used for State and local costs associated with meeting the administrative requirements established by the Act and this Part and the administrative costs associated with providing assistance or services to eligible legalized aliens under a program or activity that receives funds under this Part.

(d) Funds under this Part may be used to reimburse or pay costs of providing assistance or services to eligible legalized aliens that are incurred prior to the approval of a State's FY 1988 application and, for all fiscal years, prior to the approval of a State's amendment to its application, pursuant to Subpart E of this Part, provided that such reimbursement or payment is consistent with the Act and this Part.

§ 402.11 Limitations on Use of SLIAG Funds.

(a) Funds provided under this Part that are used for public assistance, public health assistance, and educational services may only be used only with respect to programs in a State or local jurisdiction that (1) meet the definitions of § 402.2, above, and (2) are otherwise consistent with the rules and procedures governing such programs.

(b) Funds provided under this Part may not be used for costs to the extent that those costs are otherwise reimbursed or paid for under other Federal programs.

(c) Funds provided under this Part may be used to reimburse State and/or local expenditures associated with providing public assistance and public health assistance to eligible legalized aliens and to make payments to State educational agencies for the purpose of providing educational services to eligible legalized aliens. However, the amount of reimbursement or payment may not exceed 100 percent of SLIAG-related costs, as defined in this Part, associated with providing public assistance, public health assistance, and educational services.

(d) A State must use a minimum of 10 percent of its allotment under this Part in any fiscal year for costs associated with each of the following program categories: public assistance, public health assistance, and educational services. In the event that a States does not require use of a full 10 percent in one of the above categories, it must allocate the unused portion equally among the remaining categories.

(e) Payments for educational services in any fiscal year may not exceed the amounts described in (e) (3), (4) and (5) of this section, and are subject to the limitations in (e) (1), (2), and (6) of this section.

(1) Payments may be made to a local educational agency in a fiscal year for the purpose of providing educational services to eligible legalized aliens enrolled in elementary or secondary school only if 500 eligible legalized aliens meeting the conditions in (e)(2) of this section, are enrolled in elementary or secondary public or non-public schools in that local educational agency's jurisdiction in that fiscal year or if such eligible legalized aliens represent at least 3 percent of the total number of students enrolled in elementary or secondary public or non-public schools within that local educational agency's jurisdiction in that fiscal year.

(2) In computing payments to local education agencies or to providers of educational services described in section 204(c)(3)(C) of the Act, State educational agencies may take into account only eligible legalized aliens who have been enrolled in elementary or secondary school, public or non-public school or in educational activities for adults described in § 402.2 in the United States for fewer than three complete academic years.

(3) The amount that may be paid in any fiscal year to a local educational agency with respect to eligible legalized aliens enrolled in elementary and secondary public or non-public school may not exceed an amount equal to $500 (less, in States receiving Emergency Immigrant Education Act (EIEA) funds, the amount described in (e)(6) of this section) multiplied by the number of eligible legalized aliens meeting the criteria specified in (e)(2) of this section, who are enrolled in public or private non-profit elementary and secondary schools in the jurisdiction of that local educational agency in that fiscal year.

(4) The amount that may be paid in any fiscal year to a local educational agency or other provider of educational services for adults (who are not enrolled in elementary or secondary school), as described in section 204(c)(3)(C) of the Act, may not exceed an amount equal to $500 multiplied by the number of eligible legalized aliens meeting the criteria in paragraph (e)(2) of this section who receive educational services from that provider in that fiscal year.

(5) In no event may the amount paid to a local education agency or other provider of educational services exceed the actual cost of providing those services to eligible legalized aliens, as determined in accordance with this Part and 45 CFR Part 74.

(6) The maximum amount of payment to a local educational agency with respect to eligible legalized aliens enrolled in elementary and secondary school will be reduced from the amount described in (e)(3) of this section, by an amount equal to the amount of funds received by the local educational agency with respect to such eligible legalized aliens pursuant to section 606 of the Emergency Immigrant Education Act.

(f) Funds provided under this Part may not be used to provide assistance under the programs of financial assistance from which eligible legalized aliens are barred by section 245A(h)(1), 210(f), or 210A(d)(6) of the INA. However, such funds may be used for the State and local share of the costs of providing such assistance to eligible legalized aliens who are excepted from the bar by section 245A(h) (2) or (3), 210(f), or 210A(d)(6) of the INA, provided that such individuals are otherwise eligible for benefits under such programs, and that the costs of providing those benefits are otherwise allowable under the Act, this regulation, and the State's approved application.

(g) Funds provided under this Part shall not be used to perform abortions except where the life of the mother would be endangered if the fetus were carrier to term.

(h) Funds provided under this Part shall not be used to reimburse or pay costs incurred by any public or private entity or any individual, in the conduct of a medical examination as required for application for adjustment to lawful temporary resident status under 8 CFR 245a.2(i) (52 FR 16212, May 1, 1987) or 8 CFR 210.2(d) (52 FR 16201, May 1, 1987).

§ 402.12 Use of SLIAG Funds for Costs Incurred Prior to October 1, 1987.

(a) Except as indicated in (b) and (c) of this section, States may not use funds provided under this Part of costs incurred prior to October 1, 1987.

(b) A State may use funds provided under this Part for administrative costs incurred prior to October 1, 1987, but after November 6, 1986, that are directly associated with implementation of this Part. Such costs may include planning, preparing the application, establishing fund accounting and reporting systems, data development associated with the application, and other costs directly resulting from planning for implementation of this Part.

(c) A State may use funds provided under this Part for costs incurred prior to October 1, 1987, but after November 6, 1986, in providing public health services to eligible legalized aliens and to applicants for lawful temporary residence under section 245A of the INA, in conformity with the provisions of § 402.10(a).

Subpart C—Administration of Grants

§ 402.20 General provisions.

Except where otherwise required by Federal law, the Department's rules located at 45 CFR Part 74, relating to the administration of grants, apply to funds provided under this Part.

§ 402.21 Fiscal control.

(a) Fiscal control and accounting procedures must be sufficient to permit preparation of reports required by the Act, this regulation, and other applicable statutes and regulations.

(b) States must have accounting procedures in place which allow funds provided under this Part to be traced from drawdown to allowable SLIAG-related costs. Allowability of the amount and purpose of expenditures must be established for each recipient of SLIAG funds. States must demonstrate that SLIAG-related costs, as defined in this Part, incurred in providing assistance or services to eligible legalized aliens equal or exceed the amount of SLIAG funds provided for those particular assistance and service activities. Documentation of the method of accounting and appropriate supporting information must be available for audit purposes and for Federal program reviews. To establish allowability of expenditures, States may use methods prescribed in (c) of this section. Alternatively, the State may use any other reliable method of cost calculation, subject to Federal review.

(c)(1) For public assistance, States may establish allowability by accounting for actual expenditures made to or on behalf of identifiable eligible legalized aliens who qualify for and receive assistance and/or services from the recipient, or by use of a statistically valid sampling of a recipient's public assistance caseload.

(2) For public health assistance, States may establish allowability by accounting for actual expenditures made to or on behalf of identifiable eligible legalized aliens who qualify for and receive such assistance and/or services, by use of a statistically valid sampling of clients in the public health system of the State or local government, or by using the ratio of eligible legalized aliens in a service population to all members of the relevant service population.

(3) For educational services, States must be able to demonstrate that:

(i) Funds provided under this Part were used to provide educational services, as defined in this Part, to eligible legalized aliens, as defined in this Part; and,

(ii) Payments to local educational agencies or other providers of educational services, as described in section 204(c)(3)(C) of the Act, did not exceed the amounts described in § 402.11(e) of this Part.

§ 402.22 SLIAG and program administrative costs.

(a) SLIAG administrative costs allowable under this Part include the direct and indirect costs related to administration of this Part, including: planning and consultation with local officials, preparing the application, audits, allocation of funds, tracking and recordkeeping, monitoring use of funds, and reporting.

(b) Program administrative costs are those costs associated with administering allowable assistance or services provided to eligible legalized aliens. Such costs may be based: On the proportion of eligible legalized aliens provided assistance and/or services allowable under this Part by a recipient, relative to all persons provided such assistance and/or services; on the proportion of program or service costs actually incurred in providing assistance and/or services allowable under this Part by a recipient, relative to all costs of providing the same assistance and/or services allowable under this Part by the recipient; or, on such other basis as will document that administrative costs incurred in providing such assistance and/or services and reimbursed under this Part are allowable, allocable to SLIAG, and reasonable.

(c) Consistent with section 604 of the Emergency Immigrant Education Act, of the amount paid to a State educational agency for educational services, only 1.5 percent may be used for administrative costs incurred by the State educational agency in carrying out its function under this Part.

§ 402.23 Repayment.

The Department will order a State to repay amounts found not to have been expended in accordance with Federal law, regulations, the State's approved application, or terms of the State's grant. If a State refuses to repay such amounts, the Department may offset the amount against any other amount to which the State is or may become entitled under this Part.

§ 402.24 Withholding.

After notice and opportunity for a hearing, the Secretary may withhold payment of funds to any State which is not using its allotment in accordance with the Act, these regulations, 45 CFR Part 74, and terms of the grant award.

§ 402.25 Appeals.

Appeals under this Subpart will be subject to 45 CFR Part 16, Procedures of the Departmental Grant Appeals Board.

§ 402.26 Time Period for Obligation and Expenditure of Grant Funds.

(a) Any amount awarded to a State for a fiscal year and remaining unobligated at the end of such year shall remain available to the State for obligation in subsequent fiscal years, but not after September 30, 1994.

(b) Obligations by the State must be liquidated within 12 months of the end of the Federal fiscal year in which the obligation was made. However, where a State can demonstrate extenuating circumstances that prohibit compliance with this requirement, the Secretary may extend such date upon request by the State.

Subpart D—State Allocations

§ 402.30 Basis of awards.

The Secretary will award funds in a fiscal year to States with approved applications for that fiscal year in accordance with the apportionment of funds from the Office of Management and Budget. The grant award constitutes the authority to draw and expend funds for the purposes set forth in the Act and this regulation.

§ 402.31 Determination of allocations.

(a) *Allocation formula.* Allocations will be computed according to a formula using the following factors and weights:

(1) 50 percent based on the State's eligible legalized alien population, with 49 percent based upon the number of eligible legalized aliens in a State relative to the number of such aliens in all States, and 1 percent to States which have higher-than-average ratios of eligible legalized aliens to total population relative to the average for all States, based on the proportional number of such aliens; and

(2) 50 percent based on the ratio of SLIAG-related costs in a State to the total of all such costs in all States.

(b) *Calculation of allocations.* Each time the Department calculates State allocations, we will use the best data then available to the Secretary on the distribution of eligible legalized aliens by State. Allocations will be calculated as follows:

(1) *Initial FY 1988 allocations.* In FY 1988, initial State allocations will be calculated by applying the formula described in (a) of this section to 50 percent of the SLIAG funds available for grants to States in FY 1988. SLIAG-related costs will be based on Federal estimates of such costs.

(2) *Final FY 1988 allocations.* Final allocations for FY 1988 will be calculated by applying the formula described in (a) of this section to 100 percent of the SLIAG funds available for grants to States for FY 1988. SLIAG-related costs for FY 1987 and FY 1988 will be obtained from States' FY 1989 applications, as required by § 402.41(c). (If a State does not submit an application for FY 1989, it still must submit the information described in paragraph 402.41(c) in order to receive its final allocation for FY 1988.)

(3) *FY 1989 allocations.* Allocations for FY 1989 will be determined by applying the allocation formula described in (a) of this section to the total amount of funds available for grants to States in FY 1988 and FY 1989. For purposes of calculating State allocations, the Department will use the SLIAG-related costs for FY 1987, FY 1988, and FY 1989 reported in each State's application submitted pursuant to § 402.41(c) of this Part, as approved by the Secretary.

(4) *FY 1990 allocations.* Allocations for FY 1990 will be determined by applying the allocation formula described in paragraph (a) of this section to the total amount of funds available for grants to States in FY 1988, FY 1989, and FY 1990. For purposes of calculating FY 1990 State allocations, the Department will use the following sources of data for SLIAG-related costs:

(i) For FY 1987 and FY 1988, the report required by § 402.51(e). In the event that a State has not submitted this report, the Department will include no costs for FY 1987 or FY 1988 for that State in its calculation of FY 1990 allocations.

(ii) for FY 1989 and FY 1990, the estimates of SLIAG-related costs contained in States' applications submitted pursuant to § 402.41(c) of this Part, as approved by the Secretary.

(5) *Initial FY 1991 Allocations.* Initial FY 1991 allocations will be calculated by applying the formula described in (a) of this section to the total amount of funds made available for grants to States for FY 1988, FY 1989, and FY 1990, plus 75 percent of funds available for grants to States for FY 1991. For purposes of calculating FY 1991 State allocations, the Department will use the following sources of data for SLIAG-related costs:

(i) For FY 1987, FY 1988, and FY 1989, the reports required by § 402.51(e). In the event that a State has not submitted a report for a fiscal year, the Department will include no costs for that fiscal year for that State in its calculation of initial FY 1991 allocations.

(ii) For FY 1990 and FY 1991, the estimates of SLIAG-related costs contained in the States' applications submitted pursuant to § 402.41(c) of this part, as approved by the Secretary.

(6) *Final FY 1991 Allocations.* Final allocations for FY 1991 will be determined by applying the allocation formula described in (a) of this section to the total amount of funds available for grants to States in FY 1988, FY 1989, FY 1990, and FY 1991. For purposes of calculating FY 1991 State allocations, the Department will use the following sources of data for SLIAG-related costs:

(i) For FY 1987, FY 1988, FY 1989, and FY 1990, the reports required by § 402.51(e). In the event that a State has not submitted a report for a fiscal year, the Department will include no costs for that fiscal year for that State in its calculation of final FY 1991 allocations.

(ii) For FY 1991, the estimates of SLIAG-related costs contained in the States' applications submitted pursuant to § 402.41(c) of this part, as approved by the Secretary.

§ 402.32 Determination of state allotments.

Except as noted below, a State's allotment is the difference between the amount determined under § 402.31(b) (2) through (6) of this regulation and the cumulative amount previously allotted to the State. In the event that the amount determined under § 402.31(b) (2) through (6) is less than the cumulative amount previously allotted to a State, that State's allotment will be zero. The allotments of the remaining States would be calculated by multiplying the difference between the amount determined under § 402.31(b) (2) through (6) of this regulation and the cumulative amount previously allotted to the State by the ratio of the amount of funds available for grants to States to the sum of the differences between the amounts determined under § 402.31(b) (2) through (6) and the amounts previously awarded to those States. For purposes of determining final FY 1988 State allotments, the amount previously allotted to a State will be the amount allocated and awarded to the State pursuant to § 402.31(b)(1).

§ 402.33 Allotment of excess funds.

If a State fails to qualify for an allotment in a particular fiscal year because it did not submit an approvable application by the deadline established in § 402.43 of this Part, or is not allotted its designated allocation amount because it indicated in its application that it does not intend to use, in the fiscal year for which the application is made or in the succeeding fiscal year, the full amount of its allocation, funds which would otherwise have been allotted to the State in that fiscal year shall be allotted among the remaining States submitting timely approved applications in proportion to the amount that otherwise would have been allotted to such States in that fiscal year.

Subpart E—State Applications

§ 402.40 General.

In order to be eligible for funds available under this Part in a fiscal year, a State must submit an annual application. A State's application must be approved by the Secretary prior to the award of funds to that State.

§ 402.41 Application content.

A State application must:

(a) Contain certifications by the chief executive officer or an individual specifically designated to make such certifications on behalf of the chief executive officer that, notwithstanding other contents of the application, the State assures that:

(1) Funds allotted to the State will be used only to carry out the purposes described in the Act and this Part.

(2) The State will provide a fair method for the allocation of funds among State and local agencies (as determined by the State) in accordance with the information in the application as required under (b) and (c) of this section and in accordance with the provisions of § 402.11(d) of this Part, which sets forth minimum funding levels for program categories.

(3) Fiscal control and accounting procedures used in the administration of SLIAG funds will be established that are adequate to meet the requirements established by the Act and this regulation.

(4) The State will comply with the prohibitions against discrimination on the basis of age under the Age Discrimination Act of 1975, on the basis of handicap under section 504 of the Rehabilitation Act of 1973, on the basis of sex under title IX of the Education Amendments of 1972, on the basis of race, color, or national origin under title VI of the Civil Rights Act of 1964, and on the basis of sex or religion under section 204(h)(1)(B) of the Immigration Reform and Control Act of 1986.

(b) Contain information on the number of eligible legalized aliens residing in the State. A State may either (1) adopt as its official State-level estimate the estimate of the State's number of eligible legalized aliens provided by the Department, or (2) provide its own estimate, including detailed information on the method and data used in deriving the estimate.

(c)(1) Contain an estimate of likely SLIAG-related costs for the fiscal year for which application is being made for each program or activity in which SLIAG-related costs will be incurred. Programs and activities must be identified by purposes described in § 402.10(a), that is, public assistance, public health assistance, and educational services, and SLIAG administrative costs as defined in § 402.22 (a) and (c). Such estimates for FY 1988 should include, as a discrete subset, costs incurred in FY 1987, pursuant to § 402.12.

(2) For applications for FY 1989, FY 1990, and FY 1991, in addition to the information in (c)(1) of this section contain updated estimates of SLIAG-related costs for each program or activity in which SLIAG-related costs have been or will be incurred in the fiscal year in which the application is being submitted. Programs and activities must be identified by the purposes described in § 402.10(a), that is, public assistance, public health assistance, educational services, and SLIAG administrative costs as defined in § 402.22(a). (SLIAG-related costs incurred in FY 1987 pursuant to § 402.12 of this Part are to be included, as a discrete subset, in the updated estimate of FY 1988 costs.)

(d) Contain the following information pertaining to the estimates required by (c) (1) and (2) of this section (the application must include sufficient detail to permit assessment by the Department of the reasonableness of such estimates and the allowability of such costs under the Act and this Part):

(1) Descriptions of the programs and activities for which SLIAG-related costs have been or will be incurred.

(2) Descriptions of the methodologies used to determine SLIAG-related cost. This description is to include (i) the methodology used in determining the proportion (or actual number) of eligible legalized aliens who are likely to participate in or benefit from the program or service, and (ii) a description of how a unit or other measure of the cost of providing services or benefits was calculated, or, if the estimate is based on actual cost data, a description of how the data were obtained.

(e) Contain information on the criteria for and administrative methods of disbursing funds received under this Part.

(f) Designate a single point of contact (SPOC) in the State responsible for securing and submitting information required by the Act and this regulation and provide the name, title, mailing address, and telephone number of such official. If the grantee agency is different from the SPOC, also provide the name, title, mailing address, and telephone number of the official in that agency responsible for State administration of funds available under this Part. In either case, provide the employer identification number of the grantee agency.

If a State has previously provided this information to the Department, it need not be included in the application unless the information has changed.

§ 402.42 Application format.

A State may determine the format of its application as long as it contains all the information required by § 402.41.

§ 402.43 Application deadline.

(a) An application from a State for SLIAG funds for Federal fiscal year 1988 must be received by the Department by May 16, 1988. Applications for Federal fiscal years 1989, 1990, and 1991 must be received no later than July 15, 1988, July 15, 1989, and July 15, 1990, respectively. If a State fails to submit an application by these dates, funds which it may otherwise have been eligible to receive shall be distributed among States submitting timely approved applications in accordance with § 402.33 of this Part.

(b) In order to receive funds under this Part for FY 1988, a State's application must be approvable by the Secretary by July 1, 1988. In order to receive funds under this Part for FY 1989, FY 1990, and FY 1991, a State's application must be approvable by the Secretary by Ocotober 1, 1988, October 1, 1989, and October 1, 1990, respectively. This may necessitate a State's providing clarification, revision, or additional material, as required, to render its application approvable by the Secretary. If a State fails to render its application approvable by the Secretary by these dates, funds which it may otherwise have been eligible to receive shall be distributed among States which have submitted approvable applications in accordance with § 402.32 of this Part.

§ 402.44 Basis for approval.

(a) The Department will review each State's application to ensure that it contains all of the required assurances and information and otherwise is consistent with the Act and this Part.

(b) The Department will assess the reasonableness of each State's estimates of SLIAG-related costs, as required by § 402.41(c) (1) and (2), based on the following:

(1) Are the activities for which estimates are included in the application allowable under the Act and this Part?

(2) Are the rates of participation by eligible legalized aliens in the activities for which estimates of SLIAG-related costs are included in the application and other assumptions underlying the cost estimates based on reliable empirical data?

(3) To what extent are the estimates based on actual costs incurred? Are actual costs based on methodologies described in this Part or other methodologies likely to result in valid measures of SLIAG-related costs?

(4) Do current estimates appear to be consistent with past estimates, known actual costs pursuant to § 402.41(c)(2), and current INS eligible legalized alien population data?

(5) Are revised estimates a result (all or in part) of changes in program activities?

(c) The Department will notify the State that (1) its application has been approved or (2) its application has been disapproved, together with the reasons for disapproval.

§ 402.45 Amendments to applications.

(a) If, during the course of a fiscal year, a State adds a program or activity for which it intends to claim reimbursement or make payment in that fiscal year, it must submit an amendment (containing appropriate information pursuant to § 402.41(c)) to its approved application for that fiscal year.

(b) A State may use SLIAG funds received for a fiscal year to reimburse or pay SLIAG-related costs for programs or activities described in (a) of this section retroactive to the date the activity began, but no earlier than the first day of the fiscal year and only to the extent described in § 402.10(d). Costs incurred prior to October 1, 1987, are allowable only to the extent described in § 402.12.

Subpart F—Recordkeeping and Reporting

§ 402.50 Recordkeeping.

A State must provide for the maintenance of such records as are necessary:

(a) To meet the requirements of the Act and Department regulations relating to retention of and access to records.

(b) To allow the State to provide to the Department (1) an accurate description of its activities undertaken with SLIAG funds, and (2) a complete record of the purposes for which SLIAG funds were spent, and of the recipients of such funds; and

(c) To allow the Department and auditors of the State to determine the extent to which SLIAG funds were expended consistent with the Act and this regulation.

§ 402.51 Reporting.

(a) After the end of a Federal fiscal year for which it received or during which it obligated or expended SLIAG funds and by the due date indicated below, a State must submit annual reports containing the information indentified in (c) and (e) of this section. The reports are due no later than 90 days after the end of a Federal fiscal year.

(b)(1) Failure to submit the annual report required in (a) of this section by the deadline, without prior written permission from the Secretary, constitutes a basis for withholding of SLIAG funds.

(2) Failure by a State to submit the required information prior to the calculation of allocations pursuant to Subpart D will result in the Secretary's including no SLIAG-related costs for the fiscal year for that State in the calculation of State allocations.

(c) A State's annual report must provide information on the status of each fiscal year's funds, as of September 30, for the fiscal year, including:

(1) Identification of the amount obligated and the amount expended by the State grantee agency;

(2) Identification of any amount remaining unobligated at the end of the fiscal year which the State intends to carry over to succeeding fiscal years; and,

(3) Identification of any amount remaining unobligated at the end of the fiscal year which the State does not desire to carry over to the succeeding fiscal year.

(d) A State must use SF-269 in its reporting under paragraph (c) of this section, but it may determine the format of its annual report content under paragraph (e) of this section.

(e) A State's annual report must also provide the actual SLIAG-related costs incurred during the fiscal year. The report must provide for each program or activity identified in the State's application, the amount of the actual SLIAG-related costs incurred in that program or activity, identified as public assistance, public health assistance, educational services and SLIAG administrative costs, the amount of SLIAG funds obligated for that program or activity, and the time period for which the funds were obligated. The report must contain a description of the methodology used to determine actual SLIAG-related costs, if different from the description provided in the State's application pursuant to § 402.41(d)(2). Federal and State costs of providing assistance under a State plan approved under title XIX of the Social Security Act to aliens whose status has been adjusted under sections 245A and 210A of the INA by virtue of the exceptions to the bar to Medicaid eligibility (sections 245A(h) (2) and (3) of the INA) must be shown separately in States' reports.

PART 16—PROCEDURES OF THE DEPARTMENT GRANT APPEALS BOARD

2. The authority citation for Part 16 continues to read as follows:

Authority: U.S.C. 301 and secs. 1, 5, 6, and 7 of Reorganization Plan No. 1 of 1953, 18 FR 2053, 67 Stat. 631 and authorities cited in the Appendix.

3. Appendix A to Part 16 is amended by adding paragraph B(a)(6) to read as follows:

Part III

Securities and Exchange Commission

17 CFR Part 230

Regulation D Revisions, and Agency Information Collection Activities Under OMB Review; Rule, Proposed Rule and Notice

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 230

[Release No. 33-6758; File No S7-1-87]

Regulation D Revisions

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission announces the adoption of several amendments to the rules comprising Regulation D which provides for certain exemptions from the registration requirements of the Securities Act of 1933 (the "Securities Act"). The revisions expand the "accredited investor" definition, eliminate the $150,000 purchaser of securities from that definition, increase the total offering amount permitted for certain Rule 504 offerings, and revise general solicitation restrictions under Rule 504 for certain state registered offerings. Disclosure standards for offerings of less than $2 million also have been simplified to parallel more closely requirements applicable to Regulation A offerings. Certain technical revisions have been made to the regulation, as proposed.

EFFECTIVE DATE: April 11, 1988. For offerings commenced but not completed prior to this date, issuers may opt to follow the rules in effect at the date of commencement.

FOR FURTHER INFORMATION CONTACT: Richard K. Wulff or Karen M. O'Brien, (202) 272-2644, Office of Small Business Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: On January 16, 1987, the Commission published for comment [1] certain revisions to Regulation D,[2] the limited offering exemptive provisions from the registration requirements of the Securities Act.[3] The proposals have been adopted substantially as proposed.

The revisions change the definition of accredited investor [4] by including additional institutional investors such as savings and loan associations, credit unions and broker-dealers, certain trusts, partnerships and corporations, permitting a joint as well as an individual income test for accrediting natural persons, and eliminating the $150,000 purchaser of securities. The total offering price for Rule 504 transactions has been increased from $500,000 to $1 million, if at least $500,000 is registered at the state level, and general solicitation now will be permitted under certain circumstances for offerings pursuant to Rule 504 in states which provide no qualifying registration procedure. A new level of disclosure, keyed to Regulation A,[5] but requiring that a certified balance sheet of the issuer be prepared, has been adopted for offerings of less than $2 million. The other technical revisions proposed for comment have been adopted. In a companion release issued today,[6] the Commission is soliciting comment on a number of additional revisions to Regulation D, many of which address issues raised for comment in the Reg. D Release. These new proposals primarily respond to the comments received about adding a substantial or good-faith compliance provision to the regulation, and solicit comment on further changes to the accredited investor category.

I. Amendments to Regulation D

Regulation D provides for three different exemptions from the regulation requirements of the Securities Act. Rule 504 is available for offerings of $500,000 or less by companies not subject to the reporting provisions of the Securities Exchange Act of 1934 ("Exchange Act") [7], but not investment companies as defined in the Investment Company Act of 1940.[8] This rule imposes no limitation on the number of purchasers and in certain cases permits general solicitations of potential purchasers. Rule 505 may be used by any company, except investment companies, for offerings that do not exceed $5 million. Subject to a prohibition of general solicitations, the number of accredited investors that may participate in a Rule 505 offering is unlimited; an additional 35 non-accredited investors, who need not be sophisticated, also may purchase. Rules 504 and 505 are promulgated under section 3(b) of the Securities Act. Rule 506 is the Commission's safe-harbor rule for the "non-public offering" exemption, established by section 4(2) of the Securities Act. This rule is available to any issuer and there is no dollar limit as to the amount of funds which can be raised. However, there may be no general solicitation or advertising and sales can only be made to accredited investors and an additional 35 sophisticated investors.

A. Accredited Investors

The "accredited investor" is a central concept to all of the exemptions provided by Regulation D.[9] The Commission proposed to expand the definition to include virtually all classes of institutional investors. The institutional investor category has been expanded to include savings and loan associations and similar institutions such as credit unions,[10] whether acting for their own accounts or as fiduciaries, and broker-dealers if registered under the Exchange Act and purchasing for their own accounts. As the Commission indicated in the Reg. D Release, there does not appear to be a compelling reason to distinguish these institutions from banks, insurance companies or registered investment companies which are already defined to be accredited. Most of the states in their institutional investor exemptions already exempt securities offerings to these categories of investors.[11]

One of the commenters noted that employee benefit plans within the meaning of Title I of the Employee Retirement Income Security Act of 1974 ("ERISA") which have savings and loan associations as plan fiduciaries were not proposed to be treated the same as

[7] 15 U.S.C. 78a *et seq.*

[8] 15 U.S.C. 80a-1 *et seq.*

[9] A uniform definition of "accredited investor" is used for both section 4(6) and Regulation D. Section 2(15) of the Securities Act and Rule 215, 17 CFR 230.215 together provide the same listing of investors as Rule 501(a). Amendments to Rule 215 are made today in order to maintain the consistency.

[10] The Commission's staff interprets the "similar institution" language in section 3(a)(5)(A) of the Securities Act to encompass credit unions whose accounts are insured by the National Credit Union Administration. *See, e.g., In re* Idaho Central Credit Union (January 14, 1977) ("no action" letter from the Division of Corporation Finance). Rather than provide a complete listing in the definition, the Commission has determined to maintain interpretative flexibility through the use of the "similar institution" language.

[11] *See* Uniform Securities Act, Section 402(b)(8). This section exempts any offer or sale to a bank, savings institution, trust company, insurance company, investment company as defined in the Investment Company Act of 1940, pension or profit sharing trust, or other financial institution or institutional buyer, or to a broker-dealer, whether the purchaser is acting for itself or in some fiduciary capacity. Forty-five or more of the states either use these terms as included in the Uniform Securities Act or specifically include savings and loan associations, credit unions and broker-dealers as institutional investors.

ERISA plans with, for example, banks as such fiduciaries. This omission was not intentional. Consequently, the language of both Rules 215 and 501(a) has been amended to indicate that ERISA plans which have savings and loan associations as plan fiduciaries are accredited investors. The Staff's interpretation [12] that a self-directed employee benefit plan, where investment decisions are solely within the control of an accredited investor, is itself an accredited investor, has been codified.

The proposal to accredit corporations, partnerships and business trusts with total assets in excess of $5 million was generally approved by the commenters. The formation of the entity may not be for the purpose of making the particular investment in question.[13] Since the adoption of the regulation, certain non-profit organizations with total assets in excess of $5 million have been accredited investors; for-profit organizations will now be treated in the same way.

The Commission asked for comments as to the desirability of including officers who, while sophisticated, served no policy-making role for a company within the ranks of accredited investors. A number of commenters felt that the expansion would be desirable. Nonetheless, the Commission has decided not to accredit these officers at this time, since it has not been persuaded that, absent a policy-making function characterizing an executive officer position, employees regardless of their titles meet the standards of access to information and ability to bear the risk which are necessary to achieve the status of accredited investor.

A joint-income test for purposes of accrediting natural persons was proposed at the $300,000 level. Many commenters suggested a lower level for the joint income test along with lowering the existing individual income and net worth tests. Others have expressed their concerns about the appropriateness of the current levels in the income and net worth tests and that such levels may not represent a level of financial wherewithal which equates with an ability to get information about an issuer. In the absence of compelling empirical data establishing the financial sophistication of natural persons with lower incomes and net worth, the Commission has determined to make no further revisions to the natural persons accreditation standards. The joint-income test of $300,000 has been adopted.

Under the new provisions, trusts may be accredited if they have $5 million in total assets and have investment decisions made by a sophisticated person. The proposal to limit the trust's purchase to 10 percent of its total assets has not been adopted because general fiduciary principles and legal investment laws appear to be sufficient safeguards against concentration abuses which might arise. In addition, as proposed, a trust formed solely to make the investment would not be accredited under this provision.

The Commission in the proposing release advised that consideration was being given to eliminating the $150,000 purchaser item set forth in Rule 501(a)(5), given anomalies with the net worth test, and concerns that size of purchase alone, particularly at the $150,000 level, does not assure sophistication or access to information. While some persons previously accredited would no longer be accredited (i.e., individuals with net worths of $750,000 but less than $1 million, and corporations, partnerships, and trusts which do not meet the new standards but have $750,000 in net worth), many of the persons who used the $150,000 purchaser item will now become accredited investors by virtue of the revisions to Rule 501 made today. Therefore, the $150,000 purchaser accreditation standard is rescinded.

B. Rule 504

Both of the proposals relating to Rule 504 have been adopted without change. Thus, the $500,000 ceiling is now increased to $1 million as long as no more than $500,000 worth of securities are offered and sold without registration under states' securities laws.

The modification which broadens the scope of permissible general solicitations in Rule 504 offerings to states which have no registration procedure or one which does not provide for registration and delivery of a disclosure document prior to sale has been adopted. The rule has been modified to make clear that the offering must be made in the state of registration in addition to the state which has no registration procedure, so as to minimize forum shopping. As adopted the rule also is intended to accommodate offerings in large metropolitan areas where the central jurisdiction has no registration process but the surrounding jurisdictions do, *e.g.*, New York and the District of Columbia. Sales in non-qualifying states could not exceed the $500,000 ceiling for purposes of Rule 504.

C. Disqualification Provisions

The Commission solicited comments about imposing disqualifiers in Rule 506 offerings which would be similar to those currently applicable to Rule 505 offerings. The request for comments was in response to a suggestion by representatives of the North American Securities Administration Association, Inc. ("NASAA") [14] who believed that such a provision might assist in getting the uniform limited offering exemption ("ULOE"), an official NASAA policy guideline,[15] adopted by more of the states. The commenters were almost unanimously opposed to the suggestion. No state commented on this issue. While NASAA has not withdrawn its support for this proposal, it is not clear to the Commission that the adoption of this proposal would encourage a significant number of additional states to adopt ULOE.[16] Thus, no change to the current system is being made at this time.

D. Disclosure for Offerings Not in Excess of $2 Million

The Commission asked for and received some comments about the value of a reduced level of disclosure for non-reporting company offerings of a relatively small dollar amount. As stated in the Reg. D Release, when the Commission initially proposed the regulation in 1981 [17] a reduced level of disclosure was set for offerings under $1.5 million, tied to Regulation A disclosure standards but requiring certified financial statements. Because the need for an additional level of disclosure standards was not compelling, measured by the public comments at the time, the Commission did not adopt the proposal. Now, however, it appears that there would be some benefit to another level of disclosure under the regulation as long as investor protection is not being compromised. The comments in response to the Reg. D Release support

---

[12] *In re* Diane P Weiss (December 21, 1983) (interpretative letter from the Division of Corporation Finance.)

[13] This amendment, as well as the revision to accredited trusts *infra*, makes no change in the availability of Rule 215(h) or Rule 501(a)(8) which accredit entities, all of whose equity owners are otherwise accredited.

[14] NASAA is an association of securities commissioners from each of the 50 states, the District of Columbia, Puerto Rico and several of the Canadian provinces.

[15] CCH NASAA Rep. § 6201 at 6101. Such a guideline represents endorsement of a principle which NASAA believes has general application. NASAA does not have the power to enact legislation, promulgate regulations or otherwise bind legislatures or administrative agencies.

[16] The Commission understands that a majority of states now apply disqualification provisions to Rule 506 offerings.

this position. Therefore, for offerings not in excess of $2 million, the information required in Regulation A offerings will satisfy the requirements of Rule 502(b)(2) if the issuer provides investors with a certified balance sheet, dated within 120 days of the commencement of the offering.

E. Other Revisions

All of the proposed technical revisions have been adopted. These changes included the clarification of the "aggregate offering price" definition in Rule 501(c), the single counting of non-contributory employee benefit plans in Rule 501(e), and keying the disclosure requirements to a $7.5 million level in Rule 502(b). Further, more Commission registration statement forms now are specified as being appropriate to satisfy the disclosure obligations of reporting companies under the regulation. For business combinations, the Commission's specific registration statement form is specified as the appropriate guideline.

II. NASAA Cooperation

In the proposing release, the Commission acknowledged NASAA's cooperation. Because Regulation D provides the framework for ULOE, such cooperation is invaluable to the goal of uniform application of the exemption at both the state and federal levels. The Commission understands that NASAA's State-Federal Coordination Committee and Disclosure Standards Committee will consider the Commission's final adoption today, with a view to recommending parallel changes to ULOE. The cooperation of NASAA in these efforts is appreciated and greater uniformity between the state and federal systems of securities regulation will ultimately be achieved, promoting ever increasingly efficient capital formation processes consistent with the protection of investors.

III. Availability of Final Regulatory Flexibility Analysis

A final Regulatory Flexibility Analysis in accordance with the Regulatory Flexibility Act regarding the revisions to Regulation D has been prepared. A summary of the corresponding Initial Regulatory Flexibility Analysis was included in the proposing release. Members of the public who wish to obtain a copy of the Final Regulatory Flexibility Analysis should contact Twanna Young in the Office of Small Business Policy, Division of Corporation Finance, U.S. Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC. 20549.

IV. Cost-Benefit Analysis

No specific data was provided on the Commission's request for costs and benefits of the proposals; yet, it appears that the revisions will work some savings by increasing the classes of accredited investors, raising the Rule 504 ceiling and reducing the level of disclosure requirements for offerings that do not exceed $2 million.

V. Statutory Basis, Text of Amendments and Authority

The amendments to the Commission's rules are being adopted pursuant to sections 2(15), 3(b), 4(2), 4(6), 19(a) and 19(c) of the Securities Act.

List of Subjects in 17 CFR Part 230

Reporting and recordkeeping requirements, securities.

Text of Amendments

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is amended as follows:

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

1. The authority citation for Part 230 continues to read, in part, as follows:

Authority: Sections 230.100 to 230.174 issued under Sec. 19, 48 Stat. 85 as amended; 15 U.S.C. 77s, * * *

2. Section 230.215 is amended by revising paragraphs (a), (c) and (h), removing paragraph (e), redesignating paragraphs (f) and (g) as paragraphs (e) and (f), revising newly redesignated paragraph (f), and adding a new paragraph (g), as follows:

§ 230.215 Accredited investor.

* * * * *

(a) Any savings and loan association or other institution specified in section 3(a)(5)(A) of the Act whether acting in its individual or fiduciary capacity; any broker of dealer registered pursuant to section 15 of the Securities Exchange Act of 1934; an employee benefit plan within the meaning of Title I of the Employee Retirement Income Security Act of 1974, if the investment decision is made by a plan fiduciary, as defined in section 3(21) of such Act, which is a savings and loan association, or if the employee benefit plan has total assets in excess of $5,000,000 or, if a self-directed plan, with investment decisions made solely by persons that are accredited investors;

* * * * *

(c) Any organization described in section 501(c)(3) of the Internal Revenue Code, corporation, Massachusetts or similar business trust, or partnership, not formed for the specific purpose of acquiring the securities offered, with total assets in excess of $5,000,000;

* * * * *

(f) Any natural person who had an individual income in excess of $200,000 in each of the two most recent years or joint income with that person's spouse in excess of $300,000 in each of those years and has a reasonable expectation of reaching the same income level in the current year;

(g) Any trust, with total assets in excess of $5,000,000, not formed for the specific purpose of acquiring the securities offered, whose purchase is directed by a sophisticated person as described in § 230.506(b)(2)(ii); and

(h) Any entity in which all of the equity owners are accredited investors.

3. Section 230.501 is amended by revising paragraphs (a)(1), (a)(3), (a)(8), and the first sentence of paragraph (c), removing paragraph (a)(5), redesignating paragraphs (a)(6) and (a)(7) as (a)(5) and (a)(6), revising newly redesignated paragraph (a)(6), and adding new paragraphs (a)(7) and (e)(3) before the Note as follows:

§ 230.501 Definitions and terms used in Regulation D.

* * * * *

(a) * * *

(1) Any bank as defined in section 3(a)(2) of the Act, or any savings and loan association or other institution as defined in section 3(a)(5)(A) of the Act whether acting in its individual or fiduciary capacity; any broker or dealer registered pursuant to section 15 of the Securities Exchange Act of 1934; insurance company as defined in section 2(13) of the Act; investment company registered under the Investment Company Act of 1940 or a business development company as defined in section 2(a)(48) of that Act; Small Business Investment Company licensed by the U.S. Small Business Administration under section 301 (c) or (d) of the Small Business Investment Act of 1958; employee benefit plan within the meaning of Title I of the Employee Retirement Income Security Act of 1974, if the investment decision is made by a plan fiduciary, as defined in section 3(21) of such Act, which is either a bank, savings and loan association, insurance company, or registered investment adviser, or if the employee benefit plan has total assets in excess of $5,000,000 or, if a self-directed plan, with investment decisions made solely by persons that are accredited investors;

* * * * *

(3) Any organization described in section 501(c)(3) of the Internal Revenue Code, corporation, Massachusetts or similar business trust, or partnership, not formed for the specific purpose of acquiring the securities offered, with total assets in excess of $5,000,000;

* * * * *

(6) Any natural person who had an individual income in excess of $200,000 in each of the two most recent years or joint income with that person's spouse in excess of $300,000 in each of those years and has a reasonable expectation of reaching the same income level in the current year;

(7) Any trust, with total assets in excess of $5,000,000, not formed for the specific purpose of acquiring the securities offered, whose purchase is directed by a sophisticated person as described in § 230.506(b)(2)(ii); and

(8) Any entity in which all of the equity owners are accredited investors.

* * * * *

(c) *Aggregate offering price.* "Aggregate offering price" shall mean the sum of all cash, services, property, notes, cancellation of debt, or other consideration to be received by an issuer for issuance of its securities. * * *

* * * * *

(e) *Calculation of number of purchasers.* * * *

(3) A non-contributory employee benefit plan within the meaning of Title I of the Employee Retirement Income Security Act of 1974 shall be counted as one purchaser where the trustee makes all investment decisions for the plan.

* * * * *

4. Section 230.502 is amended by redesignating paragraphs (b)(2)(i)(A), (b)(2)(i)(B), and (b)(2)(i)(C) as paragraphs (b)(2)(i)(B), (b)(2)(i)(C), and (b)(2)(i)(D) respectively, adding a new paragraph (b)(2)(i)(A), revising the paragraph headings of newly redesignated (b)(2)(i) (B) and (C), amending newly redesignated (b)(2)(i)(D) by changing the reference "(b)(2)(i) (A) or (B)" to read "(b)(2)(i) (B) or (C)", and revising paragraphs (b)(2)(ii)(B) and (b)(2)(vi) as follows:

§ 230.502 General conditions to be met.

* * * * *

(b) *Information requirements.*

(2) *Type of information to be furnished.*

(i) * * *

(A) *Offerings up to $2,000,000.* The same kind of information as would be required in Part II of Form 1–A [17 CFR 239.90], except that the issuer's balance sheet, which shall be dated within 120 days of the start of the offering, must be audited.

(B) *Offerings up to $7,500,000.*

* * * * *

(C) *Offerings over $7,500,000.*

* * * * *

(ii) * * *

(B) The information contained in an annual report on Form 10–K under the Exchange Act or in a registration statement on Form S–1 [17 CFR 239.11], Form S–11 [17 CFR 239.18], or Form S–18 [17 CFR 239.28] under the Act or on Form 10 [17 CFR 249.210] under the Exchange Act, whichever filing is the most recent required to be filed.

* * * * *

(vi) For business combinations or exchange offers, in addition to information required by Form S–4 [17 CFR 239.25], the issuer shall provide to each purchaser at the time the plan is submitted to security holders, or, with an exchange, during the course of the transaction and prior to sale, written information about any terms or arrangements of the proposed transactions that are materially different from those for all other security holders. For purposes of this subsection, an issuer which is not subject to the reporting requirements of section 13 or 15(d) of the Exchange Act may satisfy the requirements of Part I.B. or C. of Form S–4 by compliance with paragraph (b)(2)(i) of this § 230.502.

* * * * *

5. Section 230.504 is amended by revising the section heading, paragraph (b), and Notes 1 and 2, and adding a new Note 3 as follows:

§ 230.504 Exemption for Limited Offerings and Sales of Securities Not Exceeding $1,000,000.

* * * * *

(b) *Conditions to be met*—(1) *General conditions.* To qualify for exemption under this § 230.504, offers and sales must satisfy the terms and conditions of §§ 230.501 through 230.503 except that the provisions of §§ 230.503 (c) and (d) shall not apply to offers and sales of securities under this § 230.504 that are made.

(i) Exclusively in one or more states each of which provides for the registration of the securities and requires the delivery of a disclosure document before sale and that are made in accordance with those state provisions; or

(ii) In one or more states which have no provision for the registration of the securities and the delivery of a disclosure document before sale, if the securities have been registered in at least one state which provides for such registration and delivery before sale, offers and sales are made in the state of registration in accordance with such state provisions, and such document is in fact delivered to all purchasers in the states which have no such procedure, before the sale of securities.

(2) *Specific condition*—(i) *Limitation on aggregate offering price.* The aggregate offering price for an offering of securities under this § 230.504, as defined in § 230.501(c), shall not exceed $1,000,000, less the aggregate offering price for all securities sold within the twelve months before the start of and during the offering of securities under this § 230.504 in reliance on any exemption under section 3(b) of the Act or in violation of section 5(a) of the Act, provided that no more than $500,000 of such aggregate offering price is attributable to offers and sales of securities without registration under a state's securities laws.

Note 1.— The calculation of the aggregate offering price is illustrated as follows:

Example 1. If an issuer sells $500,000 worth of its securities pursuant to state registration on January 1, 1988 under this § 230.504, it would be able to sell an additional $500,000 worth of securities either pursuant to state registration or without state registration during the ensuing twelve-month period, pursuant to this § 230.504.

Example 2. If an issuer sold $900,000 pursuant to state registration on June 1, 1987 under this § 230.504 and an additional $4,100,000 on December 1, 1987 under § 230.505, the issuer could not sell any of its securities under this § 230.504 until December 1, 1988. Until then the issuer must count the December 1, 1987 sale towards the $1,000,000 limit within the preceding twelve months.

Note 2.— If a transaction under this § 230.504 fails to meet the limitation on the aggregate offering price, it does not affect the availability of this § 230.504 for the other transactions considered in applying such limitation. For example, if an issuer sold $1,000,000 worth of its securities pursuant to state registration on January 1, 1988 under this § 230.504 and an additional $500,000 worth on July 1, 1988, this § 230.504 would not be available for the later sale, but would still be applicable to the January 1, 1988 sale.

Note 3.— In addition to the aggregation principles, issuers should be aware of the applicability of the integration principles set forth in § 230.502(a).

By the Commission.

Jonathan G. Katz,
Secretary.
March 3, 1988.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 230

[Release No. 33-6759; File No. S7-4-88]

Regulation D Revisions

AGENCY: Securities and Exchange Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Commission is publishing for comment additional revisions to Regulation D. The regulation provides for three different exemptions from the registration requirements of the Securities Act of 1933 (the "Securities Act") for certain limited offerings of securities. The revisions proposed here involve additions to the "accredited investor" definition, a change in the requirements which are designed to reflect the "restricted" character of securities issued in a Regulation D transaction, and the deletion of the filing of a Form D as a condition to the Regulation D exemption. A new Rule 507 is proposed which would disqualify an issuer from the use of any of the Regulation D exemptions if it has been found to have violated Rule 503 which will still require the filing of a Form D no later than fifteen days after the first sale of securities. A new rule 508 is also proposed which would provide that minor and isolated failures to comply with the requirements of Regulation D will not necessarily cause the loss of an exemption. In a companion action today, a number of revisions to the regulation have been finalized.

DATE: Comments must be received on or before May 13, 1988.

ADDRESS: Comment letters should refer to File No. S7-4-88 and be submitted in triplicate to Jonathan G. Katz, Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Comments will be available for public inspection and copying in the Commission's Public Reference Room at the above address.

FOR FURTHER INFORMATION CONTACT: Richard K. Wulff or Karen M. O'Brien, (202) 272-2644, Office of Small Business Policy, Division of Corporation Finance, U.S. Securities and Exchange Commission, Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is proposing several revisions to Regulation D,[1] which exempts certain transactions from the registration requirements of the Securities Act.[2] The revisions would add to the list of accredited investors certain plans established and maintained by the governments of the states or their political subdivisions as well as their agencies and instrumentalities, for the benefit of their employees. The list of steps previously required to be followed to assure the "restricted" status or nontransferable nature of securities issued in Regulation D is proposed to be no longer mandatory, although they would still demonstrate satisfactorily that reasonable care has been taken to assure that purchasers are not underwriters. The filing of Form D[3] as a condition to the Regulation D exemption is proposed to be eliminated. In lieu thereof, disqualifying provisions would be added which would prohibit an issuer, found to have violated the filing requirement, from using Regulation D in the future. Pursuant to another proposed provision, isolated and minor deviations from the requirements in Regulation D that occur despite a good faith and reasonable attempt to comply would not cause an issuer to lose an otherwise appropriate exemption from the registration provisions of the Securities Act.

I. Proposed Revisions to Regulation D

Regulation D is the series of rules, Rules 501–506, which establish three separate exemptions from the registration requirements of the Securities Act. Last January, a number of proposals to amend the regulation were published for comment.[4] Today, the Commission adopted most of these proposals.[5] Several matters were raised in the public comments, especially in the area of whether or not a substantial or good faith compliance standard should apply to the regulation, which the Commission had asked about in the original notice of proposed rulemaking.

A. Accredited Investors

A number of commenters in the initial rulemaking from last January noted that states, municipalities, their instrumentalities and agencies, public universities and pension plans for their employees do not qualify for accreditation under section 4(6) of the Securities Act or Regulation D.[6] The Commission is proposing to amend Rules 215 and 501 to specifically include in the accredited lists, plans established and maintained by the governments of the states, their political subdivisions, as well as their agencies and instrumentalities for the benefit of their employees, when two conditions are met. The plan must have either a bank, savings and loan association, insurance company or registered investment adviser as its plan fiduciary. In addition, the plan must impose requirements governing fiduciary responsibility similar to those established by the Employee Retirement Income Security Act of 1974 ("ERISA").[7] If such plans have the same kind of fiduciaries, plus the same standards governing investments as ERISA plans, there does not appear to be any reason to prohibit them from being accredited. Because such plans are exempt from coverage under ERISA, they do not presently qualify for accreditation under Rule 501(a)(1), Rule 215(a) or section 2(15)(i) of the Securities Act. The Commission understands, however, that many of the states institutional investor exemptions include pension and profit-sharing plans, without regard to employer identification.[8] Although the present rule provides that an ERISA plan also may be accredited if it has more than $5 million in assets, this alternative test is not proposed for the non-ERISA public plans, because unlike ERISA plans, they are not subject to specific regulations and governmental oversight.

Comment also is requested on the issue of including states, their political subdivisions, and agencies and instrumentalities in their own right, and state universities and colleges as accredited investors. Several of the states exempt sales to these kinds of investors.[9] After considering the comments, the Commission may decide to include one or more of these entities as accredited investors. Alternatively, it may be desirable to include provisions to assure that those included would have the requisite knowledge or sophistication to qualify as accredited investors. Commenters are specifically requested to address the need for

conditions to such accreditation and the appropriate conditions, e.g., the presence of some specifically named fiduciary; or size of the fund. Comments with regard to other suitability-for-investment standards covering states and these other entities also are invited.

B. Substantial or Good-Faith Compliance

Many comments were received in response to the Commission's solicitation of comments about a standard of good faith compliance with Regulation D. Two revisions are being proposed to be made with what appear to be the principal areas of concern about technical noncompliance. In addition, a new rule is proposed which would provide that the Regulation D exemption for all sales is not lost by minor, isolated failures to comply with requirements in the regulation, where those deviations occur despite a good faith and reasonable attempt to comply. However, the exemption may be lost for a particular sale, if the deviation is significant with respect to that sale.

Comments are requested on each of the proposed revisions. In addition, commenters are requested to address whether a general substantial compliance standard is needed if the proposed revisions regarding the requirements designed to reflect the restricted character of the securities and the deletion of the filing of a Form D as a condition to the Regulation D exemption are adopted. Conversely, commenters should address the need for the latter two proposals if a general, substantial good faith standard is adopted.

(1) Demonstrating the "Restricted" Nature of the Securities

Rule 502(d) indicates that generally securities acquired in a Regulation D transaction have the same restricted status as securities acquired in a transaction under section 4(2) of the Securities Act and cannot be resold without registration or an exemption. In this connection, the issuer is reminded of its obligation to ensure that no distribution of these securities occurs without registration or appropriate exemption and that it take reasonable care to assure that purchasers are not underwriters under the Securities Act. Rule 502(d) lists certain actions which must be taken to reflect such reasonable care, including purchaser inquiries, written notifications to purchasers and legending securities. Inasmuch as compliance with Rule 502 is a condition to a Regulation D exemption, failure to take any of these steps makes the exception unavailable. Commenters have frequently characterized this feature of the regulation as one particularly well-suited to be the subject of a substantial or good faith compliance standard.

Under the proposed amendment, the listing in Rule 502(d) would not be mandatory. Taking such actions, however, would be a satisfactory demonstration of the desired reasonable care. In this regard the burden would continue to be on the issuer to demonstrate that reasonable care had been taken to guard against an inappropriate distribution of "restricted" securities and to make certain that investors appreciate the restricted nature of the securities.[10]

(2) Removing the Conditions to File Form D and New Rule 507

Rule 503 requires the filing of a notification on Form D within 15 days after the first sale of securities offered in reliance upon an exemption under Regulation D. Rules 504, 505 and 506 each condition the exemption upon compliance with Rule 503. Failure to make the filing in a timely manner makes the exemption unavailable. Commenters have frequently criticized this provision.

As proposed, the filing obligation under Rule 503 would continue but would no longer be a condition to the exemption. In order to provide an incentive for filing the Form D in a timely manner, the Commission is proposing new Rule 507, which would disqualify an issuer from the use of the Regulation D exemptions if it had been found to have violated Rule 503. Proposed Rule 507 has been patterned on Rule 252.[11] The Commission would have the authority to waive disqualifications under proposed Rule 507 upon a showing of good cause by the issuer that the Regulation D exemption should not be denied.[12]

(3) Isolated and Minor Deviations From Requirements in Regulation D

Proposed new Rule 508 is designed to provide additional flexibility in Regulation D so that minor, isolated failures in reasonable and good faith compliance efforts would not cause loss of the exemption from the registration requirements of the Securities Act for the entire offering. The exemption would be lost as to a specific sale affected by the violation, unless the violation is insignificant with respect to that sale. The rule sets forth several examples of violations that could fall within this provision. These examples are intended to highlight the minor nature of these deviations and the necessity for a good faith and reasonable effort to comply with the regulation in its entirety. Moreover, there are critical elements to a Regulation D exemption under the Securities Act, which establish the essence of the exemption; there cannot be any deviation from these requirements. Thus, for example, under Regulation D, limited offerings are contemplated and no general solicitation or advertising would be consistent with the exemptions provided.[13] The dollar limitations are critical elements of both the Rule 504 and Rule 505 exemptions. Use of either of these provisions by an investment company would be unacceptable; as would the use of Rule 504 by a reporting company. While neither this recitation nor the listing in Rule 508 is exhaustive, they do reflect the kinds of items which are encompassed and not encompassed by the rule.

Comments are requested as to whether the rule should provide, as proposed, that the exemption may be lost for certain offers and sales, if such offers and sales have been directly affected by the violation, even if the exemption is not lost for the offering as a whole. Comments also are requested as to whether defining insignificant to mean isolated and minor is a reasonable approach or whether any definition of the term is needed. Any other comments with respect to the scope of the proposed rule are also invited.

II. NASAA Cooperation

Regulation D serves as the basis for the uniform limited offering exemption ("ULOE"),[14] an official policy guideline of the North American Securities Administrators Association, Inc. ("NASAA").[15] More than half of the states have adopted ULOE or an exemption substantially similar to it. The Commission and NASAA continue to encourage the remaining states to adopt ULOE.

---

[10] The obligation to advise purchasers that they have restricted securities comes from Rule 10b-5. 17 CFR 240.10b-5. *See* Release No. 33-5226 (January 10, 1972) [37 FR 600].

[11] 17 CFR 230.252.

[12] A similar rule, Rule 702, was proposed in Release No. 33-6728 (July 30, 1987) in connection with a proposed exemption for certain employee compensation arrangements.

[13] There is an exception for certain Rule 504 offerings.

[14] CCH NASAA Rep. ¶6201 at 6101

[15] NASAA is an association of the securities commissioners of each of the 50 states, the District of Columbia, Puerto Rico and several of the Canadian provinces. An official policy guideline represents endorsement of a principle which NASAA believes has general application. NASAA has no power to enact legislation, promulgate regulations or otherwise bind the legislatures or administrative agencies of its members.

The proposals made today by the Commission have been provided to representatives of the NASAA State-Federal Coordination Committee. The Commission appreciates the cooperation of NASAA and its Committee in considering these proposals as an addition to the ULOE policy statement.

III. Summary of Initial Regulatory Flexibility Analysis

The Commission has prepared an Initial Regulatory Flexibility Analysis in accordance with 5 U.S.C. 603 regarding these Regulation D proposals.

The analysis notes that the revisions to the "accredited investor" definition, and the elimination of the filing and certain other conditions to the exemptions are proposed as a result of public comment and the Commission's experience. The proposal of Rule 507 is designed as a complement to the elimination of the filing condition to encourage continued compliance with Rule 503. The proposal of Rule 508 is intended to provide that the exemption will not be lost if there are inadvertent minor and isolated failures to comply with the requirements. The objective of unifying exemptive schemes at the states and federal levels such as through a coordinated ULOE policy guideline and Regulation D is noted, since it can aid smaller issuers in the capital formation process. The proposals add no new reporting, recordkeeping or other compliance requirements and in fact may eliminate the need to provide certain information.

A copy of the Initial Regulatory Flexibility Analysis may be obtained from Twanna Young in the Office of Small Business Policy, Division of Corporation Finance, U.S. Securities and Exchange Commission, 450 Fifth Street, N.W. Washington, DC 20549.

IV. Cost—Benefit Analysis

To assist in a full evaluation of the costs and benefits of these proposed revisions to Regulation D, the Commission seeks views and other data about these issues. The Commission believes the proposals if adopted would provide additional cost savings to issuers without compromising investor protection. The proposed revisions liberalizing certain conditions to the exemptions may produce savings through a reduction in the number of inadvertent late filings of Forms D causing a loss of the Regulation D exemption.

V. Statutory Basis and Text of the Proposed Amendments

The amendments to the Commission's rules are being proposed pursuant to sections 2(15), 3(b), 4(2), 4(6), 19(a) and 19(c) of the Securities Act.

List of Subjects in 17 CFR Part 230

Reporting and recordkeeping requirements, Securities.

Text of Proposals

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is proposed to be amended as follows:

(Arrows > < indicate proposed additions, bracket [ ] indicate proposed deletions)

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

1. The authority citation for Part 230 continue to read, in part, as follows:

Authority: Sections 230.100 to 230.174 issued under Sec. 19, 48 Stat. 85 as amended; 15 U.S.C. 77s, * * *

2. Section 230.215 is amended by revising paragraph (a) as follows (the introductory text is republished):

§ 230.215 Accredited investor.

The term "accredited investor" as used in section 2(15)(ii) of the Securities Act of 1933 (15 U.S.C. 77b(15)(ii) shall include the following persons:

(a) Any savings and loan association or other institution specified in section 3(a)(5)(A) of the Act whether acting in its individual or fiduciary capacity; any broker or dealer registered pursuant to section 15 of the Securities Exchange Act of 1934; > any plan established and maintained by a state, its political subdivisions, or any agency or instrumentality of a state or its political subdivisions for the benefit of its employees, if investment decisions are made by a plan fiduciary which is a bank, savings and loan association, insurance company, or registered investment adviser and the plan establishes fiduciary principles the same as or similar to those contained in sections 404–407 of Title I of the Employee retirement Income Security Act of 1974; < an employee benefit plan within the meaning of Title I of the Employee Retirement Income Security Act of 1974, if the investment decision is made by a plan fiduciary, as defined in section 3(21) of such Act, which is a savings and loan association, or if the employee benefit plan has total assets in excess of $5,000,000 or, if a self-directed plan, with investment decisions made solely by persons that are accredited investors;

* * * * *

3. Section 230.501 is amended by revising the introductory text and paragraph (a)(1) as follows:

§ 230.501 Definitions and terms used in Regulation D.

As used in Regulation D (§§ 230.501– >230.508<), the following terms shall have the meaning indicated:

(a) * * *

(1) Any bank as defined in section 3(a)(2) of the Act, or any savings and loan association or other institution as defined in section 3(a)(5)(A) of the Act whether acting in its individual or fiduciary capacity; any broker or dealer registered pursuant to section 15 of the Securities Exchange Act of 1934; insurance company as defined in section 2(13) of the Act; investment company registered under the Investment Company Act of 1940 or a business development company as defined in section 2(a)(48) of that Act; Small Business Investment Company licensed by the U.S. Small Business Administration under section 301 (c) or (d) of the Small Business Investment Act of 1958; > any plan established and maintained by a state, its political subdivisions, or any agency or instrumentality of a state or its political subdivisions for the benefit of its employees, if investment decisions are made by a plan fiduciary which is a bank, savings and loan association, insurance company, or registered investment adviser and the plan establishes fiduciary principles the same as or similar to those contained in sections 404–407 of Title I of the Employee Retirement Income Security Act of 1974, < employee benefit plan within the meaning of the Employee Retirement Income Security Act of 1974 if the investment decision is made by a plan fiduciary, as defined in section 3(21) of such Act, which is either a bank, savings and loan association, insurance company, or registered investment adviser, or if the employee benefit plan has total assets in excess of $5,000,000 or, if a self-directed plan, with investment decisions made solely by persons that are accredited investors;

* * * * *

4. Section 230.502 is amended by revising the introductory paragraph and paragraph (d) introductory text and added a concluding paragraph as follows:

§ 230.502 General conditions to be met.

The following conditions shall be applicable to offers and sales made under Regulation D (§§ 230.501— >230.508<):

* * * * *

(d) *Limitations on resale.* Except as provided in § 230.504(b)(1), securities acquired in a transaction under Regulation D shall have the status of securities acquired in a transaction under section 4(2) of the Act and cannot be resold without registration under the Act or an exemption therefrom. The issuer shall exercise reasonable care to assure that the purchasers of the securities are not underwriters within the meaning of the Act, which reasonable care > may be demonstrated by < [shall include, but not be limited to,] the following:

(1) * * *

(2) * * *

(3) * * *

> While taking these actions will establish the requisite reasonable care, they are not the exclusive method to demonstrate such care. Other actions by the issuer may satisfy this provision.<

5. Section 230.504 is amended by revising paragraph (b)(1) as follows:

§ 230.504 Exemption for limited offerings and sales of securities not exceeding $1,000,000.

* * * * *

(b) *Conditions to be met*—(1) *General conditions.* To qualify for exemption under this § 230.504, offers and sales must satisfy the terms and conditions of §§ 230.501 > and 230.502, < [through 230.503,] except that the provisions of §§ 230.502 (c) and (d) shall not apply to offers and sales of securities under this § 230.504 that are made

(i) Exclusively in one or more states each of which provides for the registration of the securities and requires the delivery of a disclosure document before sale and that are made in accordance with those state provisions; or

(ii) In one or more states which have no provision for the registration of the securities and the delivery of a disclosure document before sale, if the securities have been registered in at least one state which provides for such registration and delivery before sale, offers and sales are made in the state of registration in accordance with such state provisions, and such document is in fact delivered to all purchasers in the states which have no such procedure, before the sale of securities.

* * * * *

6. Section 230.505 is amended by revising paragraph (b)(1) as follows:

§ 230.505 Exemption for limited offers and sales of securities not exceeding $5,000,000.

* * * * *

(b) *Conditions to be met*—(1) *General conditions.* To qualify for exemption under this § 230.505, offers and sales must satisfy all the terms and conditions of § 230.505, offers and sales must satisfy all the terms and conditions of §§ 230.501 > and 230.502. < [through 230.503.]

* * * * *

7. Section 230.506 is amended by revising paragraph (b)(1) as follows:

§ 230.506 Exemption for limited offers and sales without regard to dollar amount of offering.

* * * * *

(b) *Conditions to be met*—(1) *General conditions.* To qualify for exemption under this § 230.501 > and 230.502. < [through 230.503.]

* * * * *

8. By adding a new § 230.507 to read as follows:

§ 230.507 Disqualifying provision relating to exemptions under §§ 230.504, 230.505 and 230.506.

(a) No exemption under §§ 230.504, 230.505 or 230.506 shall be available for an issuer if such issuer, any of its predecessors or affiliates have been subject to any order, judgment, or decree of any court of competent jurisdiction temporarily, preliminarily or permanently enjoining such person for failure to comply with § 230.503.

(b) Paragraph (a) of this section shall not apply if the Commission determines, upon a showing of good cause, that it is not necessary under the circumstances that the exemption be denied.

9. By adding a new § 230.508 to read as follows:

§ 230.508 Isolated and minor deviations from requirements in Regulation D.

(a) A failure to comply with a condition or requirement of this Regulation D that is insignificant with respect to the offering as a whole will not result in the loss of the exemption under §§ 230.504, 230.505 or 230.506 if the issuer can show a good faith and reasonable attempt to comply with all provisions of the Regulation. No exemption would be available with respect to an offer or sale to a particular person unless the failure to comply was insignificant with respect to that offer or sale, as well as to the offering as a whole.

(b) For purposes of this rule, insigificant means an isolated and minor deviation from requirements.

Note. —A failure to comply with a condition or requirement of Regulation D that is insignificant with respect to the offering as a whole may be illustrated as follows:

Example 1. Immaterial written information provided to an accredited investor is omitted from the description required to be delivered to non-accredited investors.

Example 2. A purchaser representative fails to disclose a relationship with the issuer prior to a purchaser's acknowledgement of the representative but does so before the purchaser subscribes for an investment.

Example 3. One purchaser, as a result of a clerical error, fails to receive the information package prior to the completion of the sale.

By the Commission.

Jonathan G. Katz,

Secretary.

March 3, 1988.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review of Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash (202) 272–2142.

Upon Written Request Copy Available From: Securities and Exchange Commission Office of Consumer Affairs, Washington, DC 20549.

Revision

Form D and Regulation D

File No. 270–72

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission has submitted for clearance proposed revisions to Regulation D (17 CFR 230.501–506) which would increase the numbers of accredited investors and the number of offerings eligible for exemption, thus increasing the numbers of Forms D required to be filed. The respondents are issuers who elect to offer and sell securities pursuant to section 4(6) of the Securities Act of 1933 ("the 1933 Act") or pursuant to Regulation D under the 1933 Act. Currently there are 22,225 Forms D filed at 16 burden hours per form for a total of 355,600 burden hours.

Submit comments to OMB Desk Officer: Mr. Robert Neal, (202) 395–7340, Office of Information and Regulatory Affairs, Commerce and Lands Branch, Room 3228 NEOB Washington, DC 20530.

March 3, 1988.

Jonathan G. Katz,

Secretary.

Briefings on How To Use the Federal Register— For information on briefings in Tampa, FL, Fort Lauderdale, FL, Washington, DC, and Boston, MA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Presidential Documents

Title 3—

The President

Executive Order 12629 of March 9, 1988

Nuclear Cooperation With EURATOM

By the authority vested in me as President by the Constitution and statutes of the United States of America, including Section 126a(2) of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2155(a)(2)), and having determined that, upon the expiration of the period specified in the first proviso to Section 126a(2) of such Act and extended for 12-month periods by Executive Orders Nos. 12193, 12295, 12351, 12409, 12463, 12506, 12554, and 12587, failure to continue peaceful nuclear cooperation with the European Atomic Energy Community would be seriously prejudicial to the achievement of U.S. non-proliferation objectives and would otherwise jeopardize the common defense and security of the United States, and having notified the Congress of this determination, I hereby extend the duration of that period to March 10, 1989. Executive Order No. 12587 shall be superseded on the effective date of this Executive Order.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 53, No. 48
Friday, March 11, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 2

Revision of Delegations of Authority

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This document revises the delegations of authority from the Secretary to reflect the assignment of responsibility for the State Agricultural Mediation Programs under the Agriculture Credit Act of 1987 to the Under Secretary for Small Community and Rural Development and the Administrator of Farmers Home Administration.

EFFECTIVE DATE: March 11, 1988.

FOR FURTHER INFORMATION CONTACT: Glenn J. Hertzler, Assistant Administrator Farmer Programs, Farmers Home Administration, USDA, 14th and Independence Avenue, SW., Washington, DC 20250, telephone (202) 447-4671.

SUPPLEMENTARY INFORMATION: Department responsibility for certification and policy development on State Agricultural Mediation Program issues has heretofore been located in the Office of the Secretary. Authority to administer the State Agricultural Mediation Programs is being delegated to the Under Secretary for Small Community and Rural Development, and then further redelegated to the Administrator of Farmers Home Administration.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, notice of proposed rule making and opportunity for comments are not required, and this rule may be made effective less than 30 days after publication in the **Federal Register**. Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12291. Finally, this action is not a rule as defined by the Regulatory Flexibility Act and thus is exempt from the provisions of that Act.

List of Subjects in 7 CFR Part 2

Authority delegation (Government agencies).

Accordingly, Part 2, Title 7, Code of Federal Regulations is amended as follows:

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Subpart C—Delegations of Authority to the Deputy Secretary, the Under Secretary for International Affairs and Commodity Programs, the Under Secretary for Small Community and Rural Development, and Assistant Secretaries

1. The authority citation for Part 2 continues to read as follows:

Authority: 5 U.S.C. 301; Section 4(a) of Reorganization Plan No. 2 of 1953; 7 CFR 2.23; 7 CFR 2.70.

2. Section 2.23 is amended by adding a new paragraph (a)(17) to read as follows:

§ 2.23 Delegations of authority to the Under Secretary for Small Community and Rural Development.

* * * * *

(a) * * *

(17) Administer the State Agricultural Mediation Programs under Title 5 of the Agriculture Credit Act of 1987 (Pub. L. 100-233).

* * * * *

Subpart I—Delegations of Authority by the Under Secretary for Small Community and Rural Development

3. Section 2.70 is amended by adding new paragraph (a)(32) to read as follows:

§ 2.70 Administrator, Farmers Home Administration.

(a) *Delegations.* * * *

(32) Administer the State Agricultural Mediation Programs under Title 5 of the Agriculture Credit Act of 1987 (Pub. L. 100-233).

* * * * *

Dated: March 4, 1988.

For Subparts C and I.

Richard E. Lyng,
Secretary of Agriculture.

BILLING CODE 3410-07-M

Animal and Plant Health Inspection Service

7 CFR Part 301

[Docket No. 88-017]

Oriental Fruit Fly; Removal of Portions of Los Angeles County and Orange County From Quarantined Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: We are affirming without change an interim rule that amended the Oriental fruit fly regulations by removing portions of Los Angeles County and portions of Orange County in California from the list of quarantined areas.

EFFECTIVE DATE: April 11, 1988.

FOR FURTHER INFORMATION CONTACT: Eddie Elder, Chief Operations Officer, Domestic and Emergency Operations, PPQ, APHIS, USDA, Room 661, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-6365.

SUPPLEMENTARY INFORMATION:

Background

In an interim rule published in the Federal Register December 1, 1987 (52 FR 45597-45598, Docket Number 87-161) and effective November 24, 1987, we amended the Oriental fruit fly regulations by removing portions of Los Angeles and Orange Counties in California from the list of quarantined areas.

Comments on the interim rule were required to be postmarked or received on or before February 1, 1988. We did not receive any comments. The facts presented in the interim rule still provide a basis for the rule.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived the review process required by Executive Order 12291.

Within the portions of Los Angeles and Orange Counties that were removed from the quarantined area, there are fewer than 60 small entities that may be affected, including commercial growers of tomatoes and cucumbers, 38 nurseries, no more than 9 outdoor or mobile fruit stands, and 2 community gardens. The effect of this rule on these entities should be insignificant, since most of their sales are local intrastate, and were not affected by the regulatory provisions that were removed; those sales that were affected were generally articles that could be moved after compliance with treatment or inspection provisions of the regulations.

Under these circumstances, the Acting Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR 3015, Subpart V.)

List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant diseases, Plant pests, Plants (Agriculture), Quarantine, Transportation, Oriental fruit fly, Incorporation by reference.

PART 301—DOMESTIC QUARANTINE NOTICES

Accordingly, we are adopting as a final rule, without change, the interim rule that amended 7 CFR Part 301 and that was published at 52 FR 45597–45598 on December 1, 1987.

Authority: 7 U.S.C. 150dd, 150ee, 150ff, 161, 162, and 164–167; 7 CFR 2.17, 2.51, and 371.2(c).

Done in Washington, DC, this 8th day of March, 1988.

James W. Glosser,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 88-5410 Filed 3-10-88; 8:45 am]

BILLING CODE 3410-34-M

Federal Crop Insurance Corporation

7 CFR Part 401

[Amdt. No. 8; Docket No. 5447S]

General Crop Insurance Regulations; Canning and Processing Bean Endorsement

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule Correction.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) published a final rule in the **Federal Register** on Wednesday, March 2, 1988, at 53 FR 6559, amending the General Crop Insurance Regulations (7 CFR Part 401) to add a new section § 401.118, the Canning and Processing Bean Endorsement. In that publication, the State of Idaho was inadvertently omitted from the section listing those states where canning and processing bean crop insurance is otherwise authorized to be offered, and where bean acreage by type may be divided into more than one unit under certain conditions. This notice is published to correct that error.

EFFECTIVE DATE: March 10, 1988.

ADDRESS: Written comments on this correction may be sent to the Office of the Manager, Federal Crop Insurance Corporation, Room 4090, South Building, U.S. Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC., 20250, telephone (202) 447-3325.

SUPPLEMENTARY INFORMATION: FR Document 88-4529, appearing at pages 6559 through 6561, is corrected as follows:

§ 401.118 [Corrected]

On page 6560, in Column 2, Section 5 of 7 CFR § 401.118, the Canning and Processing Bean Endorsement, is corrected to read as follows:

* * * * *

5. *Unit division.*

For Idaho, Michigan, Minnesota, Oregon, Tennessee, Washington, and Wisconsin bean acreage by type (snap or lima) that would otherwise be one unit, as defined in section 17 of the general crop insurance policy, may be divided into more than one unit if you agree to pay an additional premium if required by the actuarial table and if for each proposed unit you maintain written, verifiable records of planted acreage and harvested production for at least the previous crop year and either:

a. Acreage planted to the insured beans is located in separate, legally identifiable sections or, in the absence of section descriptions, the land is identified by separate ASCS Farm Serial Numbers, provided:

(1) The boundaries of the sections or ASCS Farm Serial Numbers are clearly identified and the insured acreage can be easily determined; and

(2) The beans are planted in such a manner that the planting pattern does not continue into the adjacent section or ASCS Farm Serial Number; or

b. The acreage planted to the insured beans is located in a single section or ASCS Farm Serial Number and consists of acreage on which both an irrigated and nonirrigated practice are carried out, provided:

(1) Beans planted on irrigated acreage do not continue into nonirrigated acreage in the same rows or planting pattern (Nonirrigated corners of a center pivot irrigation system planted to insurable beans are part of the irrigated unit. Production on the total unit, both irrigated and non-irrigated, will be combined to determine the yield for the purpose of determining the guarantee for the unit); and

(2) Planting, fertilizing and harvesting are carried out in accordance with recognized good irrigated and nonirrigated farming practices for the area.

If you have a loss on any unit, production records for all harvested units must be provided. Production that is commingled between optional units will cause those units to be combined.

Done in Washington, DC on March 7, 1988.

Glen V. Bjorklund,

Acting Manager, Federal Crop Insurance Corporation.

BILLING CODE 3410-08-M

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Reg. 676]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 676 establishes the quantity of California-Arizona navel oranges that may be shipped to market during the period March 11 through March 17, 1988. Such action is needed to balance the supply of fresh navel oranges with the demand for such oranges during the period specified due to the marketing situation confronting the orange industry.

DATES: Regulation 676 (§ 907.976) is effective for the period March 11 through March 17, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2528-S, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447-5697.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order 907 [7 CFR Part 907], as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 123 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order, and approximately 4,065 producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

This action is consistent with the marketing policy for 1987–88 adopted by the Navel Orange Administrative Committee (Committee). The Committee met publicly on March 8, 1988, in Visalia, California, to consider the current and prospective conditions of supply and demand unanimously recommended a quantity of navel oranges deemed advisable to be handled during the specified week. The Committee reports that the demand for navel oranges is good.

Based on consideration of supply and market conditions, and the evaluation of alternatives to the implementation of prorate regulations, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. To effectuate the declared purposes of the Act, it is necessary to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

List of Subjects in 7 CFR Part 907

Arizona, California, Marketing agreements and orders, Navels, Oranges.

For the reasons set forth in the preamble, 7 CFR Part 907 is amended as follows:

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

1. The authority citation for 7 CFR Part 907 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 907.976 is added to read as follows:

Note: [This section will not appear in the Code of Federal Regulations.]

§ 907.976 Navel Orange Regulation 676.

The quantity of navel oranges grown in California and Arizona which may be handled during the period March 11, 1988, through March 17, 1988, are established as follows:

(a) District 1: 1,700,000 cartons;
(b) District 2: 300,000 cartons;
(c) District 3: Unlimited cartons;
(d) District 4: Unlimited cartons.

Dated: March 9, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

7 CFR Part 910

[Lemon Reg. 604]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 604 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 350,000 cartons during the period March 13 through March 19, 1988. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 604 (§ 910.904) is effective for the period March 13 through March 19, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447-5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended [7 CFR Part 910] regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601–674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1987–88. The committee met publicly on March 8, 1988, in Ventura, California, to consider the current and prospective conditions of supply and demand and unanimously recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports that the market for lemons is strong.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR Part 910 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 910.904 is revised to read as follows:

[Note: This section will not appear in the Code of Federal Regulations.]

§ 910.904 Lemon Regulation 604.

The quantity of lemons grown in California and Arizona which may be handled during the period March 13, 1988, through March 19, 1988, is established at 350,000 cartons.

Dated: March 9, 1988.

Charles R. Brader,

Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

---

7 CFR Part 927

Winter Pears Grown in Oregon, Washington, and California; Increase in Expenses for 1987–88 Fiscal Period

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule authorizes an increase in expenditures for the Winter Pear Control Committee established under Marketing Order 927 for the 1987–88 fiscal year. The expenses are increased from $3,396,563 to $3,816,563. The designated increase reflects higher than estimated costs for market development and promotion activities undertaken by the committee in marketing the record large 1987 crop.

EFFECTIVE DATES: July 1, 1987, through June 30, 1988 [§ 927.227].

FOR FURTHER INFORMATION CONTACT: George J. Kelhart, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone 202–475–3919.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order No. 927 [7 CFR Part 927] regulating the handling of winter pears grown in Oregon, Washington, and California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674], hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

A final rule establishing expenses in the amount of $3,396,563 for the Winter Pear Control Committee for the fiscal period ending June 30, 1988, was published in the **Federal Register** on October 30, 1987 [52 FR 41697]. That action also fixed assessment rates to be levied on winter pear handlers during the 1987–88 fiscal period. In a mail ballot completed in January, the Winter Pear Control Committee voted unanimously to increase its budget of expenses from $3,396,563 to $3,816,563.

A proposed rule inviting comments on this $420,000 increase was issued on February 10, 1988, and published in the Federal Register on February 17, 1988 [53 FR 4642]. The comment period ended February 29, 1988. No comments were received.

The increase is needed to expand market development and promotion activities deemed necessary by the committee to market the record large 1987 crop. The committee has adequate funds to cover the increased expenses. Hence, no changes in assessment rates are necessary because of this increase.

On the basis of the foregoing, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

It is found that the increased expenses are reasonable and likely to be incurred, and that such expenses will tend to effectuate the declared policy of the Act.

Approval of the increased expenses must be expedited because the committee needs to have authority to pay its expenses which are incurred on a daily basis. Therefore, the Secretary also finds that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** [5 U.S.C. 553].

List of Subjects in 7 CFR Part 927

Marketing agreement and order, Winter pears, Oregon, Washington California.

For the reasons set forth in the preamble, § 927.227 is amended as follows:

PART 927—WINTER PEARS GROWN IN OREGON, WASHINGTON, AND CALIFORNIA

1. The authority citation for 7 CFR Part 927 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 927.227 is amended as follows: (Note: This section will not be published in the Code of Federal Regulations).

§ 927.227 [Amended]

Section 917.227 is amended by changing "$3,396,563" to "$3,816,563."

Dated: March 8, 1988.

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 51

[Docket No. 88-016]

Animals Destroyed Because of Brucellosis; Indemnity Payments

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations governing the payment of indemnity for animals destroyed because of brucellosis by adding the Simbrah Association to the list of registered breed associations. This action is necessary to include all registered breed associations in the regulations.

EFFECTIVE DATE: April 11, 1988.

FOR FURTHER INFORMATION CONTACT: Dr. R.D. Hobbs, Senior Staff Veterinarian, Regulatory Communications and Compliance Policy Staff, VS, APHIS, USDA, Room 827, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–5861.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR Part 51 (referred to below as the regulations) provide for the payment of indemnities to owners of cattle, bison, and swine destroyed because of brucellosis.

On December 29, 1987, we published in the **Federal Register** (52 FR 49029–49030, Docket Number 87–139), a document proposing to amend § 51.1 of the regulations by adding the Simbrah Association to the list of registered associations. Our proposal invited the submission of written comments, which were required to be postmarked or received on or before January 28, 1988. We received one comment, which supports our proposed rule. Based on the rationale set forth in the proposal, we are adopting the provisions of the proposal as a final rule.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individuals, industries, federal, state, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

The economic impact of this rule is that it will allow approximately 2,200 small cattle producers owning registered Simbrah to receive a higher indemnity rate if these cattle must be destroyed because of brucellosis. There are many thousands of small cattle producers who do not own this registered breed of cattle and would therefore not be affected by this rule.

Under these circumstances, the Acting Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

List of Subjects in 9 CFR Part 51

Animal diseases, Bison, Brucellosis, Cattle, Hogs, Indemnity payments.

PART 51—ANIMALS DESTROYED BECAUSE OF BRUCELLOSIS

Accordingly, 9 CFR Part 51 is amended as follows:

1. The authority citation for Part 51 continues to read as follows:

Authority: 21 U.S.C. 111–113, 114, 114a, 114a–1, 120, 121, 125, 134b; 7 CFR 2.17, 2.51, and 371.2(d).

§ 51.1 [Amended]

2. In § 51.1, the definition of "Registered breed association" is amended by inserting "Simbrah Association," immediately after "Santa Gertrudis Breeders International,".

Done in Washington, DC, this 8th day of March, 1988.

James W. Glosser,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 88-5409 Filed 3-10-88; 8:45 am]

BILLING CODE 3410-34-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 21

[Docket No. 88-6]

Reports of Crimes and Suspected Crimes

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Interim rule with request for comments.

SUMMARY: The Office of the Comptroller of the Currency ("OCC") is revising 12 CFR 21.11 regarding reports by a national bank in the event of known or suspected crimes. These revisions are intended to clarify the filing requirement for these reports and will tend to reduce the overall number of criminal referral reports to be filed by national banks.

This interim rule references revisions to the two criminal referral forms, raises the threshold for filing criminal referrals where no suspect has been identified, and clarifies the filing requirement as far as reporting financial crimes where no loss is incurred by the bank, such as money laundering, bank bribery, and Bank Secrecy Act violations. The interim rule is intended to make report filing more efficient for the banks and

more useful for law enforcement agencies in identifying patterns of criminal activity and apprehending persons who commit crimes involving national banks.

DATES: This interim rule is effective April 11, 1988. Comments due on or before May 10, 1988.

ADDRESSES: Public comments should be submitted to: Office of Communications, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East SW., Washington, DC 20219.

FOR FURTHER INFORMATION CONTACT: Joel Miller, Attorney, Enforcement and Compliance Division, Office of the Comptroller of the Currency, Washington, DC 20219, (202) 447-1818.

SUPPLEMENTARY INFORMATION:

Background

The OCC is charged with safeguarding the safety and soundness of national banks and pursuant to that authority is responsible for ensuring that national banks apprise other Federal law enforcement authorities of any actual or potential violations of criminal statutes. Employee fraud, abusive insider transactions, check kiting schemes, money laundering and the like can be serious threats to a bank's security and may undermine the confidence and trust that individuals and businesses place in the banking industry. The OCC is primarily concerned with criminal transactions sufficient in size or number to impact the safety and soundness of the bank, patterns of criminal offenses, crimes committed by bank officials, and the adequacy of the bank's security systems and internal controls. The law enforcement community needs to receive reports, shortly after a crime or suspected crime has been discovered, which contain sufficient information to determine whether the matter warrants investigation and prosecution.

A Working Group was formed in December 1984 to address problems and promote cooperation toward the goal of improving the federal government's response to white collar crime in federally-regulated financial institutions. The Working Group is composed of senior officials of the federal financial institution regulatory agencies and the Justice Department. The Working Group monitors the criminal referral process and has recommended further improving and coordinating the criminal referral system now in use by all federally-insured financial institutions and the regulatory agencies.

On July 17, 1985, the OCC published its final rule in the Federal Register (50 FR 34857) pertaining to 12 CFR Part 21—Minimum Security Devices and Procedures and Reports of Crimes and Suspected Crimes. That final rule imposed the criminal referral reporting requirement upon all national banks. Based upon the OCC's experience over the past year, certain needed revisions and clarifications have been incorporated into this interim rule.

The goals of this interim rule are to improve the information quality of criminal referrals, thereby making the referrals more useful, to clarify the requirement for reporting financial crimes that result in no direct loss to the bank, and to raise certain of the threshold reporting requirements for national banks, thereby making the reporting process more efficient and economical for the banks. These changes are designed to facilitate the assessment and investigation of possible criminal matters, aid in the identification of patterns of criminal misconduct, and improve the OCC's ability to track the disposition of criminal referrals.

Reasons for Issuing Interim Rule With Notice

The policy of the OCC is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions or objections regarding this interim rule, to the location identified in the ADDRESSES section of this preamble. Comments must be received on or before 60 days after publication of this interim rule in the Federal Register.

This rule is being issued on an expedited basis in order to ensure consistency with analogous rules and interpretive rulings being issued by the other federal financial regulatory agencies. In addition, the federal law enforcement agencies that use the information contained in the criminal referrals need the information required by this rule in order to pursue those individuals known or suspected to have engaged in bank fraud, money laundering, and related criminal transactions. Concurrent with the issuance of this interim rule, OCC is issuing revised criminal referral forms incorporating the revisions to this reporting requirement.

Criminal Referral Forms (Short and Long)

Section 21.11 requires a bank to file a Criminal Referral Form to report known or suspected crimes to the OCC. The OCC Criminal Referral Form has two formats—a short form (CC-8010-08) and a long form (CC-8010-09). It is estimated that the short form will be used for 75% of the reports submitted. This estimated percentage on the use of short forms has declined from the 95% figure cited in the final regulation in July 1985, due to the OCC's decision to raise the threshold reporting requirement (from $2,500 to $5,000) for the reporting of mysterious disappearances, unexplained shortages, and known or suspected crimes where no suspect has been identified.

The "short form" requires a bank to report the basic facts of the known or suspected criminal transaction: The approximate date and dollar amount of the known or suspected criminal transaction, the type of crime (embezzlement, check kiting, money laundering etc.), a brief summary of the violation, and where known, the identity of any person suspected. The "long form," an expanded and more detailed report, is required only in those situations where the transaction or suspected violation exceeds $10,000, or for any transaction involving a bank insider (i.e., an executive officer, director, or principal shareholder) as defined at 12 CFR 215.2.

Submission of Criminal Referral Forms

Threshold Amounts

Revised rule § 21.11 requires that a national bank submit a Criminal Referral Form upon the discovery of any known or suspected criminal violation committed against the bank or involving a financial transaction conducted through the bank involving bank personnel. A report must be filed where bank personnel are believed to be involved regardless of the dollar amount of bank funds involved.

Revised rule § 21.11 also sets forth more general guidelines for the reporting of known or suspected criminal violations of the U. S. Code, or regulations promulgated thereunder, where a violation is committed against the bank or where a criminal transaction is undertaken using the bank to facilitate that transaction. The bank must report all such criminal transactions involving $1,000 or more where it has a substantial basis for identifying a possible suspect or group of suspects.

For a criminal violation not involving bank personnel and involving a transaction of $1,000 or less, a bank must file a report only when that transaction appears to be part of a pattern of criminal activity committed by one or more identifiable individuals and the aggregate value of the transactions totals $1,000 or more. For example, a series of forged signatures appearing on credit card purchase receipts must be reported if the bank has reason to believe one identifiable individual, or a group of identifiable individuals acting in concert, has perpetrated the forgeries, and the aggregate dollar loss is $1,000 or more. For those situations (such as money laundering or false statements on credit applications) where the bank does not incur a "loss" *per se,* the $1,000 test applies in that the bank must evaluate whether the transaction either involved, or had the potential to involve, $1,000 or more.

In those situations where there is no substantial basis for the bank to identify a possible suspect or group of suspects, a bank must report a known or suspected criminal violation only when it involves $5,000 or more. For example, where a bank is unable to identify a suspect as a perpetrator of a credit card fraud, the bank need not file a referral until the loss on any given account exceeds $5,000. In addition, revised rule § 21.11 provides that a bank must report mysterious disappearances or unexplained shortages of bank funds or other assets only when they amount to $5,000 or more.

What Triggers The Reporting Requirement

In order to clarify what constitutes a reportable "known or suspected criminal violation," the OCC will continue to incorporate into its Criminal Referral Forms (CC-8010-08 and 8010-09) a listing and description of the most common federal crimes involving financial institutions, their personnel, or their customers' accounts. Using this list as a base, bank personnel should, in most instances, be able to determine whether a particular situation gives rise to the reporting requirement. Of note, the revised criminal referral forms being issued concurrent with this interim regulation include reference to three additional federal criminal statutes: (1) 18 U.S.C. 1956; (2) 18 U.S.C. 1957; and (3) 31 U.S.C. 5324. Banks are encouraged to file referrals whenever they suspect criminal transactions in violation of any of the cited statutes were committed.

Suspected Violations

The reporting requirement imposes an obligation to report all "known or suspected criminal violations" that meet specified criteria. By "suspected violation" the OCC is referring to a transaction or series of transactions for which there is reasonable cause to believe that a criminal violation has occurred. The OCC cannot quantify the precise amount of evidence needed to trigger the reporting requirement any more than it can delineate all the relevant factors that a bank must consider in deciding whether or not to report a suspicious or otherwise irregular transaction.

In many instances the suspicious nature of the transaction is a function not only of the transaction itself and its context but also of the bank's experience with the individuals associated with the transactions, either as employees or customers of the bank. In many situations, the bank will be able to discern the "intent" of those involved in a suspicious transaction. Invariably, however, the pivotal question of criminal intent will be left for the determination of law enforcement authorities. All that a bank can do in those situations is make a practical assessment of the suspicious transaction based upon a good faith examination of all the relevant factors. Clearly, the more serious the irregularity, particularly if it involves a bank insider, the greater the obligation upon the bank to fully investigate the matter.

Revised Threshold Amounts for Filing Reports

The OCC has no desire to place unnecessary reporting burdens on national banks; however, it is interested in furthering the goal of crime detection and prevention in cooperation with other federal law enforcement agencies. The OCC has determined, based upon its experience with the criminal referrals made over the past year, that where a bank has no apparent basis for identifying a possible suspect or group of suspects involved with a known or suspected criminal violation, a minimum reporting amount of $5,000 is appropriate.

The OCC has further determined, based upon its experience with these referral forms, that where the bank has a reasonable basis for identifying a possible suspect or group of suspects, it is important that every crime of $1,000 or more be reported. In addition, crimes of less than $1,000 are to be reported where a bank has reason to believe that one or more identifiable individuals have committed a series of crimes which, when aggregated, total $1,000 or more. Where a bank employee, officer, director, or shareholder is suspected of criminal activity, all bank related crimes must be reported, regardless of the dollar amount involved.

The OCC continues to be reluctant to set an arbitrary threshold dollar amount for criminal referrals, below which banks would not be required to file reports, as such a floor amount could tend to lead to multiple non-reportable criminal violations. In order to avoid nonreporting of criminal violations, in this interim rule the OCC has established threshold amounts that require the filing of Criminal Referral Forms whenever significant criminal activity, or a pattern of criminal activity, is detected. The rule sets a threshold of $5,000 when no suspect is identified.

Reporting Deadline

Revised rule § 21.11 continues to impose a 30-calendar day reporting period, commencing from the date of detection, during which a bank must report a reportable transaction. In those situations where the transaction requires immediate attention or where the violation is ongoing, a bank is strongly encouraged to notify the appropriate law enforcement agencies and the appropriate OCC District Office by telephone. The bank's oral notification should be followed by a timely written report.

In those situations where a bank is not obligated to file a report (e.g. an unexplained shortage of less than $5,000), but facts subsequently come to light revealing information identifying the individual(s) known or suspected of having committed or attempting to commit a criminal act, the 30-calendar day reporting period commences from the date reportable information, such as the identity of a suspect, is first identified.

Penalty for Failure to Report

Revised § 21.11 identifies when a civil money penalty may be assessed against a bank, its officers or its directors for failure to file a report. Penalties may also be assessed where the violation is willful or demonstrates a careless disregard for compliance with § 21.11. Assessments are likely to be made where it is established that a bank officer, director or other employee has intentionally attempted to cover up a defalcation, significant loss, pattern of criminal transactions, or has intentionally failed to file reports.

If a question exists as to whether to report an incident, the OCC recommends that a report be submitted providing at least the nature of the transaction, relevant account numbers and the identities of those suspected. For example, where a bank has a substantial basis to suspect that an individual has engaged in a pattern of criminal conduct, such as engaging in monetary transactions that appear to violate the money laundering statutes, the bank should file a criminal referral describing that pattern of criminal conduct. Additionally, banks are encouraged to report suspected violations, regardless of amount, to either state or local law enforcement authorities, whenever a violation of state or local law is suspected.

Exceptions to Reporting Requirements

Revised rule § 21.11(f) continues to provide two exceptions to the reporting requirements: one for robberies and burglaries and the other for lost or missing securities. These exceptions are provided because of the OCC's recordkeeping requirement in § 21.5(c) which requires a bank to keep a record of all crimes of violence on file, and because of the Securities and Exchange Commission's reporting requirements set forth at 17 CFR 240.17f–l which requires the reporting of all lost and missing securities.

Notice and Comment and Regulatory Flexibility Act

The Office has found that good cause exists under 5 U.S.C. 553(b)(B), for not providing notice and public procedure for this rule. Those procedures are unnecessary and contrary to the public interest. This rule eases a reporting of information requirement used by the government, thereby benefitting national banks.

The goals of this interim rule are to improve the information quality of criminal referrals, thereby making the referrals more useful, to clarify the requirement for reporting financial crimes that result in no direct loss to the bank, and to raise certain of the threshold reporting requirements for national banks, thereby making the reporting process more efficient and economical for the banks. This rule is being issued on an expedited basis in order to ensure consistency with analogous rules and interpretive rulings being issued by the other federal financial regulatory agencies. Although implementation delay attributable to usual public procedure is not desirable since this rule benefits national banks, the Office believes that public comment is beneficial. Therefore, opportunity for public comment regarding this interim rule is provided.

Since the Office has found that notice and public procedure concerning this rulemaking are unnecessary, the provisions of the Regulatory Flexibility Act are not applicable.

Executive Order 12291

The OCC has determined that this interim rule is not a "major rule" and therefore does not require a regulatory impact analysis.

Paperwork Reduction Act

Pursuant to the Paperwork Reduction Act of 1980, the reporting and recordkeeping requirements of 12 CFR Part 21 were submitted to and approved by the Office of Management and Budget under OMB control number 1557–0069.

List of Subjects in 12 CFR Part 21

National Banks, Criminal referrals, Insider abuse, Theft, Embezzlement, Check kiting, Defalcations, Money laundering, Criminal transactions.

Authority and Issuance

For the reasons set out in the preamble, Part 21 of Chapter I of Title 12 of the Code of Federal Regulations is amended as follows:

PART 21—[AMENDED]

1. The authority citation for Part 21 continues to read as follows:

Authority: 12 U.S.C. 1 *et seq.*, 93a, 1818, as amended, and 1881–1884.

2. In § 21.11, paragraphs (b)(5), (c) (2), (3), (e) through (h) are republished and paragraphs (a), (b) (1), (2), (3) and (4), (c)(1), and (d) are revised to read as follows:

§ 21.11 Reports of crimes and suspected crimes.

(a) *Purpose.* This section applies to known or suspected crimes involving national banks. This section ensures that the appropriate federal regulatory and law enforcement agencies are notified when unexplained losses or known or suspected criminal acts are discovered. Based on these reports, the OCC maintains a data base for monitoring the types and extent of crimes against banks.

(b) *Reports Required.* A national bank shall file OCC Criminal Referral Form (CC–8010–08 or CC–8010–09) in accordance with the instructions on the form, in case of:

(1) Any mysterious disappearance or unexplained shortage of bank funds or other assets of $5,000 or more.

(2) Any known or suspected criminal violation, or pattern of criminal violations, of any section of the United States Code, or regulation promulgated thereunder, committed against the bank or involving a financial transaction conducted through the bank, where the bank has a substantial basis for identifying responsible bank personnel.

(3) Any known or suspected criminal violation, or pattern of criminal violations, of any section of the United States Code, or regulation promulgated thereunder, committed against the bank or involving a financial transaction conducted through the bank and involving or aggregating $1,000 or more in bank funds or other assets, where the bank believes, in good faith, that it was either an actual or potential victim of a criminal violation, or series of criminal violations, or that the bank was used to facilitate a criminal transaction, and the bank has a substantial basis for identifying a possible suspect or group of suspects.

(4) Any known or suspected criminal violation of any section of the United States Code, or regulation promulgated thereunder, committed against the bank and involving or aggregating $5,000 or more in bank funds or other assets, where the bank believes, in good faith, that it is either an actual or potential victim of a criminal violation, or series of criminal violations, or that the bank was used to facilitate a criminal transaction, even though there is no substantial basis for identifying a possible suspect or group of suspects.

(5) As used in paragraphs (b) (2), (3), and (4), of this section, the term "suspected" refers to all matters, including unexplained losses, for which there is a known factual basis for a belief that a crime has been or may have been committed.

(c) *Time for reporting.* (1) A national bank shall file, no later than 30 calendar days after the date of detection of the loss or known or suspected criminal violation, any report required pursuant to paragraph (b) of this section. Where a report becomes necessary because a possible suspect or group of suspects is finally identified, the 30-calendar day reporting period commences with the identification of the suspect or group of suspects.

(2) Where a pattern of crimes committed by an identifiable individual is detected by a bank, a report shall be filed no later than 30 calendar days after the aggregate amount of the crimes exceeds $1,000.

(3) In situations involving violations requiring immediate attention or where a reportable violation is ongoing, the bank should immediately notify, by telephone, the Offices set forth on the forms. Banks shall timely file, after telephone notification, the required written reports.

(d) *Reporting to Federal, State and local authorities.* Banks are strongly encouraged to file criminal referrals or otherwise report crimes or suspected criminal activity to federal, state and local law enforcement authorities in those situations where the facts reflect a significant likelihood that a violation of law has occurred.

(e) *Manner of reporting.* A bank may elect to file its reports on the appropriate OCC Criminal Referral Form, a legible photocopy thereof, or a facsimile of the appropriate OCC form.

(f) *Exemptions.* (1) Banks need not file Criminal Referral Forms for those robberies and burglaries explicitly covered by the recordkeeping requirements of § 21.5(c), committed or attempted at a banking office of a bank.

(2) Banks need not file Criminal Referral Forms for lost, missing, counterfeit or stolen securities if a report is filed pursuant to the reporting requirements of 17 CFR 240.17f–1.

(g) *Notification of Board of Directors.* The Bank shall have effective procedures ensuring that the board of directors of the bank is notified, not later than at their next meeting, of the filing of any report hereunder.

(h) *Penalty.* Willful failure to file or careless disregard in filing reports may subject the bank, its officers, and/or its directors to civil money penalties.

(Approved by the Office of Management and Budget under Control Number 1557–0069.)

Date: December 23, 1987.

Robert L. Clarke,

Comptroller of the Currency.

[FR Doc. 88–5295 Filed 3–10–88; 8:45 am]

BILLING CODE 4810-33-M

---

12 CFR Parts 29, 30, and 34

[Docket No. 88–7]

Real Estate Lending Activities of National Banks; Adjustable-Rate Mortgages, Due-on-Sale Clauses, Etc.

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency (the "Office") is amending its regulations governing the real estate lending activities of national banks. These amendments implement recommendations of the Federal Financial Institutions Examination Council, and are designed to achieve greater uniformity among the regulations of the several depository institution regulatory agencies. In general, these amendments consolidate and simplify various real estate lending rules of this Office, presently codified at 12 CFR Parts 29, 30, and 34.

Important revisions are being made to the Office's adjustable-rate mortgage ("ARM") regulation. Specifically, the amendments now being adopted change the types of loans for which national banks must give consumer-oriented disclosures, and rescind the Office's current ARM disclosure provision. National banks continue to be subject to the disclosure requirements contained in the Federal Reserve Board's Truth in Lending regulation (Regulation Z). In addition, to ease the regulatory burden of lenders and eliminate regulatory impediments to the secondary market for ARMs, these amendments facilitate the ability of national banks to deal in ARMs. Certain revisions are also made for greater clarity, and obsolete or unnecessary provisions are eliminated. Finally, obsolete portions of 12 CFR Part 30, dealing with due-on-sale clauses, are rescinded and the remaining sections of Part 30 as well as the revised ARM regulation are transferred to Part 34. This brings all of the Office's substantive real estate regulations together in one place.

EFFECTIVE DATE: March 11, 1988, except the removal of Part 29 which is effective October 1, 1988. Compliance with the amendments to Part 34 is optional until October 1, 1988.

FOR FURTHER INFORMATION CONTACT: Roland G. Ullrich, Deputy Director, Consumer Activities Division, (202) 287–4265, or Ellen C. Starr, Attorney, Legal Advisory Services Division, (202) 447–1880.

SUPPLEMENTARY INFORMATION:

Revisions to 12 CFR Part 29

An adjustable-rate mortgage is a mortgage loan in which the interest rate is subject to change. Changes in the interest rate on ARM loans may result in changes in monthly payment amounts or changes in the rate of amortization of principal (changes in the maturity of the loan or the amount of the final payment).

Designed in response to the inflation and high interest rates which prevailed in the late 1970s and early 1980s, ARMs came into widespread use after the various federal depository institution regulatory agencies issued regulations authorizing and governing them. The Office's ARM rules, contained in 12 CFR Part 29, were adopted on March 27, 1981. 46 FR 18932. The Federal Home Loan Bank Board followed on May 23, 1983. 48 FR 23058. Because of the disclosure requirements contained in 12 CFR 29.7, national banks were exempted from compliance with certain disclosure provisions of the Federal Reserve Board's Truth-in-Lending regulation (Regulation Z) dealing with variable-rate, closed-end credit. 12 CFR 226.18(f) n.43 (1987).

Some concerns regarding ARMs have developed in recent years. For instance, there has been considerable congressional and industry interest in developing uniform disclosures for ARM consumers. In particular, members of Congress have urged that such disclosures contain a "worst-case" payment scenario, *i.e.*, a provision which spells out the maximum payment for which the borrower may become liable under the adjustable-rate loan to which he or she is agreeing. This is to prevent "payment shock," which can occur when the consumer finds that, following a payment adjustment, the payments are much larger than anticipated.

Another concern has been the secondary market, in which lenders buy and sell ARM contracts. Such a market has arisen, but its development has been hampered in part by the fact that the different agencies' regulations have dissimilar requirements, especially in the content and timing of disclosures that must be made to consumers. National banks that desire to purchase ARMs in the secondary market have been limited to buying loans that conform to the Office's rules. This is undesirable, since limiting the marketability of ARMs limits the incentive to provide residential mortgage loans, restricting the availability of consumer credit. ARM originators who wished to have full access to the secondary market had to make multiple disclosures to their borrowers to comply with all of the agencies' requirements. Providing multiple disclosures is both burdensome for lenders and potentially confusing for consumers.

To address these problems, the Federal Financial Institutions Examination Council (FFIEC), composed of representatives of the Office, the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve System, the Federal Home Loan Bank Board, and the National Credit Union Administration, recommended uniform initial disclosure requirements for ARMs.

In a statement issued August 12, 1986, the FFIEC recommended that the following initial disclosures be given to prospective ARM borrowers: (1) "The Consumer Handbook on Adjustable-Rate Mortgages" (published jointly by the Federal Reserve Board and the Federal Home Loan Bank Board), or a suitable substitute; and (2) disclosures that demonstrate how any particular ARM loan program offered by a creditor may affect borrowers when interest rates change. The latter includes up to 14 specific elements, depending upon the specific loan program involved. The FFIEC's recommendations are similar to

OL 53 ISS 48 MR 11 988 MI

the initial disclosures required by the Office's current ARM regulation.

The Federal Reserve Board ("FRB") has already acted to implement the FFIEC's recommendations. On November 24, 1986, the FRB issued a Notice of Proposed Rulemaking (51 FR 42241) proposing to amend 12 CFR Part 226 (Regulation Z) to incorporate the FFIEC's proposals. The FRB also proposed to amend Regulation Z to add most of the subsequent disclosure requirements presently contained in the Office's ARM regulation at 12 CFR 29.7. The FRB issued a Final Rule amending Regulation Z on December 24, 1987. 52 FR 48665.

Rather than duplicate the rules that the FRB now has in place, on October 2, 1987, the Office issued a Notice of Proposed Rulemaking proposing to rescind the present disclosure requirements in 12 CFR 29.7. 52 FR 36953. The Office stated, however, that to the extent they are incorporated into Regulation Z, the Office will continue to enforce these requirements with respect to national banks. 52 FR 36954.

Beyond the FFIEC's recommendations, the Office has concluded that certain portions of its ARM regulation are no longer necessary and should be rescinded. The amendments now being adopted change the types of loans for which national banks must make consumer-oriented disclosures, and rescind the Office's current ARM disclosure provision. The revised regulations, with certain portions of 12 CFR Part 30, are added to Part 34 so that all of the Office's substantive real estate regulations are located in one place under the general heading of "Real Estate Lending."

Revisions to 12 CFR Part 30

Another area of concern in the early 1980's was "due-on-sale" clauses in real estate loans. These clauses give a lender the right to declare the entire debt payable at once if title to the property securing the loan is transferred. In the early 1980's, many states restricted or prohibited due-on-sale clauses either by statute or judicial decision. These states reasoned that such provisions discouraged homeowners from selling their property and therefore constituted an unreasonable restraint on the sale of housing. The Office, on the other hand, believed that in the volatile interest rate climate of the time, a rule ensuring the enforceability of due-on-sale clauses could encourage banks to offer fixed-rate, long term mortgage loans with relatively lower interest rates, due to the reduced level of market risk. 46 FR 46964 (1981).

The debate was resolved with the passage of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97–320, 96 Stat. 1469 ("the Garn-St Germain Act" or "the Act"). Section 341 of the Act, codified at 12 U.S.C. 1701j–3, provided generally that, notwithstanding state law, due-on-sale clauses in real estate loans, regardless of when originated, would be enforceable as to transfers occurring after the date the Act become effective (October 15, 1982). However, this general rule was not applicable during the "window period," *i.e.*, the period beginning with the date of a state rule of law restricting the enforceability of due-on-sale clauses and ending with the effective date of the Act. Due-on-sale clauses in window-period loans were to be enforceable only after the passage of three years from the effective date of the Act, unless a different rule was established by the appropriate regulatory authority. (The Office did, in fact, establish an earlier cutoff date of April 15, 1984. 12 CFR 30.1(b)(1).) In addition, due-on-sale clauses in certain types of transactions were prohibited.

The Office implemented the Garn-St Germain Act by the publishing its due-on-sale regulation, 12 CFR Part 30, on November 8, 1983. 48 FR 51283. Major portions of the regulation are concerned with the so-called window period which, as noted above, ended on April 15, 1984. Since that time, national banks have been free to enforce due-on-sale provisions without restriction, except in the transactions exempted by the Garn-St Germain Act.

The Office believes that it would be beneficial to simplify this regulation by rescinding obsolete portions dealing with the window period, paragraphs (b) and (d) of § 30.1. Since these paragraphs constitute the bulk of the regulation, the Office proposed to transfer the remaining valid portions, paragraphs (a) and (c) of § 30.1, to Part 34, "Real Estate Lending," where they would become new section 34.4. The present text would remain unchanged except for minor, nonsubstantive revisions.

Summary of Comments; Office Action

To implement the uniform disclosures recommended by the FFIEC, and address the other concerns outlined above, the Office issued a Notice of Proposed Rulemaking (the "NPRM") to amend 12 CFR Parts 29, 30 and 34. 52 FR 36953. The comment period on the NPRM ended November 2, 1987.

Twenty of the 21 comments received generally supported the Office's proposal to adopt the FFIEC's recommendation of uniform disclosure requirements for adjustable-rate mortgages. The only commenter opposing adoption suggested the retention of the Office's present disclosure requirement, contained in 12 CFR 29.7. Generally, commenters favored the proposed changes as beneficial to consumers, and asserted that compliance with the amendments would not be costly or difficult. One commenter stated that any additional burden would be outweighed by the convenience of a uniform disclosure requirement. Another commenter noted that national banks have operated at a competitive disadvantage to state banks, and stated that a level playing field and simplified regulation would be welcome. Few commenters specifically addressed the Office's proposal to consolidate existing real estate lending regulations, but those that did address consolidation supported it.

Most commenters made specific, technical recommendations as to ways in which the uniform ARM disclosures proposed could be improved. These technical recommendations are discussed by proposed section number and title, below.

After considering all of the comments, the Office has made changes to the final rule, designed to alleviate the burden of compliance with the regulation without compromising the goal of uniform disclosures for adjustable-rate mortgage loans extended for consumer credit purposes. In addition, other changes have been made to clarify the intentions of the proposed amendments to the regulation. For example, in response to comments received, the Office has revised the definition of an adjustable-rate mortage loan and has clarified the effect of the transition period. All changes to the proposed rule are discussed below. The Office has not adopted changes suggested by commenters which would alter the uniform disclosure provisions recommended by the FFIEC.

Section-by-Section Analysis

Section 34.4 Due-on-sale clauses

As proposed in the NPRM, this section is drawn from the present paragraphs (a) and (c) of § 30.1, which remain unchanged except for minor, technical revisions.

Section 34.5 Definition

In the NPRM, the Office proposed to revise the definition of an adjustable-rate mortgage loan, to cover only extensions of consumer credit to natural persons. 42 FR 36955. The phrase "consumer credit" was drawn from Regulation Z, (12 CFR Part 226) and is

intended to have the same meaning as it has in that regulation. The purpose of this revision was to clarify that the Office's ARM regulation, with its requirement of consumer-oriented disclosures, was not intended to apply to purchase-money mortgage loans for investment, commercial, business or agricultural purposes.

The original ARM regulation was intended, in part, to promote the availability of mortgage funds for residential purposes and to provide protections for home purchasers. 46 FR 18932, 18935 (1981). The regulation was not intended to regulate adjustable-rate mortgage loans made for other purposes. The broad language of the definition of an adjustable-rate mortgage loan, 12 CFR 29.1, coupled with the preemption provision of 12 CFR 29.2, has enabled some banks to extend variable rate loans for investment, business, commercial, or other non-consumer credit purposes, where these loans finance or refinance the purchase of and are secured by a one-to-four family dwelling. To comply fully with the Office's ARM regulation, these banks have made the consumer-oriented disclosures that the current ARM regulation requires in investment, commercial, business, or other non-consumer credit ARM transactions.

Approximately half of the commenters responded to the proposed change in the definition of an ARM. Most commenters supported the exclusion of loans for business, commercial, and agricultural purposes, stating that commercial borrowers neither wanted nor required the ARM disclosures. Some supporting the exclusion stated that it would allow banks to compete more effectively. However, one commenter objected to "the narrower definition proposed," on the basis that a "borrower who wishes to use loan proceeds for agricultural and industrial purposes should also be fully informed as to all possible changes in loan terms in order to make an informed choice before borrowing."

One commenter asserted that a narrower definition of the ARMs to which the regulation applies may ultimately reduce the types of ARM loans that a bank could make, stating that a large number of existing ARM loans which relied on the federal preemption provision of 12 CFR 29.9 would be excluded under the proposal. This commenter suggested that consistency with Regulation Z may be outweighed by a disadvantageous narrowing of the definition.

Some commenters stated that they preferred the Office's proposed definition of ARMs to that of the FFIEC. As noted at 52 FR 36956, the FFIEC's proposal covers only loans secured by the borrower's principal dwelling, and includes non-purchase money closed-end credit secured by the borrower's principal dwelling.

Other commenters opposed the Office's proposed definition, endorsing that recommended by the FFIEC. One commenter asserted that the Office's proposed definition left unclear the issue of whether a loan for the purpose of purchasing or refinancing a one-to-four family dwelling but secured by a different dwelling (*e.g.*, a vacation home) is covered by the regulation. This commentr advocated the approach taken by the FFIEC and the FRB, that an ARM is only covered by the regulation if the collateral used is the borrower's principal dwelling.

Two commenters maintained that, even as amended, the Office's proposed definition of a covered ARM was inconsistent with the FRB's definition. They noted that the Office's proposed definition reaches both closed- and open-ended loans; the latter are not covered by the FRB proposal. Another commenter stated that the FRB's proposed amendment to Regulation Z did not distinguish between first and second mortgage borrowings, in contrast to this Office's proposed definition, which does not include second mortgage loans that are silent with regard to whether the borrower will apply loan proceeds toward the payment of a purchase-money mortgage. This commenter advocated the FRB definition, suggesting that the FRB approach would enhance the opportunity for national banks to participate in an expanded secondary market for ARM loans.

By amending the definition of an adjustable-rate mortgage loan, the Office intended to clarify that the consumer-oriented disclosures were required only in consumer-credit transactions. The Office did not intend to prevent extensions of variable rate credit for investment, business, commercial or agricultural purposes. Therefore, this Office is revising the proposed definition. This change is accompanied by changes to the disclosure section, designed to make clear that the consumer-oriented ARM disclosures stated at Regulation Z must be given only in consumer credit transactions. As a result, ARM loans may continue to be made for investment, business, commercial or agricultural purposes, but such loans will not require the consumer credit disclosures of Regulation Z.

The NPRM also proposed to exclude short-term and demand loans from the coverage of the definition of an adjustable-rate mortgage. 52 FR 36955. This revision is intended to make the Office's adjustable-rate mortgage definition consistent with the FRB's amended Regulation Z, which applies only to variable rate loans with a term of greater than one year. 52 FR 48761. This revision does not affect the authority of national banks to make short term or demand loans secured by real estate, as that authority is derived from 12 U.S.C. 371 and 12 CFR Part 34. 12 U.S.C. 371; 12 CFR 34.2.

Section 34.6 General Rule

The NPRM proposed to eliminate the current restriction that national banks may make, sell, purchase, participate or deal in ARM loans "only if they conform to the conditions and limitations of this part." This change was intended to enhance the ability of national banks to participate in the nationwide secondary market in ARM loans by permitting them to purchase or participate in loans made in accordance with another regulatory agency's requirements.

The commenters favored the elimination of this restriction, agreeing that this amendment would enhance the establishment of a thriving secondary market in ARMs. One commenter, however, requested that this Office clarify the effect of the amendment on existing ARM loans, *i.e.*, whether a national bank could purchase or participate in ARM loans that complied with the requirements of another regulatory agency when made, but which were made prior to the effective date of this regulation.

In response to this comment, the Office has determined that the purposes of the amendment are best furthered if national banks may purchase or participate in adjustable-rate mortgage loans made in accordance with the regulatory requirements of another regulatory agency, regardless of when the ARM loans were originated.

Although the substantive requirements of the Office's ARM regulation, and those incorporated from the FRB's Regulation Z, apply to ARM loans made by national banks, the Office expressed some concern in its NPRM regarding the evasion of these requirements through the use of affiliates. The Office requested specific comment on whether to require that ARM loans a national bank purchased from an affiliate also comply with the amended ARM regulation.

Only one commenter requested the Office not to impose such a restriction on affiliates of national banks that originate loans. Therefore, the Office has decided to adopt a requirement that

BEST COPY AVAILABLE

the ARM loans which a national bank purchases from its affiliates must comply with the requirements of this Office's adjustable-rate mortgage regulation.

Section 34.7 Index

In the interest of greater clarity, the NPRM proposed to re-word this section. No substantive changes were intended. One commenter suggested that this provision be deleted, as the section offered "little or no protection to the consumer."

The Office intended that the specific requirements of this section apply only to consumer credit adjustable-rate mortgage loans. The NPRM would have achieved this result through an amended, narrower definition of an adjustable-rate mortgage loan. However, the Office is now retaining a broad definition of an adjustable-rate mortgage loan. In view of the broader definition of an adjustable-rate mortgage, the Office is now amending the index section. This amendment is intended as a clarification that the stated index requirements apply only in consumer credit transactions. This amendment will allow a bank to tie a variable interest rate to the bank's prime rate where the variable rate loan is made for investment, commercial, business, or agricultural purposes.

Section 34.8 Rate Changes

The NPRM proposed to delete the present section on rate changes, 12 CFR 29.4, believing that the information presented was superfluous. All comments that addressed the proposed deletion of 12 CFR 29.4 supported this change. One commenter stated that the note and related documents evidencing the loan contract typically established the basis for determining the index value to be used to adjust interest rates.

In place of the previous section on rate changes, the Office is adding a provision requiring that consumer credit ARM loans originated on or after December 9, 1987, include a limitation on the maximum interest rate that may apply during the term of the loan. This interest rate cap is mandated by section 1204 of the Competitive Equality Banking Act of 1987, Pub. L. No. 100-86, 100 Stat. 552.

Section 34.9 Pre-payment Fees

The NPRM proposed no changes to the current Pre-payment Fees section, 12 CFR 29.6, other than renumbering the section.

Section 34.10 Disclosure

In the NPRM, this Office proposed to adopt the recommendations of the FFIEC, and to amend its ARM disclosure requirements accordingly. Specific FFIEC recommendations were discussed by this Office in the NPRM. 52 FR 36953. The FRB has thoroughly addressed each of these recommendations and the specific items which the FFIEC listed. 52 FR 48665. Almost every comment the Office received made some specific suggestions about the actual disclosures proposed. These comments are addressed in the order that the pertinent disclosure items appeared listed. The FRB received similar comments to those received by this Office; the FRB responded to those comments in the final rule amending Regulation Z. 52 FR 48665.

As initial disclosures, the FFIEC recommended that ARM consumers be given (1) "The Consumer Handbook for Adjustable-Rate Mortgages," prepared by the FRB and the Federal Home Loan Bank Board, or a suitable substitute; and (2) a "loan program" disclosure, covering up to fourteen items, to be prepared for each adjustable-rate loan program. Commenters generally favored the requirement that the "Consumer Handbook for Adjustable-Rate Mortgages" or a suitable substitute be provided to potential customers. One commenter suggested that a process be developed and implemented whereby those lenders that chose to develop a substitute could obtain expedient approval of that substitute's suitability. Another commenter requested that the FFIEC develop and adopt a uniform disclosure booklet to discuss adjustable-rate mortgages generally, and provide definitions and examples of the specific disclosure items required.

As to the "loan program" disclosure which the FFIEC recommended be prepared for each adjustable-rate loan program, one commenter suggested that the FFIEC develop a uniform disclosure format. This commenter stated that a uniform booklet and disclosure format would allow a consumer to read about and understand a "generic ARM," and them compare detailed data from any lender, utilizing the same format. This commenter argued that without a common format, although lenders may provide the same types of information in compliance with the regulation, differences in presentation, format, and narrative would make it difficult for a consumer to compare programs from lender to lender.

The Office has decided not to implement a process whereby lenders would obtain agency approval prior to providing potential ARM consumers a "suitable substitute" for the "Consumer Handbook for Adjustable-Rate Mortgages." Instead, national banks should make a good faith determination whether the information they intend to provide is, in fact, a "suitable substitute." The Office considers that a "suitable substitute" should be, at a minimum, comparable to the "Consumer Handbook" in substance, comprehensiveness, and clarity. Many commenters specifically addressed the FFIEC's proposed disclosure item (j). 52 FR 36956. This item would require a lender to develop an example, based on a $10,000 loan amount, of how payments and the loan balance would be affected by changes implemented according to the terms of the loan program. The example must be based on index values beginning in 1977, and must be updated annually until a 15-year history is shown. Thereafter, the example should reflect the most recent 15 years of index values. Finally, the proposed example should reflect "all significant loan program terms, such as caps, a discounted interest rate, and negative amortization" triggered by index movements during the years shown.

All commenters addressing item (j) opposed it. They agreed that this item would increase the disclosure burden on lenders and would be of minimal benefit to ARM borrowers. They asserted that (1) considering all variables, such as interest rate caps, discounted rates, and negative amortization may prove confusing and misleading to customers; (2) historical fluctuation does not predict future interest rate activity; (3) the 15-year example would be difficult to develop, because many banks change their rates on their accounts monthly, and only change the customer's payment annually; (4) a 15-year example showing the index value and the amount of change on a semi-annual basis will demonstrate to the consumer how the index has performed, and the additional disclosure of payments and loan balance over that term is unnecessary; and (5) the added disclosure item would provide little information to the consumer which was not already more adequately provided under this Office's existing regulations.

One commenter contrasted the requirement of present § 29.7(a)(11) to that proposed at item (j), stating that in practical effect, item (j) may require an "unrealistic disclosure." Another commenter, however, endorsed item (j) "in that it modifies the existing requirement that national banks are presently required to give a hypothetical (and usually unrealistic) example of the payment amount and loan balance using an assumed one-percentage point increase in the index every six months."

Some commenters offered suggestions for improving the proposed disclosures. One commenter advocated an example which showed the historical performance of an index, and a "worst-case" scenario, showing the maximum interest rate, payment amount, and resulting loan balance. Another commenter suggested a prospective, rather than an historical, depiction of maximum interest rate, showing each year's loan cap over the life of the loan.

Although the FRB also received comments rejecting to disclosure item (j), the FRB has retained that item unchanged. 52 FR 48671. In addition, the FRB has included examples of the interpretation of these requirements. One item which the FFIEC recommended be disclosed, that a loan program contains no limitation on the amount of payment or interest rate increases, has been omitted as no longer necessary. *See* § 34.8, discussed above.

Other commenters addressed other aspects of the proposed disclosure. One warned that the FFIEC's recommended disclosure items (k), (m) and (n) may confuse borrowers by presenting them with too much information that they would not understand. 52 FR 36958. Another commenter asked that lenders not be required to give specific disclosures until the borrower had paid a nonrefundable fee and submitted an ARM loan application.

As proposed in the NPRM, the Office now rescinds the disclosure provision previously stated at 12 CFR 29.7, and defers to the disclosure requirements in Regulation Z, as amended. Generally, the initial disclosure requirements recommended by the FFIEC are patterned after the requirements of § 29.7(a). The FRB has amended Regulation Z to implement the recommendations of the FFIEC. 52 FR 48665. In amending Regulation Z, the FRB noted that it did not adopt changes suggested by commenters which would alter the uniform disclosure provisions recommended by the FFIEC. 52 FR 48666. Thus, by deferring to Regulation Z, the Office is adopting the FFIEC's recommendations.

As recommended by the FFIEC, and implemented by the FRB, the "loan program" disclosure must contain:

(i) The fact that the interest rate, payment, or term can change;

(ii) the index or formula to be used and a source of information about the index;

(iii) An explanation of how the interest rate and payment will be determined, including an explanation of how the index is adjusted, such as by the addition of a margin;

(iv) A statement that the consumer should ask about the current margin value and current interest rate;

(v) The fact that the interest rate will be discounted, and a statement that the consumer should ask about the amount of the interest rate discount;

(vi) The frequency of interest rate and payment changes;

(vii) Any rules relating to changes in the index, interest rate, payment amount, and outstanding loan balance, including, for example, an explanation of interest rate or payment limitations, negative amortization, and interest carryover;

(viii) An historical example, based on a $10,000 loan amount, illustrating how payments and the loan balance would have been affected by changes implemented according to the terms of the loan program. The example shall be based on index values beginning in 1977 and be updated annually until a 15-year history is shown. Thereafter, the example shall reflect the most recent 15 years of index values. The example shall reflect all significant loan program terms, such as negative amortization, interest rate carryover, interest rate discounts, and interest rate and payment limitations, that are triggered by index movements during the period;

(ix) An explanation of how the consumer may calculate the payments for the loan amount to be borrowed based on the most recent payment shown in the historical example;

(x) The maximum interest rate and payment amount for a $10,000 loan originated at the most recent interest rate shown in the hypothetical example assuming the maximum periodic increases in rates and payments under the program; and the initial interest rate and payment for that loan;

(xi) The fact that the loan program contains a demand feature;

(xii) The type of information that will be provided in notices of adjustments and the timing of such notices; and

(xiii) A statement that disclosure forms are available for the creditor's other variable-rate loan programs.

52 FR 48665. As recommended by the FFIEC, these disclosures must be provided to a prospective borrower when an application form is furnished or before the payment of a nonrefundable fee, whichever is earlier.

The FRB has also amended Regulation Z to impose new subsequent disclosure requirements on ARM lenders. The new subsequent disclosure provision is found at 12 CFR 226.20(c). 52 FR 48671. As with the initial disclosure requirements, the Office will enforce these provisions with respect to national banks.

These subsequent disclosure provisions resemble the subsequent disclosure requirements of § 29.7(b), with minor differences. Unlike § 29.7(b), Regulation Z as amended does not require a prompt subsequent disclosure of interest rate changes unless they are coupled with payment changes. Under the amended Regulation Z, notice of interest rate changes that do not result in payment changes must be given only once a year, instead of at the time of each change.

The FRB had originally proposed that a notice of interest rate changes, accompanied by payment changes, should be given to a consumer 30 days before a payment at the new level was due. Current § 29.7(b) requires this notice be given 25 days before a payment at the new level is due. In its Final Rule, the FRB adopted the timing of the notice provision in § 29.7, requiring notice 25 days before a payment at the new level is due.

The FRB does not incorporate in amended § 226.20 a statement, if appropriate, "that a prepayment fee will be charged if the borrower chooses to prepay the loan." The Office required this disclosure at § 29.7 (b)(6) and (c)(4). However, Regulation Z generally requires a disclosure about the existence of any prepayment penalty, which makes it unnecessary to specifically require that disclosure for adjustable-rate mortgage loans. *See* 12 CFR 226.18(k).

The balance of the subsequent disclosures in Regulation Z as amended are identical to this Office's requirements in § 29.7 (b) and (c). Therefore, the Office believes that it can promote regulatory simplification by rescinding present § 29.7 (b) and (c) without compromising consumer protection.

Short term and demand loans, which are defined respectively as mortgage loans which are not fully amortized by the end of the loan term and mortgage loans which are payable on demand, were addressed in § 29.7(d). That section previously required a standard, bold-faced warning of the possibility that such loans may be called or not renewed at maturity of the note. This requirement was in addition to the existing provisions applicable to these loans contained in Regulation Z, which require that a demand feature contained in a loan be disclosed, and that a payment schedule show a balloon payment when the loan matures prior to the end of the amortization schedule. *See* 12 CFR 226.18 (g) and (i).

Three of the four commenters who addressed the proposed elimination of a

OL
53
ISS
48
MR
11
988
MI

disclosure notice for short-term and demand loans supported that proposal. Two commenters stated that the Regulation Z disclosure requirements, which will still apply to these loans, are sufficient notice to consumers. However, one commenter asserted that the bold-faced notice that this Office required for short-term or demand loans should be incorporated in the FRB's Regulation Z, thus preserving the requirement that this notice be given. As the Office is not aware of any problems with the present requirements of Regulation Z, the notice required by § 29.7(d) has been eliminated.

Finally, the Office determined § 29.7(e) to be unnecessary, since that information can be derived from the initial disclosure of the margin or other adjustment mechanism mandated by the amendments to Regulation Z and the initial interest rate. One commenter supported this proposed deletion, while another recommended that his disclosure continue. The Office still feels the requirement to be superfluous, and therefore is eliminating it.

As noted in the discussion of the amended definition of an adjustable-rate mortgage loan, the Office does not intend to require that the consumer-oriented disclosures generally outlined above and incorporated in Regulation Z at 12 CFR 226.19(b) and 229.20(c) be given in investiment, business, commercial or agricultural credit transactions with a variable interest rate. This intent is expressed by the addition of a sentence to § 34.10, stating that the disclosures required by Regulation Z need only be made where application of the terms of Regulation Z would require that the disclosures be given.

In summary, by applying the definition of an adjustable-rate mortgage loan and the general rule, national banks may make, sell, purchase, participate or deal in extensions of variable rate credit made to finance or refinance the purchase of and secured by a lien on a one-to-four family dwelling. Although a national bank may make an adjustable-rate mortgage loan for business, investment, commercial or agricultural purposes, Regulation Z disclosures must only be given in consumer credit transactions, as required by that regulation. For example, where a bank extends a closed-end variable rate loan to a natural person, for the purchase of and secured by his or her single family principal dwelling, and the term of the loan is for greater than one year, the initial and subsequent disclosures of 12 CFR 226.19(b) and 226.20(c) must be given.

Section 34.11 Non-federally chartered commercial banks

The Office proposed no substantive changes to this section, which merely repeats authority conferred by § 804(a) of the Garn-St Germain Act upon state commercial banks to make ARM loans in accordance with federal regulations in lieu of state law. *See* 12 U.S.C. 3803(a). The section has been retained for the convenient reference of banks seeking that authority.

Previously, this section listed by number the specific provisions of the ARM regulation with which a state commercial bank must comply. One commenter suggested that the disclosure section, proposed § 34.10, should be added to the sections referenced in § 34.11 as being applicable to non-federally chartered commercial banks. As amended, § 34.11 omits any specific list of sections, and states that nonfederally chartered commercial banks relying on this provision must comply with the requirements of Subpart B of Part 34.

Section 34.12 Transition Rule

The NPRM proposed a six-month phase-in period, during which a national bank may comply with either the disclosure requirements as presently stated at 12 CFR 29.7, or with the amended disclosure requirements, § 34.10. At the end of that period, compliance with the new Part 34 will be required.

While some commenters favored the proposed six-month phase in, other commenters objected to the apparent retroactive effect of the proposed transition rule. One commenter suggested that lenders be permitted to comply with existing § 29.7(a) requirements for initial disclosures until the date on which lenders must comply with the new Regulation Z disclosure for adjustable-rate mortgages, October 1, 1988. This commenter also suggested that lenders be permitted to continue "renegotiable rate loans" in accordance with original loan commitments.

One commenter stated generally that the application of the disclosure requirement to ARM loans already being serviced may present severe compliance difficulties for some lenders. Another commenter protested its inability to comply with the subsequent disclosures of amended Regulation Z, and the terms of its own ARM loan documents.

The Office does not intend the amended disclosure provisions of the ARM regulation to have a retroactive effect. As noted above under "Effective Date," national banks have until October 1, 1988, as a transition period, during which the banks may choose to follow either the provisions of Part 29 or the amended requirements of Part 34 and Regulation Z. For adjustable-rate mortgage loans originated on or after October 1, 1988, compliance with the new Part 34 will be mandatory. However, national banks may continue to apply the provisions of Part 29 to adjustable-rate mortgage loans originated, or as to which a binding commitment was made, prior to October 1, 1988.

Effective Date of this Rule

As indicated above, this final rule is effective immediately upon publication in the **Federal Register**. The 30 days delayed effective date otherwise required under the Administrative Procedure Act has been waived pursuant to 12 U.S.C. 553(d)(3) of that Act, which provides for waiver "by the agency for good cause found and published with the rule."

The Office has noted that the initial disclosures the FFIEC recommended and the FRB adopted in amending Regulation Z largely track those previously required by the Office at 12 CFR Part 29. Further, the FRB amendment to its Regulation Z incorporates subsequent disclosure requirements that the Office had required of national banks. Finally, compliance with the requirements of Part 34 is optional until October 1, 1988, providing national banks ample time to develop and implement new adjustable-rate mortgage loan disclosure documents. For these reasons, the Office is waiving the 30 days delayed effective date for this rule.

Regulatory Flexibility Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act, the Comptroller of the Currency certifies that this final rule will not have a significant economic impact on a substantial number of small banks. All banks should benefit from regulatory simplification and the greater secondary market opportunities that will result from this final rule.

Executive Order 12291

The Office has determined that this final rule does not constitute a major rule within the meaning of Executive Order 12291. Accordingly, a Regulatory Impact Analysis will not be required on the grounds that this final rule: (1) Would not have an annual effect on the economy of $100 million or more; (2) would not result in a major increase in the cost of bank operations or government supervision, nor would it be likely to generate substantially higher payments for borrowers, and (3) would not have a significant adverse impact on competition, employment, investment, productivity, innovation, or competition with foreign-based entities.

Paperwork Reduction Act

The collection of information requirements contained in this final rule have been submitted to the Office of Management and Budget under section 3504(h) of the Paperwork Reduction Act. (OMB Control No. 1557–0183).

List of Subjects

12 CFR Part 29

Mortgages, National banks.

12 CFR Part 30

Due-on-sale clauses, National banks, Real estate loans.

12 CFR Part 34

Credit, Due-on-sale clauses, Mortgages, National banks, Real estate loans.

For the reasons set forth in the preamble, Title 12, Chapter I, Parts 29, 30 and 34 of the Code of Federal Regulations are amended as follows:

PART 29—[AMENDED]

1. The authority citation for Part 29 continues to read as follows:

Authority: 12 U.S.C. 1 *et seq.*; 12 U.S.C. 93a; and 12 U.S.C. 371.

2. Part 29 is amended by adding the following:

Note.—Subpart B of Part 34 of this chapter is effective on March 11, 1988, but under § 34.12 national banks have the option of continuing to comply with this Part 29 (in lieu of Part 34) until October 1, 1988.

PART 29—[REMOVED]

3. Part 29 is removed effective October 1, 1988.

PART 30—[REMOVED]

4. Part 30 is removed.

PART 34—[AMENDED]

1. The authority citation for Part 34 is revised to read as follows:

Authority: 12 U.S.C. 1 *et seq.*; 12 U.S.C. 93a; 12 U.S.C. 371; 12 U.S.C. 1701j–3.

2. Part 34 is amended by adding the heading "Subpart A—General" immediately before § 34.1.

3. Part 34 is amended by adding a new § 34.4 to read as follows:

§ 34.4 Due-on-sale clauses.

(a) *General rule.* A national bank may make or acquire through purchase, assignment, pledge or otherwise, a loan, secured by a lien on real property, that includes a clause, known as a due-on-sale clause, giving the lender or any assignee or transferee of the lender the power to declare the entire debt payable if all or part of the legal or equitable title or an equivalent contractual interest in the property securing the loan is transferred to another person, whether by deed, contract, or otherwise. Except as set forth in paragraph (b) of this section, such clauses in loans, whenever originated, shall be valid and enforceable as to transfers of the secured property occurring after December 8, 1983, notwithstanding any contrary law or judicial decision of any state, including the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands, and Guam, which laws and judicial decisions are hereby expressly preempted. For the purposes of this part, (1) real property shall also include such residential dwellings as condominium units, cooperative housing units, and residential manufactured homes and (2) the term "lender" means a government agency or person, including corporations, partnerships, trusts or associations making a real property loan or any assignee or transferee, in whole or in part, of such a person or agency.

(b) *Exceptions.* Due-on-sale clauses shall not be enforceable according to the terms of the contract in the case of transfers described in subsection (d) of section 341 of the Garn-St Germain Depository Institutions Act of 1982 (Pub. L. 97–320), 12 U.S.C. 1701j-3(d), as interpreted by the Federal Home Loan Bank Board pursuant to the powers granted to it in paragraph (e) of that section, 12 U.S.C. 1701j-3(e).

4. Part 34 is amended by adding a new Subpart B to read as follows:

Subpart B—Adjustable-Rate Mortgages

Sec.
34.5 Definitions.
34.6 General rule.
34.7 Index.
34.8 Rate changes.
34.9 Prepayment fees.
34.10 Disclosure.
34.11 Nonfederally chartered commercial banks.
34.12 Transition rule.

Subpart B—Adjustable-Rate Mortgages

Note.—Subpart B is effective March 11, 1988, but under § 34.12 national banks have the option of continuing to comply with Part 29 until October 1, 1988.

§ 34.5 Definitions.

(a) *Adjustable-rate mortgage loans.* (1) An adjustable-rate mortgage loan is any extension of credit made to finance or refinance the purchase of and secured by a lien on a one-to-four family dwelling, including a condominium unit, cooperative housing unit or residential manufactured home, where such loan is made pursuant to an agreement intended to enable the lender to adjust the rate of interest from time to time.

(2) Adjustable-rate mortgage loans do not include (i) fixed rate extensions of credit that are payable on demand; or (ii) fixed rate extensions of credit that are payable either without any interim amortization of the loan, or at the end of a term that, including any terms for which the bank has promised to refinance the loan, is shorter than the term of the amortization schedule.

(b) *Consumer credit.* The phrase "consumer credit" means credit offered or extended to a consumer primarily for personal, family, or household purposes.

§ 34.6 General rule.

(a) National banks and their subsidiaries may make, sell, purchase, participate, or otherwise deal in adjustable-rate mortgage loans without regard to any limitations imposed on adjustable-rate mortgage lending by the laws of any state, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, the Northern Mariana Islands, or Guam, which limitations are hereby expressly preempted.

(b) National banks may purchase or participate in adjustable-rate mortgage loans which were not made in accordance with the regulations in this part, except that any such loans purchased, in whole or in part, from an affiliate or subsidiary shall comply with the regulations in this part. For purposes of this paragraph, the terms "affiliate" and "subsidiary" shall have the same meaning that they have in 12 U.S.C. 371c.

§ 34.7 Index.

If the adjustable-rate mortgage loan is one to which 12 CFR 226.19(b) applies, loan documents shall specify an index to which changes in the interest rate charged on an adjustable-rate mortgage loan shall be linked. This index shall be readily available to and verifiable by the borrower, and beyond the control of the bank. A bank may use as an interest rate index any measure of market rates of interest which meets these requirements. The index for an adjustable-rate mortgage loan shall be either single values of the chosen measure or a moving average of the chosen measure calculated over a specified period.

§ 34.8 Rate changes.

All consumer credit adjustable-rate mortgage loans originated on or after December 9, 1987, shall include a limitation on the maximum interest rate that may apply during the term of the loan.

§ 34.9 Prepayment fees.

Banks offering or purchasing adjustable-rate mortgage loans may impose fees for prepayments regardless of any state law prohibitions of, or limitations on, such fees, which prohibitions or limitations are hereby expressly preempted. For the purpose of this part, prepayments shall not include:

(a) Payments that exceed the required payment amount to avoid or reduce negative amortization; or

(b) Principal payments in excess of those necessary to retire the outstanding debt over the remaining loan term at the then current interest rate that are made in accordance with rules governing the determination of monthly payments contained in the loan documents.

§ 34.10 Disclosure.

In consumer credit transactions, a national bank offering adjustable-rate mortgage loans shall make the disclosures required by regulations implementing the Truth in Lending Act as amended, Pub. L. 90–321, 82 Stat. 146 (1968), prescribed by the Board of Governors of the Federal Reserve System and commonly known as "Regulation Z." These disclosures shall be made in accordance with Regulation Z, in the instances in which Regulation Z would require that the disclosures be made.

§ 34.11 Nonfederally chartered commercial banks.

Under authority granted by section 804(a) of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97–320, codified at 12 U.S.C. 3803(a), nonfederally chartered commercial banks may make adjustable-rate mortgage loans in accordance with the provisions of this subpart.

§ 34.12 Transition rule.

If on March 11, 1988 a national bank has already made, or during the transition period a national bank makes, a loan or a binding commitment to lend under an adjustable-rate mortgage loan program which complied with the requirements of Part 29 of this chapter, but which would violate any of the provisions of this subpart, the national bank may continue to administer those loans or binding commitments to lend in accordance with that loan program. All adjustable-rate mortgage loans or binding commitments to make adjustable-rate mortgage loans which a national bank enters into after October 1, 1988, must comply with all provisions of this subpart.

Dated: February 19, 1988.

Robert L. Clarke,

Comptroller of the Currency.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 211

[Rel. No. SAB–77]

Staff Accounting Bulletin No. 77; Allocation of Debt Issue Costs in a Business Combination Accounted for as a Purchase

AGENCY: Securities and Exchange Commission.

ACTION: Publication of Staff Accounting Bulletin.

SUMMARY: This staff accounting bulletin expresses the staff's views regarding the allocation of debt issue costs in a business combination accounted for as a purchase.

FOR FURTHER INFORMATION CONTACT: John A. Heyman or John M. Riley, Office of the Chief Accountant (202–272–2130), or Howard P. Hodges, Jr., Dvision of Corporation Finance (202–272–2553), Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The statements in staff accounting bulletins are not rules or interpretations of the Commission nor are they published as bearing the Commission's official approval. They represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the Federal securities laws.

Jonathan G. Katz,

Secretary.

March 4, 1988.

PART 211—[AMENDED]

Accordingly, Part 211 of Title 17 of the Code of Federal Regulations is amended by adding Staff Accounting Bulletin No. 77 to the table found in Subpart B.

The staff hereby adds Sub-Section 6 to Topic 2.A of the Staff accounting bulletin series. Topic 2.A.6 discusses the staff's views regarding the allocation of debt issue costs in a business combination accounted for as a purchase.

Topic 2: Business Combinations

* * * * *

A. Purchase Method

* * * * *

6. Debt Issue Costs

Facts: Company A is to acquire the net assets of Company B in a transaction to be accounted for as a business combination using the purchase method. In connection with the transaction, Company A has retained an investment banker to provide advisory services in structuring the acquisition and to provide the necessary financing. It is expected that the acquisition will be financed on an interim basis using "bridge financing" provided by the investment banker. Permanent financing will be arranged at a later date through a debt offering, which will be underwritten by the investment banker. Fees will be paid to the investment banker for the advisory services, the bridge financing and the underwriting of the permanent financing. These services may be billed separately or as a single amount.

Question 1: Are all fees paid to the investment banker a direct cost of the acquisition and, as such, accounted for as an element of the purchase price of the business acquired?

Interpretive Response: No. Fees paid to an investment banker in connection with a business combination accounted for as a purchase, when the investment banker is also providing interim financing or underwriting services, must be allocated between direct costs of the acquisition and debt issue costs.

Paragraph 76 of Accounting Principles Board Opinion No. 16[1] and the related Interpretation No. 33 provide that direct costs such as finder's fees and fees paid to outside consultants should be treated as components of the cost of the acquisition, while the costs of registering and issuing any equity securities are treated as a reduction of the otherwise determined fair value of the equity securities. However, debt issue costs are an element of the effective interest cost of the debt, and neither the source of the debt financing nor the use of the debt proceeds changes the nature of such costs. Accordingly, they should not be considered a direct cost of the acquisition.

The portions of the fees allocated to direct costs and to debt issue costs should be representative of the actual services provided. Thus, in making a reasonable allocation (or in determining that an allocation made by the investment banker is reasonable[2]) factors such as (i) the fees

---

[1] Accounting Principles Board Opinion No. 16 establishes standards for the reporting of business combinations.

[2] This would apply irrespective of whether the fees for the services were billed as a single amount or separately, since the separate billing of the services implicitly involves an allocation by the investment banker.

charged by investment bankers in connection with other recent bridge financings and (ii) fees charged for advisory services when obtained separately, should normally be considered to determine the relative fair values of the two services. Whether these or other factors are considered, the allocation should normally result in an effective debt service cost (interest and amortization of debt issue cost[3]) which is comparable to the effective cost of other recent debt issues of similar investment risk and maturity. The amount accounted for as debt issue costs should be separately disclosed, if material.[4]

Question 2: May the debt issue costs of the interim "bridge financing" be amortized over the anticipated combined life of the bridge and permanent financings?

Interpretive Response: No. Debt issue costs should be amortized by the interest method over the life of the debt to which they relate. Debt issue costs related to the bridge financing should be recognized as interest cost during the estimated interim period preceding the placement of the permanent financing with any unamortized amounts charged to expense if the bridge loan is repaid prior to the expiration of the estimated period. Where the bridge financing consists of increasing rate debt, the consensus reached by the Financial Accounting Standards Board's Emerging Issues Task Force ("EITF") on this issue[5] Should be followed.

BILLING CODE 8010-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 284

[Docket No. RM87–34–000 et al., Order No. 500]

Regulation of Natural Gas Pipelines After Partial Decontrol; Public Hearing

March 8, 1988.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of public hearing.

SUMMARY: The Federal Energy Regulatory Commission (Commission) issued an interim rule and statement of policy, Order No. 500, on August 7, 1987, addressing concerns raised by the United States Court of Appeals for the District of Columbia Circuit in *Associated Gas Distributors* v. *FERC (AGD)*. Order No. 500 responded to the Court's concerns about take-or-pay problems in Order No. 436. Order No. 500 readopted the regulations originally promulgated by Order No. 436 with modifications designed to meet the concerns of the Court in *AGD*. Additionally, the Commission requested data from industry participants in order to make an accurate and reliable assessment of take-or-pay problems in the context of current market conditions before issuing a final rule in this docket.

Pursuant to requests from interested persons, a public hearing will be held.

DATES: A public hearing will be held on Monday, April 11, 1988 at 10:30 a.m. If necessary, the hearing will continue on April 12, 1988. Requests to participate and the amount of time requested should be directed to the Secretary no later than March 25, 1988.

ADDRESSES: The hearing will be held at: Hearing Room A, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

Requests to participate and questions regarding participation should be directed to: The Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Julia Lake White, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357–8530.

SUPPLEMENTARY INFORMATION: The Federal Energy Regulatory Commission (Commission) issued an interim rule and statement of policy in Order No. 500 [1] on August 7, 1987. The order addressed concerns about take-or-pay problems in Order No. 436 [2] raised by the United States Court of Appeals for the District of Columbia Circuit in *Associated Gas Distributors* v. *FERC (AGD)*.[3] Order No. 500 readopted the regulations originally promulgated by Order No. 436 with modifications designed to meet the concerns of the Court in *AGD*. Additionally, the Commission requested data from industry participants in order to make an accurate and reliable assessment of take-or-pay problems in the context of current market conditions.

The Commission has received requests for a public hearing to provide interested persons an opportunity to make oral presentations of their views on Order No. 500, under section 502(b) of the Natural Gas Policy Act of 1978 (NGPA). In response to these requests, the Commission is scheduling a public hearing. The purpose of this hearing is to provide interested persons an opportunity to make an oral presentation to the Commission on Order No. 500. The Commission will also accept written comments of a length not in excess of 15 pages, double spaced, summarizing the position of the parties making an oral presentation.

The hearing will be held on Monday, April 11, 1988, at 10:30 a.m. at the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, Hearing Room A. If necessary, the hearing will continue on April 12, 1988.

The hearing will not be of a judicial or evidentiary type. There will be no cross-examination of persons presenting statements. However, the Commission may question such persons.

Requests to participate in the hearing should be submitted by March 25, 1988, to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. Requests to participate should request the amount of time required for the oral presentation. A list of participants in the hearing will be available in the Commission's Office of Public Information and at Hearing Room A on the morning the hearing is convened.

A stenographer will prepare a transcript of the hearing which will be available in the public file for this proceeding, Docket No. RM87–34–000 *et al.*, in the Commission's Public Reference Room and may be ordered from that office. Any further procedural rules will be addressed by the Commission at the hearing.

---

[3] See Question 2 regarding the period over which the debt issue costs related to bridge financings should be amortized.

[4] *See* Rule 5–02(17) of Regulation S–X (17 CFR 210.5–02(17)).

[5] The EITF in Issue 86–15 (May 1, 1986) addressed the accounting for interest expense and debt issue costs for a debt instrument which matures at a stated date, but which may be consecutively extended for specific periods at the option of the borrower until a set, final, maturity date. The interest rate on the debt increased by a specific amount at each renewal/extension ("increasing rate debt"). The EITF reached a consensus that (i) periodic interest cost should be determined using the interest method, based on the estimated outstanding term of the debt taking into consideration the borrower's plans, ability and intent to service the debt, and (ii) debt issue costs should be amortized over the same period used in determining interest cost.

BILLING CODE 4717-01-M

PANAMA CANAL COMMISSION

35 CFR Part 60

Classified Information

AGENCY: Panama Canal Commission.

ACTION: Final rule.

SUMMARY: This final rule revises 35 CFR Part 60, which governs the Panama Canal Commission's information security program. The purpose of this document is to implement the provisions of Executive Order 12356. The regulations contained in this part are adopted pursuant to that Executive Order (which became effective on August 1, 1982) and to implement its provisions within the Panama Canal Commission. Executive Order 12356 sets forth uniform standards for the identification, classification, downgrading, declassification, and safeguarding of security information affecting the national defense and foreign relations of the United States.

EFFECTIVE DATE: March 11, 1988.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara Fuller, Assistant to the Secretary for Commission Affairs, Panama Canal Commission, 2000 L Street NW., Washington DC 20036-4996 (Telephone: 202-634-6441) or Mr. Thomas C. Duty, Chief, Administrative Services Division, Panama Canal Commission, APO Miami 34011-5000 (Telephone: 011-507-52-7757).

SUPPLEMENTARY INFORMATION: The Panama Canal Commission is revising its regulations dealing with programs for safeguarding and handling of classified information in order to implement Executive Order 12356. In addition to incorporating the provisions of the Executive Order and its implementing directives, the regulations also reflect organizational changes created by the disestablishment of the agency's Internal Security Office on December 1, 1981, and the subsequent realignment of duties and responsibilities between the Offices of Executive Administration and Personnel Administration, Panama Canal Commission. As part of this realignment, the Director, Office of Executive Administration has been designated the senior agency official to direct and administer the information security program for the Commission: his duties include an active oversight and security education program to ensure effective implementation of Executive Order 12356 and any implementing directives published by the Information Security Oversight Office. Also as a result this realignment, the Personnel Director has been designated the official responsible for directing the conduct of investigations of individuals for the purpose of security clearances, in accordance with the standards and criteria of E.O. 10450.

This is not a major rule for the purposes of Executive Order 12291. As required by the Regulatory Flexibility Act, it is hereby certified that this rule will not have a significant impact on small business entities.

List of Subjects in 35 CFR Part 60

Classified Information, Information Security, Panama Canal Commission.

For the reasons set forth in the preamble, the Panama Canal Commission proposes to revise in its entirety 35 CFR Part 60 to read as follows:

PART 60—CLASSIFIED INFORMATION

Sec.
60.1 Authority, scope and definitions.
60.2 Compliance with Executive Order 12356 and implementing directives.
60.3 Classification levels, categories, and limitations.
60.4 Limitations on original classification authority.
60.5 Use of derivative classification.
60.6 Requirements for classification guides.
60.7 Duration of classification.
60.8 Identification and markings.
60.9 Declassification and downgrading.
60.10 Access to classified information.
60.11 Top Secret, Secret, and Confidential Control Officer.
60.12 Mandatory review for declassification.
60.13 Custody and storage.
60.14 Security investigations; training and orientation of employees.
60.15 Debriefing upon termination of employment.
60.16 Responsibility of individual employees.
60.17 Loss or compromise; destruction of nonrecord classified information.
60.18 Procedures for receiving and transmitting classified documents.
60.19 Reproduction of classified documents.

Authority: E.O. 12356, 47 FR 14874; 32 CFR Part 2001 (Directive No.1, Information Security Oversight Office), 47 FR 27836; E.O. 10450, 18 FR 2489; 22 U.S.C. 3611.

§ 60.1 Authority, scope, and definitions.

(a) Executive Order 12356, dated April 2, 1982 (47 FR 14874, April 6, 1982) and 32 CFR Part 2001 (Directive No. 1 of the Information Security Oversight Office, approved by the National Security Council on June 22, 1982, 47 FR 27836, June 25, 1982), set forth uniform standards for the identification, classification, downgrading, declassification, and safeguarding of security information affecting the national defense and foreign relations of the United States. The regulations contained in this part are adopted pursuant to that Executive Order (which became effective on August 1, 1982) and implement its provisions within the Panama Canal Commission.

(b) Definitions:

(1) "Commission" refers to the Panama Canal Commission.

(2) "Information" means any information or material, regardless of its physical form or characteristics, that is owned by, produced by or for, or is under the control of the United States Government.

(3) "National security information" means information that has been determined pursuant to this Order or any predecessor order to require protection against unauthorized disclosure and that is so designated.

(4) "Foreign government information" means:

(i) Information provided by a foreign government or governments, an international organization of governments, or any element thereof with the expectation, expressed or implied, that the information, the source of the information, or both, be held in confidence; or

(ii) Information produced by the United States pursuant to or as a result of a joint arrangement with a foreign government or governments or an international organization of governments, or any element thereof, requiring that the information, the arrangement, or both, be held in confidence.

(5) "National security" means the national defense or foreign relations of the United States.

(6) "Confidential source" means any individual or organization that has provided, or that may reasonably be expected to provide, information to the United States on matters pertaining to the national security with the expectation, expressed or implied, that the information or relationship or both be held in confidence.

(7) "Original classification" means an initial determination that information requires, in the interest of national security, protection against unauthorized disclosure, together with a classification designation signifying the level of protection required.

(8) "ODUSD(P)" refers to the Office of the Deputy Under Secretary of Defense (Policy).

§ 60.2 Compliance with Executive Order 12356 and implementing directives.

(a) The Director, Office of Executive Administration is designated the senior agency official to direct and administer the information security program for the Commission, including an active oversight and security education program to ensure effective implementation of Executive Order 12356 and any implementing directives published by the Information Security Oversight Office.

(b) The Director, Office of Executive Administration will establish procedures to prevent unnecessary access to classified information, including procedures that (1) require that a demonstrable need for access to classified information is established before initiating administrative clearance procedures and (2) ensure that the number of persons granted access to classified information is limited to the minimum consistent with operational and security requirements and needs.

(c) The Personnel Director will direct the conduct of investigations relative to the issuance of security clearances in accordance with the standards and criteria of Executive Order 10450.

§ 60.3 Classification levels, categories, and limitations.

(a) Classification levels. Official information which requires protection against unauthorized disclosure in the interest of the national security shall be classified "Top Secret," "Secret," or "Confidential" depending upon the degree of its significance to national security. No other terms or phrases of classification shall be used to identify such information except as otherwise expressly provided by statute. If there is reasonable doubt about the need to classify information, it shall be safeguarded as if it were classified pending a determination by one of the original classification authorities listed in § 60.4(a), who shall make this determination within thirty (30) days. If there is reasonable doubt about the appropriate level of classification, it shall be safeguarded at the higher level of classification pending a determination by one of the original classification authorities, who shall make this determination within thirty (30) days.

(1) *"Top Secret"* shall be applied to information, the unauthorized disclosure of which reasonably could be expected to cause exceptionally grave damage to the national security. The Commission does not have the authority to classify information originally as "Top Secret."

(2) *"Secret"* shall be applied to information, the unauthorized disclosure of which reasonably could be expected to cause serious damage to the national security.

(3) *"Confidential"* shall be applied to information, the unauthorized disclosure of which reasonably could be expected to cause damage to the national security.

(b) Classification categories. Information shall be considered for classification if it concerns:

(1) Military plans, weapons, or operations;

(2) The vulnerabilities or capabilities of systems, installations, projects, or plans relating to the national security;

(3) Foreign government information;

(4) Intelligence activities (including special activities), or intelligence sources or methods;

(5) Foreign relations or foreign activities of the United States;

(6) Scientific, technological, or economic matters relating to the national security;

(7) United States Government programs for safeguarding nuclear materials or facilities;

(8) Cryptology;

(9) A confidential source; or

(10) Other categories of information that are related to the national security and that require protection against unauthorized disclosure as determined by the President or by agency heads or other officials who have been delegated original classification authority by the President. Any determination made under this subsection shall be reported promptly to the Director of Information Security, Office of the Deputy Under Secretary of Defense (Policy).

(c) Information that is determined to concern one or more of the categories in § 60.3(b) shall be classified when one of the original classification authorities listed in § 60.4(a) also determines that its unauthorized disclosure, either by itself or in the context of other information, reasonably could be expected to cause damage to the national security. Classification on the basis of combination or association with other (classified or unclassified) information shall be supported by a written explanation which shall be maintained with the record copy of such information.

(d) Unauthorized disclosure of foreign government information, the identity of a confidential foreign source, or intelligence sources or methods is presumed to cause damage to the national security.

(e) Information classified in accordance with § 60.3 shall not be declassified automatically as a result of any unofficial publication or inadvertent or unauthorized disclosure in the United States or abroad of identical or similar information, see § 60.11(e).

(f) Limitations on classification.

(1) In no case shall information be classified in order to conceal violations of law, inefficiency, or administrative error; to prevent embarrassment to a person, an organization, or the Panama Canal Commission or other agency; to restrain competition; or to prevent or delay the release of information that does not require protection in the interest of national security.

(2) Basic scientific research information not clearly related to the national security may not be classified.

(3) The President or the officials designated by the President in the **Federal Register** may reclassify information previously declassified and disclosed if it is determined in writing that (i) the information requires protection in the interest of national security; and (ii) the information may reasonably be recovered. These reclassification actions shall be reported promptly to the DUSD(P) for subsequent reporting to the Director of the Information Security Oversight Office.

(4) Information in the custody of the Panama Canal Commission may be classified or reclassified after an agency has received a request for it under the Freedom of Information Act (5 U.S.C. 552) or the Privacy Act of 1974 (5 U.S.C. 552a), or the mandatory review provisions of Executive Order 12356 if such classification meets the requirements of that Executive Order and is accomplished personally and on a document-by-document basis by the officials identified in § 60.4(a) or an official with original Top Secret classification authority.

§ 60.4 Limitations on original classification authority.

(a) The authority to classify information originally under this part shall be limited to the categories of Secret and Confidential. Only the following officials of the Panama Canal Commission are authorized to classify information or material originally:

(1) The Administrator; and

(2) The Director, Office of Executive Administration.

(b) Other officials and employees of the Panama Canal Commission originating documents which, in their opinion, should be classified as Secret or Confidential prior to dispatch, shall forward these documents to the Director, Office of Executive Administration with recommendation for appropriate classification. Such documents shall be protected by a cover sheet (such as Panama Canal

Commission Forms 165-Conf or 165–B Secret) of the classification recommended by the originator, and shall be handled and safeguarded as if classified, see § 60.8(a).

(c) All information originated within the Commission which is believed to require classification as Top Secret (within the meaning of this part and Executive Order 12356) shall be hand carried by the originator to the Director, Office of Executive Administration who will determine the appropriate level of classification. If the information warrants Top Secret classification, that official shall transmit the information promptly under appropriate safeguards to the agency which has appropriate subject matter interest and classification authority in accordance with the procedures established by § 60.18 of this part. If it is not clear which agency should get the information, it shall be sent to the Director of the Information Security Oversight Office for a determination.

(d) Intra-office documents, such as longhand notes or draft papers, that contain information affecting the national security shall be distinctly marked with the proper classification at top and bottom, by hand, by the originator, and shall be protected and destroyed in the same manner as an inter-office or inter-agency classified documents. Such intra-office documents shall be forwarded to the Office of Executive Administration for destruction as soon as the content has been included in a formal classified paper or as soon as the note or draft is no longer required.

(e) A holder of classified information or material shall observe and respect the classification assigned by the originator.

(f) Exceptional Cases. When an employee, contractor, licensee, or grantee of an agency that does not have original classification authority originates information believed by that person to require classification, the information shall be protected in a manner consistent with Executive Order 12356 and its implementing directives. The information shall be transmitted promptly as provided under the Order or its implementing directives to the agency that has appropriate subject matter interest and classification authority with respect to this information. That agency shall decide within thirty (30) days whether to classify this information. If it is not clear which agency has classification responsibility for this information, it shall be sent to the Director of the Information Security Oversight Office. The Director shall determine the agency having primary subject matter interest and forward the information, with appropriate recommendations, to that agency for a classification determination.

§ 60.5 Use of derivative classification.

(a) Derivative classification is: (1) the determination that information is in substance the same as information currently classified; and (2) the application of the same classification markings. Persons who only reproduce, extract, or summarize classified information, or who only apply classification markings derived from source material or as directed by a classification guide, need not possess original classification authority.

(b) Persons who apply derivative classification markings shall:

(1) Observe and respect original classification decisions; and

(2) Carry forward to any newly created documents any assigned authorized markings. The declassification date or event that provides the longest period of classification shall be used for documents classified on the basis of multiple sources.

(c) If a person who applies derivative classification markings believes that the process of reproducing, extracting, paraphrasing, restating or summarizing may have changed the level of or removed the basis for classification, an appropriate official of the originating agency or the office of origin who has the authority to upgrade, downgrade or declassify the information must be consulted.

(d) Paper copies of derivatively classified documents shall be marked at the time of origination as follows:

(1) Classification authority. (i) The authority for classification shall be shown as follows:

CLASSIFIED BY (description of source document on classification guide).

(ii) If a document is classified on the basis of more than one source document or classification guide, the authority for classification shall be shown as follows:

CLASSIFIED BY MULTIPLE SOURCES

In these cases the derivative classifier shall maintain the identification of each source with the file or record copy of the derivatively classified document. A document derivatively classified on the basis of a source document that is marked "CLASSIFIED BY MULTIPLE SOURCES" shall cite the source document in its "CLASSIFIED BY" line rather than the term "MULTIPLE SOURCES."

(2) Declassification and downgrading instructions. Dates or events for automatic declassification or downgrading, or the notation "ORIGINATING AGENCY'S DETERMINATION REQUIRED" to indicate that the document is not to be declassified automatically, shall be carried forward from the source document, or as directed by a classification guide, and shown on a "DECLASSIFY ON" line as follows:

DECLASSIFY ON (date; description of event) or ORIGINATING AGENCY'S DETERMINATION REQUIRED (OADR)

(3) Any additional markings or abbreviations described in paragraphs (b) through (m) of § 60.8 of this part appearing on the source material shall be carried forward to the new material when appropriate.

§ 60.6 Requirements for classification guides.

(a) Classification guides used to direct derivative classification and issued pursuant to Section 2.2 of Executive Order 12356 and § 60.5 of this part shall, at a minimum:

(1) Identify or categorize the elements of information to be protected;

(2) State which of the classification designations (i.e., Top Secret, Secret, or Confidential) applies to each element or category of the information;

(3) Prescribe declassification instructions for each element or category of information in terms of (i) a period of time, (ii) the occurrence of an event, or (iii) a notation that the information shall not be declassified automatically without the approval of the originating agency; and

(4) Indicate how the designation, time limits, markings, and other requirements of Executive Order 12356 and this part are to be applied.

(b) Each classification guide shall be kept current and shall be reviewed at least once every two years and updated as necessary. The Office of Executive Administration shall compile and maintain a list of classification guides in current use.

(c) Each guide shall be approved personally and in writing by the Director, Office of Executive Administration.

(d) The Administrator may, for good cause, grant and revoke waivers of the requirement to prepare classification guides for specified classes of documents or information. A decision to waive the requirement should be based, at minimum, on an evaluation of the following factors:

(1) The ability to segregate and describe the elements of information;

(2) The practicality of producing or disseminating the guide because of the nature of the information;

(3) The anticipated usage of the guide as a basis for derivative classification; and

(4) The availability of alternative sources for derivatively classifying the information in a uniform manner. The Director of the Information Security Oversight Office shall be notified of any waivers.

§ 60.7 Duration of classification.

(a) Information shall be classified as long as required by national security considerations. When it can be determined, a specific date or event for declassification shall be set by the original classification authority at the time the information is originally classified.

(b) Automatic declassification determinations under predecessor orders shall remain valid unless the classification is extended by an authorized official of the originating agency. These extensions may be by individual documents or categories of information. The originating agency shall be responsible for notifying holders of the information of such extensions.

(c) Information classified under predecessor orders and marked for declassification review shall remain classified until reviewed for declassification under the provisions of Executive Order 12356.

§ 60.8 Identification and markings.

(a) At the time of original classification, the following information shall be shown on the face of all classified documents, or clearly associated with other forms of classified information in a manner appropriate to the medium involved, unless this information itself would reveal a confidential source or relationship not otherwise evident in the document or information:

(1) One of the three classification levels defined in § 60.3;

(2) If the original classification authority is other than the approving or signing official, the identity shall be shown as follows:

CLASSIFIED BY (identification of original classification authority)

(3) Agency and office of origin. If the identity of the originating agency and office is not apparent on the face of a document, it shall be placed below the "CLASSIFIED BY" line.

(4) Declassification and downgrading instructions. Declassification and, as applicable, downgrading instructions shall be shown as follows:

(i) For information to be declassified automatically on a specific date:

DECLASSIFY ON: (date)

(ii) For information to be declassified automatically upon occurrence of a specific event:

DECLASSIFY ON: (description of event)

(iii) For information not to be declassified automatically:

DECLASSIFY ON: ORIGINATING AGENCY'S DETERMINATION REQUIRED or "OADR"

(iv) For information to be downgraded automatically on a specific date or upon occurrence of a specific event:

DOWNGRADE TO (classification level) ON (date or description of event)

(b) Each classified document shall by marking or other means, indicate which portions are classified, with the applicable classification level, and which portions are not classified. The Administrator may, for good cause, grant and revoke waivers of this requirement for specified classes of documents or information. The Director of the Information Security Oversight Office shall be notified of any waivers.

(c) Marking designations implementing the provisions of Executive Order 12356, including abbreviations, shall conform to the standards prescribed in implementing directives issued by the Information Security Oversight Office.

(d) Foreign government information shall either retain its original classification or be assigned a United States classification that shall ensure a degree of protection at least equivalent to that required by the entity that furnished the information.

(e) Information assigned a level of classification under predecessor Executive Orders shall be considered as classified at that level of classification despite the omission of other required markings. Omitted markings may be inserted on a document by the officials listed in § 60.4(a) of this part.

(f) The overall classification of a document, whether or not permanently bound, or any copy or reproduction thereof, shall be conspicuously marked or stamped at the top and bottom of the outside of the front cover (if any), on the title page (if any), on the first page, on the back page, and on the outside of the back cover (if any). Each interior page of a classified document shall be marked or stamped at the top and bottom either according to the highest classification of the content of the page, including the designation "Unclassified" when appropriate, or according to the highest classification of the document. In any case, the classification marking of the page shall not supersede the classification marking of portions of the page marked with lower levels of classification.

(g) Whenever practicable, subjects and titles shall be selected so as not to require classification. When the subject or title is classified, an unclassified identifier may be assigned to facilitate receipt and reference.

(h) Classifiers shall identify the level of classification of each classified portion of a document (including subjects and titles), and those portions that are not classified. Portion marking shall be accomplished by placing a parenthetical designator immediately preceding or following the text that it governs. The symbols "(TS)" for Top Secret, "(S)" for Secret, "(C)" for Confidential, and "(U)" for Unclassified, shall be used for this purpose. If individual portion marking is impracticable, the document shall contain a description sufficient to identify the information that is classified and the level of such classification. The officials listed in § 60.4(a) may for good cause, request from the DUSD(P) a waiver of the portion marking requirement for specified classes of documents or information. The Director of the Information Security Oversight Office shall be notified by the DUSD(P) of any waivers.

(i) The classification and associated markings prescribed by this part for documents shall, where practicable, be affixed to material other than documents by stamping, tagging, or other means. If this is not practicable, recipients shall be made aware of the classification and associated markings by notification or other means.

(j) A transmittal document shall indicate on its face the highest classification of any information transmitted by it. It shall also include the following or similar instruction:

(1) For an unclassified transmittal document:

UNCLASSIFIED WHEN CLASSIFIED ENCLOSURE IS REMOVED

(2) For a classified transmittal document:

UPON REMOVAL OF ATTACHMENTS THIS DOCUMENT IS (classification level of the transmittal document standing alone)

(k) Documents that contain foreign government information shall include either the marking "FOREIGN GOVERNMENT INFORMATION," or a marking that otherwise indicates that the information is foreign government information. If the fact that information is foreign government information must be concealed, the marking shall not be used and the document shall be marked as if it were wholly of U.S. origin. Documents classified by a foreign government or an international organization of governments shall, if the foreign classification is not in English, be marked with the equivalent United States classification. Foreign government information not classified by a foreign government or an international organization of governments but provided to the United States in confidence by a foreign government or by an international organization of governments, shall be classified at an appropriate level and shall be marked with the United States classification accordingly.

(l) In addition to the marking requirement in paragraphs (a) through (k) of this section, the additional markings provided in paragraphs (l)(1)–(3) of this section shall, as appropriate, be displayed prominently on classified information. When display of these additional markings is not practicable, their applicability to the information shall be included in the written notification of the assigned classification.

(1) For classified information containing Restricted Data or Formerly Restricted Data as defined in the Atomic Energy Act of 1954, as amended, such markings as may be prescribed by the Department of Energy in regulations issued under the Act shall be applied.

(2) For classified information involving intelligence sources or methods:

WARNING NOTICE—INTELLIGENCE SOURCES AND METHODS INVOLVED.

(3) For classified information that, pursuant to Executive Order 12356, the originator has determined should be subject to special dissemination or reproduction limitations, or both, a statement placing the user on notice of the restrictions shall be included in the text of the document or on its cover sheet; e.g., "Reproduction requires approval of originator," or "Further dissemination only as directed by the Director, Office of Executive Administration."

(m) National security information that is transmitted electrically shall be marked as follows:

(1) The highest level of classification shall appear before the first line of text;

(2) A "CLASSIFIED BY" line is not required;

(3) The duration of classification shall appear as follows:

(i) For information to be declassified automatically on a specific date:

DECL:(date)

(ii) For information to be declassified upon occurrence of a specific event:

DECL:(description of event)

(iii) For information not to be automatically declassified which requires the originating agency's determination, see § 60.7(a):

DECL: OADR

(iv) For information to be automatically downgraded:

DNG (abbreviation of classification level to which the information is to be downgraded and date or description of event on which downgrading is to occur).

§ 60.9 Declassification and downgrading.

(a) Information shall be declassified or downgraded as soon as national security considerations permit. Review of classified information shall be coordinated with other agencies that have a direct interest in the subject matter. Information that continues to meet the classification requirements prescribed by § 60.3 of this part, despite the passage of time, will continue to be protected in accordance with Executive Order 12356 and this part.

(b) Information shall be declassified or downgraded by the official who authorized the original classification, if that official is still serving in the same position; by the originator's successor; by a supervisory official of either; or by officials delegated such authority, in writing, by an official listed in § 60.4(a).

(c) In the case of classified information transferred in conjunction with a transfer of functions, and not merely for storage purposes, the receiving agency shall be deemed to be the originating agency for purposes of Executive Order 12356 and this part.

(d) In the case of classified information that is not officially transferred as described in § 60.9(c), but that originated in an agency that has ceased to exist and for which there is no successor agency, each agency in possession of such information shall be deemed to be the originating agency for purposes of Executive Order 12356 and this part. Such information may be declassified or downgraded by the agency in possession after consultation with any other agency that has an interest in the subject matter of the information.

(e) The Commission shall maintain a current listing of officials delegated declassification or downgrading authority by name or position.

(f) Classified information accessioned into the National Archives of the United States from the Commission shall be declassified or downgraded by the Archivist of the United States in accordance with Executive Order 12356, the directives of the Information Security Oversight Office, and guidelines established by the Director, Office of Executive Administration of the Panama Canal Commission. Such guidelines shall be reviewed and updated if necessary at least every five years, unless earlier review is requested by the Archivist.

§ 60.10 Access to classified information.

(a) A person is eligible for access to classified information provided that a determination of trustworthiness has been made and that such access is essential to the accomplishment of lawful and authorized Government purposes. The determinations of eligibility and trustworthiness, referred to in this part as a security clearance, shall be based on such investigations as the Panama Canal Commission may require. The Personnel Director shall be responsible for conducting investigations relative to the issuance of security clearances in accordance with the standards and criteria of Executive Order 10450, and will maintain a list showing the level of security clearances granted to each person. Security clearances will be granted by the Director, Office of Executive Administration, as provided in § 60.14 of this part.

(b) In addition to a security clearance, a person must have a need for access to the particular classified information or material sought in connection with the performance of that person's official duties or contractual obligations, except in those instances provided for in paragraph (d) of this section. The determination of that need shall be made by the Director, Office of Executive Administration in coordination with officials having responsibility for the classified information or material.

(c) When a person no longer requires access to classified information or material in connection with the performance of that person's official duties or contractual obligations, the security clearance shall be withdrawn. Likewise, when a person no longer needs access to a particular security classification category, that person's security clearance shall be adjusted to the classification category still required for the performance of that person's duties and obligations. In both instances, such action shall be without prejudice to the person's eligibility for a security clearance should the need again arise.

(d) Persons engaged in historical research projects and former Presidential appointees who occupied

policy-making positions may be authorized access to classified information or material originating within the Panama Canal Commission. In such cases, the requirement in section 60.10(a) that access to classified information may be granted only as is essential to the accomplishment of lawful and authorized Government purposes, may be waived, but only if the Commission has jurisdiction over the information and:

(1) The Commission makes a written determination that access is consistent with the interests of national security;

(2) The Commission takes appropriate steps to protect classified information from unauthorized disclosure or compromise, and ensures that the information is safeguarded in a manner consistent with Executive Order 12356;

(3) The Commission limits the access granted to former Presidential appointees to items that the person originated, reviewed, signed or received while serving as a Presidential appointee; and

(4) In addition, the Director, Office of Executive Administration obtains:

(i) Written agreements from the requesters to safeguard the information to which they are given access as permitted by Executive Order 12356 and this part; and

(ii) Written consent from the requester for the Director, Office of Executive Administration to review all of their notes and manuscripts for the purpose of assuring that no classified information is contained in them.

(e) If the access requested by historical researchers and former Presidential appointees requires the rendering of services for which fair and equitable fees may be charged pursuant to 31 U.S.C. 9701, the requester shall be so notified and the fees may be imposed.

(f) Except as provided by directives issued by the President through the National Security Council, classified information originating in one agency may not be disseminated outside any other agency to which it has been made available without the consent of the originating agency.

§ 60.11 Top Secret, Secret, and Confidential Control Officer.

(a) The Director, Office of Executive Administration, Panama Canal Commission, is the Agency's designated Top Secret Control Officer and is responsible for the receipt, current accountability, and transmission of all Top Secret information. The Deputy Director, Office of Executive Administration is the Alternate Top Secret Control Officer. A physical inventory of all Top Secret material shall be made at least annually.

(b) The Director and the Deputy Director, Office of Executive Administration are also the Agency's designated Control Officer and Alternate Control Officer, respectively, for all classified information up to and including Secret.

(c) The Director, Office of Executive Administration shall act on all suggestions and complaints received by the Commission with respect to the administration of Executive Order 12356 and this part, and may also recommend to the Administrator appropriate administrative actions or sanctions to correct abuse or violation of any provision of that Order or directives under it. The Director of the Information Security Oversight Office shall be promptly informed by the agency when such violations occur.

(d) To the extent required by applicable laws and agency regulations, the Administrator shall report to the Attorney General evidence reflected in classified information of possible violations of Federal criminal law by an agency employee and of possible violations by any other person of those Federal criminal laws specified in guidelines adopted by the Attorney General.

(e) When the Commission is the agency of primary interest, following an inadvertent or unauthorized publication or disclosure of information identical or similar to information that has been classified in accordance with the Executive Order 12356 or predecessor orders, the Director, Office of Executive Administration shall determine the degree of damage to the national security, the need for continued classification, and, in coordination with the agency in which the disclosure occurred, what action must be taken to prevent similar occurrences, see § 60.17.

§ 60.12 Mandatory review for declassification.

(a) Any United States citizen, permanent resident alien, federal agency, or the government of a U.S. state or municipality may request that classified information be reviewed for declassification by the originating agency and released. Such requests must be submitted in writing to the Chief, Administrative Services Division, Panama Canal Commission, APO Miami 34011–5000 (or Panama Canal Commission, Balboa Heights, Republic of Panama). In accordance with § 9701 of title 31, United States Code, fees may be applied to any requests for declassification and release. A request need not identify the information requested by date or title, but must describe the document or material containing the information with sufficient specificity to enable the agency to locate it with a reasonable amount of effort. Whenever a request is deficient in its description of the information sought, the Chief, Administrative Services Division shall notify the requester that, unless additional identifying information is provided or the scope of the request is narrowed, the Commission will take no further action on the request.

(b) When the Commission receives any request for documents in its custody that were classified by another agency, it shall refer copies of the request and the requested documents to the originating agency for processing, and may, after consultation with the originating agency, inform the requester of the referral. In cases in which the originating agency determines in writing that a response is required, it is the responsibility of the referring agency to respond to the requester.

(c) When another agency refers a request to the Commission for review because the Commission originally classified the information requested, the Commission shall treat the request as though it were submitted directly to it under paragraph (a) of this section. The Commission shall send its decision directly to the requester and shall, if so requested, notify the referring agency of its decision on the request and on the appeal, if any.

(d) Requests for classification review made under paragraph (a) of this section shall be promptly acknowledged by the Chief, Administrative Services Division and then forwarded to the official who originally classified the document, or that official's successor, or when appropriate to an official designated by an official listed in § 60.4(a), who, in coordination with the Chief, Administrative Services Division, shall decide whether the requested information may be declassified, see § 60.7 and § 60.9.

(1) Unless withholding is otherwise warranted under applicable law, any information which may be declassified shall normally be forwarded to the requester within sixty (60) days after receipt of a proper request. If additional time is needed to locate or review the requested information, the Chief, Administrative Services Division will notify the requester accordingly. Except in unusual circumstances, a decision will be made within one year of receipt of the request.

(2) When information cannot be declassified in its entirety, a reasonable

effort will be made, consistent with other applicable law, to release those portions of the requested information that constitute a coherent segment.

(3) Upon the denial or a partial denial of a request, the Chief, Administrative Services Division shall reply to the requester and provide a brief statement of the reasons for the denial, a notice of the right to appeal the decision to the Director, Office of Executive Administration, and a notice that the appeal must be in writing and must be received by the Commission within sixty (60) days of receipt of the decision letter by the requester. Appeals should be addressed to: Director, Office of Executive Administration, Panama Canal Commission, APO Miami 34011-5000 (or Panama Canal Commission, Balboa Heights, Republic of Panama).

(e) Within thirty (30) days after its receipt of a proper appeal against an initial decision not to declassify information, the Director, Office of Executive Administration shall make and dispatch h the decision whether the information should be declassified. If the Director, Office of Executive Administration is the original classification authority of the information under appeal, the Administrator shall determine whether the information may be declassified. The Director, Office of Executive Administration shall, after the decision, promptly make available to the requester any information that is declassified and which is otherwise releasable. If continued classification of the requested information is necessary, the requester shall be notified of that decision and the reasons therefor. If requested, the appeal determination shall also be communicated to any referring agency.

(f) The classification reviews made in response to requests and appeals under this section are in addition to the systematic review of classified information prescribed by Executive Order 12356 and 32 CFR Part 2001.

(g) Requests for access to classified material submitted under the Freedom of Information Act or the Privacy Act of 1974 (5 U.S.C. 552 and 552a) shall be processed in accordance with Parts 9 and 10 of 35 CFR, and shall be subject to the same review criteria for declassification as requests submitted under paragraphs (a) through (d) of this section. In response to a request for information under the Freedom of Information Act, the Privacy Act of 1974, or the mandatory review provisions of this Order, the Commission shall refuse to confirm or deny the existence or non-existence of requested information whenever the fact of its existence or non-existence is itself classifiable under Executive Order 12356 or 32 CFR Part 2001.

§ 60.13 Custody and storage.

(a) Classified information shall be protected in accordance with applicable National Security Council directives or directives promulgated by the Information Security Oversight Office and approved by the National Security Council.

(b) Each bureau director and chief of an independent unit (or classified security control officer as designated by the Director, Office of Executive Administration) shall be responsible for assuring that all classified information within that official's organization is used, processed, stored, reproduced, and transmitted only under conditions which will provide adequate protection and prevent access by, or dissemination to, unauthorized persons. Containers, vaults, alarm systems, and associated security devices procured after the effective date of this part for the storage and protection of classified information shall be in conformance with the standards and specifications published by the General Services Administration and, to the maximum extent practicable, be of the type designated on its Federal Supply Schedule.

(c)(1) Top secret information shall be stored in a GSA-approved security container with an approved built-in, three-position, dial-type combination lock; in a vault protected by an alarm system and response force; or in other storage facility that meets the standards for top secret established under the provisions of paragraph (b) of this section.

(2) Secret and confidential information shall be stored in a manner and under the conditions prescribed for top secret information, or in a container, vault, or alarmed area that meets the standards for secret or confidential information established pursuant to the provisions of paragraph (c)(1) of this section, and/or paragraph (c)(3) of this section.

(3) Secret and confidential information may also be stored in a safe-type filing cabinet having a built-in, three-position, dial-type, changeable combination lock, or a steel filing cabinet equipped with a steel lock bar, provided it is secured by a three-position, changeable combination padlock approved by GSA for the purpose. The Director, Office of Executive Administration shall prescribe any necessary supplementary controls for storage of secret information in cabinets equipped with a steel lock bar.

(d) Each bureau director and chief of an independent unit is responsible for assuring that all personnel within that official's organization, having access to classified information, have a security clearance issued by the Director, Office of Executive Administration, see §§ 60.14 and 60.16.

(e)(1) Combinations of all repositories containing classified information shall be changed at least annually and forwarded in double-sealed envelopes to the Office of Executive Administration. The double-sealed envelopes shall be classified no lower than the highest category of information contained in the repositories. Combinations to dial-type locks shall be changed only by persons having appropriate security clearance, and shall be changed whenever such equipment is placed in use, whenever a person knowing the combination no longer requires access to the combination, whenever the equipment is taken out of service, and at least once every year. Knowledge of combinations protecting classified information shall be limited to the minimum number of persons necessary for operating purposes. Records of combinations shall be classified no lower than the highest level of classified information to be stored in the security equipment concerned. Bureau directors and heads of independent units shall ensure that combinations of dial-type locks shall be changed whenever there is reason to suspect possible compromise of the current combination.

(2) When security equipment having a built-in combination lock is taken out of service, the lock shall be reset to the standard combination 50-25-50. Combination padlocks shall be reset to the standard combination 10-20-30.

(3) The Commission shall establish administrative procedures for the control and accountability of keys and locks whenever key-operated, high-security padlocks are utilized. The level of protection provided such keys shall be equivalent to that afforded the classified information being protected. Under no circumstances may keys be removed from the premises. They shall be stored in a secure container.

(f) Custodians of classified matter are responsible for registering with the Office of Executive Administration the names of all persons having knowledge of combinations to repositories containing classified information.

(1) Persons entrusted with classified information shall be responsible for providing protection and accountability for such information at all times and for locking classified information in approved security equipment whenever

it is not in use or under the direct supervision of authorized persons. Custodians shall follow procedures which will ensure that unauthorized persons do not gain access to classified information.

(2) Individuals charged with the custody of classified information shall conduct the necessary inspections within their areas to ensure adherence to procedural safeguards prescribed to protect classified information. The Director, Office of Executive Administration shall ensure that periodic inspections are made to determine whether procedural safeguards prescribed by agency regulations are in effect at all times.

§ 60.14 Security investigations; training and orientation of employees.

(a) Requests for security clearances, including changes in the level of clearances, will be forwarded to the Office of Personnel Administration for background investigations and security checks. The Personnel Director shall ensure that all necessary investigations are completed, and will provide a recommendation on the issuance of a security clearance to the Office of Executive Administration. The Director, Office of Executive Administration, in consideration of all available information, will determine if a security clearance may be issued, or if the level may be changed, and establish the expiration date of the clearance.

(b) The Director, Office of Executive Administration is also responsible for establishing and maintaining a training and orientation program for employees concerned with classified information or material.

§ 60.15 Debriefing upon termination of employment.

(a) Bureau directors and heads of independent units shall be responsible for notifying the Office of Executive Administration whenever it is necessary that an employee be briefed or debriefed. Such notification should be in writing and be at least sixty (60) days, or as long as possible, in advance.

(b) Bureau directors and heads of independent units shall ensure that debriefings are accomplished for any employee whose employment is terminated, or scheduled to be terminated, or when a temporary separation from employment (not to include leave) for sixty (60) days or more has occurred or is scheduled, whenever the employee has had access to classified information within the last twelve calendar months of his employment.

§ 60.16 Responsibility of individual employees.

(a) The responsibility for the safeguarding of classified information shall rest on each individual employee having possession or knowledge of it, regardless of how such information or knowledge was obtained. In addition, each individual employee is directly responsible for acquiring familiarity with and complying with these and subsequently published security regulations.

(b) Any officer or employee, at any level of employment, determined to have been responsible for any release or disclosure of national security information or material in a manner not authorized by Executive Order 12356 or under this part, is subject to prompt and stringent administrative action, and, where a violation of criminal statute may be involved, is subject to prosecution under applicable law.

§ 60.17 Loss or compromise; destruction of nonrecord classified information.

(a) Any person who has knowledge of the loss or possible compromise of classified information in the custody of the Commission shall immediately report the circumstances to the Office of Executive Administration. The Director, Office of Executive Administration shall initiate an inquiry to (1) determine cause, (2) place responsibility, and (3) take corrective measures and appropriate administrative, disciplinary, or legal action. If it is determined that classified information has been compromised, the agency that originated the information shall be notified of the loss or possible compromise so that a damage assessment may be conducted and appropriate measures taken to negate or minimize any adverse effect of the compromise.

(b) The Administrator (or Director, Office of Executive Administration) shall initiate a damage assessment whenever there has been a compromise of classified information originated by the Commission that, in his judgment, can reasonably be expected to cause damage to the national security. Damage assessments shall be in writing and shall conform to the guidelines established by the Information Security Oversight Office, as provided in 32 CFR 2001.47(b).

(c) Nonrecord classified information that has served its intended purpose shall be destroyed in accordance with procedures and methods approved by the Administrator. The method of destruction selected must preclude recognition or reconstruction of the classified information or material.

§ 60.18 Procedures for receiving and transmitting classified documents.

(a) The procedures for handling classified documents received by any person or unit of the Panama Canal Commission shall be as follows:

(1) All classified documents received by any person or unit of the Commission shall be immediately delivered to the Office of Executive Administration. Personnel of the Office of Executive Administration shall receipt for and record all classified documents received from outside agencies (except that those officials listed in § 60.4(a) of this part may receipt for classified documents from outside agencies, and then forward them to the Office of Executive Administration, in person or by an authorized representative).

(2) The receipted documents shall be permanently recorded by the Office of Executive Administration, at which time accountability for these documents shall be assumed by that office.

(3) When classified documents addressed to an individual in the Panama Canal Commission are received by the Office of Executive Administration, the addressee shall be notified by telephone that such classified matter is awaiting him; or the classified documents may be transmitted as provided in paragraph (c) and (d) of this section. When the addressee picks up the classified documents, all items shall be recorded on an individual classified documents register furnished by the Office of Executive Administration; one copy is to be permanently retained in the library, and one is to be furnished to the addressee, or his authorized representative, who shall sign for the documents opposite each item on the register. This method of transfer may be utilized in lieu of a receipt.

(b) When any unit of the Panama Canal Commission prepares a document which is to be classified Secret or Confidential for transmission to other offices of the Commission, the procedure shall be as follows:

(1) Prepare sufficient copies of the document for whatever distribution is required, and one additional copy for file in the Office of Executive Administration.

(2) Forward draft copies, handwritten copies, and carbons to the Office of Executive Administration for retention or destruction under established procedures.

(i) In addition, all portions of electric typewriter ribbons used in the preparation of classified material must be destroyed in the same manner. Reusable cloth typewriter ribbons must be protected if used for preparation of classified material on the first pass through typewriter.

(ii) Classified material may not be entered into electronic equipment with memory capability, such as word processors, computers, personal computers, memory typewriters and other similar equipment, *unless* specific, written permission is obtained in advance, for each specific piece of equipment or system, from the Office of Executive Administration.

(3) Bring all copies of the document to the Office of Executive Administration. Copies shall be securely fastened underneath a cover sheet of the classification recommended by the originator.

(4) At the direction of the Director, Office of Executive Administration, the proper classification, short title, and serial number shall be assigned to each document, and an accountability stamp shall be placed on each copy.

(5) All classified documents shall be appropriately and conspicuously marked to put all persons on clear notice of their classified content. In addition, all classified documents shall be marked to indicate the downgrading-declassification schedule to be followed in accordance with § 60.9.

(6) The documents shall be recorded in the permanent documents log. The accountability for the documents passes from the originator to the Office of Executive Administration at this point.

(7) Distribution of the remaining copies shall be made according to the procedures covered in paragraphs (a)(3), (c) and (d) of this section. The number of copies of documents containing classified information shall be kept to a minimum to decrease the risk of compromise and reduce storage costs.

(c) When any unit of the Panama Canal Commission transmits documents or information classified Top Secret to other offices of the Commission, or any classified documents or information to any agencies or units other than the Commission, the procedure for handling such information shall be as follows:

(1) The documents or information shall be enclosed in opaque inner and outer covers before transmitting. The inner cover shall be a sealed wrapper or envelope plainly marked with the assigned classification and addresses of both sender and addressee. The outer cover shall be sealed and addressed with no identification of the classification of its contents.

(2) A receipt shall be attached to or enclosed in the inner cover. The receipt shall identify the sender, addressee, and the document, but shall contain no classified information. It shall be immediately signed by the recipient and returned to the sender.

(d) When the Commission transmits classified documents or information to any agency other than the Commission, or documents or information classified Top Secret to other offices of the Commission, one or more of the following methods shall be used:

(1) By specifically designated personnel having the appropriate security clearance;

(2) By State Department diplomatic pouch;

(3) By messenger-courier system specifically created for that purpose;

(4) Over authorized secure communication circuits.

(e) Secret and confidential documents or information may also be transmitted by the following methods:

(1) As provided in paragraph (c) of this section, if transmittal is to be within the Commission;

(2) By U.S. registered mail through Army, Navy, or Air Force Postal Service facilities provided that the information does not at any time pass out of U.S. citizen control and does not pass through a foreign postal system; or

(3) Under escort of appropriately cleared personnel aboard U.S. Government and U.S. Government-contract vehicles or aircraft, ships of the United States Navy, civil-service-manned U.S. Naval ships, and ships of U.S. Registry. Operators of vehicles, captains or masters of vessels, and pilots of aircraft who are U.S. citizens and who are appropriately cleared may be designated as escorts.

§ 60.19 Reproduction of classified documents.

(a) Top Secret documents may not be reproduced without the consent of the originating agency unless otherwise marked by the originating office. The reproduction of Secret and Confidential documents may be restricted by the originating agency. Reproduced copies of classified documents are subject to the same accountability and controls as the original documents.

(b) The Office of Executive Administration is the only office within the Panama Canal Commission authorized to reproduce documents which have been classified. Other offices within the Panama Canal Commission which require the reproduction of classified documents shall take them to the Office of Executive Administration, where the documents will be reproduced, properly marked, controlled and then returned to the user.

Dated: February 9, 1988.

D.P. McAuliffe,
Administrator.

BILLING CODE [illegible]

VETERANS ADMINISTRATION

38 CFR Part 3

Frequency of Payment of Improved Pension

AGENCY: Veterans Administration.

ACTION: Final regulation.

SUMMARY: The Veterans Administration (VA) is amending its adjudication regulations pertaining to the frequency of payment of improved pension. The amendment is necessary to insure that other Federal benefits are not denied to VA beneficiaries solely because of the payment of improved pension less frequently than monthly. The effect of this amendment will be to provide VA beneficiaries with the ability to elect monthly pension payments if to do so would be to their advantage.

EFFECTIVE DATE: March 11, 1988.

FOR FURTHER INFORMATION CONTACT: Robert M. White, Chief, Regulations Staff, Compensation and Pension Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420 (202) 233-3005.

SUPPLEMENTARY INFORMATION: It has been brought to our attention that in some instances payment of improved pension less frequently than monthly has resulted in the denial of other Federal benefits, such as Supplemental Security Income and Medicaid, because of the amount of the payment. By amending 38 CFR 3.30 to provide an option for VA beneficiaries who receive improved pension payments less frequently than monthly to elect to receive monthly payments, other Federal benefits will not be denied solely on the basis of the frequency of payment of improved pension. An editorial change is also being made to delete the last sentence of both paragraphs (b) and (c) of § 3.30 as redundant.

The VA finds good cause for dispensing with prior publication for public comments, such comments being unnecessary and contrary to the public interest. Denial of other Federal benefits is an unintended result for those VA improved pension beneficiaries who receive their payments quarterly, semi-annually, or annually under the current provisions of § 3.30. The beneficiaries

affected by this amendment may, therefore, choose to receive their improved pension benefits in the same manner, monthly, as do the vast majority of improved pension beneficiaries.

The Administrator has determined that denial of their Federal benefits because of the current provisions of § 3.30 is an unintended result and is contrary to the best interests of our improved pension beneficiaries. Any delay in effectuating this amendment could result in further denials of other Federal benefits with resulting hardship to our beneficiaries. Public participation is unnecessary and an effective date as of publication of this amendment is warranted.

Because a notice of proposed rulemaking is unnecessary and is not being published, this change does not come within the term "rule" as defined in, and made subject to, the Regulatory Flexibility Act (RFA), 5 U.S.C. 601(2). In any case, the Administrator hereby certifies that this regulation will not have a significant economic impact on a substantial number of small entities as they are defined in the RFA, 5 U.S.C. 601–612. The reason for this certification is that this regulatory amendment imposes no regulatory burden on small entities, and only claimants for VA benefits would be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this regulation is exempt from the initial and final regulatory flexibility analyses requirements of §§ 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Administrator has determined that this regulation is nonmajor for the following reasons:

(1) It will not have an annual effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program numbers are 61.104 and 64.105.

List of Subjects in 38 CFR Part 3

Administrative practices and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

Approved: February 12, 1988.

Thomas K. Turnage,
Administrator.

PART 3—[AMENDED]

In 38 CFR Part 3, ADJUDICATION, § 3.30 is amended by adding introductory text and by revising paragraphs (b) and (c) to read as follows:

§ 3.30 Frequency of payment of improved pension.

Payment shall be made as shown in paragraphs (a), (b), (c), (d), and (e) of this section; however, beneficiaries receiving payment less frequently than monthly may elect to receive payment monthly in cases in which other Federal benefits would otherwise be denied.

(Authority: 38 U.S.C. 210(c))

* * * * *

(b) *Quarterly.* Payment shall be made every 3 months on or about March 1, June 1, September 1, and December 1, if the annual rate payable is at least $144 but less the $228.

(c) *Semiannually.* Payment shall be made every 6 months on or about June 1, and December 1, if the annual rate payable is at least $72 but less than $144.

* * * * *

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW-FRL-3340-5]

Hazardous Waste Management System: Identification and Listing of Hazardous Waste; Final Exclusion Rule

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA or Agency) today is granting a final exclusion from the lists of hazardous wastes contained in 40 CFR 261.31 and 261.32 to the Releases Control Branch (RCB) of EPA, for certain solid wastes generated at the Denney Farm site in McDowell, Missouri by the EPA Mobile Incineration System. This action responds to a delisting petition received by the Agency under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 268, 124, 270, and Title 40 of the Code of Federal Regulations, and under 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude wastes on a "generator-specific" basis from the hazardous waste lists.

EFFECTIVE DATE: March 11, 1988.

ADDRESSES: The public docket for this final rule is located at the U.S. Environmental Protection Agency, 401 M Street, SW., (Sub-basement), Washington, DC 20460, and is available for public viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding Federal holidays. Call (202) 475-9327 for appointments. The reference number for this docket is "F-88-MIEF-FFFFF." The public may copy a maximum of 50 pages of material from any one regulatory docket at no cost. Additional copies cost 20 cents per page.

FOR FURTHER INFORMATION CONTACT: The RCRA Hotline, toll-free at (800) 424-9346, or (202) 382-3000. For technical information concerning this notice, contact Mr. Bob Kayser, Office of Solid Waste (WH-563), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382-4536.

SUPPLEMENTARY INFORMATION:

I. Background

A. Authority

Under 40 CFR 260.20 and 260.22, facilities may petition the Agency to remove their wastes from hazardous waste control by excluding them from the lists of hazardous waste contained at 40 CFR 261.31 and 261.32. Petitioners must provide sufficient information to EPA to allow the Agency to determine that (1) the waste to be excluded is not hazardous based upon the criteria for which it was listed, and (2) that no other hazardous constituents are present in the wastes at levels of regulatory concern.

B. History of this Rulemaking

The Releases Control Branch (RCB) of EPA, located in Edison, New Jersey, petitioned the Agency to exclude from hazardous waste control certain waste it intends to generate. After evaluating the petition, on January 4, 1988, EPA proposed to exclude RCB's waste from the lists of hazardous waste contained at 40 CFR 261.31 and 261.32, conditional upon RCB meeting certain monitoring and sampling and analysis requirements (see 53 FR 31). RCB's petition was for an "upfront" exclusion. A petitioner may request an upfront exclusion for wastes that have not yet been generated or that will be subject to further treatment. An upfront delisting petition (when treatment is planned) allows an exclusion to be granted based on untreated waste characteristics, pilot-scale treatment data if available, process descriptions and batch testing requirements. The batch testing requirements may include analytical testing of representative samples obtained from the full-scale system. These data can be used to verify that the treatment system, once on-line, is operating as described in the petition. The Agency may specify verification testing limitations (i.e., the maximum allowable levels of hazardous constituents of concern in the waste) in the conditions of the granted exclusion; when the actual levels of the constituents of concern are below these levels, the waste will not be considered hazardous.

This rulemaking addresses public comments received on the proposal and finalizes the proposed exclusion.

II. Disposition of Petition

A. EPA Releases Control Branch

1. Proposed Exclusion

The EPA Releases Control Branch (RCB) petitioned the Agency for an upfront exclusion from EPA Hazardous Waste No. F027 of incineration residues from the treatment of certain cancelled pesticides in the EPA Mobile Incineration System (MIS). RCB based its petition on the expected low concentrations of the listed constituents in the incineration residues. In the proposed rule, the Agency concluded that data submitted by RCB, in conjunction with the verification testing conditions which the Agency proposed to require as part of a final exclusion, substantiated RCB's claim that the listed constituents of concern would not be present in the incineration residues above levels of regulatory concern. Furthermore, RCB submitted data on other non-listed hazardous constituents expected to be present in the untreated pesticides and potentially present in the incineration residues as products of incomplete combustion. The verification testing conditions attached to the exclusion are designed to ensure that these constituents will not be present in the incineration residues at or above levels of regulatory concern. See 53 FR 31, January 4, 1988, for a more detailed explanation of why EPA proposed to grant RCB's petition for these incineration residues.

2. Agency Response to Public Comments

General. The Agency received public comments on the proposed rule from four different interested parties. All commenters were generally in favor of the Agency's proposed decision to exclude the incineration residues from the treatment of the cancelled pesticides. Several commenters specifically supported the Agency's efforts to meet the Agency's statutory duties under Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). As will be discussed in more detail below, several commenters submitted detailed comments arguing that the proposed testing requirements and accompanying delisting levels were too conservative.

One commenter stated that the conditions of the exclusion are so conservative that the impact of the exclusion will be to discourage future incineration of similar dioxin-contaminated materials, despite clear Congressional preference for permanent treatment of hazardous waste. The Agency strongly disagrees. EPA believes that the successful incineration of the cancelled pesticides and upfront exclusion of the resultant incineration residues will encourage an otherwise reluctant commercial hazardous waste management industry to step into the dioxin management business. EPA also believes that the conservative approach to the exclusion of these materials demonstrates a commitment to meeting statutory requirements to ensure protection of human health and environmental safety while encouraging permanent treatment solutions.

One commenter stated that the Agency failed to provide an adequate opportunity to comment on the proposal. The commenter believed that the administrative record for the proposal was inadequate. Although EPA believes that the record was and is fully adequate to support the proposal and final action, the Agency has provided in today's rulemaking preamble additional information to address specific concerns raised by this and other commenters. This information includes historical background on the 1985 exclusion for the MIS and on the evolution of the Delisting Program's rulemaking activities and criteria over the past three years. Because many of the health-based levels used to set delisting levels have been published in previous delisting decisions and because the Delisting Program's analytical approach and the MIS technology have been subject to extensive public notice and comment and were fully referenced in the notice of proposed rulemaking, the Agency believes that the administrative record was replete with necessary and sufficient information upon which the interested parties could comment. (The Agency notes that no commenter requested an extension of the comment period.)

The remainder of this section addresses specific aspects of the proposal on which the Agency received comment, including differences from previous related exclusions, the concept of upfront delistings, EPA's modeling approach in general, the appropriateness of the modeling approach for dioxin, and specific comments on the proposed conditions. In responding to comments and in considering approaches to and criteria for the proposed and final exclusions, the Agency has kept an open mind and has applied its best, current technical judgment.

a. *Differences from Related Exclusions.* One commenter characterized the proposal as "a startling and largely unexplained departure" from the approach used in the original exclusion for the MIS in 1985 (see 50 FR 30272, July 25, 1985). This commenter also stated that the proposal is inconsistent with the second proposal related to the MIS, for certain lagoon sludge from Syntex Agribusiness, published on September 3, 1987 (See 52 FR 33439).

The Agency's approach to the evaluation of petitions has evolved since the 1985 exclusion. Since that time, for example, the Agency has adopted the organic leachate model (OLM) as an analytical tool in reviewing delisting petitions (see 51 FR 41084, November 13, 1986). The OLM allows the Agency to evaluate the potential mobility of hazardous organic constituents. In addition, the Agency has implemented the requirements of the Hazardous and Solid Waste Amendments of 1984 (HSWA) that the delisting process consider all factors (including additional constituents) which could cause a waste to be hazardous rather than only those factors for which a waste was listed. EPA has also published a guidance manual (see "Petitions to Delist Hazardous Wastes—A Guidance Manual," U.S. EPA, Office of Solid Waste (EPA/530–SW–003), April 1985) which outlines the information needed in a delisting petition. Further, the recent Syntex proposal and today's final rule are examples of the Agency's current ability to evaluate and grant "upfront" exclusions.

One of the major differences between the 1985 exclusion and the 1987 and 1988 proposals is that the two recent proposals were for "upfront" exclusions; that is, the treatment residues from the incineration of the Syntex lagoon sludge and the cancelled pesticides have not yet been generated and therefore have not been characterized. In the case of the 1985 exclusion, RCB had submitted actual analytical data on treatment residues for the EP toxic metals and hazardous organic compounds (identified in the petition as potential constituents of concern), including dioxin. Upon evaluation of these data, the Agency determined that batch testing was only necessary for the three metals listed in the conditions of that exclusion. Because similar data for the Syntex and cancelled pesticides treatment residues do not yet exist, the Agency is requiring as part of this final exclusion for the cancelled pesticides (and intends to require as part of any final exclusion for the Syntex residues) extensive verification sampling and analysis of the incineration residues when generated.

A second difference is that the materials to be incinerated in these three cases vary from contaminated soils to wastewater treatment sludge to commercial pesticide products. As a result of the inherent differences among these incinerator feeds, the constituents of concern vary.

The levels of regulatory concern for the metals vary among the three petitions due to application of the vertical and horizontal spread (VHS) model (see 50 FR 48896, November 27, 1985). As discussed in the preambles to the 1987 and 1988 proposals, the VHS model results in a scale which suggests that a large volume of waste exhibiting a particular extract level could be considered hazardous, while a smaller volume of the same waste could be considered non-hazardous (see 52 FR 33441 and 53 FR 32). Because the waste volumes of the three petitions vary, levels of concern for metals in these wastes also vary.

Further discussion of specific differences among the 1985 exclusion and the two recent proposals is provided later in today's notice in Section II.A.2.e. ii, iii, and iv.

Thus, differences between these actions properly reflect differences in the petitioned wastes and the Agency's evolving technical expertise in assessing the hazards of wastes proposed for exclusions. The mere fact that differences exist reveals nothing more or less than this. These differences have been publicly noticed in numerous post-1985 actions that appeared in the **Federal Register** and were fully referenced in the proposal. The Agency believes strongly that it should be able to apply superior methods of analysis or more accurate information when they become available to ensure protection of human health and the environment. Of course, commenters are encouraged to assess the Agency's evolving methodologies and to comment on specific criteria where proposed. Specific challenges to the analysis for the proposed exclusion of cancelled pesticides are described below.

b. *Upfront Delisting as a Concept.* Several commenters expressed their support of the concept of upfront delistings. One commenter stated that the ability to determine upfront delisting levels will encourage waste minimization and treatment activities that reduce constituent concentrations below delisting levels. One commenter also noted that the availability of upfront delisting levels will discourage petitions which are likely to be unsuccessful, thereby saving industry and Agency resources. The Agency agrees with this commenter and is planning to amend the delisting criteria contained in 40 CFR 260.22 to include specific criteria for upfront delisting petitions.

One commenter suggested that EPA should use upfront delisting levels as a "floor" in other RCRA programs so that management requirements could cease or be reduced based upon the concentrations present in a particular waste stream. Although the Agency is interested in evaluating the commenter's noval approach, this approach has ramifications beyond the scope of this rulemaking. EPA encourages the commenter to provide in another forum more specific examples of such reduced management requirements, and a more thorough analysis of how such a program could be implemented.

c. *General Comments on the OLM and VHS Models.* Several commenters expressed concern regarding the Agency's use of the OLM and VHS models as factors in setting the delisting levels. The commenters referred the Agency to comments on the Agency's models that they had made on earlier proposals, and reiterated their major concerns that (1) the models use extremely conservative assumptions and do not include all critical parameters, resulting in unrealistic conclusions, and (2) the models do not allow for the consideration of site-specific factors.

EPA believes that the models used in the Delisting Program generally represent a reasonable worst case waste disposal scenario, and that a reasonable worst case scenario is appropriate when evaluating whether a waste should be relieved of the protective management constraints of RCRA Subtitle C. Because a delisted waste is no longer subject to hazardous waste control, *i.e.*, generators may dispose of wastes on their property or at any facility that will accept the waste. EPA currently believes that it can be inappropriate for the Delisting Program to consider extensive site-specific factors. The Agency currently is unable to predict how a waste will be managed after delisting. For example, a generator may petition the Agency for delisting of a metal hydroxide sludge which is currently being managed in an on-site landfill and provide data on the nearest drinking water well, permeability of the aquifer, dispersivities, etc. If the Agency were to base its evaluation solely on these site-specific factors, the Agency might conclude that the waste, at that specific location, cannot affect the closest well, and the Agency might grant the petition. Upon promulgation of the exclusion, however, the generator is under no obligation to continue to manage the waste at the on-site landfill. In fact, it is likely that the generator will either choose to send the delisted waste off-site immediately, or will eventually reach the capacity of the on-site facility and subsequently send the waste off-site to a facility which may have very different hydrogeological and exposure conditions.

The decision not to consider site-specific criteria is particularly appropriate in this exclusion, because the petitioner has not requested that EPA give any consideration to site-specific factors. Therefore, the Agency has not examined these factors in making a decision in this case.

For the purposes of this particular rule, EPA has considered the appropriateness of the OLM/VHS model approach and of the model's parameters. First, the Agency decided that a landfill exposure scenario would be appropriate. EPA assessed the nature of the solid residues which will be generated by the MIS and concluded that landfilling is the most reasonable disposal scenario. (Due to the lack of organic content in the residues following incineration, land treatment would probably not be used. Similarly, mangement in an impoundment is not expected.) In terms of the liquid residues, EPA determined that the groundwater dilution of constituents afforded by application of the VHS model was appropriate, given past management practices for the MIS's scrubber water (i.e., land application). The Agency further considered whether the OLM/VHS model was the landfill model of choice. The primary criteria in this evaluation were (1) the need to apply a generic model (i.e., non-site specific), and (2) the need to apply an environmentally conservative model. As discussed above, the Agency believes that a generic modelling approach is needed because of the potential for delisted wastes to be subject to numerous management options. Further, the Agency believes that a conservative approach is particularly warranted in regard to upfront exclusions, because the petitioner has not generated any residues yet and therefore has not provided any waste characterization.

d. *Specific Comments on the Use of the OLM/VHS Model for Dioxin Migration.* One commenter submitted comments regarding the appropriateness of the VHS model for setting delisting levels for dioxin. Specifically, the commenter noted that the VHS model does not include consideration of actual migration potential of a compound because the model does not account for attenuative mechanisms (such as sorption) which would retard the flow of hydrophobic compounds (such as dioxin) in ground water. The commenter noted that the original version of the model adopted by the Delisting Program (see Domenico and Palciauskas, "Alternative Boundaries in Solid Waste Management", *Groundwater,* v. 20, 301–311, 1982) included a term to account for retardation due to sorption, and that other models used by EPA (e.g., the Liner Location Model) consider sorption effects. The commenter believes that the omission of a migration factor in the VHS model will result in an overestimation of receptor concentrations of dioxin, other organic constituents, and metals.

The Agency acknowledges that sorption effects can play an important part in the migration of contaminants through ground water. Sorption effects, however, are highly variable from site to site and are dependent on many factors, such as soil characteristics. In keeping with the reasonable worst case approach, the Agency has determined not to consider site-specific sorption variables in applying the VHS model to these wastes. An important aspect of this reasonable worst-case scenario is that soil and aquifer conditions would not favor the attenuation of contaminants. Thus, sorption effects, in fact all attenuative effects, are assumed to have no effect on the receptor concentrations of ground-water contaminants. For very hydrophobic compounds, this assumption is a very conservative, worst-case assumption. The Agency notes, however, that this assumption becomes significantly less conservative when the hydrophobic compounds are codisposed or leached with solvents which tend to mobilize hydrophobic constituents.

The commenter also stated that the organic leachate model (OLM) is inappropriate for predicting the leaching capacity of highly insoluble compounds because (1) highly insoluble compounds are not well represented in the OLM leaching data base, (2) the insoluble compounds that are represented show a poor correlation with the adopted model, and (3) actual leaching data from municipal incinerator ash show that the OLM overpredicts dioxin leaching levels by a factor of 100.

In response to these comments, some background information on the OLM is appropriate. The OLM was constructed using 353 data pairs representing 53 wastes bearing 73 different constituents. A number of the wastes sampled were bound in hydrophobic matrices (e.g., lumpy oil refinery sludge, viscous chemical manufacturing sludge, and tar/dirt mixtures from production of methyl ethyl ketone), other wastes were bound in inorganic matrices, and one waste type represented incinerator ash (API sludge/incinerator ash). The commenter is correct that the correlation coefficient determined solely for the low solubility constituents in the leaching data base is low. However, the correlation coefficient for any general subset of data studied in a regression analysis will be lower than the correlation coefficient for the overall data set. Part of what the commenter noticed is due to the fact that the low correlation coefficient was generated from a small data set.

The Agency agrees, however, that the variability of leaching data in general is partly responsible for the low correlation. In keeping with the reasonable worst-case approach, the Agency is taking a conservative stance in regard to the high variability in the leaching data on mobility of hydrophobic compounds. For this reason, the municipal incinerator ash data cannot be considered by itself. Even if the municipal incinerator ash data were added to the leaching data base, the paucity of these data would result in little or no effect on the general correlation coefficient.

The commenter also stated that the time frame for dioxin to reach the compliance point in the VHS model scenario is on the order of tens of thousands of years and that the dioxin is likely to degrade before actually reaching the receptor. However, the length of time required for contaminants in an aquifer to reach a potential receptor may be highly variable; full analysis of dioxin mobility would necessarily require a substantial amount of site-specific information. As discussed above, the Delisting Program does not currently believe it appropriate to consider site-specific information in its analysis. In fact, because the Agency cannot know with certainty how the wastes will be disposed after exclusion, the Agency cannot discount the possibility that the wastes may be exposed to solubilizing agents which will tend to mobilize any dioxin remaining in the residues. For these reasons, the Agency has assumed in using the VHS model that (1) attenuation is insignificant, and (2) soil and aquifer conditions do not favor the degradation of contaminants en route to the receptor point.

The commenter disagreed with the application of the VHS model for dioxin because it does not, in general, conserve mass. That is, due to the simplifying assumptions used in the VHS model, the initial velocity of a contaminant entering the aquifer is determined only by the velocity of the ground water, the vertical dispersivity of the aquifer, and the width of the disposal unit. The commenter claimed that this initial velocity is also affected by the properties of the waste materials and net infiltration into the ground water. The commenter stated that, by not considering these factors, the VHS model can overestimate or, more likely, underestimate the dilution that may occur in an aquifer.

EPA acknowledges that the VHS model is more likely to overpredict (rather than underpredict) the receptor concentration of contaminants in any given waste due to the conservative nature of the assumptions underlying the model. EPA also recognizes that all models do not always predict factual values accurately. Notwithstanding, EPA believes that the VHS model provides a useful analytical tool for the evaluation of the hazards posed by these wastes. EPA has considered and rejected the use of alternative models and approaches for this specific petition, as described below. Unless the Agency is able to assure protection of human health and the environment without generic, conservative assumptions, the Agency will employ these assumptions. Commenters should, however, feel free to demonstrate that more specific alternatives are scientifically valid and adequate to replace such assumptions.

Other Models. One commenter objected to the proposed dioxin delisting levels as being unreasonably low in light of the Center for Disease Control (CDC) level of 1 ppb for residential soils (See Kimbrough, R.D., H. Falk, P. Stehr, 1984. Health Implications of 2,3,7,8-Tetrachlorodibenzodioxin (TCDD) Contimaination of Residential Soil, *J. Tox. Env. Health,* 14:47–93). The delisting level for solid residues is

different from the CDC number for the following reasons:

- The CDC used a significantly different unit cancer risk (a factor used to compute a regulatory dose) from that used by EPA to set the health-based level. Because the CDC unit risk factor is lower, a higher concentration could be set for the same degree of overall risk than if EPA's factor were used.
- The CDC approach considers exposures to dioxin contaminated soil via ingestion, dermal absorption, and inhalation, while the VHS model considers ingestion of ground water.
- The CDC analysis was originally meant tospecify acceptable levels of contamination which have become fixed to residential soils. The delisting levels represent raw waste concentrations.

The 1 ppb action level for residential soils recommended by CDC corresponds to an acceptable dose level of 636 ficagram/kg/day. CDC calculated that the Virtually Safe Dose (equivalent to a cancer risk of 10^{-6} for dioxin falls within the range of 28 fg/kg/day to 1,428 fg/kg/day, but justified the chosen value of 636 fg/kg/day as acceptable in the context of their specific analysis. If the unit cancer risk of 6.4 fg/kg/day calculated by EPA (Health Assessment Document for Polychlorinated Dibenzo-p-dioxins, U.S. EPA, 1985) is used in the methodology presented by CDC, the resultant "action level" would be about 100-fold less than the 1 ppb level, i.e., on the order of 10 ppt (see the docket to this notice for the calculations supporting this estimation). Despite the numerous differences in the exposure scenarios and modeling approaches, this level is comparable to the levels of concern predicted by the OLM/VHS model analysis for solids.

One commenter challenged the Agency's unit cancer risk value used to derive health-based levels for the VHS model groundwater exposure scenario. The Agency acknowledges that the value used is conservative, but continues to believe that this conservative unit cancer risk value is appropriate for the purposes of this delisting evaluation. The Agency's full response to these comments is available in the docket to this rule (see "Response to Public Comments on Health-based Levels Used in the Cancelled Pesticides Proposed Exclusion", March 2, 1988).

The Agency considered the appropriateness of other exposure assessment models for dioxin as alternatives to the OLM/VHS model approach. As a result of comment on the 1987 and 1988 MIS delisting proposals, the CDC approach was considered as one alternative. The CDC approach considers very different exposure routes than the VHS model. In general, the exposure scenarios considered in the CDC approach are appropriate for dioxin; although as demonstrated briefly above, the use of EPA's unit risk number with the CDC assumptions results in a similar, conservative level of concern as the use of the OLM/VHS model. The CDC analysis did not, however, take into account other routes of exposure, including ground water and food chain bioaccumulation. Under certain circumstances, the Agency believes that bioaccumulation may be an equally significant exposure route as those addressed in the CDC approach.[1] The Agency also notes that a number of assumptions used in the CDC approach, including estimated soil ingestion rates, have been revised or have been the subject of serious scientific debate since the development of the CDC action level. Based on the uncertainty associated with the underlying assumptions of the CDC approach and the difference in unit cancer risk levels, the Agency decided that the CDC approach is not a preferable alternative to the VHS model for evaluating this petition at this time.

The Agency also considered application of developmental work by EPA's Office of Research and Development (ORD) for the evaluation of dioxin-related delisting petitions. ORD is currently preparing a detailed exposure assessment document for dioxin. One portion of this work evaluates a variety of potential exposure routes for dioxin-contaminated soils and assigns estimated risk levels to these exposure routes for a given scenario. The Delisting Program has evaluated the merits of this approach and believes that, when finalized, this approach will be a valuable tool. ORD's work, however, has not been released for use at this time and is undergoing extensive peer and Science Advisory Board (SAB) review. Given the uncertainities associated with the technical merits of this approach, the Agency has determined that the ORD approach should not be used at this time. However, application of ORD's draft document to the facts of this case supports the low levels of concern predicted by the OLM/VHS model approach (i.e., low ppt level). (This information has also been placed in the docket.)

One commenter pointed out that the Agency has re-examined its unit cancer risk number and has prepared a draft document (which the commenter submitted as part of the comment package) revising the number upwards by a factor of 16. The Agency is continuously considering new toxicological data and re-evaluating many of its health-based numbers. Petitioners who have either withdrawn their petitions or received denial decisions in the past are free to re-petition if final revisions to these numbers would potentially improve their chances of obtaining an exclusion. The report that the commenter has referred to, however, is a preliminary draft which has not been formerly released by the Agency, is not available for use as Agency policy, and is being circulated for review within the Agency for comments on its technical accuracy. As such, it cannot at this time be adopted by the Delisting Program and should not be considered in discussions of the applicability of the existing, Agency-sanctioned risk specific dose (RSD) for dioxin.

e. *Specific Comments on Proposed Verification Conditions—i. Condition 1—Compliance with Permit Conditions.* Two commenters agreed that all incinerators should operate in compliance with their permit conditions, but objected to the requirement in the proposed exclusion that residues be retreated if the incinerator is operating out of compliance with its permit conditions (see 53 FR 36, January 4, 1988). The commenters suggested that the results of the analyses of the residues be used to determine whether the residue be considered non-hazardous.

The Agency agrees with the commenters that the petitioner should analyze any residues generated whenever the MIS is operating outside of the limits specified in its permit. The Agency is specifically concerned with a hypothetical situation where the MIS experiences a mechanical system failure (i.e., failure of the secondary combustion chamber (SCC) or the air pollution control system, failure of the kiln to fire, etc.) after RCB has made a successful demonstration under Condition 6 of the exclusion and has terminated the daily analytical testing specified in Conditions 2 through 5. Although the Agency does not expect these failures to occur, we are modifying Condition 1 in response to comments to require RCB to conduct verification testing on the

BEST COPY AVAILABLE

incinerator residues should such a scenario occur:

> Condition (1): The incinerator is monitored continuously and is in compliance with operating permit conditions. Should the incinerator fail to comply with the permit conditions relevant to the mechanical operation of the incinerator, RCB must test the residues generated during the run when the failure occurred according to the requirements of Conditions (2) through (5), regardless of whether or not the demonstration in Condition (6) has been made.

ii. *Conditions 2 and 3—Metals Analyses.* One commenters questioned why the 1988 and 1987 proposals imposed more stringent maximum allowable leachate and treatment residue concentrations for mercury, chromium, and selenium than the 1985 rule, as well as limitations for the remainder of the EP toxic metals, nickel, and cyanide that have no counterpart in the 1985 rule. As discussed earlier, the Agency is requiring in this exclusion (and intends to require in any exclusion for the Syntex residues) that the residues be tested for all of the EP toxic metals, nickel and cyanide, because the 1987 and 1988 proposals were for upfront exclusions. The treatment residues from the incineration of the Syntex lagoon sludge and the cancelled pesticides have not been generated yet and therefore have not been characterized. In the case of the 1985 exclusion, RCB had submitted actual analytical data on treatment residues. Upon evaluation of these data, the Agency determined that batch testing was only necessary for the three metals listed in the conditions of that exclusion. No such data exist for the Syntex or cancelled pesticides treatment residues since they have not been generated yet.

The commenter also questioned why the delisting levels for chromium, mercury, and selenium are different than the levels listed in the conditions for the 1985 exclusion. As discussed earlier, the delisting levels have been determined by back-calculating from the regulatory standards through the VHS model and are a function of the waste volume. Since the waste volume covered by the 1985 exclusion differs from the volume covered by the cancelled pesticides proposal (as well as Syntex's waste volume), the dilution factors differ and the resultant delisting levels also differ.

The commenter also requested an explanation of why the proposed delisting levels are lower than the EP Toxicity characteristic limits. The general purpose of the hazardous waste characteristics, such as the EP Toxicity characteristic, is to regulate the worst, rather than all, of the hazardous wastes exhibiting a given characteristic. Wastes leaching concentrations of the EP toxic metals at less than 100 times the National Primary Drinking Water Standards (the EP Characteristic) are not necessarily non-hazardous. Rather, such wastes may be listed as hazardous if, pursuant to the criteria for listing contained in 40 CFR 261.11 of the regulations, these lesser concentrations in combination with other factors are deemed to pose substantial present or potential threats to human health and the environment. Similarly, the Delisting Program currently believes that wastes which exhibit levels slightly less than the levels established through the hazardous waste characteristics may still be identified as hazardous. Thus, levels established by application of the VHS model that are below the EP Toxicity characteristic levels may properly be considered to be hazardous.

One commenter submitted specific comments on the Maximum Concentration Limits (MCLs) which the Agency used in this exclusion for the EP toxic metals. The commenter argued that the drinking water standards (or MCLs) should not be used by EPA in establishing the delisting levels for metals. The commenter claimed that the MCLs are based on chronic exposure scenarios, and would necessarily overestimate the adverse health impact under a scenario where "the MCL is reached only transiently."

The Agency believes that the steady-state VHS model generally provides a reasonable worst case value for constituents of concern at a receptor well. In most cases, the concentration of a constituent in the leachate represents only a small fraction of the total mass of the constituent in the waste. Sustained leaching of the constituent is possible, which would lead to chronic exposure to the chemical over long time periods. Therefore, the Agency believes that use of health-based standards (such as MCLs) derived for chronic exposures is valid.

The commenter also raised a variety of questions concerning the bases of the MCLs for a number of the metals. The Agency's response to these comments is available in the docket to today's rule (see "Response to Public Comments on Health-based Levels Used in the Cancelled Pesticides Proposed Exclusion", March 2, 1988). The Agency is in the process of revising the MCLs, and all of the points raised by the commenter were acknowledged by EPA in a proposed rule (50 FR 46936, November 13, 1985). As discussed in the docket, EPA does not believe that the questions raised warrant the use of different health-based levels for these constituents in this rulemaking.

The same commenter also challenged the health-based levels used to establish delisting levels for nickel and cyanide. The commenter further questioned why these two chemicals should be monitored because neither chemical was detected in the waste. The bases for these health-based levels were described in detail in a proposed rule establishing prohibition levels for the land disposal of "California List" metals and cyanide (see 52 FR 29994, August 12, 1987). These proposed health-based levels were established for the same exposure route as the MCLs (i.e., drinking water), and the Agency believes these levels are adequate for setting delisting levels. For both chemicals, the commenter noted the uncertainty in the bioavailability of these chemicals when ingested in food or water. The Agency agrees that some uncertainty exists in this area, but believes that the safety factors incorporated into the health-based levels appropriately address these (as well as other) uncertainties.

In response to the commenter's statement regarding the absence of nickel and cyanide in the untreated pesticides, the Agency notes that the petitioner submitted data only for an aqueous extract of the solid cancelled pesticides. While the analyses of the extract indicate that these two chemicals do not leach from the solid pesticide material, these results do not confirm the absence of these chemicals in the pesticide wastes. If these constituents are actually present in the untreated pesticides, they may potentially be more mobile after incineration due to the removal and destruction of the organic materials which can, under certain circumstances, retard leaching. Furthermore, cyanide is a possible product of incomplete combustion and may be formed during the incineration process. For these reasons, EPA believes that the analyses of nickel and cyanide in the final waste residues are justified.

iii. *Condition 4—Organics Analyses.* One commenter expressed support of the Agency's proposed approach to allow residuals to be disposed as non-hazardous when the constituents of concern are not detected using the appropriate SW–846 methods correctly and the practical quantitation limits exceed the delisting levels.

One commenter believed that the maximum waste residue concentrations proposed for organics are excessively low and are not necessary to protect human health and the environment. The commenter questioned why any testing for organics is necessary, because the 1985 exclusion did not require batch testing for organics. The Agency refers the commenter to the discussions earlier in this notice regarding the differences between the 1985 exclusion and the upfront exclusions proposed in 1987 and 1988.

One commenter stated that the low delisting levels for certain organics will require the MIS to operate with extended residence times to ensure destruction of these constituents to the delisting levels. The commenter believed that this is unnecessary and will (1) effectively reduce the capacity of the MIS, (2) significantly increase operating costs, and (3) deter future thermal treatment of hazardous wastes.

The Agency acknowledges that effective hazardous waste treatment and detoxification can be quite expensive and time consuming. The Agency also recognizes that its conservative approach to protecting human health and the environment may cause increased treatment costs compared with less protective approaches. Notwithstanding, the Agency believes that the availability of upfont exclusions, even with conservative conditions, will encourage such treatment.

Two commenters supported the Agency's proposed approach to eliminate certain constituents from the verification testing requirements when the delisting levels exceed 1,000 ppm. The commenters agreed with the Agency that it is highly unlikely that these constituents will be present in the residues at these levels after incineration.

One commenter noted that the maximum allowable treatment residue concentrations for a number of constituents are substantially higher than the levels for the same constituents in the 1987 proposal. The commenter correctly attributes some of these differences to updates to the Agency's health-based levels. The constituents affected by these updates include chloroform, 1,2-dichloroethane, and 2,3,4,6-tetrachlorophenol. The commenter stated that for the sake of fairness and completeness, all of the exclusions should be comparable (except where the Agency has specifically demonstrated a health-based rationale for different requirements). The commenter assumed that the Syntex exclusion, when finalized, would incorporate the updated values.

The Agency notes that part of the difference in delisting levels is due to the different volumes of waste petitioned for exclusion by the two petitioners (see earlier discussion of the effect of volume changes in setting delisting levels). The Agency agrees that the basis for exclusions should be similar unless appropriate reasons for differences exist, and is considering several options to bring the Syntex proposal and today's rule into closer agreement.

The commenter also questioned why the delisting level for chloroform in the solid residues differs between the 1987 and 1988 proposals by 540 fold, yet the difference in the health-based level and in waste volume is about 120 fold (12 fold in the health-based regulatory level and 10 fold in the waste volume). The Agency notes that differences in health-based levels for a given constituent are not directly proportional to the resulting differences in delisting levels because of the exponential form of the OLM, which essentially amplifies the differences in health-based levels. The public is referred to the docket for the mathematical derivation of this explanation.

One commenter stated that it was unable to comment on the acceptability of the proposed delisting levels because the health-based levels were not published in the proposal. These health-based levels were, however, placed in the docket to the notice and were thus available for review to substantiate any comment. Although the Agency believes that availability of such information in the docket fully complies with applicable requirements for notice, the Agency intends to publish such numbers in future proposals for upfront exclusions.

One commenter objected to the Agency's intention to add constituents to the list of constituents in Condition 4 if health-based levels became available after the publication of the proposal and before promulgation. The commenter argued that such values must be subject to notice and comment prior to inclusion in a final rule. The Agency agrees and has not added any additional constituents to the list in Condition 4.

One commenter suggested that the list of constituents to be tested for under Condition 4 be reduced by 50 percent. The commenter believes that the reduced list would allow for a conservative, more cost-effective verification that the incineration residues are not hazardous. The Agency considered but has rejected the commenter's suggestions because justification for specific deletions from the verification lists was not provided. In addition, HSWA requires that petitioners demonstrate that any potential constituents of concern do not cause the wastes to be hazardous; the concept of verifying only 50 percent of the constituents of concern is not consistent with this mandate. The constituents listed in Condition 4 represent compounds which are known to be present in the untreated pesticides and compounds which potentially may be present in the incineration residues as products of incomplete combustion. The verification testing list presented in the proposal (and finalized today) was abbreviated by eliminating hazardous constituents which could not possibly be present at levels of regulatory concern (i.e., the level of regulatory concern was greater than 1,000 ppm). The Agency believes this reduction was appropriate because of (1) the low or non-existent levels of the "eliminated" constituents in the untreated pesticides, (2) analytical test results on residues generated in the past by the MIS, and (3) the MIS's demonstrated ability to achieve 99.9999 percent destruction and removal efficiency. Without further information sufficent to indicate that the other specific constituents will not be present at or above levels of regulatory concern in the residues, verification testing for such constituents is appropriate.

One commenter noted that the proposal did not specify precise analytical methodologies for analysis of the solid residues and that there are no approved methods for measuring volatiles in solids. Condition 4 of the proposal (and final rule) states that "analyses must be performed according to SW–846 methodologies", and the commenter is referred to that manual for the appropriate analytical method for the chemicals of concern. SW–846 does include methods for analyzing volatile organics in solid waste. For example, Method 8240 contains procedures for purging and analyzing volatile compounds from soil/sediment samples.

The commenter suggested that SW–846 methods be applied to an aqueous extract of the solid residues because this would be appropriate for a groundwater exposure scenario. The Agency believes that an aqueous extraction is appropriate for groundwater exposure scenarios, and for this reason, used the OLM (which was derived from an aqueous leaching data base, see 51 *FR* 41082, November 13, 1986) to predict aqueous leachate concentrations of organics from total concentrations of constituents in waste. Because the delisting levels were back-calculated (by using the VHS/OLM models to predict leachate from total constituent levels in the residue), double-counting would result if leachate levels of the residues were compared to the delisting levels.

iv. *Condition 5—Dioxin Analyses—General.* One commenter objected to the inclusion of testing for dioxin because it is inconsistent with the 1985 exclusion. As stated earlier, the conditional testing requirements have been added to verify that the MIS can treat the cancelled pesticides as successfully as the petitioner claims it can. If the petition were a conventional petition instead of an upfront petition, the conditional testing requirements may not have been needed.

One commenter referenced the 1985 exclusion, pointing out that limits were not set for dioxin at that time, and that the Agency should be consistent and apply the same criteria to the recent proposals. As stated earlier in the Agency's response to general comments, the Agency's general approach to dioxin and that of the delisting program have developed considerably since the 1985 exclusion was promulgated, and the 1985 exclusion was not an upfront exclusion.

One commenter noted that the dioxin levels in the proposal are significantly more conservative than the levels promulgated in the 1985 exclusion. The commenter further noted that the Agency indicated in 1985 that the 1985 detection limit levels for dioxin in solids and aqueous media were not of regulatory concern, even though lower levels were achievable. In 1985, the Agency viewed the determination of dioxins by HRGC/HRMS as an experimental method. The Agency now believes that the better detection limits that are available (see discussion below on Method 8290), and the more conservative levels proposed for this exclusion, are more consistent with the delisting programs' unit cancer risk values and with the evolution of its reasonable worst case modeling approach. The Agency also believes that the development of a more conservative approach is a reasonable means of ensuring protection of human health and the environment.

The same commenter stated that if verification testing is required, the Agency should only require analysis for those dioxin isomers and homologs present in the untreated residues. The Agency disagrees. HSWA clearly states that the Agency must evaluate wastes for all factors which may cause a waste to be hazardous (see 42 U.S.C. 6921(f)). Dioxins and furans are known to be products of incomplete combustion. Therefore, the Agency believes it is appropriate to analyze these incineration residues for all possible dioxin isomers and homologs.

This commenter also submitted a catalog of other thermal treatment units which have treated dioxin-contaminated materials in the U.S. and claimed that few of these units have achieved the dioxin delisting levels specified in the cancelled pesticides exclusion. The Agency has examined the commenter's catalog and has concluded that the referenced thermal treatment units may indeed have actually achieved the delisting levels of concern, as each unit achieved non-detectable levels of dioxin in their ash. Without more information, there is no means to know whether the units did or did not achieve the delisting levels. Notwithstanding, the Agency notes that in some cases the detection limits achieved were equivalent to or below the PQLs proposed for this exclusion. The Agency therefore questions why the commenter claimed that few thermal units may be able to meet the conditions of today's rule.

The commenter also questioned why the Agency is requiring such rigorous treatment when data from municipal incinerators indicates that ash from such incinerators can exceed the MIS's delisting levels. Whether dioxins are found in municipal incinerator ash is not relevant to RCB's delisting petition. Issues related to the presence of dioxin in municipal incinerator ash will be considered in the Agency's overall decision on appropriate management standards for such ash.

Method 8290. One commenter protested the Agency's proposed requirement that Method 8290 be used to analyze the residues for dioxin. The commenter objected to the use of a method which has not been subject to general notice and comment through rule-making and is not in final form. As stated in the proposal, Method 8290 has been subjected to single laboratory validation. (See: ORD Publication EPA 600/4–86–004, "Protocol for the Analysis of 2,3,7,8-Tetrachlorodibenzo-p-dioxin by High Resolution Gas Chromatography/High Resolution Mass Spectrometry", January, 1986.) According to Agency experts who were consulted in the choice of a HRGC/HRMS method, Method 8290 is the method of choice (see memorandum to Suzanne Rudzinski from Robert L. Booth dated December 3, 1987 which was and is available in the docket to the proposal). The Agency also notes that HRGC/HRMS analysis has been available for several years, and although it is a sophisticated method, it is certainly not an untried, experimental procedure. In addition, although methods which are added to SW–846 are traditionally noticed in the **Federal Register** for public information and comment, SW–846 is currently used as a guidance manual by the Delisting Program rather than as a regulatory requirement. In proposed rulemakings such as the proposed cancelled pesticides exclusion, EPA proposes the use of specific SW–846 methods and the regulated community is given the opportunity to comment on the methods. Comment on the proposed use of Method 8290 was received in this case.

One commenter objected to the use of Method 8290 on the grounds that it is not widely available, has not been used extensively, is twice as expensive as the less sensitive method for dioxins which is currently in SW–846 (Method 8280), is too complicated, will be burdensome for laboratories to avoid false positives due to laboratory cross-contamination of samples and equipment, and has a long turnaround time which will be burdensome during the incineration process due to the limited storage capacity at the Denney Farm site. The Agency agrees with the commenter that there are complications associated with the use of Method 8290. Nevertheless, the Agency is responsible for choosing an analytical method which is best suited for measuring the potential hazardousness of the cancelled pesticides incineration residues, not the method which is most convenient and inexpensive. Given the need for high analytical sensitivity to assure careful analyses of residue constituents, the Agency remains convinced that Method 8290 is the method of choice. Additionally, the Agency notes that there are a number of laboratories which are familiar with and experienced in the conduct of Method 8290. Many of these laboratories participated in the development of the method and should be able to provide analytical services with a minimal turn-around and adequate quality control.

Practical Quantitation Limits (PQLs). Two commenters objected to the Agency specifying PQLs in delistings. One commenter stated that setting an absolute limit for an analytical method as a delisting requirement is precedent-setting and in many cases would be inappropriate. The commenter expressed concern that the Agency intends to specify PQLs routinely in all future upfront exclusions. However, the commenter also stated that the logic which the Agency used in estimating a PQL for dioxin may be reasonable for the specific application of the cancelled pesticides exclusion, since the laboratories used to conduct the analysis will be limited to the few qualified laboratories in the country. The same commenter went on to state that for future delistings, the Agency should not estimate a PQL, but should allow a laboratory to establish a matrix-specific, laboratory-specific minimum detection limit (MDL) for the constituent of concern. The PQL should be a set multiple of this MDL. Finally, the commenter agreed that the multiplier for setting a PQL from an MDL is almost certainly in the range of three to ten, as stated by the Agency in the proposal. Another commenter stated that the low PQLs are unjustified given the lack of rigorous interlaboratory studies for Method 8290.

The Agency believes that setting specific PQLs for upfront delisting petitions is appropriate. For upfront delistings, the data submittal requirements must be described in detail to minimize situations where the petitioner submits verification data that the Agency subsequently might reject as inadequate. One of the critical elements of verification testing is the analytical detection limits. The adequacy of the detection limits is judged by comparing the achieved detection limits with the suggested detection limits in SW–846. The Agency frequently requests that the petitioner reanalyze the waste using lower detection limits or provide a detailed discussion of why lower detection limits cannot be achieved. To avoid such situations, the Agency believes that specification of reasonable but conservative MDLs and PQLs that labs must meet is approprite. RCB's petition was for an upfront delisting and no analytical data on the treatment residues were available for EPA's review. As was discussed in detail in the proposal, the Agency considered data from a number of laboratories that have analyzed wastes for dioxin using Method 8290 in order to establish a reasonable yet conservative PQL. (The Agency notes that PQLs were only specified in the dioxin testing condition. Dioxin is the primary listed constituent of concern in the petitioned waste (EPA Hazardous Waste No. F027).)

Several commenters stated that many factors (i.e., waste matrix interferences, background levels, operator and instrument variability) can affect a method's analytical sensitivity. Method 8290 has been designed with extensive cleanup procedures and instrumentation calibration requirements. These features were added to the method to maximize the method's sensitivity and minimize potential interferences. EPA consulted with experts regarding the feasibility of the proposed PQLs and determined that, given the quality and expertise of the laboratories which may be used to conduct the dioxin analyses, the proposed PQLs are reasonable. Future determinations of PQLs will be made on a matrix- and constituent-specific basis.

One commenter argued that the procedure used to determine minimum detection limits (MDLs) and PQLs is meant to be applied by specific laboratories for a specific chemical and specific matrix, rather than as specified in the proposal. The commenter also stated that if the Agency is concerned about laboratories having abnormally high MDLs or PQLs because of poor practices, this concern should be addressed through existing QA/QC programs instead of through the specification of PQLs. The Agency notes that the levels presented in the proposal are not specific targets for the petitioner to achieve, but rather maximum acceptable PQLs, or the upper bound of acceptable detection limits. These values were determined by evaluating the levels which have been achieved by a number of laboratories which are familiar with the method. The Agency also notes that Method 8290 is a very detailed and specific method with extensive QA/QC requirements. Agency experts believe that laboratories which follow the method procedure correctly should be able to achieve the PQLs. The Agency is not indicating that these PQLs for this dioxin waste are necessarily appropriate for all petitions. PQLs depend on the waste matrix and thus will be determined, as needed, on a case-by-case basis.

One commenter complained that the Agency has set the maximum PQLs arbitrarily. Specifically, the commenter stated that it was unclear why the Agency set the PQLs to be less than three times the minimum detection limits (MDL) after the Agency indicated that PQLs are normally set at three to ten times the MDL. One commenter, having recommended that the Agency not specify PQLs, providdd an alternative recommendation that if PQLs are to be used, the Agency should use a factor of 10 to determine the PQL. The commenter did not provide specific justification as to why the factor of 10 is more appropriate than a factor of three.

Although the Agency defended its earlier choice of PQLs as reasonable because (1) the residues to be analyzed will be relatively free of interferences, (2) the petitioner will be using highly qualified and experienced operators and laboratories to conduct the analyses, and (3) the values chosen are extremely conservative, the Agency acknowledges that standard scientific protocol used to establish PQLs specifies three to ten times the MDL, rather than two or two-and-one-half times the MDL. EPA is therefore revising the condition to raise the PQLs to three times the MDL (the most conservative value in this range), i.e., to 15 ppt and 0.120 ppt for the solid residues and wastewaters, respectively.

The Agency received comments which pointed out that the Agency had specified maximum PQLs for Method 8290 but did not specify whether they applied only to 2,3,7,8–TCDD or to all of the polychlorinated dioxins and furans. The commenter referenced the ad hoc Agency work group which had originally recommended Method 8290 and the PQLs, and stated, that (1) the PQLs specified in the proposal were meant to apply to 2,3,7,8–TCDD, (2) a laboratory achieving these PQLs would achieve "reasonable" detection limits for the other cogeners and homologs, (3) equivalent PQLs should be achievable for all tetra- and penta- homologs, and (4), for the hexa- homologs, PQLs should be 2.5 times the 2,3,7,8–TCDD PQLs. The sensitivity of the 8290 method decreases somewhat for the more highly chlorinated homologs, and the method specifies that method calibration limits for the hexachlorinated compounds are 2.5-fold higher than the limits for the tetrachlorinated homologs. The Agency agrees that these levels should have been specified in the proposal. The Agency also agrees with the commenter's suggested PQLs and is modifying the condition accordingly:

> Condition (5): RCB must generate, prior to disposal of residues, verification data from each eight hour run for each treatment residue (i.e., kiln ash, cyclone ash, separator sludge, and filtered wastewater) to demonstrate that the residues do not contain tetra-, penta-, or hexachlorodibenzo-p-dioxins or furans at levels of regulatory concern. Samples must be collected as specified in conditions (2) and (3). The TCDD equivalent levels for solids must be less than 5 ppt and for wastewater the levels must be below 0.002 ppt. Any residues with detected dioxins or furans in excess of these levels must be retreated or disposed as acutely hazardous. Method 8290, a high resolution gas chromatography and high resolution mass spectroscopy (HRGC/HRMS) analytical method, must be used. For tetra- and pentachlorinated homologs, the maximum practical quantitation limit must not exceed 15 ppt for solids and 0.120 ppt for wastewaters. For hexachlorinated homologs, the maximum practical quantitation limit must not exceed 37 ppt for solids and 0.3 ppt for wasterwaters.

One commenter objected to the requirement that residues be retreated or managed in accordance with Subtitle C if no dioxin is detected in the residues but the laboratory cannot meet the required PQLs. One commenter suggested that the Agency validate an analytical method's ability to achieve any future MDL that is set as a condition of an upfront delisting. The Agency has used its best technical judgment in setting MDLs at realistic values, and will continue to do so in the future. The Agency believes that this condition is necessary to protect human health and the environment, and it is appropriate because the exclusion is in response to an upfront delisting petition. The Agency notes that in such instances, the petitioner has a number of options: (1) the petitioner can retreat the residue; (2) the petitioner can also dispose of the residue as hazardous; (3) the petitioner can request that the laboratory reanalyze the residues to achieve the PQLs specified in the exclusion, or the petitioner can retain the services of a different laboratory that is capable of achieving the PQLs; or (4) the petitioner can submit the high analytical detection limits with documentation certifying the laboratory's inability to achieve lower detection limits due to specific matrix interferences which the method cannot address.

Several commenters pointed out confusing printing errors in the proposals regarding the PQLs. As a point of clarification, the final sentence in the second column on 53 FR 38 of the proposal should have read as follows: "Using a factor of three to determine the resultant PQL, most highly qualified laboratories should be able to achieve PQLs of 15 ppt for solids and 120 ppq for wastewaters."

v. Condition (6)—Termination Provision and Data Submittal Requirements. Three commenters expressed support of the termination of verification testing after four consecutive clean batches of residues are generated.

One commenter objected to the requirement that the petitioner continue testing until the Assistant Administrator of the Office of Solid Waste and Emergency Response notifies the petitioner that the testing requirement has been terminated. The commenter believes that this is an unworkable approach given the constraints of the storage capacity at the Denney Farm site, the lengthy analytical turnaround times, and the potential administrative delays at the Agency. The commenter suggests that either the Agency commit to an expedited review of the verification data or allow the petitioner to evaluate the samples independently to ensure compliance with the exclusion conditions.

The Agency believes at this time that Agency review of verification data is needed to maintain the integrity of the upfront delisting process, and the Agency will strive to review this data expeditiously.

The two commenters objected to the requirement that all data be submitted to EPA. The commenters believe that on-site summaries should be acceptable and would save EPA the cost of handling and storing unneeded data. The Agency disagrees with the commenters' characterization of the data as unneeded. These data will serve as validation of the petitioner's claim that the residues will be non-hazardous, and must be available for public review in the docket.

3. Final Agency Decision

For the reasons stated in the proposal, the Agency believes that the incineration residues from the treatment of the cancelled pesticides, when subject to the verification testing requirements specified in the exclusion, should be excluded from hazardous waste control. The Agency, therefore, is granting a final exclusion to the Releases Control Branch for the incineration residues generated from the treatment of cancelled pesticides in the EPA Mobile Incineration System. These wastes are listed as EPA Hazardous Waste No. F027 and will be generated at the Denney Farm site in McDowell, Missouri. The exclusion remains in effect unless the wastes vary from those originally described in the petition (i.e., the wastes are altered as a result of changes in the treatment process). The current exclusion applies only to the processes covered by the original demonstration. The facility would require a new exclusion if the treatment process is altered, and accordingly would need to file a new petition. The facility must treat such wastes as hazardous until a new exclusion is granted.

Although management of the wastes covered by this petition is relieved from Subtitle C jurisdiction, the generator of a delisted waste may either treat or dispose of the waste in an on-site facility, or ensure that the waste is delivered to an off-site storage, treatment, or disposal facility, either of which is permitted, licensed, or registered by a State to manage municipal or industrial solid waste. Alternatively, the delisted waste may be delivered to a facility that beneficially uses or reuses, or legitimately recycles or reclaims the waste, or treats the waste prior to such beneficial use, reuse, recycling, or reclamation.

III. Effective Date

This rule is effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended section 3010 of RCRA to allow rules to become effective in less than 6 months when the regulated community does not need the 6-month period to come into compliance. That is the case here because this rule reduces, rather than increases, the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense which would be imposed on this petitioner by an effective date 6 months after promulgation and the fact that a 6-month deadline is not necessary to achieve the purpose of section 3010, we believe that this rule should be effective immediately. These reasons also provide a basis for making this rule effective immediately under the Administrative Procedure Act, pursuant to 5 U.S.C. 553(d).

IV. Limited Effect of Federal Exclusion

States are allowed to impose requirements that are more stringent than EPA's pursuant to section 3009 of RCRA. State programs thus need not include those Federal provisions which exempt persons from certain regulatory requirements. For example, States are not required to provide a delisting mechanism to obtain final authorization. If the State program does include a delisting mechanism, however, that mechanism must be no less stringent than that of the Federal program for the State to obtain and keep final authorization.

As a result of enactment of the Hazardous and Solid Waste Amendments of 1984, any State which had delisting programs prior to the Amendments must become reauthorized under the new provisions (See RCRA Regulation Statutory Interpretation #4: Effect of Hazardous and Solid Waste Amendments of 1984 on State Delisting Decisions, May 16, 1985, Jack W. McGraw, Acting Assistant Administrator for the Office of Solid Waste and Emergency Response.) To date, only one State (Georgia) has received reauthorization for their delisting program. The final exclusion granted today, therefore, is issued under the Federal program. A state, however, can still decide whether to exclude these wastes under the State program as a matter of state law. Since a petitioner's waste may be regulated under a dual system (i.e., both Federal and State programs), petitioners are urged to contact their State regulatory authority to determine the current status of their wastes under State law.

V. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is

"major" and therefore subject to the requirements of a Regulatory Impact Analysis. This rule to grant an exclusion is not major since its effect is to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction is achieved by excluding wastes generated at a specific facility from EPA's lists of hazardous wastes, thereby enabling the facility to treat its waste as nonhazardous. There is no additional economic impact, therefore, due to today's rule.

VI. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an Agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment will not have an adverse economic impact on small entities since its effect will be to reduce the overall costs of EPA's hazardous waste regulations and is limited to one facility. Accordingly, I hereby certify that this regulation will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 261

Hazardous materials, Waste treatment and disposal, Recycling.

Authority: Sec. 3001, RCRA, 42 U.S.C. 6921.

Date: March 7, 1988.

Jeffery Denit,

Acting Director, Office of Solid Waste.

For the reasons set out in the preamble, 40 CFR Part 261 is amended as follows:

PARTS 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Sections 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6912, and 6922).

2. In Appendix IX, add the following waste stream in alphabetical order to Table 1 as indicated:

Appendix IX—Wastes Excluded Under §§ 260.20 and 260.22

TABLE 1.—WASTES EXCLUDED FROM NON-SPECIFIC SOURCES

Facility	Address	Waste description
EPA's Mobile Incineration System (MIS).	McDowell, MO	Kiln ash, cyclone ash, seperator sludge, and filtered wastewater (except spent activated carbon) (EPA Hazardous Waste No. F027) generated during the treatment of cancelled pesticides containing 2,4,5-T and Silvex and related materials by the EPA's Mobile Incineration System at the Denney Farm Site in McDowell, Missouri after [insert date of final rule publication in the Federal Register], so long as: (1) the incinerator is monitored continuously and is in compliance with operating permit conditions. Should the incinerator fail to comply with the permit conditions relevent to the mechanical operation of the incinerator, RCB must test the residues generated during the run when the failure occurred according to the requirements of Conditions (2) through (5), regardless of whether or not the demonstration in Condition (6) has been made; (2) Four grab samples of wastewater must be composited from the volume of filtered wastewater collected after each eight hour run and, prior to disposal, the composite samples analyzed for the EP toxic metals, nickel, and cyanide. If arsenic, chromium, lead, and silver EP leachate test results exceed 0.44 ppm; barium levels exceed 8.8 ppm; cadmium and selenium levels exceed 0.09 ppm; mercury levels exceed 0.02 ppm; nickel levels exceed 4.4 ppm; or cyanide levels exceed 1.8 ppm, the wastewater must be retreated to achieve these levels or must be disposed in accordance with Subtitle C of RCRA. Analyses must be performed according to SW–846 methodologies. (3) One grab sample must be taken from each drum of kiln ash generated during each eight hour run; all grabs collected during a given eight hour run must then be composited to form one composite sample. One grab sample must be taken from each drum of cyclone ash generated during each eight hour run; all grabs collected during a given eight hour run must then be composited to form one composite sample. A composite sample of four grab samples of the seperator sludge must be collected at the end of each eight hour run. Prior to the disposal of the residues from each eight hour run, an EP leachate test must be performed on these composite samples and the leachate analyzed for the EP toxic metals, nickel, and cyanide. If arsenic, chromium, lead, and silver EP leachate test results exceed 1.6 ppm; barium levels exceed 32 ppm; cadmium and selenium levels exceed 0.3 ppm; mercury levels exceed 0.7 ppm; nickel levels exceed 16 ppm; or cyanide levels exceed 6.5 ppm, the wastes must be retreated to achieve these levels or must be disposed in accordance with Subtitle C of RCRA. Analyses must be performed according to SW–846 methodologies. (4) RCB must generate, prior to disposal of residues, verification data from each eight hour run for each treatment residue (*i.e.*, kiln ash, cyclone ash, seperator sludge, and filtered wastewater) to demonstrate that the maximum allowable treatment residue concentrations listed below are not exceeded. Samples must be collected as specified in conditions (2) and (3). Analyses must be performed according to SW–846 methodologies. Any residues which exceed any of the levels listed below must be retreated or must be disposed as hazardous. Solid and sludge concentrations must not exceed the following levels: Aldrin—0.015 ppm Benzene—8.7 ppm Benzo(a)pyrene—0.43 ppm Benzo(b)fluoranthene—1.8 ppm Chlordane—0.37 ppm Chloroform—5.4 ppm Chrysene—170 ppm Dibenz(a,h)anthracene—0.083 ppm 1,2-Dichloroethane—4.1 ppm Dichloromethane—2.4 ppm 2,4-Dichlorophenol—480 ppm Dichlorvos—260 ppm Disulfoton—23 ppm

TABLE 1.—WASTES EXCLUDED FROM NON-SPECIFIC SOURCES—Continued

Facility	Address	Waste description
		Endosulfan I—210 ppm Fluorene—120 ppm Indeno(1,2,3-cd)pyrene—330 ppm Methyl parathion—210 ppm Nitrosodiphenylamine—130 ppm Phenanthrene—150 ppm Polychlorinated biphenyls—0.31 ppm Tetrachloroethylene—59 ppm 2,4,5-TP (silvex)—110 ppm 2,4,6-Trichlorophenol—3.9 ppm. And detected wastewater concentrations do not exceed the following levels: Acetone—35 ppm Aldrin—0.000016 ppm Benzene—0.044 ppm Benzo(a)pyrene—0.000027 ppm Benzo(b)fluoranthene—0.00018 ppm Biphenyl—15 ppm Bis-2-ethylhexyl phthalate—5.2 ppm Chlordane—0.00024 ppm Chlorobenzene—8.8 ppm Chloroform—0.052 ppm Chrysene—0.0018 ppm 2,4-D—3.5 ppm Dibenz(a,h)anthracene—0.000006 ppm Dichloromethane—0.042 ppm 1,3-Dichlorobenzene—34 ppm 1,4-Dichlorobenzene—0.66 ppm 1,2-Dichlorobenzene—26 ppm 1,2-Dichloroethane—0.044 ppm 2,4-Dichlorophenol—0.88 ppm Dichlorvos—0.78 ppm Diethyl phthalate—4,400 ppm Disulfoton—0.016 ppm Endosulfan I—0.020 ppm Ethyl benzene—35 ppm Fluoranthene—1.8 ppm Fluorene—0.018 ppm Indeno(1,2,3-cd)pyrene—0.0018 ppm Isophorone—62 ppm Methyl chloride—35 ppm Methyl parathion—0.099 ppm Naphthalene—80 ppm Nitrosodiphenylamine—0.063 ppm Pentachlorophenol—8.8 ppm Phenanthrene—0.018 ppm Phenol—8.8 ppm Polychlorinated biphenyls—0.000072 ppm Pyrene—35 ppm Tetrachloroethylene—0.059 ppm 2,3,4,6-Tetrachlorophenol—8.8 ppm Toluene—88 ppm 2,4,5-TP (silvex)—0.088 ppm 1,2,4-Trichlorobenzene—6.2 ppm 2,4,6-Trichlorophenol—0.018 ppm 2,4,5-Trichlorophenol—35 ppm 2,4,5-Trichlorophenoxyacetic acid—0.88 ppm Xylene—619 ppm; (5) RCB must generate, prior to disposal of residues, verification data from each eight hour run for each treatment residue (*i.e.*, kiln ash, cyclone ash, separator sludge, and filtered wastewater) to demonstrate that the residues do not contain tetra-, penta-, or hexachlorodibenzo-p-dioxins or furans at levels of regulatory concern. Samples must be collected as specified in conditions (2) and (3). The TCDD equivalent levels for solids must be less than 5 ppt and for wastewater the levels must be below 0.002 ppt. Any residues with detected dioxins or furans in excess of these levels must be retreated or must be disposed as acutely hazardous. Method 8290, a high resolution gas chromatography and high resolution mass spectroscopy (HRGC/HRMS) analytical method, must be used. For tetra- and penta-chlorinated dioxin and furan homologs, the maximum practical quantitation limit must not exceed 15 ppt for solids and 120 ppq for wastewaters. For hexachlorinated dioxin and furan homologs, the maximum practical quantitation limit must not exceed 37 ppt for solids and 0.3 ppt for wastewaters; (6) The test data from conditions (1), (2), (3), (4) and (5) must be kept on file by RCB for inspection purposes and must be compiled, summarized, and submitted to the Assistant Administrator for Solid Waste and Emergency Response by certified mail on a monthly basis and when the treatment of the cancelled pesticides and related materials is concluded. The testing requirements for conditions (2), (3), (4), and (5) will continue until RCB provides the Assistant Administrator with the results of four consecutive batch analyses for the petitioned wastes, none of which exceed the maximum allowable treatment residue concentrations listed in these conditions and the Assistant Administrator notifies RCB that the conditions have been lifted. All data submitted will be placed in the RCRA docket.

TABLE 1.—WASTES EXCLUDED FROM NON-SPECIFIC SOURCES—Continued

Facility	Address	Waste description
		(7) RCB must provide a signed copy of the following certification statement when submitting data in response to the conditions listed above: "Under civil and criminal penalty of law for the making or submission of false or fraudulent statements or representations, I certify that the information contained in or accompanying this document is true, accurate, and complete. As to the (those) identified section(s) of this document for which I cannot personally verify its (their) accuracy, I certify as the Agency official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate and complete."

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

Federal Insurance Administration; Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are determined for the communities listed below.

The base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the **Federal Register** for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12291, so no regulatory analyses have been prepared. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The authority citation for Part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The base (100-year) flood elevations are finalized in the communities listed below. Elevations at selected locations in each community are shown. No appeal was made during the ninety-day period and the proposed base flood elevations have not been changed.

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
ALABAMA	
Chambers County (Unincorporated Areas) (FEMA Docket No. 6817)	
Chattahoochee River:	
About 4.2 miles downstream of Riverview Dam	*527
Just downstream of Langdale Dam	*552
Just upstream of Langdale Dam	*556
About 2000 feet downstream of West Point Dam	*580
Osanippa Creek:	
About 800 feet downstream of U.S. Highway 29	*577
About 1,500 feet downstream of Interstate	*596
Tributary No. 2:	
At mouth	*579
About 1.2 miles upstream of County Road 55	*597
Moores Creek:	
About 600 feet downstream of State Highway 29	*553
Just upstream of Fob James Boulevard	*556
Ginnie Creek:	
At mouth	*653
About 500 feet upstream of Fob James Boulevard	*587
Maps available for inspection at the County Commissioner's Office, Valley, Alabama.	
Lanett (city), Chambers County (FEMA Docket No. 6817)	
Chattahoochee River:	
About 1.6 miles downstream of U.S. Highway 29	*571
About 1,100 feet upstream of U.S. Highway 29	*575
Maps available for inspection at the City Hall, Lanett, Alabama.	
ARIZONA	
Colorado City (town), Mohave County (FEMA Docket No. 6535)	
Short Creek:	
Approximately 15 feet upstream of State Highway 389	*4,930
Approximately 30 feet downstream of North Central Road	*4,977
At Usona Avenue	*5,010

ARKANSAS	
Lepanto (city), Poinsett County (FEMA Docket No. 6817)	
Left Hand Chute of Little River:	
Approximately 1.1 miles downstream of most downstream crossing of State Route 140	*220
Approximately .81 mile upstream of Old State Route 140	*223
Maps available for inspection at 117 South Greenwood, Lepanto, Arkansas.	

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
CALIFORNIA	
Coronado (city), San Diego County (FEMA Docket No. 6817)	
Pacific Ocean:	
Center of Strand Way, 200 feet along the street from its intersection with Pomona Avenue	*9
A point 100 feet due south of the southwest end of Avenida del Sol	*7
Maps are available for review at City Hall, 1825 Strand Way, Coronado, California.	
Encinitas (city), San Diego County (FEMA Docket No. 6817)	
Pacific Ocean:	
Approximately 200 feet west of Tattenham Street	*15
Approximately 200 feet west of intersection of Neptune Avenue and Jason Street	*9
Approximately 300 feet west of intersection of Neptune Avenue and Europa Street	*10
Approximately 330 feet west of intersection of Neptune Avenue and Athena Street	*13
Approximately 600 feet west of intersection of La Mesa Avenue and Orpheus Avenue	*12
Approximately 325 feet west of intersection of Neptune Avenue and La Mesa Avenue	*11
Approximately 300 feet west of intersection of 5th Street and 'A' Street	*10
Approximately 150 feet west of intersection of 5th Street and 'B' Street	*8
Approximately 360 feet west of intersection of 4th Street and 'D' Street	*10
Approximately 330 feet west of intersection of 4th Street and 'E' Street	*11
Approximately 250 feet west of intersection of 4th Street and 'G' Street	*12
Approximately 450 feet west of intersection of 3rd Street and 'J' Street	*11
Approximately 850 feet west of intersection of 1st Street and 2nd Street	*10
Approximately 1,100 feet west of intersection of Summit Avenue and Westminster Drive	*9
Approximately 750 feet west of intersection of Hayden Drive and Montgomery Avenue	*10
Approximately 700 feet west of intersection of San Elijo Avenue and Birmingham Drive	*11
Approximately 500 feet west of intersection of Camino Del Mar and Chesterfield Drive	*10
Approximately 200 feet west of intersection of San Elijo Avenue and Kilkenny Drive	*7
At southern corporate limits	*13
Escondido Creek:	
Approximately 1,850 feet south of intersection of Manchester Avenue and El Camino Real	*13
Approximately 50 feet upstream of Encinitas Boulevard	*33
At El Camino Del Norte	*54
Approximately 300 feet north of intersection of Via De Caballo and Val Sereno Drive	*85
San Elijo Creek:	
At confluence with San Elijo Lagoon	*13
Approximately 1,100 feet above confluence with San Elijo Lagoon	*16
Maps are available for review at City Hall, 535 Encinitas Avenue, Encinitas, California.	
National City (city), San Diego County (FEMA Docket No. 6820)	
Sweetwater River:	
1,500 feet downstream of intersection of Plaza Bonita Road	*37
Approximately 150 feet downstream of Plaza Bonita Road	*30
Las Palmas Creek:	
At Highland Avenue	#1
San Diego Bay:	
At mouth of Sweetwater River	*8
Maps are available for review at City Hall, 1243 National City Boulevard, National City, California.	
San Marcos (city), San Diego County (FEMA Docket No. 6817)	
San Marcos Creek:	
Just upstream of Discovery Road	*514
At the intersection of Mission Road and Twin Oaks Road	*581
Approximately 20 feet downstream of Olive Drive	*598
East Branch San Marcos Creek:	
At confluence with San Marcos Creek	*585
At the intersection of Mission Road and Richland Road	*634
Approximately 10 feet downstream of Rock Springs Road	*651
Maps are available for review at City Hall, 105 West Richmar Avenue, San Marcos, California.	
Santa Maria (city), Santa Barbara County (FEMA Docket No. 6817)	
Bradley Ditch:	
At downstream corporate limits	*197
Approximately 200 feet upstream of Railroad Avenue	*205
Approximately 100 feet upstream of U.S. Highway 101 and State Highway 166	*220
Just downstream of Jones Street and the Santa Maria Valley Railroad	*240
Maps are available for inspection at City of Santa Maria Department of Public Works, 810 West Church Street, Santa Maria, California.	
Solana Beach (city), San Diego County (FEMA Docket No. 6817)	
Pacific Ocean:	
Approximately 700 feet southwest of the intersection of Sierra Avenue and Del Mar Shores Terrace	*12
Approximately 550 feet west of the intersection of Sierra Avenue and Palm Drive	*13
Approximately 500 feet west of the intersection of Sierra Avenue and Linda-Mar Drive	*12
Approximately 450 feet west of the intersection of Sierra Avenue and Plaza Street	*10
Approximately 300 feet west of the southern intersection of Heux Avenue and Hill Street	*12
Approximately 500 feet west of the intersections of Clark Street, Hill Street and Sierra Avenue	*14
Approximately 300 feet west of the intersection with Solana Vista Drive and Pacific Avenue	*13
San Dieguito River:	
Between Del Mar Downs Road and Valley Avenue	*17
Maps are available for review at the City Manager's Office, City Hall, 380 Stevens Avenue, Solana Beach, California.	
Trinity County (unincorporated areas) (FEMA Docket No. 6817)	
Trinity River:	
Approximately 2,600 feet downstream of confluence with Canyon Creek	*1448
Approximately 1,450 feet downstream of confluence with Feltzer Gulch	*1475
Approximately 1,300 feet downstream of confluence with Carr Creek	*1520
Approximately 300 feet downstream of confluence with Browns Creek	*1545
Approximately 230 feet downstream of State Highway 299	*1625
Approximately 920 feet downstream of confluence with McIntyre Gulch	*1665
Approximately 150 feet downstream of confluence with Snipe Gulch	*1741
Approximately 400 feet downstream of confluence with Rush Creek	*1760
Approximately 420 feet downstream of Trinity Dam Boulevard	*1812
Maps are available for review at the Trinity County Planning Department, 303 Trinity Lakes Boulevard, Weaverville, California.	
COLORADO	
Boulder County (Unincorporated Areas), (FEMA Docket No. 6803)	
Boulder Creek:	
At the intersection with Northeast County Line Street	*4,948
At confluence with Barker Reservoir	*8,025
South Boulder Creek:	
At confluence with Boulder Creek	*5,175
500 feet upstream of Eldorado Springs Road	*5,781
Coal Creek:	
At confluence with Boulder Creek	*4,960
3,400 feet upstream of Third Avenue	5,536
Dry Creek No. 1:	
At confluence with St. Vrain Creek	*4,940
5,950 feet upstream of North 75th Street	*5,111
Clover Basin Tributary:	
At confluence with Dry Creek No. 1	*5,037
80 feet upstream of North 75th Street	*5,057
Steel Lakes Tributary:	
At confluence with Dry Creek No. 1	*5,050
At upstream face of North 75th Street	*5,059
Dry Creek No. 2:	
At downstream face of Northeast County Line Street	*4,901
50 Feet downstream of State Highway 119	*5,135
Dry Creek No. 3:	
At confluence with Boulder Creek	*5,067
1,450 feet upstream of Baseline Road	*5,277
Elmers Twomile Creek:	
230 feet upstream of Glenwood Drive	*5,315
At the intersection with Iris Avenue	*5,326
Fourmile Creek:	
At confluence with Boulder Creek	*5,731
860 feet upstream of Pennsylvania Gulch Road	*7,760
Fourmile Canyon Creek:	
At confluence with Boulder Creek	*5,163
80 feet south of line between sections 10 and 15 in Range 7/W Township 1N	*6,092
James Creek:	
At confluence with Lefthand Creek	*6,338
720 feet upstream of confluence with Jenks Gulch	*6,802
Lefthand Creek:	
At confluence with St. Vrain Creek	*4,929
At downstream face of Peak to Peak Drive	*9,220
Little James Creek:	
450 feet upstream of Ward Street	*7,003
1,920 feet upstream of Ward Street	*7,098
Little Thompson River:	
At intersection with the Larimer County-Boulder County line in Section 6 Range 69W Township 3N	*5,091
At line between Sections 2 and 3 in Range 70W Township 3N	*5,232
Middle Boulder Creek:	
At confluence with North Beaver Creek	*8,185
2,900 feet upstream of State Highway 119	*8,320
North Beaver Creek:	
At confluence with Middle Boulder Creek	*8,185
1,080 feet upstream of State Highway 72	*8,302
Rock Creek:	
At confluence with Coal Creek	*5,129
At downstream face of Brainard Drive	*5,307
St. Vrain Creek:	
At downstream face of 119th Street	*4,916
At downstream face of Airport Road	*5,022
St. Vrain Creek: (Vicinity of Lyons)	
3,450 feet downstream of Second Avenue	*5,299
590 feet downstream of Second Avenue	*5,314
South St. Vrain Creek:	
1,020 feet upstream of confluence with North St. Vrain Creek	*5,334
At confluence with Middle St. Vrain Creek	*7,006
Middle St. Vrain Creek:	
At confluence with South St. Vrain Creek	*7,006
360 feet upstream of State Highway 72	*8,510
Spring Gulch:	
At confluence with St. Vrain Creek	*4,929
80 feet downstream of 12th Avenue	*4,980
Wonderland Creek:	
At confluence with North Goose	*5,220
1,080 feet upstream of Broadway	
At confluence with 5	*5,506
Dry Creek:	
At confluence with Flatirons Lake	*5,191
At Burlington Northern Railroad	*5,221
Goose Creek:	
At confluence with Boulder Creek	*5,255
Approximately 140 feet upstream of 9th Street	*5,380
Highway 93 Split Flow:	
At South Boulder Road	*5,338
At confluence with South Boulder Creek	*5,487
North Goose Creek:	
At confluence with Goose Creek	*5,212
Approximately 2,600 feet upstream of Wonderland Creek	*5,242
Maps are available for review at the Floodplain Administrator's Office, Public Works Department, Engineering Division, Boulder County Courthouse Annex, 13th and Spruce Streets, Boulder, Colorado 80306.	
CONNECTICUT	
Cornwall (town), Litchfield County (FEMA Docket No. 6820)	
Housatonic River:	
Downstream corporate limits	*402
Approximately 50 feet downstream of U.S. Route 7	*440
Upstream side of State Route 128	*509
Upstream corporate limits	*541
Hollenbeck River:	
Approximately 420 feet downstream of corporate limits	*838
Downstream side of State Route 43	*894
Approximately 1.2 miles upstream of Lake Road	*925

Old Settler's Slough:	
At western corporate limits	*3,411
Approximately 200 feet above Campbell Street	*3,425
Approximately 50 feet below Auburn Avenue	*3,436
At divergence from Powder River	*3,486
Maps are available for inspection at the City Planner's Office, City Hall, 1665 First Street, Baker, Oregon 97814.	
Baker County (FEMA Docket No. 6812)	
Powder River (at Baker):	
Approximately 5,300 feet downstream of Hughes Lane Road	*3,394
Approximately 30 feet upstream of Hughes Lane (City of Baker corporate limits)	*3,412
Approximately 20 feet upstream of Madison Street Bridge	*3,433
Upstream of the Union Pacific Railroad Bridge	*3,453
City of Baker southern corporate limits	*3,476
At the confluence of Griffin Gulch	*3,483
Powder River Overflow A:	
Approximately 5,000 feet downstream of Hughes Lane Road along profile baseline	*3,385
South of Hughes Lane	*3,410
Powder River Overflow B:	
Approximately 5,000 feet downstream of confluence with Powder River along profile baseline	*3,394
Approximately 2,000 feet north of northern corporate limits of City of Baker	*3,403
Powder River (at Sumpter):	
At upstream side of Whitney Tippen Highway Bridge	*4,242
Approximately 190 feet above West Dredge Road	*4,272
At City of Sumpter corporate limits	*4,325
At Sawmill Gulch Road	*4,356
At confluence of Cracker Creek	*4,383
North Powder River (at North Powder):	
Approximately 4,200 feet above mouth	*3,222
At an unnamed road located approximately 5,200 feet above mouth	*3,228
At Thief Valley Road	*3,244
Just above Interstate 84 South	*3,258
Approximately 800 feet above State Highway 30	*3,261
Old Settler's Slough:	
At R 39/40 E	*3,388
Just above Pocahontas Road	*3,408
At City of Baker corporate limits	*3,411
Approximately 50 feet below Auburn Avenue	*3,425
At divergence from Powder River	*3,458
Pine Creek (at Halfway):	
At downstream side of Pine Creek Highway	*2,632
Approximately 60 feet above Slaughterhouse Road	*2,636
At East Pine Creek Road	*2,708
Maps are available for inspection at the Baker County Planning Office, County Courthouse, 1995 Third Street, Baker, Oregon 97814.	
Bend (city), Deschutes County (FEMA Docket No. 6820)	
Deschutes River:	
At upstream of Pacific Power and Light Dam	*3,594
100 feet above logboom	*3,607
4,700 feet below upstream corporate limits	*3,610
3,200 feet below upstream corporate limits	*3,617
Maps are available for review at City Hall, Planning Department, 710 Northwest Wall, Bend, Oregon.	
Columbia City (city), Columbia County (FEMA Docket No. 6820)	
Columbia River:	
At downstream corporate limits	*22
At upstream corporate limits approximately 1,100 feet above "L" Street extended	*22
Maps are available for review at City Hall, Columbia City, Oregon 97018.	
Columbia County (unincorporated areas) (FEMA Docket No. 6820)	
Clatskanie River:	
At confluence with Beaver Slough	*12
Just upstream of Olson Road	*18
Conyers Creek:	
At Kelly Road	*22
Approximately 750 feet above confluence of Roaring Creek	*74
Columbia River:	
At Clatsop-Columbia County boundary	*11
At Crims Island	*14
At confluence of Goble Creek	*19
At confluence of Multnomah Channel	*23
At Columbia-Multnomah County boundary	*26
McNulty Creek:	
At confluence with Columbia River	*23
Upstream of Columbia River Highway	*79
Downstream of Ross Road	*100
Milton Creek:	
Approximately 280 feet above Pittsburg Road and City of St. Helens corporate limit	*137
At intersection of Pittsburg Road, approximately 300 feet below intersection of Robinson and Pittsburg Road	*203
At Pittsburg Road crossing of T 4/5 North	*221
Nehalem River:	
Approximately 825 feet upstream of Knickerson Creek	*600
Approximately 1,300 feet upstream of the intersection of Pebble Creek Road and Alder Street extended	*608
Just downstream of sewage disposal ponds	*613
Approximately 3,100 feet above confluence of Rock Creek	*616
Scappoose Creek:	
Approximately 2,860 feet downstream of West Lane Road	*24
Just below State Highway 30	*43
Just upstream of Dutch Canyon Road	*63
Just upstream of Branch Road	*75
At upstream of Raymond Creek Road	*98
Rock Creek:	
At confluence with Nehalem River	*614
North Scappoose Creek:	
At confluence with Scappoose Creek	*37
At upstream of State Highway 30	*46
Approximately 150 feet below confluence with North Scappoose Creek overflow	*54
Approximately 250 feet above Apple Valley Road	*75
North Scappoose Creek Overflow:	
Approximately 100 feet below confluence with North Scappoose Creek	*54
At confluence with Scappoose Creek	*43
Maps are available for review at Columbia County Courthouse, First Street, St. Helens, Oregon.	
Deschutes County (unincorporated areas) (FEMA Docket No. 6820)	
Deschutes River at Tumalo:	
300 feet below River Mile 159	*3,137
At Tumalo Deschutes Highway Bridge	*3,167
Deschutes River at Sunriver:	
At Cardinal Landing Bridge	*4,153
1,200 feet below Harper Bridge	*4,158
Little Deschutes River:	
At confluence with Deschutes River	*4,159
1,800 feet above South Center Drive Bridge	*4,166
At confluence of Paulina Creek	*4,182
At upstream side of Stearns Bridge	*4,201
At County boundary between Deschutes and Klamath	*4,256
Squaw Creek:	
100 feet above County boundary between Deschutes and Jefferson County	*2,587
At River Mile 10.00	*2,877
At River Mile 14.00	*2,953
120 feet above Camp Polk Bridge	*2,992
At Section line 29/32 in T 15S, R 10E	*3,506
Maps are available for review at the Deschutes County Courthouse Annex, 1164 N.W. Bond, Bend, Oregon.	
Pilot Rock (city), Umatilla County (FEMA Docket No. 6820)	
Birch Creek:	
At confluence of West and East Fork Birch Creek	*1,624
At downstream corporate limit	*1,619
West Fork Birch Creek:	
At upstream corporate limit	*1,661
Approximately 940 feet upstream of 2nd Street	*1,650
At 2nd Street	*1,636
Just upstream of Birch Street	*1,632
At confluence with East Fork	*1,624
East Fork Birch Creek:	
At upstream limit of flooding affecting the city	*1,662
Approximately 800 feet upstream of 3rd Street	*1,647
At SW. 2nd Street	*1,639
Just upstream of 2nd Street	*1,632
At confluence with West Fork	*1,624
Maps are available for review at the Umatilla County Courthouse, 216 SE. Fourth Street, Pendleton, Oregon.	
Prescott (city), Columbia County (FEMA Docket No. 6820)	
Columbia River: At Riverview Avenue	*19
Maps are available for review at Prescott City Hall, 72742 Blakely Street, Rainier, Oregon.	
Rainier (city), Columbia County (FEMA Docket No. 6820)	
Columbia River:	
At downstream corporate limit, approximately 3,300 feet below Longview Bridge	*16
At upstream corporate limit	*17
Maps are available for review at City Hall, Rainier, Oregon.	
Scappoose (city), Columbia County (FEMA Docket No. 6820)	
Scappoose Creek:	
At downstream corporate limits, just above Columbia River Highway	*43
Upstream of Scappoose Vernonia Road	*46
At centerline of J.P. West Road	*48
At centerline of E.M. Watts Road	*53
At upstream corporate limit, centerline of Dutch Canyon Road	*62
Maps are available for review at City Hall, Scappoose, Oregon.	
St. Helens (city), Columbia County (FEMA Docket No. 6820)	
Columbia River:	
At upstream corporate limits	*23
At downstream corporate limits confluence of Multnomah Channel	*25
Milton Creek:	
At upstream corporate limits, 1,840 feet upstream of Pittsburg Road	*150
At intersection with Columbia River Highway (State Highway 30)	*100
At centerline of Old Portland Road	*67
At confluence with Columbia River	*23
Maps are available for review at City Hall, St. Helens, Oregon.	
Sumpter (city), Baker County (FEMA Docket No. 6812)	
Powder River:	
At southern corporate limit (approximately 1,000 feet east of the river channel)	*4,321
At southern corporate limit	*4,326
At Sawmill Gulch Road	*4,356
At confluence of Cracker Creek	*4,383
Maps are available for inspection at the Baker County Planning Office, County Courthouse, 1995 Third Street, Baker, Oregon 97814.	
Vernonia (city), Columbia County (FEMA Docket No. 6820)	
Rock Creek:	
Approximately 1,050 feet downstream of Bridge Street, at downstream corporate limit	*614
At Bridge Street (State Highway 47)	*615
At upstream corporate limit, T 4/5 north line	*619
Nehalem River:	
At downstream corporate limit, approximately 1,000 feet above confluence of Knickerson Creek	*600
At intersection of Elm Street and Mist Drive	*606
At eastern end of Vernonia Lake	*608
Just upstream of the confluence of Rock Creek, at southern corporate limit	*615
Maps are available for review at City Hall, 919 Bridge Street, Vernonia, Oregon.	
PENNSYLVANIA	
Berlin (township), Wayne County (FEMA Docket No. 6817)	
Delaware River:	
At downstream corporate limits	*684
At upstream corporate limits	*687
Indian Orchard Brook:	
At downstream corporate limits	*961
Upstream side of downstream crossing of Camp Navajo Road	*1,011
Upstream side of upstream crossing of Camp Navajo Road	*1,051

At confluence with Potomac River	*355
Approximately 200 feet upstream of State Route 45	*368
At State Route 9	*370
At County Route 19	*401
At County Route 51	*441
Approximately 800 feet upstream of County Route 26-5	*463
Dry Run:	
Approximately 0.4 mile downstream of downstream county boundary	*462
Downstream side of County Route 9-11	*480
Upstream side of County Route 4	*503
Approximately 182 feet upstream of County Route 13	*575
Tuscarora Creek:	
Approximately 1,370 feet downstream of CSX Transport	*395
Downstream side of Interstate Route 81	*453
At County Route 15 (1st upstream crossing)	*521
At County Route 15 (2nd upstream crossing)	*565
Approximately 1.6 miles upstream of County Route 15 (3rd upstream crossing)	*604

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
Mill Creek:	
Approximately 0.4 mile downstream of County Route 26	*476
At County Route 24-3	*585
At County Route 24	*630
Approximately 1.7 miles upstream of County Route 24	*661
Middle Creek:	
Approximately 1.3 miles downstream of U.S. Route 11	*486
Downstream side of County Route 30	*559
Approximately 1,500 feet downstream of County Route 30-5	*606
Approximately 100 feet upstream of County Route 37	*625
Evans Run:	
Approximately 1.4 miles downstream of U.S. Route 11	*454
At U.S. Route 11	*490
At Interstate Route 81	*521
Approximately 1 mile upstream of Interstate Route 81	*556
Maps available for inspection at the Berkeley County Planning Office, 212 South College Street, Martinsburg, West Virginia.	
Harrison County (unincorporated areas) (FEMA Docket No. 6917)	
West Fork River:	
At downstream County boundary	*902
At upstream corporate limits of City of Clarksburg	*948
At upstream County boundary	*994
Bingamon Creek:	
At confluence with West Fork River	*902
Downstream side of first County Route 8 Bridge crossing	*940
Approximately 1,200 feet upstream of County Route 3-1 Bridge	*995
Tenmile Creek:	
At confluence with West Fork River	*920
Downstream side of Indian Run Road Bridge	*962
Upstream side of Access Road approximately 1.1 miles upstream of confluence of Rush Run	*1,005
Simpson Creek:	
At confluence with West Fork River	*927
At upstream County boundary	*996
Little Tenmile Creek:	
At confluence with Tenmile Creek	*932
Approximately 200 feet upstream of confluence of Caldwell Run	*976
Approximately 1.1 miles upstream of confluence of Middle Run	*1,022
Limestone Run:	
At City of Clarksburg corporate limits, downstream side of CSX Transport (B&O) Bridge	*942
Approximately 50 feet downstream of Wilsonburg Road	*991
Downstream side of County Route 50-10 Bridge	*1,036
Approximately .77 mile upstream of County Route 50-10	*1,073
Elk Creek:	
Approximately 2.6 miles downstream of Cost Avenue Bridge	*984
Approximately 250 feet upstream of County Route 20-19	*1,010
At County boundary	*1,025
Gnatty Creek:	
At confluence with Elk Creek	*1,015
At County boundary	*1,042
Maps available for inspection at the Harrison County Planning Commission, 5th Floor, County Courthouse, Clarksburg, West Virginia.	
Marion County (unincorporated areas) (FEMA Docket No. 6917)	
Booths Creek:	
At County Route 56	*913
At County Route 27-1	*930
Buffalo Creek:	
At downstream County boundary	*874
At confluence of Johnson Run	*919
At CSX Transportation (2nd upstream crossing)	*952
Approximately .3 mile upstream of confluence of Dents Run	*961
Paw Paw Creek:	
At downstream County boundary	*858
At County Route 17-18	*904
At confluence of Robinson Run	*951
Approximately 1,960 feet upstream of County Route 15	*992
Prickett Creek:	
Approximately .3 mile downstream of County Route 73	*904
At confluence of Reuben Run	*970
Approximately .6 mile upstream of County Route 66-1	*1,002
Monongahela River:	
Approximately .7 mile downstream of the confluence of Paw Paw Creek	*866
Approximately .3 mile upstream of confluence of Paw Paw Creek	*868
Approximately 695 feet downstream of the confluence of Tygart Valley and West Fork Rivers	*875
At confluence of Tygart Valley and West Fork Rivers	*875
West Fork River:	
Approximately .34 mile downstream of first upstream crossing of CSX Transportation	*878
Approximately 507 feet upstream of first upstream crossing of CSX Transportation	*880
At downstream County boundary	*896
Approximately 50 feet upstream of most upstream crossing of CSX Transportation	*896
Bingamon Creek:	
Approximately 146 feet downstream of U.S. Route 19	*902
Approximately .5 mile upstream of U.S. Route 19	*902
Tygart Valley River:	
At confluence with Monongahela River	*875
Approximately 1.5 miles upstream of confluence with Monongahela River	*875
Pyles Fork:	
At downstream County boundary	*976
At County Route 250-5	*990
Approximately .3 mile upstream of confluence of Campbell Run	*1,010
Maps available for inspection at the County Commission Office, Room 403, G. Harper Meredith Building, Fairmont, West Virginia.	
WISCONSIN	
Almena (village), Barron County (FEMA Docket No. 6930)	
Lightning Creek:	
Just upstream of County Highway P	*1,162
Just downstream of Alma Street	*1,171
Maps available for inspection at the Village Hall, Almena, Wisconsin.	
Cassville (village), Grant County (FEMA Docket No. 6930)	
Mississippi River:	
About 2.7 miles downstream of confluence of Furnace Creek	*618
About 1.0 mile upstream of confluence of Furnace Creek	*620
Maps available for inspection at the Village Hall, 100 West Amelia, Cassville, Wisconsin.	
Colfax (village), Dunn County (FEMA Docket No. 6820)	
Red Cedar River:	
About 0.5 mile downstream of Wheeler University Street	*918
About 1,500 feet upstream of Wheeler University Street	*921
Eighteen Mile Creek:	
Just downstream of Colfax Dam	*920
Just upstream of Colfax Dam	*927
About 1,900 feet upstream of Foot Bridge	*930
Maps available for inspection at the Village Clerk's Office, Village Hall, 613 Main Street, Colfax, Wisconsin.	
Hawkins (village), Rusk County (FEMA Docket No. 6820)	
Main Creek:	
About 2,450 feet downstream of the Soo Line Railroad	*1,347
Just upstream of Ellingson Avenue	*1,356
Maps available for inspection at the Village Hall, Hawkins, Wisconsin.	
Neosho (village), Dodge County (FEMA Docket No. 6917)	
Rubicon River:	
About 3,300 feet downstream of Schuyler Street	*867
Just downstream of Schuyler Street	*869
Mill Pond: Along entire shoreline	*878
Maps available for inspection at the Village Hall, 115 South Schuyler Street, Neosho, Wisconsin.	
Oxford (village), Marquette County (FEMA Docket No. 6820)	
Neenah Creek:	
About 2,500 feet downstream of Chauncey Street	*838
Just downstream of Oxford Dam	*839
Neenah Lake: Along shoreline	*853
Maps available for inspection at the Village Hall, Oxford, Wisconsin.	
Princeton (city), Green Lake County (FEMA Docket No. 6917)	
Fox River:	
About 1.1 miles downstream of Main Street	*766
About 1.0 mile upstream of Main Street	*768
Maps available for inspection at the City Hall, Clerk's Office, 436 West Main, Princeton, Wisconsin.	
WYOMING	
Baggs (town), Carbon County (FEMA Docket No. 6826)	
Little Snake River:	
Approximately 1,150 feet downstream of State Highway 789	*6,243
Approximately 2,200 feet upstream of State Highway 789	*6,248
Ledford Slough:	
Approximately 330 feet downstream of County Road	*6,240
Approximately 100 feet downstream of State Highway 789	*6,246
Approximately 3,000 feet upstream of State Highway 789	*6,252
Maps available for review at the Town Hall, 129 Penland Street, Baggs, Wyoming.	

The base (100-year) flood elevations are finalized in the communities listed below. Elevations at selected locations in each community are shown. Any appeals of the proposed base flood elevations which were received have been resolved by the Agency.

Source of flooding and location	# Depth in feet above ground. *Elevation in feet (NGVD)
CALIFORNIA	
Kings County (unincorporated areas) (FEMA Docket No. 6903)	
East Branch Cross Creek:	
Immediately downstream of Orange Avenue	*193
Approximately 100 feet upstream of the Atchison, Topeka and Santa Fe Railroad	*209
Approximately 300 feet downstream of Kansas Avenue	*224
Tule River:	
Approximately 2,300 feet downstream of Kings County/Tulare County boundary	*192
Approximately 300 feet downstream of Kings County/Tulare County boundary	*193
Maps available for review at the Kings County Planning Agency, Engineering Building, Government Center, Hanford, California.	
San Joaquin County (unincorporated areas) (FEMA Docket No. 6914)	
Mokelumne River:	
50 feet upstream of New Hope Road (Walnut Grove Road)	*24
Approximately 500 feet upstream of Peltier Road	*34
Approximately 750 feet upstream of State Highway 99	*51
Approximately 1,250 feet downstream of State Highway 88	*99
Approximately 450 feet downstream of Camanche Dam	*102
North Fork Mokelumne River:	
At confluence with South Fork Mokelumne River	*7
Approximately 50 feet upstream of Walnut Grove Road	*12
At divergence from South Fork Mokelumne River	*15
Middle River:	
Approximately 3,000 feet upstream of State Highway 4	*8
At the confluence with Old River	*16
Middle River (Delta Area): At the confluence with Empire Cut	*7
Old River:	
2,000 feet upstream of Fabian and Bell Canal	*8
At the confluence with Salmon Slough	*10
3,000 feet downstream of the confluence with San Joaquin River	*22
Old River (Delta Area):	
At the confluence with Woodward Canal and Old River	*7
Approximately 1,000 feet easterly along State Highway 4 from the bridge crossing at Old River	*8
Paradise Cut:	
At the confluence with Sugar Cut	*12
Approximately 500 feet upstream of Paradise Road	*17
Approximately 1,000 feet downstream of Paradise Dam	*25
South Fork Mokelumne River:	
At the confluence of Hog Slough	*8
Approximately 100 feet upstream of Walnut Grove Road	*15
South Fork Mokelumne River (Delta Area):	
Approximately 1,000 feet west along State Highway 12 from the bridge crossing of Little Potato Slough	*7
At confluence of Little Potato Slough	*8
San Joaquin River (Delta Area):	
Intersection of Jacobs Road and McDonald Road	*7
Intersection of Mathews Road and Wolfe Road	*17
Approximately 3,000 feet north of the intersection of Kasson Road and Durham Ferry Road (Airport Way)	*32
Beaver Slough: Approximately 100 feet downstream of Blossom Road	*8
Bishop Cut (Delta Area): At confluence of Telephone Cut	*8
Columbia Cut (Delta Area): At the confluence of San Joaquin River and Columbia Cut	*7
Connection Slough (Delta Area): Approximately 100 feet upstream of the confluence with Old River	*7
Disappointment Slough (Delta Area): At the confluence of Ward Cut	*7
Empire Cut (Delta Area): At the confluence of Middle River	*7
Hog Slough (Delta Area): At the confluence of South Fork Mokelumne River	*8
Honker Cut (Delta Area): At the confluence of White Slough	*8
Latham Slough (Delta Area): At the confluence of Empire Cut	*7
Little Connection Slough (Delta Area): At confluence with San Joaquin River	*7
Little Potato Slough:	
At the confluence with Potato Slough	*7
At State Highway 12	*8
Potato Slough (Delta Area): At the confluence with San Joaquin River	*7
Sycamore Slough (Delta Area): At the confluence of South Fork Mokelumne River	*8
Telephone Cut (Delta Area): At the confluence of Bishop Cut	*8
Turner Cut (Delta Area): At the confluence of Empire Cut, Whiskey Slough and Turner Cut	*7
Whiskey Slough (Delta Area): At the confluence of Empire Cut, Turner Cut and Whiskey Slough	*7
White Slough (Delta Area):	
At the confluence with San Joaquin River	*7
At the confluence of Potato Slough	*8
Woodward Canal (Delta Area): At the confluence of Middle River	*7
Victoria and North Canals (Delta Areas): At the confluence of Middle River and Victoria and North Canals	*7
Maps are available for review at the San Joaquin County Planning and Inspection Department, 1810 East Hazelton, Stockton, California.	
COLORADO	
Boulder (CITY), Boulder County (FEMA Docket No. 6903)	
Boulder Creek:	
At intersection with Burlington Northern Railroad	*5,294
50 feet upstream of Broadway	*5,346
480 feet downstream of Arapahoe Ave.	*5,406
South Boulder Creek:	
20 feet upstream of Burlington Northern Railroad	*5,225

BILLING CODE 6718-03-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 87-04; Notice 3]

Federal Motor Vehicle Safety Standards; Air Brake Systems

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Final rule.

SUMMARY: This notice amends Federal Motor Vehicle Safety Standard No. 121, *Air Brake Systems*, to clarify the standard's parking brake requirements. The amendments require actuation of a mechanical means for holding the parking brakes, within three seconds after operation of the parking brake control. (For trailers, such actuation is required within three seconds after venting to the atmosphere of the front supply line connection is initiated.) In addition, vehicles are required to be capable of meeting requirements related to parking brake retardation force within the three second period. The amendments also require that the grade holding test (or alternative drawbar test) be met with only the mechanical means of holding the parking brakes in operation.

DATES: The amendments made by this rule to the Code of Federal Regulations are effective April 11, 1988. The amendments require mandatory compliance effective September 7, 1988, while permitting manufacturers to comply with the new requirements as an option to complying with requirements being superseded effective April 11, 1988. Petitions for reconsideration must be received on or before April 11, 1988.

ADDRESSES: Petitions for reconsideration should be submitted to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Mr. Scott Shadle, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC (202-366-5273).

SUPPLEMENTARY INFORMATION:

Background

On March 17, 1987, NHTSA published in the Federal Register (52 FR 8317) a notice of proposed rulemaking (NPRM) to clarify the parking brake requirements of Federal Motor Vehicle Safety Standard No. 121, *Air Brake Systems*. The notice was issued as part of a rulemaking action which had been initiated in response to a petition submitted by the California Highway Patrol (CHP).

The CHP petition largely focused on the "Mini-Max" parking brake, produced by International Transquip Industries, Inc. In some versions, this parking brake was applied with air pressure (usually about 100 psi) and held by air until the air pressure dropped, in some cases to as low as 40 psi, to a point at which the brake became held mechanically. The drop in air pressure could occur over a period of many hours, during which time the braking force significantly decreased. CHP expressed concern that such a system could result in "false parking," i.e., a situation in which subsequent to application of a vehicle's parking brake by the driver, the parking force decreases to the point that the vehicle could roll away if parked on a hill.

CHP noted that section S5.6.3 of Standard No. 121 requires that "once applied, the parking brake shall be held in the applied position solely by mechanical means," and argued that this wording had for years made it illegal for a parking brake system to be held in the applied position by air pressure. The petitioner expressed concern that a 1984 interpretation seemed to say that the parking brake can be held in the applied position by air pressure, as long as there is a possibility of a mechanical system locking itself by the time 60 percent of the pressure leaks off or is suddenly lost. CHP requested that NHTSA either amend Standard No. 121 to prohibit systems that have the probability of resulting in false parking or issue an interpretation of section S5.6.3 with sufficient limits to accomplish the same result. Subsequent to the CHP petition, NHTSA received comments on the petition and other information from International Transquip, as well additional information from CHP.

In evaluating the issues raised by CHP's petition, NHTSA considered whether it would be appropriate to resolve them by issuing an interpretation of section S5.6.3. As discussed in the NPRM, the wording of that section (quoted above) does raise certain issues relating to whether parking brake systems with delayed mechanical application force comply with Standard No. 121. As noted by the CHP and International Transquip submissions, NHTSA has made a number of past interpretations concerning that section. The NPRM noted, however, that while NHTSA has never concluded that brake systems resulting in false parking are safe or provided an interpretation that the particular parking brake system cited by CHP complies with section S5.6.3, some of the past interpretations could contribute to ambiguity concerning whether some of the features incorporated in that parking brake system are permitted by the standard. For this reason, and in light of a safety concern about false parking, NHTSA granted the CHP petition to initiate rulemaking on the false park issue rather than issuing an intepretation whether or not such systems comply with section S5.6.3.

The NPRM

In the March 1987 NPRM, NHTSA explained its concern about braking systems which result in false parking. The agency stated the following:

> If a vehicle is parked on a grade and the parking brake can be set so that it just holds the vehicle on the grade with the force applied when the driver actuates the parking brake control, the vehicle could roll away if that parking force later drops. Thus, a driver could be misled into parking on a grade which is only initially within the holding capability of the parking brake. The driver might park the vehicle and walk away thinking it was secure, only to have it later roll away. The safety hazards connected with large, heavy trucks rolling away could be particularly serious. 52 FR 8318.

Based on this safety concern, NHTSA proposed to require that, within five seconds of the time parking brakes are actuated, they must be held in the applied position solely by mechnical means and the retardation force of the parking brake system cannot decrease in the event of a decrease in the air or brake fluid pressure of any of the vehicle's service or parking brake systems. For trucks and buses, the brake actuation was defined as when the driver actuates the parking brake control. For trailers, the brake actuation was defined as when venting to the atmosphere of the front supply line connection is initiated. The five second period was intended to be short enough to ensure that vehicles would be stably parked at the time drivers leave them, while long enough to permit the use of air applied-mechanically held parking systems. The agency believed that several seconds could be required for the air pressure in such systems to be evacuated, which would be necessary to achieve a mechanically held condition.

NHTSA also proposed to require that vehicles be capable of meeting requirements related to parking brake retardation force within two seconds of the time the parking brakes are actuated. The agency stated that it believed that retardation force should be generated in as short a time as is practicable, since the parking brake system is sometimes also used as an emergency braking system. NHTSA also stated that there is a definite need for fast parking brake apply times on some trailers, because there are tractors which modulate the parking brakes through the supply line to provide for trailer braking in the event of a control line failure. A trailer with slow parking brake times would degrade the emergency braking performance of combinations having such tractors.

The agency indicated in the NPRM that the number of parking brake systems that might be affected by the proposal was very small. The only current system other than the Mini-Max which the agency believed might be affected was the DD3 parking brake system produced by Bendix. The agency indicated that it believed it might be possible for International Transquip to redesign all of its braking system configurations to comply with the proposed requirements.

Comments

NHTSA received numerous comments on both the proposed five second requirement related to false parking and the proposed two second requirement related to parking brake retardation force.

A number of commenters supported the proposed requirement related to false parking. The Heavy Duty Brake Manufacturers Council (HDBMC), an activity of the Heavy Duty Manufacturers Association/Motor and Equipment Manufacturers Association, stated that it strongly supports the proposal and agency rationale. Individual brake manufacturers supporting the proposal include Midland Brake, Rockwell and Bendix. Bendix, which manufactures the DD3 brake, stated that it has always been aware of the rollaway possibilities of vehicles that are parked on air. That commenter stated that it now offers the DD3 in a "demonstrated-park" version, which meets the proposed requirement. That company also submitted data showing that it is possible for a driver to actuate the parking control and exit a vehicle in about four seconds, and suggested that the five second time period be reduced to three seconds. The Truck Trailer Manufacturers Association (TTMA) stated that it supports the proposed requirement, which would assure that false parking does not become a problem in the future. Corpac Industries, a trailer manufacturer, also supported adoption of the proposed requirement. General Motors and Ford supported the proposed requirement related to false parking. Flxible, a bus manufacturer, submitted comments indicating that it had experienced various problems, including vehicle rollaway, using test systems constructed by Mini-Max specifically for Flxible. That commenter stated that, from an opinion point of view, anything that results in, or allows a delay in setting the parking brakes to a mechanically held condition, and with its experienced conditions, could result in an operator going away from the vehicle and a runaway condition developing. The Insurance Institute for Highway Safety also supported the proposal.

While Rockwell generally supported the proposal, it stated that it believes that there may be certain unique vehicle configurations where "parking-with-air may be desirable and perhaps necessary to achieve required performance and durability goals. According to that commenter, such configurations include one-man operation refuse packers and transit buses. Rockwell stated that allowance for configurations such as these should be considered in an amendment.

Some commenters suggested alternative means for dealing with the false park issue. Navistar stated that it believes the agency can solve the problem of false parking by defining when the parking brakes are fully applied by mechanical means, and that it is unnecessary to add a five second timing requirement. Volvo White stated that the current Standard No. 121 requirements are sufficiently clear and that a change in the rule is unnecessary. Freightliner stated that it does not believe that the false park issue is applicable to spring brake systems and that Standard No. 121's current language is sufficient to ensure that parking brakes are held solely by mechanical means.

CHP stated that while it remains concerned about the possibility of false parking, the requirement proposed by NHTSA would have the effect of eliminating some systems using the Bendix DD3 as well as Mini-Max. That commenter stated that, in its view, both devices offer beneficial characteristics and a unique small size for special applications. CHP stated that its concern remains that any system which allows movement of the pushrod before locking invites the possibility of a false park situation. That organization stated that, in response to its original concerns, International Transquip had redesigned the Mini-Max brake chamber to have the locking piston dropped on brake

application, thereby holding the brake at a much higher force. (In the Mini-Max parking brake, the locking piston is a pawl which drops to engage teeth cut in the brake pushrod.) CHP recommended that the proposed requirement be modified into a two-step test procedure, requiring actuation of the mechanical locking device within five seconds after initial brake application, and separately requiring that the slope holding test be met with only the mechanical locking device in operation, after the brakes have bled down to a zero pressure reading. CHP argued that the obvious advantages of pressure on the diaphragm at the time of the brake application should not be discarded, and that its recommended wording would ensure that the system had no false park by requiring zero pressure on the diaphragm during the slope holding test.

A number of commenters strongly opposed the proposed requirement related to false parking. International Transquip argued that the proposal had been made in response to theoretical concerns which are unjustified based on operational experience in Canada with thousands of vehicles whose braking systems employ air-applied delayed mechanical parking. That commenter asserted that the current 20 percent grade holding requirement is more than adequate since heavy vehicles do not park on grades as steep as 20 percent and a margin of additional holding force and safety is already factored into this requirement. International Transquip also argued that the proposed requirement would, in practice, prohibit use of an air back-up to any mechanical lock, and deny the industry several safety benefits such as shorter emergency stopping distances, better pneumatic balance between chambers, earlier detection of air leaks, and effective emergency modulation on trailers. That company stated that technical or economic problems may preclude compliance by air-applied mechanically held brakes with the proposed amendment, thereby denying the industry a safer shop alternative, as well as a unit suitable for lowbed trailers and other space constrained applications. That commenter also stated that air-applied mechanically held brakes can provide substantial economic benefits to the industry, which would be lost if the proposed requirement is adopted.

International Transquip argued that the current regulations as worded in a final rule published in 1979 are more than adequate to protect against the minimal hazards of parked heavy vehicles. That commenter asserted that the 1979 rule does not have the phrase "solely by mechanical means." (The agency notes that the phrase "solely by mechanical means" was included in Standard No. 121 prior to the 1979 rule and not deleted by that rule.) International Transquip stated that if the agency is determined to amend its regulations, the agency should adopt language requiring that, within the proposed five second time period, "the parking brakes shall be held in the applied position by mechanical means or a mechanical means of holding the application in the event of loss of fluid or air pressure must be in position and must be capable of achieving the minimum performance specified in either S5.6.1 or S5.6.2."

Additional comments were submitted on behalf of International Transquip by the law firm of Crowell & Moring. That firm argued that the problem of false parking does not exist and the proposed requirement is misfocused. According to that commenter, it is not change in parking force that is unsafe but insufficient force. Crowell & Moring argued that the mechanical park of the Mini-Max comes into play at a level of parking force sufficient to prevent rollaway under any relevant circumstances. That firm also argued that adoption of the proposed requirement would eliminate a proven, safe technology and deprive the public of the safety and economic advantages of the Mini-Max brake.

Several members of Congress submitted comments opposing the proposed amendment, citing materials prepared by International Transquip. The Private Truck Council of America argued that the proposed requirement was issued without any documented evidence of rollaway. That commenter stated that restrictive regulations may stifle creative improvements in truck design and urged that the proposal be rescinded unless some clear and convincing evidence of necessity is available. John L. Schandelmeier, a private consultant on brake systems, argued that Mini-Max and DD3 brake chambers, when piped as air applied, air held, and mechanically locked brakes, offer superior emergency brake stopping and grade holding capability to spring brakes. That commenter asserted that the version of the DD3 brake in which air is immediately released is less desirable than the earlier one because emergency stopping distances are increased. Several other commenters also opposed the proposed amendment, generally making similar arguments to those of International Transquip.

Echlin commented that the air brakes it manufactures for use by vehicle manufacturers in the United States are compatible with the proposed requirements. That company expressed concern, however, that Transport Canada has in the past followed the lead of NHTSA with respect to Canadian regulations. Echlin stated that it produces a valve in Canada, used in trailer brake systems, that applies a pneumatic emergency application which is backed up by spring applied brake application. That company indicated that these vehicles differ in several respects from United States vehicles, but expressed concern that if the proposal were adopted in Canada, there could be a serious reduction in the emergency stopping capability of the Canadian trailers. TBG Warehousing Limited, a Canadian company, stated that vehicles with air park systems have been manufactured in Canada for many years and expressed concern that adoption of the proposal would be detrimental to both the United States and Canada.

As with the proposed requirement related to false parking, NHTSA received comments both supporting and opposing the proposed two second requirement concerning parking brake retardation force. HDBMC supported the proposed requirement, stating that it agrees that vehicles should be capable of meeting requirements related to parking brake retardation force within two seconds of the time the parking brakes are actuated. Midland Brake stated that it has data regarding parking brake application time for trucks and trailers which show that the two second apply time should be acceptable for these vehicles. TTMA stated that the two seconds proposed as the time for meeting the parking brake retardation force appears to be reasonable from both operational and safety aspects. Corpac stated that, based on limited tests, the proposed time of two seconds for meeting the parking brake retardation force is correct and has an ample margin of reserve to allow for variations in the manufacturing process.

Bendix commented that the stated purpose of the two second timing is to assure the parking brakes have adequate response timing when they are used to provide modulated emergency braking. That company argued that a time requirement for emergency brake systems should not be incorporated within the scope of this proposed rulemaking. Bendix stated that since its data show that current parking brake systems are capable of achieving demonstrated park in less than two seconds, there is no need for the proposed two and five second requirements. That company suggested that the proposed response time requirement of "at any time after two seconds" to achieve the required parking force be changed to "within three seconds" the parking brake system shall achieve and thereafter maintain the required mechanically held parking force.

Volvo White opposed the two second timing requirement, stating that it would result in an unsafe "whiplash" condition during compliance testing and would require it to review all its certifications and conduct new certification tests. That commenter also argued that it and other truck manufacturers should not be required to expend resources for a potential problem it contends is limited to towed vehicles. Volvo White also stated that it disagrees that the proposal is not "major" or "significant."

Navistar stated that it believes that proposed "two second to hold" requirement would seriously jeopardize the ability of many of its current vehicles to comply with Standard No. 121, although there are no available test data. That company asserted that it would need a minimum of two years lead time to investigate all production vehicles for compliance and to develop new designs where required. Navistar also argued that to impose a timing requirement on parking brake application because the parking brake is often also used as an emergency brake system is inappropriate in a proposal to prohibit false park systems. That company stated that its emergency brake systems never employ only the parking brakes to satisfy Standard No. 121's emergency brake system performance requirements, and argued that it is not appropriate for the agency to propose changes to the emergency brake systems without a compelling need to do so and without data which indicate a problem or need for change.

Freightliner argued that timing requirements would impose a general restriction on all parking brake systems; that the metal spring system was designed for overall performance, not speed of application; and that developing additional procedures to determine compliance would use resources to document timing, not improve the braking performance of a reliable mechanical design. Ford expressed corcern about imposing additional recertification burdens on truck manufacturers. MVMA stated that it assumes that the agency did not intend to impose a new requirement for spring brake parking systems.

False Parking

After reviewing the comments, NHTSA remains concerned about false parking. As the agency stated in the NPRM, if a vehicle can be set so that it just holds the vehicle on the grade with the force applied when the driver operates the parking brake control, the vehicle could roll away if that parking force later drops. Thus, a driver could be misled into parking on a grade which is only initially within the holding capability of the parking brake. The driver might park the vehicle and walk away thinking it was secure, only to have it later roll away. NHTSA notes that since the National Traffic and Motor Vehicle Safety Act is directed toward unreasonable risks, it is unnecessary for the agency to wait for actual accidents in order to issue safety standards.

While NHTSA continues to be concerned about false parking, it is also concerned that its safety standards not constrain the development and use of new designs which have the potential to offer a level of safety equivalent to that offered by existing designs. After reviewing the comments, the agency is persuaded that a requirement prohibiting any decrease in parking retardation force after five seconds from the time the parking brakes are actuated would inappropriately constrain the development and use of air-applied mechanically held parking brake systems.

The agency notes first that while the proposed requirement would effectively prohibit brake systems which result in false parking, it would also have the effect of prohibiting systems unlikely to result in false parking under reasonably foreseeable conditions. For example, brake systems with delayed mechanical parking occurring more than five seconds after actuation would be prohibited even if the final parking retardation force was sufficient to hold on any existing grade.

Second, NHTSA is persuaded by the comments that it may not be possible to design air-applied mechanically held parking brake systems acceptable for general use which can meet a requirement necessitating almost immediate evacuation of air from the brake chambers. In issuing the NPRM, the agency believed that the proposed five second time period would permit continued use of air-applied mechanically held parking systems, which could require several seconds for the air pressure to be applied to the brake chamber, a mechanical latch or lock to be activated, and the air pressure to be evacuated to result in the mechanically held condition.

As indicated above, Bendix has designed a version of the DD3 which meets the proposed requirement. While this indicates that it is technically feasible to produce an air-applied mechanically held parking brake system that can meet the proposed requirement, it does not indicate that such systems are necessarily acceptable for the full range of air-braked vehicles. The agency notes that the DD3 is a specialized brake which is used primarily on buses. The agency also notes that the comment by John Schandelmeier indicates that some operators and drivers find the complicated "cluster valve" arrangement of that design to be unacceptable and are re-piping it to attain the performance of the earlier version.

International Transquip commented that there are no guarantees that its brake could be plumbed to meet the proposed requirement and that many of the problems experienced by Flxible with a prototype Mini-Max system were related to Flxible requiring the immediate exhausting of the application air pressure upon each parking brake application. International Transquip stated that Flxible's experience underscores the fact that problems remain to be solved. NHTSA accepts International Transquip's assertion, particularly given the problems that company experienced in attempting to develop a system in which application air pressure would be immediately exhausted. International Transquip also expressed concern that some of the potential advantages of an air-applied mechanically held parking brake would be lost as a result of immediate evacuation of air from the brake chambers.

Third, the agency believes that the basic concept of air-applied mechanically held parking brakes offers theoretical benefits. The CHP petition, for example, discussed a number of potential advantages that air applied parking brakes have compared to conventional spring brakes. In addition to savings in space, weight, initial cost, maintenance cost, and disassembly precautions, CHP cited the following advantages: (1) The fact that, the service brake hoses and diaphragms receive full reservoir pressure each time the parking brake is pulled, thereby providing a frequent check for service brake system integrity; (2) the brakes are solidly locked for special vehicle operations where a stable platform is needed, and the vehicle can be held stationary on much steeper grades than with spring

brakes as long as full air pressure is retained; (3) the increase in pushrod travel from maladjusted brakes does not decrease the parking brake torque as badly as with spring brakes, and (4) loss in application force at the air parking brake of one wheel can be detected audibly by an air leak or visually by nonoperation of the pushrod.

NHTSA cautions that in citing potential advantages of air applied parking brakes, the agency is not taking the position that the concept of air applied parking brakes is superior to spring brakes. Moreover, the agency is not taking any position about the overall safety of the Mini-Max or DD3 parking brakes as compared to each other or to spring brakes. However, given that the concept of air applied parking brakes offers potential advantages, the agency believes that care should be taken to ensure that Standard No. 121 does not unnecessarily constrain the development and use of designs incorporating this concept.

NHTSA also cautions that while it has necessarily considered whether various parking brake systems appear to meet the specific requirements being adopted by this notice, it has not conducted compliance or other tests for those parking brakes or attempted to evaluate whether, or under what circumstances, vehicles equipped with those parking brakes would meet the overall requirements of Standard No. 121. The agency notes that Standard No. 121 applies to vehicles. Under the National Traffic and Motor Vehicle Safety Act, it is the responsibility of the vehicle manufacturer to ensure that its vehicles comply with Standard No. 121. The discussion in this notice of whether various parking brake systems appear to meet particular requirements is based on the agency's understanding of those systems as presented in this notice and is limited to the specific issues and requirements being addressed. This notice should in no way be read as either an approval of any particular parking brake systems or a determination that vehicles equipped with particular parking brake systems will comply with Standard No. 121.

The agency also notes that the comparisons made by some commenters of the emergency stopping distances of vehicles equipped with Mini-Max brakes and conventional spring brakes may be not be appropriate. The tests in question indicated that under certain circumstances if a vehicle is stopped solely by using the parking brake, a Mini-Max parking brake would stop the vehicle in a shorter distance than a spring brake, due to a higher application force. This comparison may not be appropriate, however, because trucks, buses and tractor-trailer combinations are not typically stopped by solely using a parking brake. Standard No. 121 requires trucks and buses to have an emergency brake system. The emergency brake systems provided on trucks, buses and tractor-trailer combinations built in compliance with Standard No. 121 are similar to the split brake systems used on passenger cars in that when a brake failure occurs, part of the service brake system remains operable (as the emergency brake system) to permit driving in a controlled manner to a safe parking place. Emergency brake systems are required to be capable of modulation by drivers to provide for good vehicle control during braking; they are also required to be controlled by the regular service brake control valves so that drivers are not confused in crisis situations about how to operate the emergency brake system. Since parking brakes are controlled by a separate valve, they can serve as backup brake systems when something unusual causes both the service and emergency brake systems to fail, e.g., complete loss of air pressure or failure of the service brake control valve. The agency has stated in the past, however, that it is generally not desirable to have brakes used in a backup system develop overly high brake forces, given the potential for wheel lockup and loss of vehicle control.

NHTSA also notes that, unlike spring brakes, air applied parking brakes may not provide a backup braking capability in the event of a complete loss of service/emergency braking air pressure *unless* they are applied by an energy source which is completely separate from the service/emergency brake systems. When a failure occurs in the service brake systems of current vehicles equipped with spring brakes, the emergency brake system takes over and a driver can continue to modulate the brakes down to low pressures knowing that the spring brakes can be applied in the event a faster stop is required. However, air applied parking brakes will only apply with the pressure remaining in the emergency reservoir unless they are applied by an energy source which is completely separate from the service/emergency brakes.

In developing a final rule, NHTSA believes that weight should be given to both the potential problem of false parking and ensuring that Standard No. 121 does not unnecessarily constrain the development and use of air-applied mechanically held parking brake systems. After carefully considering the comments, the agency believes that the amendment suggested by CHP gives appropriate weight to both concerns. As indicated above, CHP recommended that the proposed requirement be modified into a two-step test procedure, requiring actuation of the mechanical locking device within five seconds after initial brake application, and separately requiring that the slope holding test be met with only the mechanical locking device in operation, after the brakes have bled down to a zero pressure reading.

NHTSA is adopting amendments along the lines suggested by CHP in its comments. For trucks and buses, the amendments require actuation of a mechanical means for holding the parking brakes, within three seconds after operation of the parking brake control. For trailers, such actuation is required within three seconds after venting to the atmosphere of the front supply line connection is initiated. The amendments also require that the grade holding test (or alternative drawbar test) be met with only the mechanical means of holding the parking brakes in operation. In light of comments from Bendix and Midland Brake, the agency is specifying more detailed test conditions in order to ensure objectivity.

CHP's comment indicated that, in response to its original concerns, International Transquip had redesigned the Mini-Max brake chamber to have the locking piston dropped on brake application, thereby holding the brake at a much higher force. A requirement for actuation of the mechanical locking device within a three second period has the effect of requiring the locking piston to drop on brake application, thus alleviating much of the safety concern which led CHP to submit its petition. In addition to holding the brake at a much higher force (a result which is dependent on that company not reducing the brake application pressure below a certain level), the dropping of the locking piston on each parking brake application ensures that the locking piston will not stick as a result of non-use. Since International Transquip has already made this design change, the amendment will have no adverse impacts on that company.

As indicated above, the five second time period proposed in the NPRM was intended to be sufficiently long to permit air pressure to be applied to the brake chamber, a mechanical latch or lock to be activated, and the air pressure to be evacuated to result in the mechanically held condition. Since the amendment being adopted does not require the air pressure to be evacuated, it is unnecessary to provide a time period as long as five seconds. NHTSA has concluded that the requirement that parking brakes be actuated within three seconds can easily be met by both air-applied mechanically held parking brake systems and by spring brakes. For the Mini-Max parking brake, actuation occurs when the air pressure on the lock port is sufficiently vented to allow the pawl to drop and physically contact the toothed sector of the pushrod shaft. For the DD3 parking brake, actuation occurs when the air pressure on the lock port is sufficiently vented to allow locking rollers to physically contact the pushrod shaft. For spring brakes, actuation occurs when the air pressure in the spring brake chamber is sufficiently vented to allow the spring to physically contact the push rod pushplate. NHTSA believes that the redesigned Mini-Max parking brake, both versions of the DD3 parking brake, and current spring brake systems already meet the three second actuation requirement.

NHTSA notes that while the locking piston of the new Mini-Max design drops immediately on brake application, there may still be a reduction in parking retardation force over time, as there may be with other air-applied mechanically held parking brake designs. As noted earlier, in the Mini-Max parking brake, the locking piston is a pawl which drops to engage teeth cut in the brake pushrod. Under the old design, the locking piston was held off by the same air pressure used to make and temporarily hold the parking brake application until the air pressure dropped to a predetermined level, in some cases as low as 45 psi. Under the new design, the locking piston drops almost immediately. In both of these designs, the parking application is not actually held by mechanical means until the pushrod moves enough to engage one of the teeth on the pushrod. Since the locking piston of the new design drops on brake application, however, the pushrod can move no further than $\frac{7}{32}$ of an inch, the distance between the teeth on the pushrod.

The amount of parking brake force reduction associated with $\frac{7}{32}$ inch movement of the pushrod would vary depending on the application pressure and overall design of the brake system. Available data indicate that the additional air pressure necessary to move the pushrod on various types of truck, tractor and trailer brake systems 0.2 inches ($\frac{7}{32}=0.21875$) from a starting pressure of 40 psi could range from 19 to 28 psi. By way of example, if an application pressure of 70 psi were assumed, a 28 psi reduction would mean a reduction in pushrod force of about 40 percent. Data provided by Bendix indicate that the DD3 brake system without the "demonstrated park" feature can have a reduction of the force acting on the brake chamber pushrod of about 25 percent. However, due to the significant hysteresis in the foundation brakes of air braked vehicles, a reduction in pushrod force would result in a lesser percentage reduction in actual braking force output. (In this context, the term "hysteresis" means that the change in brake force output at the wheel due to a change in pushrod force will be different for a given change in pushrod force, depending on whether the pushrod force is increasing or decreasing.)

As indicated above, International Transquip suggested an amendment requiring that, within five seconds after operation of the parking brake control, the parking brakes "shall be held in the applied position by mechanical means or a mechanical means of holding the application in the event of loss of fluid or air pressure must be in position and must be capable of achieving the minimum performance specified in either S5.6.1 or S5.6.2." The agency considered an amendment along these lines but believes that the meaning of "in position" is unclear. In the Mini-Max design, for example, if the pawl should immediately drop onto the top of a tooth, it might not be considered "in position" to hold the vehicle until the pushrod moves enough to let the pawl drop between the teeth.

There has not been any dispute about the existing Standard No. 121 requirement that the 20 percent grade holding test (or alternative drawbar test) be met with only the mechanical locking device in operation, i.e., after any reduction in parking brake retardation force occurs. (The alternative drawbar test is of similar stringency to the 20 percent grade holding test.) NHTSA believes that new and reasonably maintained vehicles meeting this requirement and the requirement discussed above concerning actuation of the mechanical means for holding the vehicle would not experience false park problems when parked under reasonably foreseeable conditions. Twenty percent grades are rare, and it would be uncommon for air-braked vehicles to be parked on grades even approaching that steepness. The agency also notes that, after a review of available data, it is unaware of any air-applied mechanically held parking brakes which have experienced false park problems. Transport Canada has also indicated that it is unaware of any such problems.

The agency recognizes, however, that unlike the specific amendment set forth in the regulatory text of the NPRM, the amendment being adopted does not address all theoretical false park situations. For example, the initial CHP petition noted that if brakes are at or beyond the recommended limit of pushrod travel, or the owner replaces the lining with a type having a lower coefficient of friction than the original equipment, the mechanical parking lock will not hold the vehicle on a grade even considerably less than the specified 20 percent, and also cited the possibility that a driver might park a vehicle on a steep city hill with a 22 percent grade. NHTSA does not believe that there is any way to address these theoretical situations by a new vehicle regulation short of a requirement that would unnecessarily constrain the development and use of air-applied mechanically held parking brake systems. However, NHTSA notes that manufacturers have an obligation under the National Traffic and Motor Vehicle Safety Act to produce vehicles without safety related defects. NHTSA expects that manufacturers will design vehicles in such a manner to ensure that air-braked vehicles will not experience false park problems when parked under reasonably foreseeable conditions.

NHTSA notes that General Motors commented that the condition that parking brakes be held in the applied position "solely by mechanical means" is design restrictive and excludes adoption of advanced technology parking brake systems which employ other mechanizations. That company recommended deletion of the words "solely by mechanical means" but did not elaborate on the possible technologies it had in mind. While the amendment being adopted does not include the specific term "solely by mechanical means," it does, as indicated above, require that the grade holding test (or alternative drawbar test) be met with only the mechanical means of holding the parking brakes in operation. The purpose of this requirement is to ensure that the parking brake can maintain the specified minimum parking brake retardation force level even if there are slow leaks in the air or fluid systems of the vehicle or electrical failure.

Parking Retardation Force Timing

After reviewing the comments, NHTSA continues to believe that parking retardation force should be generated quickly, since the parking brake system is sometimes also used as an emergency system. Moreover, as part of ensuring objectivity, the agency believes that a standard specifying minimum retardation force requirements for parking brakes should specify the time when those requirements must be met.

NHTSA is adopting amendments along the lines of the proposal, although a time period of three seconds instead of two seconds is specified. Data provided by Bendix indicated that the compliance of some current parking brake systems might be marginal for the proposed two second requirement. Therefore, in light of the fact that NHTSA did not contemplate changes in current parking brake systems, the agency is adopting a three second requirement. NHTSA believes that all current parking brake systems easily meet this requirement. Since certification can be accomplished by engineering analysis and simple tests, certification costs will be minimal.

For trucks and buses, the amendments require minimum parking retardation force requirements to be met at all times after three seconds from the time of actuation of the parking brake control. For trailers, the amendments require minimum parking retardation force requirements to be met at all times after three seconds from the time venting to the atmosphere of the front supply line connection is initiated. As with the timing requirement for actuation of the mechanical means for holding the parking brakes, the agency is specifying more detailed test conditions in order to ensure objectivity.

NHTSA does not agree with the argument raised in the comments that the potential safety problem addressed by this requirement is limited to towed vehicles. While the agency stated in the NPRM that there is a definite need for fast parking brake apply times on some trailers, because there are tractors which modulate the parking brakes through the supply line to provide for trailer braking in the event of a control line failure, the parking brake systems of power units may also be used for backup emergency braking. Thus, the need for quick generation of parking retardation force is relevant to power units as well as towed vehicles.

NHTSA has carefully considered the comments arguing that the proposed requirements would cause testing and certification difficulties. The agency does not believe that manufacturers must, as a practical matter, determine their compliance with the timing requirement during their grade holding or draw bar testing. Instead, certification can easily be accomplished by using an engineering analysis of the vehicle's parking brake system or, if necessary, a test measuring the air pressure in the parking brake system to determine when the pressure reaches zero.

NHTSA has also considered the comments arguing that the agency has not demonstrated a need to change current brake systems and that the proposed requirement would result in additional certification burdens without any safety benefit. As indicated above, the requirement being adopted is not expected to require changes in current brake systems. Spring brakes as well as the DD3 and Mini-Max parking brakes already achieve quick generation of parking retardation force. However, as new concepts in parking brake systems develop, the agency believes it is appropriate to ensure that such systems do not have significant delays in parking brake application and holding.

Effective Date

The amendments adopted by this notice require mandatory compliance effective September 7, 1988, while permitting manufacturers, effective April 11, 1988, to comply with the new requirements as an option to complying with requirements being superseded. Permitting optional compliance with amendments that become effective at a later date promotes manufacturer flexibility without creating any adverse impacts.

It is believed that all parking brakes currently being sold comply with the amendments being adopted. Since any necessary certification can be accomplished by engineering analysis and simple tests, 180 days provides a sufficient time for that purpose.

Regulatory Impacts

NHTSA has evaluated the economic and other effects of this final rule and determined that they are neither "major" within the meaning of Executive Order 12291 nor "significant" within the meaning of the Department of Transportation regulatory policies and procedures. It is believed that all parking brakes currently being sold comply with the amendments being adopted. The agency has also concluded that the impacts are so minor as not to require a full regulatory evaluation.

In accordance with the Regulatory Flexibility Act, NHTSA has evaluated the effects of this action on small entities. Based upon this evaluation, I certify that the amendments will not have a significant economic impact on a substantial number of small entities. As indicated above, no parking brakes currently being sold are believed to be affected by these amendments. One small manufacturer, International Transquip, previously produced a parking brake which would not comply with the amendments. However, during the course of this rulemaking, that company redesigned its parking brake design in a manner believed to comply with the amendments being adopted. Therefore, that company and any of its distributors which may be classified as small businesses will not be significantly affected by the amendments. Other small businesses, small organizations, and small governmental units will be affected by the amendments only to the extent that they purchase motor vehicles. The amendments will not have any significant effect on the price of those vehicles. Accordingly, no regulatory flexibility analysis has been prepared.

The agency has also analyzed this rule for the purposes of the National Environmental Policy Act, and determined that the rule will not have any significant impact on the quality of the human environment.

Finally, this rule has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The primary impact of the rule is to clarify the meaning of existing Federal requirements.

Imports, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

PART 571—[AMENDED]

In consideration of the foregoing, 49 CFR Part 571 is amended as follows:

1. The authority citation for Part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.121 [Amended]

2. S5.6.3 of § 571.121 is revised to read as follows:

S5.6.3 *Application and holding.* Each parking brake system shall meet the requirements of S5.6.3.1 through S5.6.3.4, except that, at the option of the manufacturer, vehicles manufactured before September 7, 1988 may meet the requirements specified in S5.6.3.5.

S5.6.3.1 The parking brake system shall be capable of achieving the minimum performance specified either in S5.6.1 or S5.6.2 with any single leakage-type failure, in any other brake system, of a part designed to contain compressed air or brake fluid (except failure of a component of a brake chamber housing).

S5.6.3.2 For trucks and buses, with an initial reservoir system pressure of 100 psi and, if designed to tow a vehicle equipped with air brakes, with a 50 cubic inch test reservoir connected to the supply line coupling, at all times after three seconds from the time of actuation of the parking brake control, the parking brake system shall achieve the minimum parking retardation performance specified in S5.6.3.1. For trailers, with an initial supply line pressure of 100 psi and, if designed to tow a vehicle equipped with air brakes, with a 50 cubic inch test reservoir connected to the supply line coupling, at all times after three seconds from the time venting to the atmosphere of the front supply line connection is initiated, the parking brake system shall achieve the minimum retardation performance specified in S5.6.3.1.

S5.6.3.3 A mechanical means shall be provided which is capable, with zero air pressure and zero fluid pressure in the vehicle and without electrical power, of holding the parking brake application at a level meeting the minimum parking retardation performance specified in S5.6.3.1.

S5.6.3.4 For trucks and buses, with an initial reservoir system pressure of 100 psi and, if designed to tow a vehicle equipped with air brakes, with a 50 cubic inch test reservoir connected to the supply line coupling, no later than three seconds from the time of operation of the parking brake control, the mechanical means referred to in S5.6.3.3 shall be actuated. For trailers, with an initial supply line pressure of 100 psi and, if designed to tow a vehicle equipped with air brakes, with a 50 cubic inch test reservoir connected to the supply line coupling, no later than three seconds from the time venting to the atmosphere of the front supply line connection is initiated, the mechanical means referred to in S5.6.3.3 shall be actuated.

S5.6.3.5 *(Optional requirement for vehicles manufactured before September 7, 1988.* The parking brake system shall be capable of achieving the minimum performance specified either in S5.6.1 or S5.6.2 with any single leakage-type failure, in any other brake system, of a part designed to contain compressed air or brake fluid (except failure of a component of a brake chamber housing). Once applied, the parking brakes shall be held in the applied position solely by mechanical means.

Issued on: March 8, 1988.

Diane K. Steed,

Administrator.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 672

[Docket No. 80333-8033]

Groundfish of the Gulf of Alaska; Emergency Interim Rule

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule.

SUMMARY: The Secretary of Commerce (Secretary) has determined that an emergency exists in the Gulf of Alaska groundfish fishery, due to unanticipated problems enforcing the prohibition on directed fishing for sablefish with hook-and-line gear prior to the scheduled April 1, 1988 fishing season. The Secretary issues this emergency rule to redefine directed fishing for sablefish. This action will restrict the amount of sablefish that a fisherman may retain and land as incidental catch while fishing for other groundfish species with hook-and-line gear in the Gulf of Alaska. This regulation is necessary to discourage illegal fishing and prevent substantial early harvests of sablefish before the beginning of the directed hook-and-line fishery on April 1, 1988. It is intended to facilitate an orderly fishery while carrying out the North Pacific Fishery Management Council's recommended allocation objectives in the sablefish fishery.

DATE: Effective March 9, 1988 until June 7, 1988. Comments are invited until March 25, 1988.

ADDRESS: Copies of the environmental assessment may be obtained from Robert W. McVey, Director, National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg (Fishery Biologist NMFS), 907-586-7230.

SUPPLEMENTARY INFORMATION:

Background

The domestic and foreign groundfish fisheries in the exclusive economic zone (EEZ or 3-200 miles offshore) of the Gulf of Alaska are managed under the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP). The FMP was prepared by the North Pacific Fishery Management Council (Council) under the Magnuson Fishery Conservation and Management Act (Magnuson Act) and is implemented by regulations for the foreign fishery at 50 CFR Part 611 and for the U.S. fishery at 50 CFR Part 672.

One of the groundfish species that is important to U.S. fishermen is sablefish. The annual harvest quota, or total allowable catch (TAC), for this species is further allocated among trawl, pot, and hook-and-line gear, which are the only legal gear types in the Gulf of Alaska groundfish fishery. Most of the sablefish TAC is allocated to hook-and-line fishermen. Prices that they will likely receive in 1988 will be at least $1.00 per pound. The only other groundfish species that hook-and-line fishermen will catch in large numbers is Pacific cod, but this species is currently worth only about $0.20 per pound. An economic incentive clearly exists to favor catching sablefish.

The 1988 directed hook-and-line fishery for sablefish will start on April 1. Until that time, hook-and-line fishermen may conduct a directed fishery for other groundfish species, including Pacific cod. Existing regulations define directed fishing to mean fishing that is intended or can be reasonably expected to result in the catching, taking, or harvesting of quantities of such groundfish that amount to twenty percent or more of the catch, take, or harvest, or to twenty percent or more of the total amount of fish or fish products on board at any time. The Council and the Secretary usually refer to catches in a non-directed fishery as bycatch.

The Regional Director, National Marine Fisheries Service, Alaska Region (Regional Director), the Alaska Department of Fish and Game, and the North Pacific Fishery Management Council have received many inquiries from fishermen and processors about whether hook-and-line sablefish bycatch is retainable for a sale prior to the April 1 season starting date. The inquiries started for the first time in January 1988 as a result of the developing hook-and-line fishery for Pacific cod in the Kodiak area. Since hook-and-line fishermen were expending significant effort for Pacific cod, they questioned the legality of retaining and landing sablefish prior to the April 1 starting date. Thus, retention of sablefish up to 20 percent of the total amount of groundfish became known.

Regulations at 50 CFR 672.23(b) state, "Directed fishing for sablefish with hook-and-line gear and pot gear in the regulatory areas and districts of the Gulf of Alaska is authorized from April 1 through December 31 . . .". Based on the definition of "directed fishing", the Agency concluded that retention of the sablefish bycatch prior to the April season starting date is clearly permissible as long as the directed fishing rule is not violated. This means that hook-and-line fishermen are allowed to catch and retain an amount of sablefish that is less than twenty percent of the total amount of the groundfish catch over any period of time or total amount of groundfish on board.

Due to the increased fishing effort being applied in the Pacific cod fishery this year, this retainable bycatch "allowance" has caused problems for the first time. As more fishermen have directed fishing effort at Pacific cod, it has become apparent that a sablefish bycatch rate of 19 percent is much more than what is needed to support a directed Pacific cod fishery. A lower bycatch is to be expected, because sablefish are targeted with hook-and-line gear at water depths of 200 fathoms and deeper, whereas Pacific cod are targeted at depths of 150 fathoms and less.

A more realistic bycatch rate has been determined by NMFS following a review of recent fishing data. In 1986, for example, the bycatch rate experienced by Japanese hook-and-line vessels while harvesting nearly all of a 15,000 metric-ton (mt) allocation of Pacific cod was about 1 percent; this fishery occurred in the same area and during the same time of year as the current domestic fishery. The foreign Pacific cod fishery was constrained by a prohibited species catch limit for sablefish, which encouraged avoidance of sablefish to prevent premature closure of the Pacific cod fishery. Another example of bycatch rates is from a limited number of actual 1988 hook-and-line landings of Pacific cod, which showed some sablefish catches can be as low as 3 percent of the Pacific cod landings.

Because a bycatch rate that could be as much as 19 percent is more than necessary to allow a directed fishery for Pacific cod, hook-and-line fishermen are able to use the bycatch allowance to circumvent the prohibition on directed fishing for sablefish by targeting on sablefish and then catching enough Pacific cod to result in a total harvest that would appear to not violate the directed fishing rule. It's clear under the current regulation that targeting a bycatch is illegal, but the actual catching would have to be observed for enforcement action to occur. That is, enforcement agents would have to be present to observe the ratio of the sablefish catch for a given haul or the ratio of sablefish on board to determine whether a violation had occurred.

Under current regulations, bycatch amounts of sablefish in a directed Pacific cod fishery can easily exceed 1 mt in a single day. Fish tickets that were obtained from fishermen who have already made landings in 1988 have been examined. Some tickets showed a metric ton or more of sablefish having been landed with a sufficient amount of other groundfish so that the total amount of sablefish was less than 20 percent, which would make the sablefish landing appear to be legal. NMFS asserts that to catch that much sablefish, a fisherman would have to fish directly on sablefish. In one instance, a fisherman admitted to having caught 1 mt of sablefish in a single day.

Despite the current prohibition on directed fishing for sablefish, a fisherman can manipulate his catch composition by topping off his catch with other groundfish species, especially Pacific cod, and so land his sablefish as apparent bycatch. Since at-sea enforcement is not available to detect such directed fishing for sablefish, NMFS estimates that about 20 percent of the sablefish quota assigned to hook-and-line gear could be taken before April 1.

The potential thus exists for some of the hook-and-line fishermen to harvest and land large amounts of the sablefish quota prior to April 1. NMFS has heard from fishermen's representatives that many of the hook-and-line vessels in the Seattle fleet who had not planned to fish until the directed sablefish fishery opens, perceive the situation as one that provides an unfair advantage to those fishermen who are illegally targeting on sablefish. It is likely these vessels will depart for Alaska waters earlier than planned in order to compete in this early fishery. This, in turn, will increase the number of sablefish landed early as bycatch, aggravating the situation.

These vessels, and vessels in Kodiak, which are fishing the nearby Pacific cod grounds, could make many trips per vessel prior to April 1. For example, between March 1 and April 1, each vessel could make five trips before the sablefish season actually started. To illustrate the effect of this much effort, NMFS examined its 1987 permit database to estimate the numbers of hook-and-line vessels in the Kodiak and Seattle fleets as an example of vessel numbers that potentially could fish early. If about 190 Kodiak and 209 Seattle hook-and-line vessels were to make landings, and each delivered 1 mt of sablefish per trip, 1,995 mt could be landed. This amount represents about 20 percent of the 10,030 mt sablefish quota assigned to hook-and-line gear in the Central Regulatory Area where much of the Pacific cod fishing will be conducted.

Since a specified share of the total allowable catch for sablefish is allocated to hook-and-line gear, NMFS will manage the total harvest by hook-and-line gear so that the share is not exceeded. Therefore, NMFS will subtract any amounts of sablefish taken as bycatch before the April 1 starting date from the directed fishing quota. Consequently, full amounts of the quotas will not be available as expected when the season starts. NMFS's inability to enforce the prohibition on directed fishing for sablefish prior to April 1 is having the unanticipated effect of encouraging illegal fishing. Violators of the prohibition will gain an economic advantage over those fishermen who elect to honor the regulations, because they will be able to harvest sablefish stocks that have not been exploited for almost a year, and thus experience high catch rates. Fishing plans are being disrupted in that many fishermen who otherwise expected an April starting date are now changing their schedules to fish early. Some of those might have aborted their plans for vessel maintenance or might forego fishing opportunities elsewhere. Business opportunities being financed by banks on the basis of full quotas being available in April could be jeopardized. Planning by processors in terms of purchasing ice and bait for an April 1 opening could be upset.

The Council reviewed this issue at its January 20-22, 1988, meeting. It reflected on whether it had intended that sablefish should be retained as bycatch by hook-and-line gear prior to a directed fishing season when it adopted the April 1 starting date and made assignments of sablefish to gear types in Amendment 14 to the FMP. Although the Council determined that it had not specifically addressed whether sablefish should be retained as bycatch in other hook-and-line fisheries, it did affirm, after receiving recommendations from NMFS, that a bycatch between 1 and 5 percent was more realistic, and that it did not intend that the bycatch should be as high as is now permissible. It recognized that an adequate enforcement presence is not available to prevent illegal targetting on sablefish during the time this species is intended to be caught incidentally in other target fisheries. To take no action would condone illegal fishing by some fishermen, while other fishermen would be honoring the regulations. Also, to take no action would undermine NMFS's intended 1988 management of the hook-and-line sablefish fishery. Under 50 CFR 672.24(3)(i), NMFS intends to limit the directed hook-and-line sablefish harvest to an amount that would leave an appropriate amount as bycatch to support other hook-and-line fisheries when the directed sablefish season in each of the management areas close. If fishermen are allowed to continue to harvest up to 20 percent of sablefish as a bycatch when the directed fishing is closed, they might reach the bycatch amount that was set aside much sooner. Then, under 50 CFR 672.24(3)(ii), any additional amounts of sablefish would have to be treated as a prohibited species and discarded at sea for the remainder of the year. Such treatment is a waste of a valuable resource, which otherwise could be landed in a future year's fishery to the benefit of the industry.

This waste is unacceptable to the Council, which then voted to recommend that the Secretary implement an emergency rule to redefine the directed fishing definition with respect to sablefish caught in hook-and-line fisheries. The Council recommended that a catch of sablefish or an amount of sablefish on board that is higher than a number, to be determined by NMFS, lying within the range of 1 to 5 percent or more of the catch of groundfish or amount of groundfish on board constitutes directed fishing. The Council also recommended that a regulatory amendment be prepared for its review to remedy this problem in future seasons.

The Secretary has reviewed this issue and concurs with the Council's recommendations. The Secretary finds that failure to correct an identified loophole in a fishing regulation, which could be exploited illegally is contrary to purposes of the Magnuson Act and the public interest. He is, therefore, implementing an emergency rule under Section 305(e) of the Magnuson Act that redefines directed fishing for sablefish with hook-and-line gear in such a way that a catch of sablefish, or an amount of sablefish on board, that is 4 percent or more of the catch of groundfish constitutes directed fishing for sablefish. Percentages less than 4 percent will constitute bycatch.

In arriving at this percentage, the Secretary considered the 1986 landings by the Japanese hook-and-line fishery, which experienced a bycatch rate of 1 percent, and limited 1988 landings by U.S. hook-and-line fishermen to date that demonstrated bycatch rates of 3 to 7 percent when sablefish were not being illegally targeted. While the Secretary believes that a 1 percent bycatch rate would be too restrictive, given the increased numbers of sablefish and the fact that the 1986 Japanese fishery was actively avoiding sablefish to avoid premature closures if prohibited species catch limits were reached, he believes that a bycatch percentage that was too high would negate the purposes of this emergency rule. He has determined, therefore, that a bycatch rate that is less than 4 percent is a reasonable amount of sablefish that would inadvertently be caught as bycatch in a hook-and-line fishery.

Classification

The Assistant Secretary, NOAA, has determined that this rule is necessary to respond to an emergency situation and that it is consistent with the Magnuson Act and other applicable law. This rule is implemented for 90 days under section 305(e) of the Magnuson Act.

The Assistant Secretary, NOAA, also finds for good cause that the reasons justifying promulgation of this rule on an emergency basis also make it impractical and contrary to the public interest to provide prior notice and opportunity for comment or to delay for 30 days its effective date, under provisions of section 553 (b) and (d) of the Administrative Procedure Act. This rule must be implemented as soon as possible if it is to accomplish its intended effect.

The Assistant Administrator for Fisheries, NOAA, prepared an environmental assessment for this action and concluded that no significant impact on the human environment would result from this rule. A copy of this document may be obtained from the address above.

This emergency interim rule is exempt from the normal review procedures of Executive Order 12291 as provided in section 8(a)(1) of that order. It is being reported to the Director of the Office of Management and Budget, with an explanation of why it is not possible to follow the regular procedures of that order.

The Regulatory Flexibility Act does not apply to this rulemaking, because the Agency is not required to publish a general notice of proposed rulemaking under the Administrative Procedure Act or any other law.

This rule does not contain a collection of information requirement subject to the Paperwork Reduction Act.

The Assistant Administrator of Fisheries, NOAA has determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of the State of Alaska. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act.

This emergency interim rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

List of Subject in 50 CFR Part 672

Fisheries.

Dated: March 8, 1988.

James E. Douglas, Jr.,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR Part 672 is amended as follows:

PART 672—GROUNDFISH OF THE GULF OF ALASKA

1. The authority citation for Part 672 continues to read as follows:

Authority: 16 U.S.C 1801 *et seq.*

2. In § 672.2, the definition of *Directed Fishing for the period March 9, 1988* to *June 7, 1988* is added to read, until June 7, 1988 as follows:

§ 672.2 Definitions.

* * * * *

Directed Fishing for the period March 9, 1988 to June 7, 1988, means (1) with respect to any species, stock, or other aggregation of fish, other than sablefish caught with hook-and-line gear, fishing that is intended or can reasonably be expected to result in the catching, taking, or harvesting of quantities of such fish that amount to 20 percent or more of the catch, take, or harvest, or 20 percent or more of the total amount of fish, or fish products on board at any time. It will be a rebuttable presumption that, when any species, stock, or other aggregation of fish comprises 20 percent, or more of the catch, take, or harvest, or 20 percent or more of the total amount of fish or fish products on board at any time, such fishing was directed to fishing for such fish; or

(2) With respect to sablefish caught with hook-and-line gear, fishing that is intended or can reasonably be expected to result in the catching, taking, or harvesting of quantities of sablefish that amount to 4 percent or more of the catch, take, or harvest, or 4 percent or more of the total amount of sablefish or sablefish products on board at any time. It will be a rebuttable presumption that, when sablefish comprises 4 percent, or more of the catch, take, or harvest, or 4 percent or more of the total amount of fish or fish products on board at any time, such fishing was directed to fishing for sablefish.

BILLING CODE 3510–22–M

---

50 CFR Part 675

[Docket No. 71147-8002]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Director, Alaska Region, NMFS (Regional Director), has determined that vessels of the United States have caught the prohibited species catch (PSC) limit of 80,000 *C. bairdi* Tanner crabs while conducting directed fishing for yellowfin sole and "other flatfish" in the Bering Sea subarea south of 58°00′ N. latitude and east of 165°00′ W. longitude (Zone 1). Therefore, further directed fishing on yellowfin sole and "other flatfish" by vessels of the United States is prohibited in Zone 1 for the remainder of the year, as required by regulations governing the groundfish fishery of the Bering Sea and Aleutian Islands area.

DATES: This notice is effective at 3:00 p.m., March 8, 1988, Alaska Standard Time (a.s.t.), until midnight, a.s.t., December 31, 1988.

FOR FURTHER INFORMATION CONTACT: Janet E. Smoker (Resource Management Specialist, NMFS), 907–586–7230.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) governs the groundfish fishery in the exclusive economic zone under the Magnuson Fishery Conservation and Management Act. The FMP was developed by the North Pacific Fishery Management Council (Council). On March 19, 1987, the Secretary of Commerce (Secretary) published a final rule implementing Amendment 10 to the FMP (52 FR 8592). The rule at 50 CFR 675.21(a)(1) states that if, during the year, the Regional Director determines that vessels of the United States will catch the PSC limit of 80,000 *C. bairdi* Tanner crabs while conducting directed fishing for yellowfin sole and "other flatfish" in Zone 1, the Secretary will publish a notice in the **Federal Register** prohibiting a directed fishery by vessels of the United States for yellowfin sole and "other flatfish" in Zone 1 for the remainder of the year.

The 1988 Bering Sea joint venture processing (JVP) fishery for yellowfin sole and "other flatfish" began in mid-January. NMFS has monitored the daily JVP catches of prohibited species, including *C. bairdi* Tanner crabs, in each subarea of the Bering Sea. Under guidelines developed by an industry steering committee with the approval of the Council, and implemented by conditions on permits of the foreign processors receiving fish, JVP companies whose bycatch rates of *C. bairdi* exceeded permitted rates at certain checkpoints during the fishery were excluded from fishing in Zone 1. The first checkpoint (when 20 percent of the quota, or 16,000 *C. bairdi* crabs had been taken) was reached on January 25, and the second checkpoint (32,000 crabs) was reached on February 15. Despite exclusion of those companies with the highest crab bycatches, the third checkpoint (48,000 crabs) was reached on February 28, and the fourth (64,000 crabs) on March 3. Given recent daily catch rates of *C. bairdi* and current effort levels, the remaining crabs in the 80,000 crab quota will be taken on March 8.

The Regional Director finds, therefore, that the PSC limit of 80,000 *C. bairdi* Tanner crabs in Zone 1 has been taken and that further directed fishing on yellowfin sole and "other flatfish" by vessels of the United States in Zone 1 is prohibited for the remainder of the year.

In accordance with § 675.21(a)(1), the Secretary issues this closure prohibiting further directed fishing for yellowfin sole and "other flatfish" in Zone 1 by vessels of the United States from 3:00 p.m. Alaska Standard Time (2400 g.m.t.), March 8, 1988, until midnight, December 31, 1988. Fishing in Zone 1 for other target species for which quotas remain open, such as Pacific cod and turbot, may continue.

Classification

This action is required by 50 CFR 675.21(a)(1) and complies with Executive Order 12291.

The Assistant Administrator for Fisheries, NOAA finds for good cause that providing prior notice and comment is impractical and contrary to the public interest. Immediate effectiveness of the notice is necessary to prevent the risk of overfishing local crab stocks. However, interested persons are invited to submit comments in writing to the address above for 15 days after the effective date of this notice.

List of Subjects in 50 CFR Part 675

Fish, Fisheries, Reporting and recordkeeping requirements.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 8, 1988.

Richard H. Schaefer,

Director of Office of Fisheries, Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Proposed Rules

Federal Register
Vol. 53, No. 48
Friday, March 11, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1126

Milk in the Texas Marketing Area; Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed suspension of rules.

SUMMARY: This notice invites written comments on proposals that would suspend, for the months of March through July 1988, portions of the pool plant and producer milk definitions of the Texas order. Associated Milk Producers, Inc., a cooperative association that represents a substantial portion of the producers who supply milk to the market, has proposed that the 60 percent delivery standard for pooling a cooperative association plant and the limitation on the types of pool plants at which milk receipts are used to determine the amount of milk that a cooperative may divert to nonpool plants be suspended for March–July. The Southland Corporation, which operates distributing plants that are fully regulated under the order, has requested that the limits on the amount of milk that a pool plant operator may divert to nonpool plants be suspended for March–June. Proponents contend that this action is necessary to give handlers the necessary flexibility to dispose of the market's increasing milk supplies without engaging in uneconomic movements of milk solely for the purpose of retaining pool status for dairy farmers who regularly supply the market's fluid requirements.

DATE: Comments are due on or before March 18, 1988.

ADDRESSES: Comments (two copies) should be filed with USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-2089.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers supplying the fluid needs of the market would continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing. This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under the criteria contained therein.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), the suspension of the following provisions of the order regulating the handling of milk in the Texas marketing area is being considered for the months of March through July 1988:

1. In § 1126.7(e), the words, "and 60 percent or more of the producer milk of members of the cooperative association (excluding such milk that is received at or diverted from pool plants described in paragraph (b), (c), and (d) of this section) is physically received during the month in the form of a bulk fluid milk product at pool plants described in paragraph (a) of this section either directly from farms or by transfer from plants of the cooperative association for which pool plant status under this paragraph has been requested".

2. In § 1126.13(e)(2), the paragraph references, "(a), (b), (c), and (d)".

Notice also is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), the suspension of the following provisions of the order regulating the handling of milk in the Texas marketing area is being considered for the months of March through June 1988:

3. In § 1126.13(e)(3), the sentence, "The total quantity of milk so diverted during the month shall not exceed one-third of the producer milk physically received at such pool plant during the month that is eligible to be diverted by the plant operator;".

All persons who want to send written data, views or arguments about the proposed suspension should send two copies of them to USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, by the 7th day after publication of this notice in the **Federal Register**. The period for filing comments is limited to 7 days because a longer period would not provide the time needed to complete the required procedures and include March in the suspension period.

The comments that are received will be made available for public inspection in the Dairy Division during normal business hours (7 CFR 1.27(b)).

Statement of Consideration

The proposals would suspend, for the months of March through July 1988, portions of the pool plant and producer milk definitions of the Texas order. Specifically, a proposal for the months of March–July would suspend the 60 percent delivery standard for pool plants operated by cooperative associations and the restriction on the types of pool plants at which milk must be received to count in the base which establishes the maximum amount of milk that a cooperative may divert to nonpool plants. Also, a proposal for the months of March–June would suspend the limits on the amount of milk a pool plant operator may divert to nonpool plants.

The order provides for pooling a cooperative association plant that is located in the marketing area if at least 60 percent of the producer milk of members of the cooperative association is physically received at pool

distributing plants during the month. Also, cooperative associations may divert to nonpool plants up to one-third of the amount that the cooperative causes to be physically received at pool distributing and supply plants. The suspension would make inoperative for the months of March–July the 60 percent delivery standard for plants operated by a cooperative association and allow a cooperative's deliveries to all types of pool plants to be included as a basis from which the diversion allowance would be computed.

Also, the order provides that the operator of a pool plant may divert not more than one-third of the milk that is physically received during the month at the handler's pool plant. The proposal would suspend the one-third limit for the months of March–June 1988.

Suspension of the provisions involving cooperative associations was requested by Associated Milk Producers, Inc., a cooperative association that operates supply-balancing plants that are pooled under the order and represents a substantial number of producers who supply milk for the Texas market. Suspension of the provisions that relate to pool plants was proposed by The Southland Corporation, which operates distributing plants that are fully regulated under the Texas order. Proponents contend that the increasing volume of producer milk marketed by handlers under the Texas order cannot be qualified for pooling under current order provisions. If the suspension is not granted, proponents claim that uneconomic movements of milk would have to be made solely for the purpose of qualifying the increasing production of dairy farmers who supply the fluid milk needs of the market.

In view of the foregoing, it may be appropriate to suspend the aforementioned provisions of the Texas order.

List of Subjects in 7 CFR Part 1126

Milk marketing orders, Milk, Dairy products.

The authority citation for 7 CFR Part 1126 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

Signed at Washington, DC, on: March 4, 1988.

Patrick Boyle,

Administrator, Agricultural Marketing Service.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

National Highway Traffic Safety Administration

23 CFR Part 659

[FHWA Docket No. 88-5]

Certification of Speed Limit Enforcement; Revision of Procedures

AGENCY: Department of Transportation/ Federal Highway Administration/ National Highway Traffic Safety Administration.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: The NPRM proposes to simplify the existing procedural regulation which provides a lengthy and complicated set of procedures that are not required by statute and have proven to be unnecessary in their current format. In addition, the NPRM Proposes to update the current regulation governing the 55 MPH speed limit since it does not reflect statutory changes. Finally, provisions addressing the effect of future compliance on a State found not to be in compliance in a given fiscal year (FY) pertaining to withheld funds, are being reworded to clarify the intent.

DATES: Comments must be submitted on or before April 11, 1988.

ADDRESS: Submit written, signed comments to FHWA Docket No. 88-5, HCC-10, Room 4232, Federal Highway Administration, 400 Seventh Street SW., Washington, DC 20590. All comments and suggestions received will be available for examination at the above address between 8:30 a.m. and 3:30 p.m., e.t., Monday through Friday, except for legal holidays. Those desiring notification of receipt for comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: In OST: Samuel E. Whitehorn, Office of the Assistant General Counsel for Regulations and Enforcement at (202) 366-9307; in FHWA: Mr. Sheldon G. Strickland, HTO-30, (202) 366-1993, or Mr. David C. Oliver, Safety Law Division (202) 366-1356; and in NHTSA: Mr. Clayton Hall, NTS-40, (202) 366-4913, or Ms. Kathy DeMeter, General Law Division, (202) 366-1834, all at the Department of Transportation, 400 Seventh Street SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

Background

The Department of Transportation (Department or DOT) is responsible for ensuring that each State enforce a national maximum 55 miles per hour (MPH) speed limit on those roads posted at 55 MPH. The Surface Transportation and Relocation Assistance Act of 1987 (Pub. L. 100-17), enacted April 2, 1987, allows states to increase the maximum allowable speed limit to 65 MPH on certain portions of the Interstate System. The Act, however, did not change the requirement that states submit information and continue to enforce the 55 MPH limit on roads posted at that speed.

Generally, States are required to certify (and submit supporting data) to the Department that they are enforcing the speed limits on their public highways (23 U.S.C. 141 and 154). The certification must include the percentage of motor vehicles exceeding the 55 MPH speed limit. Section 154 also provides that the Department shall withhold up to 10 percent of a State's Federal-aid apportionment for the Primary, Secondary, and Urban highway programs, 23 U.S.C. 104(b) (1), (2), and (6), for the fiscal year following the submission of a certification showing that more than 50 percent of the motor vehicles traveling on that State's highways which are posted a 55 MPH exceed that limit. Further, section 154 gives the Secretary discretion to delay imposition of sanctions in hardship cases and directs that any funds withheld shall be apportioned if the State complies with the law. These statutory provisions do not require that the Department hold a hearing before taking steps to withhold funds.

Federal Highway Administration (FHWA) and National Highway Traffic Safety Administration (NHTSA) implementing regulations, 23 CFR Part 659, provide procedures concerning how each State must certify its compliance. (FHWA and NHTSA are operating administrations within DOT). Generally, each State develops a plan to monitor speeds which is subject to FHWA review and approval. By January 1 of each year, each State must certify its compliance for the preceding fiscal year and submit information to support that certification.

If the State-submitted data indicates that the State is not in compliance, the State is accorded a number of opportunities, which are described below, to convince the Department that its Federal-aid apportionment should not be reduced.

Current Procedures—Section 659.21—Procedure for the Reduction of Funds

The current procedural regulation, 23 CFR 659.21, provides:

1. *Administrators' Proposed Noncompliance Determination.* If, based on State-submitted data, a State cannot

certify its compliance, NHTSA and FHWA must notify the State of a proposed noncompliance determination.

2. *Administrators' Final Decision on Noncompliance.* The State may request an informal hearing to show cause why it should not be found in noncompliance or attempt to resolve the matter informally. If the matter is not resolved informally the State retains the right to request a formal hearing conducted according to the provisions of the Adminstrative Procedure Act (APA), 5 U.S.C. 551 *et seq.* The right to an APA hearing is provided only by regulation and is not required under the applicable statutory provisions governing the 55 MPH national maximum speed limit. If no request for a hearing is made the Administrators then forward the proposed determination to the Secretary for acceptance.

3. *ALJ's Recommended Compliance Decision.* If a State does request an APA hearing, the Secretary is required to convene one expeditiously to determine whether a State is in compliance with the 55 MPH law. The Department generally uses administrative law judges (ALJ) to conduct such proceedings. The ALJ then issues a recommended decision on compliance.

4. *Secretary's Final Noncompliance and Proposed Sanction Decision.* If the Secretary finds that a State is not in compliance, the regulation provides that "the Administrators shall jointly notify * * * the State * * * of the determination of nonconformity and of the proposed reduction in apportioned funds."

5. *Final Decision on Sanctions and Hardship Deferral.* The State then may request an informal meeting with the Administrators to discuss the sanction and a hardship deferral. After that, a final decision on sanctions and hardship deferral is issued.

In addition, as required under 23 U.S.C. 141, the regulation provides that if a State fails to certify, or if the Secretary determines that a State is not adequately enforcing the 55 MPH maximum speed limit on all public highways (other than those now posted at 65 MPH), no Federal-aid highway project shall be approved under 23 U.S.C. 106. 23 CFR 659.19(a).

Proposed Change to Section 659.21

Based on our past experiences with the above procedures, the Department proposes to adopt a less formal and more streamlined process which would afford each State an ample opportunity to present its position to the Department. The major difference between the proposed and the current rule involves the elimination of the formal hearing process, as outlined more fully below.

The problem which the new regulation seeks to address concerns those steps that have simply proven to be non-productive. For example, states now receive four decisions from the Department concerning compliance. Generally, the issue of compliance is a matter of reviewing data compiled by the State (and adjusted in accordance with FHWA procedures), which as a matter of mathematics, indicates whether or not the State is over or under the 50 percent threshold for compliance. In addition, the first three of the four decisions do not even address sanctions and hardship deferrals. Even when the Secretary makes the fourth and final compliance decision, only a proposed penalty decision is made.

Not only does the procedure involve unnecessary steps, it also bifurcates the process and thereby inhibits States from addressing the crux of the issue, sanctions, at the same time that the compliance decision is made, On the surface, this bifurcated process will appear to make sense—first determine if a state is not in compliance and then determine the sanction. In practice, the question of compliance is straight forward and the matter of sanctions and mitigating circumstances should, and could, be addressed at that same point.

In the Arizona, Maryland and Vermont cases instituted and concluded for FY 1984 under 23 CFR 659.21(d), (instituting orders, 50 FR 51959, December 20, 1985), each of the proceedings adhered to the regulatory regime described above. The issue of compliance was put before an ALJ, and other issues reserved for the Secretary and Administrators. At the prehearing conferences held in two of the three cases in January 1986, the ALJ's ruled that there was no question of fact to resolve concerning compliance, and thus a formal hearing on that issue was not necessary. The States were frustrated in their attempts to have the judges look at other factors, such as mitigating circumstances. The ALJs correctly determined that it was not within their authority to look at such factors since those circumstances concerned sanctions, rather than compliance. These determinations were completely consistent with the instituting order setting up the proceeding, which in turn followed the regulatory scheme. (The third case had been stayed pending a review of that State's subsequent certification.)

In each of the FY 1984 cases, where the Administrators issued proposed noncompliance determinations, the States requested and received informal meetings to show cause why they should not be found in noncompliance. At these meetings the States fully discussed both the compliance issue and any mitigating factors. These meetings easily could have been expanded to include hardship issues, thus allowing the Department to obtain sufficient information upon which to make a determination of compliance or noncompliance and to address, or defer based on hardship, any sanctions.

Even if the hearing process were expanded to include all issues, the resulting process would still be inefficient—it would still require multiple steps and continue to be cumbersome. For instance, the Department would still have to institute formal hearings and provide ample time to conduct the hearing. In the formal cases, the Department believed that 60 days would be needed to complete the hearings, even though they involved only one issue, compliance. While the ALJs were able to issue decisions prior to the 60 day time period, the very nature of the process required that sufficient time be provided for the parties to submit briefs, etc. Adding other and more complicated issues, such as sanctions, to the hearing process probably would have required additional time without providing a corresponding benefit.

Because the right to a hearing is not provided by statute, there is no requirement that a full APA hearing be held in these cases. Thus, the Department has the flexibility to fashion other more appropriate procedures to comply with the statutes governing the national maximum speed limit.

The Department proposes the following process:

Preliminary Decision

(a)(1) *Preliminary Proposed Noncompliance Determination.*

The NHTSA and FHWA Administrators would send a proposed noncompliance decision to the Governor, along with the basis for the decision. This decision would be based on data submitted by the State.

(2) *Decision on Compliance, Hardship and Sanctions.*

A State would have 30 days from the date of receipt of the letter to request an opportunity to show cause why it should not be found in noncompliance or to discuss a possible sanction or a hardship deferral. If a State makes such a show cause request an informal conference would be held. The State could offer any relevant information concerning compliance, hardship deferrals and sanctions levels. (If the

State agrees that it is not in compliance, the conference would focus on the hardship deferrals and any proposed sanction.) In lieu of requesting a conference within the 30 day period, the State could present written information concerning compliance, sanctions and deferrals.

If the Secretary (or designee) then concluded that a State is not in compliance, a written final decision on compliance, hardship, and sanctions would be issued.

(b) If the Secretary (or designee) concluded that a State was in compliance, a final decision would be issued.
